Correspondent A says the landing was made at three points. The inhabitants were driven off a hillside and butchered in a gully. Fifteen out of the total population of 300 then on the island were killed. (The "regular battue" was therefore singularly successful.)

Correspondent B says that fifteen men working peacefully in the fields were seized, bound and shot down.

July 20, a telegram was sent to Mr. Eric Whittall in these terms :—

"Reuter reports you confirmed slaughter sixteen innocent Greeks on Long Island by Turkish regular soldiers, is this true?"

July 21 the following reply was received :—

"Twelve Greeks Long Island killed gendarmes tenth. Consider some cause existed for skirmish between islanders and gendarmes, but that some Greek lives might have been spared. Have made no declarations Reuter."

So far as I am aware this is the latest information to hand, and warrants a protest against the lurid headlines in large black type under which Reuter's telegram appeared in some of your contemporaries :—

SLAIN IN COLD BLOOD.
TERRIBLE BUTCHERY BY TURKISH TROOPS.
16 MEN MURDERED.

Obviously eighty armed men under an officer, whether they were gendarmes or regular troops, were not landed on the island without reason. Judging from Mr. Whittall's telegram, in all probability there had been smuggling, gun-running, or some disturbance by the islanders. A force of gendarmes was sent under an officer to make a search. When they commenced to carry this out the islanders resisted. Some sort of a skirmish took place between them and the gendarmes. The latter got the best of the fight, drove the resisters into a corner, and gave them no quarter.

In this connection it is interesting to note that the gendarmerie of the Smyrna district is in charge of a European officer.—Yours, etc.,

C. F. DIXON-JOHNSON.

Croft-on-Tees, Darlington.

THE PRESS ON THE WAR.

Before the Declaration.

Austria has a genuine grievance which calls aloud for redress. Who has the right to assume that there are other impulses to account for any steps she may feel compelled to take? We sincerely trust that there will be no recrudescence of the racial conflicts which have deluged South-Eastern Europe with blood. At the same time, it must be contended that Servia has been receiving an amount of sympathy which is quite unwarranted by circumstances. The highly coloured portrayals of her as a gallant little nation fighting against odds in defence of downtrodden fellow-nationals is utter fudge. The Serbs have shown treachery and cunning to friends and foes alike until they have alienated every ally except the Great Power which may now find it awkward to offer practical support. If peace is to be assured the issue rests with King Peter and his advisers. Only by rooting out the pestiferous groups of conspirators who make Belgrade their headquarters can honour be satisfied.—*The Outlook* (July 25).

We recognise that Russia cannot tolerate the destruction of Servia and is bound to stipulate as to the limits of Austrian intentions. But let no one, on the other hand, lift a finger or raise a voice to encourage Servia in obstinacy or even to save her from the due measure of immediate punishment which the passions and follies of her extremists have deserved, and the negligent presumption of her statesmanship has courted. The psychology of Serb magalomania has been inflamed to a most mischevious degree since the successes of King Peter's subjects after the recent Balkan wars.—*The Observer* (July 26).

Peace, indeed, is the first interest of the Entente and the first interest of England. Both will spare no efforts to preserve it. But any plans which may be based on the supposition that the policy of either has changed, or is likely to change, are doomed to disappointment and to failure. Our friendships are firm, as our aims are free from all suspicion of aggression. While we can hope to preserve peace by working with the Great Powers who are not immediate parties to this dangerous quarrel, we shall consider that end above all else. But should there arise in any quarter a desire to test our adhesion to the principles that inform our friendships and that thereby guarantee the balance of power in Europe, we shall be found no less ready and determined to vindicate them with the whole strength of the Empire, than we have been found ready whenever they have been tried in the past. That, we conceive, interest, duty, and honour demand from us. England will not hesitate to answer to their call.—*The Times* (July 27).

So far, therefore, as the issue between the two countries is concerned, the British public will be guilty of a very foolish blunder indeed if it indulges in any sentiment of the "underdog" kind. Servia is a nuisance to Europe generally, and a very great nuisance to Austria in particular. If her Government practically gives its patronage to a propaganda leading to perpetual disorder and occasional frightful crimes, it cannot appeal for sympathy, however, unpleasant the consequences. While, however, refusing to look on Austria as a bully of small nations or a wanton disturber of the peace, we do think that she owes it to Europe to give the necessary operations an appearance as little disquieting as may be. . . . Our Foreign Office might in all friendliness suggest to Vienna the wisdom of disclaiming at once all notion of territorial expansion at the expense of Austria's unpleasant little neighbour.—*The Standard* (July 27).

If it should prove impossible at this late hour to prevent the outbreak of war between Austria and Servia, it is at least possible to isolate the struggle. If Great Britain, Germany, France and Italy, acting together in good faith, do not achieve that they will be responsible for the greatest crime in history.—*The Daily News and Leader* (July 27).

Whatever one may say and think of the precise terms of the Austrian Note which has led to the war, the Austrian attitude cannot on the whole but appear, in the light of the Greater Servian propaganda, as perfectly justified. It is idle to say that the Government of Servia was not responsible for the doings of the chauvinist section of the population. As representing the Radical peasant party, M. Pashitch and his colleagues were the initiators of the Pan-Servian idea, and by refusing to proceed against the mischievous agitation they have placed Austria in a position either to take the law into her own hands or to surrender to the Black Hand and the Narodna Obrana at discretion. It is not surprising that she has chosen the former way.—*The Daily Chronicle* (July 27).

If the word mobilisation is pronounced in St. Petersburg, Berlin, and Paris, it will have to be pronounced in London also. But why should it be uttered at all in any of these capitals? Servia has declared herself ready to make all reparation in her power, but not to commit national suicide. There is no vital quarrel at this moment between Germany and any of her neighbours, nor any reason why Austria-Hungary should seek to create one. If she persists, and if in that persistence she is able to plunge all Europe into war, the cause must be sought elsewhere than in Servia. Accordingly the question of peace or war, for England as for the other Powers, cannot be dismissed on the ground that England has no vital interests in Servia. Her vital interest is in the reign of equity and right in Europe and in the maintenance of her own character.—*The Morning Post* (July 27).

After the Declaration.

It is hard to know which would be the greater misfortune for Europe—the acceptance of the challenge and a great war, or its non-acceptance and the consequent domination of the Triple Alliance. It is for Englishmen as fast as they can to realise the situation and to make up their minds as to the country's duty.—*The Morning Post* (July 29).

Austria has suffered treatment at the hands of Servia which she cannot and ought not any longer to endure. She has our fullest sympathy in the action she is taking to obtain reparation for the past and guarantees for the future. That is the lesser issue, and we would not lift a finger to save Servia from the chastisement she has so richly deserved. It rests with Austria whether the greater issue shall also be raised.—*The Pall Mall Gazette* (July 29).

We have now to reckon with the accomplished fact of a declaration of war upon Servia by Austria-Hungary. It looked inevitable all day yesterday and was officially confirmed last night. It is not the end of all things, but it calls for the most strenuous and immediate efforts to localise the conflict. The best we can hope is a long period of tension, repeating in an acuter form the alarms of the Balkan war, while Austria-Hungary proceeds with her task, which may by no means be without difficulty, of subduing the Servians.—*The Westminster Gazette* (July 29).

The action of Austria in precipitating the war cannot be justified by the nominal circumstances that have given rise to it. The provocation which she has received from Servia, culminating in the assassination of the Crown Prince and the refusal of prompt and adequate reparation, has been great. But the character of the ultimatum she addressed to Servia and the rejection of the reply which came very near unconditional surrender, make it clear that she has used the incident as a means to an end. —*The Daily News* (July 29).

If, as they say, Austria is chiefly anxious to humiliate Servia publicly, and seeks no territory, the occupation of the capital ought to satisfy her, and fortunately Belgrade lies just over the River Danube, and its occupation ought not to give much trouble. There is no obvious reason why Austria should not be content with that. . . . If she grasps at more she will probably retain less. She would not be allowed, nor does she wish, to annex any part of Servia, and a prolonged campaign in the country would only inflame the hatred of the Serbs without hurting the Government more than the occupation of the capital would do.—*The Manchester Guardian* (July 29).

If Austria-Hungary with Germany's approval has decided to go forward in any event with her Servian campaign, it is for Russia to consider whether the peace of Europe should be destroyed in order to stop it at this stage. Having regard to all the circumstances, we cannot feel that it ought to be, if Austria-Hungary puts on a firm basis her promises not to encroach on Servian territory or independence.—*The Daily Chronicle* (July 29).

Everything points to the probability of the war in Servia being soon over, which in itself will conduce to the localisation of the conflict. The Servian army cannot hope to make a stand against the invaders. The country is thinly populated, and it has just borne the strain of two, or, we might even say, three wars.—*The Evening Standard* (July 29).

THE PRESS ON THE NEAR EAST.

The Decree of Fate.

An article, under the heading "Servia and Austria: The Sarajevo Tragedy," contributed to *The Daily Telegraph* (July 25) by Mr. Chedo Myatovitch, gives the point of view of a fair-minded and cultured Servian on the crisis which Austro-Hungarian and Servian relations had reached at the end of last week. Throughout the writer seems, as it were, obsessed with what he calls the "strange fatality" which rules those relations. He writes:—

A part of the Servian Press never ceases to decry Austria as the personification of diabolical wickedness and of deep hatred of the Servian nation. That is not true. The truth is that Austro-Hungarian statesmen are not guided by hatred of the Servians, but by the consciousness of their duty towards their own country. To keep their position in the Adriatic is absolutely a vital interest of Austria-Hungary. To preserve and strengthen that position they must keep and develop Dalmatia. They cannot develop Dalmatia and make it prosperous without obtaining a hinterland for her. Looking at it from an impartial point of view, I do not see how the Austrian statesmen could have worked otherwise than they did. They, of course—doing only their patriotic duty—came into conflict with the vital interests of the Servian nation. The inevitable duty of the Servian statesmen was, and is, and for ever shall be to work at the unification of all the Servian territories into one independent self-governing national State. We Servians cannot possibly reconcile ourselves with the prospect that Bosnia, Herzegovina, and Dalmatia should for ever remain the provinces of the Austrian Empire. Part of the Servian Press likes to represent the Austro-Hungarian *régime* in Bosnia and Herzegovina as most autocratic and oppressive, impoverishing and demoralising the Servian people of these provinces. I think that Press policy is quite wrong, because it is not based on the real facts. In truth, Austria has done very much to elevate the moral and cultural level of these countries and to increase the prosperity of the people. The truth lies in this fact: the Austrian *régime* may be ten times more humane, wise, and successful than it has been up to now, and yet the Servians will not be satisfied with that *régime*, simply because it is foreign, and they naturally desire to be their own masters. There is no doubt a serious and deep divergence between the vital interests of the Austro-Hungarian Monarchy and the Servian nation. It is a fatality, but it is a fact, and inevitably we must come one day to the supreme struggle for the great problem: to be or not to be.

Pan-Serb Propaganda.

An article on "Serb and Austrian," in *The Independent* (July 13) by Professor Michael I. Pupin, of Columbia University, provides another Serb view of the situation after the Serajevo tragedy. We quote below:—

The Pan-Serb propaganda does exist—I admit it frankly—and I ought to know whereof I speak, because I am a Serb and a former subject of the Austrian Empire. But this Pan-Serb propaganda is not a political conspiracy, born and bred at Belgrade or at any other place in the kingdom of Servia. It is a natural heritage of every true Serb, who is ever ready to obey the voice of the Serb minstrel, the gouslar, which commands him and has always commanded him for 500 years to struggle for the "honoured cross and golden liberty." This voice was always the supreme commander in all Serb struggles against the Turkish oppressor, and it is to-day the supreme commander in the Serb struggles against Austrian tyranny. The causes of the Pan-Serb propaganda are in Vienna and not in Belgrade. The tragedy in Sarayevo on June 28 was being prepared in Vienna during the last thirty-six years; it was enacted on the very day—Vidov Dan—when every true Serb celebrates the anniversary of the battle of the field of Kossovo, in 1389, when the Serb Empire fell. Its memory always served as a reminder to the Serbs that they must avenge the wrongs perpetrated upon their race, and that by united effort only can they regain the glories of their ancient empire which vanished at Kossovo.

A Tribute to the Khedive.

Commenting upon the attempt upon the life of the Khedive, the *Pall Mall Gazette* remarks:—

Egypt would have lost a most capable ruler had not the attack on the Khedive happily failed. Abbas II. is only forty, though he has reigned two-and-twenty years. He is an accomplished linguist, conversing fluently in all the principal European tongues, is strict in his attention to every duty of his office, eschews both alcohol and tobacco. . . . Agriculture is the Khedive's hobby, and his special pride are the model farm round the Koubeh Palace and the fine stock of his stables and kennels.

The Problem of the Ottoman Greeks.

An important article, under the heading "Ottoman Empire and Greece," is contributed to *The Daily Telegraph* (July 28) by Dr. E. J. Dillon. A careful and detailed survey is given of the difficult problem with which Turkey is faced owing to the anomalous position of the Ottoman Greeks. Dr. Dillon has been endeavouring to bring about a "workable arrangement" between Greece and Turkey. He writes:—

The statesmen who at present preside over the destinies of the Moslem Empire are convinced that the new lease of life accorded to their country after the Balkan war is conditioned by the consolidation of the ethnic elements of which it is composed, by the assimilation or nationalisation of the Christians and the welding of them all into one solid mass. Now the assimilation by Turkey of the Greeks, whose culture is so greatly superior to her own, is a sheer impossibility. Even the simpler process of nationalising them is beset with difficulties and might become a disturbing factor in home affairs. For it implies the political emancipation of the Orthodox Christians, the bestowal on them of a heavy stake in the country, and a powerful incentive to labour for its welfare. And even this bold line of action would be fruitless unless parallel with it went the cultivation of such amicable intercourse with the Kingdom of Greece as would warrant the firm conviction that peace between the two States was safeguarded effectually by the abandonment of land-greed and political ambitions on the one side and of schemes of revenge on the other side. But if these conditions could be fulfilled, the Greco-Turkish problem, and together with it the Balkan problem, would be solved for many years. And I fancied I could suggest to both Governments a feasible way of fulfilling them which would commend itself to both.

It seems, however, that Dr. Dillon's intervention was unfortunately powerless to stem the tide of passion. He continues as follows:—

The alternative to this method is the extirpation of the Hellenes of the Empire, their ejection from the land by open violence or petty persecution without regard for international usage, in the assumption that Europe—whose ardent desire it is that Turkey should hold together and thrive—will not budge to stop the experiment. That assumption was based on the quiescence of the Powers when Adrianople was retaken by Turkey and their own solemn decree was summarily quashed by my friend Talaat Bey. This process of eviction has already been inaugurated, and one of its results was to embitter both peoples, to estrange both Governments, and to render an amicable settlement of their differences more arduous than before.

How impossible it is for Turkey to acquiesce in the existing position is well shown in the following extract:—

These schemes [of Greek expansion], however wild they may seem to statesmen, are, it was further argued, living realities to those Hellenes of whose hopes and fears public opinion and sentiment in the Hellenic world are largely made up. Thus, they voluntarily taxed themselves for the increase of the Greek fleet. They sent their sons to be trained as soldiers and bluejackets in the army and navy of King Constantine as though they were already his subjects, and not those of the Sultan. A large number of them had actually enlisted in the King's army and fought against Turkey during the war. Pursuant to a clause in the Peace Treaty these offenders had to be included in a general amnesty, and allowed to continue their avocations in Turkey unmolested. But they were well known to their Moslem neighbours, who hated them cordially, and deemed death a mild punishment for their perfidy. The Government might pardon, but the people felt impelled to punish.

Servia—the Socialist State

Touching upon the Servian peasantry, a writer in *The Manchester Guardian* says:—

Fifty years ago the Servian peasantry still lived in village communities, each family consisting of several generations (so-called "zadrugas"), tilling its common land in tenancy, as it were, from the community, and periodically exchanging it with others. This was almost an exact replica of the conditions prevailing at that time in Russia, where, as is well known, the survival of the "Mir" gave rise among the young men to a theory that Russia offers the greatest facilities for direct transition to a Socialist State. The foremost exponent of that theory was then Bakounin, the father of Anarchism, who saw in the Russian village community a providential arrangement destined to place his country in the van of social progress. It is not surprising that the young Servians who were at that time receiving their education in foreign countries, having heard of these doctrines should have felt greatly attracted by them. Their "zadruga," then, was the nucleus of a Socialist State, and they had never suspected it. The times being revolutionary, all the young Servians became disciples of Bakounin—that is, Anarchists with a Pan-Slav flavour who worshipped the peasant as the unconscious bearer of a most glorious future and saw him as one who in his humble way was much wiser than all the statesmen and philosophers of that other bourgeois world of the West. Hence we find M. Pashitch and his friend M. Patchu, the present Minister of Finance, on the side of Bakounin, now listening at his feet to his Anarchist preaching, and then fighting with him in the International the "authoritarian" Marx and Engels. It was in this mood that they formed the Servian Radical party as the representative of the peasant class. It was still in this mood that M. Pashitch, then an engineer, employed on the construction of an iron bridge over the Save, raised as late as 1884 the standard of revolt, and had to flee to Crotia for his life. But gradually, of course, as the "zadruga" disappeared, as individual property in land became the rule, even in Servia, the old illusions vanished, and the Anarchism and revolutionism of the Radical party vanished with them, giving place to moderate Liberalism and, under the stress of rivalry with the Hungarian economic enemy, to very immoderate nationalism.

NEAR EAST IN PARLIAMENT.

HOUSE OF LORDS.

Sudan Loan. July 23.

Lord Strachie (Paymaster-General) moved the second reading of the Bill to increase the loan to the Sudan Government under the Act of last year to £3,000,000, to be allocated as follows: £2,000,000 for works for the purpose of irrigating the Gezireh Plain, £800,000 for the extension of the Sudan Railway system, and £200,000 for other irrigation works and contingencies.

The motion was agreed to without discussion.

Atrocities in Albania. July 28.

Lord Lamington asked his Majesty's Government whether they had any confirmation of the report that the streets of towns in Southern Albania were covered with the naked bodies of women who had been strangled and of babies hacked to pieces, and that the population were being exterminated, excepting for those refugees who are starving in and around Valona; whether, in view of the fact that Northern Albania was protected from these terrible atrocities by the presence of an international force, his Majesty's Government would not take steps to procure the despatch of international forces to Central and Southern Albania.

Viscount Morley said that surely the noble Lord knew that we could not enter into chivalrous enterprises of every kind that might present themselves to us as recommended by humanity. The noble Lord was quite wrong in supposing that his Majesty's Government were looking with indifference on the allegations of enormities which were referred to in the question. No details had been received as to the hideous atrocities named in the question. As to the numbers of those who had been rendered homeless the Government's only reports were from unofficial sources, and could not well be considered as much more than general rumour. It appeared from reliable private sources that in a part of Valona there were some 12,000 refugees from South Albania. In the surrounding country it could hardly be doubted that thousands more—it might be many hundreds—were in urgent need of the necessaries of life, but proposals had been made for their immediate relief, which it was hoped would be effective.

The Italian Government were prepared to send large quantities of maize, but, singularly in the circumstances, that maize was said to have been declined by the refugees. The International Commission of Control, seated at Durazzo, were reported to have placed 100,000 francs at the disposal of a Special Committee for the purpose of immediate relief. The six Powers were considering the dispatch from Durazzo of an international mission, who would endeavour to elucidate these past transactions and to further the restoration of something like order and confidence. On the second part of the question the noble Lord referred to past affairs, which seemed to place a special responsibility on the English Government, and as to which he seemed to impute the blame of almost wilful ignorance on the part of his Majesty's Government for what was to happen in the future. That was not so. The presence of an international force in Scutari was due to special circumstances connected with the evacuation of Scutari by Montenegro. For the present, after constant consideration of all the reports, his Majesty's Government adhered to their decision that the situation, involving any number of international points, did not warrant the dispatch of British troops to any other part of Albania. They had forces in Northern Albania, but it would be indefensible to repeat that operation by ourselves alone in Southern Albania. There would be no objection on our part, however, to that task being undertaken by any other Power which might think it its duty or desirable.

The Marquess of Lansdowne said that while they quite admitted that the noble Viscount was right in saying that we could not pose as crusaders and seek out grievances to redress wherever they might be found, here was a part of the world for the condition of which we have a certain amount of responsibility. He thought his noble friend was entitled to ask not only that we should not object, but that we should be glad to co-operate with any Power who would make it its business to see that something was done to arrest the carnage going on in that unfortunate country.

Lord Loreburn said that he quite recognised the difficulty. Nobody would desire to press the Government unduly, but he did not think what his noble friend said was adequate. He had said we should not be averse if any other Power was willing to come forward in a fair spirit. Could he not extend that by saying that we should be willing to assist if other Powers would share the task?

The Marquess of Crewe said that his Majesty's Government certainly would not say at that moment that the idea or possibility of certain occupation could not or ought not to be carefully considered. It was not the kind of enterprise in which the Foreign Office should lightly advise the country to engage, and although everything which had been said would receive the close attention of Sir Edward Grey, the notion of sending troops, even in concert with some other Power or Powers, was not a matter which should be treated as one of no great import or as one which in conceivable circumstances might not involve very serious consequences both to this country and generally in Europe.

Sudan Loan.

The Government of the Sudan (Loan) Bill passed through Committee.

Earl Kitchener. July 29.

Lord Kitchener, who was introduced by Earl Roberts and the Earl of Powis, took the oath and his seat as Earl Kitchener of Khartoum.

HOUSE OF COMMONS.

Anglo-Persian Oil Company. July 27.

The House went into Committee for the consideration of a resolution authorising the application of the £654,813 from the old Sinking Fund to the acquisition of share or loan capital in the Anglo-Persian Oil Company.

The resolution was carried by 191 to 67.

Persia's Financial Trials. July 28.

Sir George Scott Robertson asked the Secretary for Foreign Affairs whether he had official information to the effect that a sum of £42,000 belonging to the Persian Government, and set aside by them for the payment of police and gendarmerie, had been impounded by the Russian authorities, and that, in consequence, the police were clamouring for arrears of pay and the Swedish officers of gendarmerie threatening to resign, and, if so, what steps he proposed to take?

Sir E. Grey: It appears that the surplus of the northern Customs has been used to meet certain unexpected Russian demands. This has naturally increased the difficulties of the financial situation, but I have no information to show that the failure to pay the gendarmerie has been solely due to this fresh claim on the Treasury. I have instructed his Majesty's Ambassador at St. Petersburg to discuss the whole matter with the Russian Minister for Foreign Affairs.

Replying to supplementary questions, put by Sir G. S. Robertson and Mr. Worthington Evans, Sir E. Grey said that this particular sum, which, according to his information, was not £42,000, had been retained to pay Russian claims. It was very inadvisable at this time to press claims on Persia which might increase her financial embarrassment. The sum was not part of the loan which was made to Persia, which was earmarked for the purpose of the Gendarmerie.

Sir George Scott Robertson asked whether the Russian authorities had signified their intention to permit the removal of Shuja-ud-Dowleh from the Governorship of Azerbaijan by the Persian Government; whether any withdrawal of Russian troops from that province was made dependent upon an increase of the Persian Cossacks commanded by Russian officers by an equal number of men; and whether an augmentation of the Persian (Swedish) gendarmerie in the North must be met by an identical increase in the Cossack Brigade?

Sir E. Grey: I cannot give information as to possible or prospective changes in the Governorship of Azerbaijan. The withdrawal of Russian troops is stated to be dependent on the degree of order in Azerbaijan. The question of an increase in the Cossack Brigade and of strengthening the gendarmerie is still under consideration.

Sir Edward Grey's Statement.

On Monday, to a crowded House, Sir Edward Grey narrated the steps he had taken to bring about a Conference of representatives of Germany, France, Italy, and Great Britain, in the hope of arranging a settlement of the question in dispute between Austria-Hungary and Servia. His statement was made in answer to a question by Mr. Bonar Law. He said that on Friday morning he had received from the Austria-Hungarian Ambassador the text of his Government's communication to the Powers. In the afternoon he saw other Ambassadors and expressed the view that, so long as the dispute was one between Austria-Hungary and Servia alone he felt that we had no title to interfere, but that, if the relations between Austria-Hungary and Russia became threatening, the question would then be one of the peace of Europe. After he heard that Austria-Hungary had broken off diplomatic relations with Servia he instructed by telegraph his Majesty's Ambassadors in Paris, Berlin, and Rome to ask the Governments to which they were respectively accredited if they would be willing to arrange a Conference in London, at which he should meet the French, German, and Italian Ambassadors in London. At the same time he had intimated to the Governments in Vienna, St. Petersburg, and Belgrade the proposal of a Conference, through the usual channels, and requested them to suspend military operations pending the result of the Conference. In conclusion, he said: "It must be obvious to any person who reflects upon the situation that the moment the dispute ceases to be one between Austria-Hungary and Servia, and becomes one in which another Great Power is involved, it can but end in the greatest catastrophe that has ever befallen the Continent of Europe at one blow. No one can say what would be the limit of the issues that might be raised by such a conflict; the consequences of it, direct and indirect, would be incalculable."

Financial Help for Albania.

Mr. Fell asked if the Government had made any loan or advance to the State or Kingdom of Albania, or was under any financial obligation to make any such loan.

Sir Edward Grey: An advance of £5,000 was made by his Majesty's Government last December towards the relief of distress in Albania, as was stated in the House on February 19, but this was not strictly speaking an advance to the Government of Albania, as it was not under their control. The question of an international loan is under consideration, but his Majesty's Government are under no obligation to contribute anything to it.

PERSONAL & SOCIAL

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. New style.	Julian. Old style.	—	Moslem.	Jewish.
1914. July.	1914. July.		1332. Ramadan	5674 Ab
31 Aug.	18	Friday	8	8
1	19	Saturday	9	9
2	20	Sunday	10	10
3	21	Monday	11	11
4	22	Tuesday	12	12
5	23	Wednesday	13	13
6	24	Thursday	14	14

To-morrow is the birthday of H.R.H. Prince Sixtus of Parma, half-uncle of the Crown Prince of Bulgaria.

Sunday is the birthday of H.R.H. Prince Alexander of Greece, the younger brother of the Diadoch.

Monday is the birthday of His Majesty the King of the Hellenes.

Wednesday is the birthday of Sister Maria Benedicta, of the Convent of St. Cecilia at Ryde, who used to be H.R.H. Princess Adelaide of Parma, the half-aunt of the Crown Prince of Bulgaria.

H.M. King Constantine is proceeding this week to Moudros on board a destroyer to follow the grand naval manœuvres. His Majesty will then inspect the fleet.

H.M. the Queen of the Hellenes, accompanied by H.R.H. Princess Frederick of Hesse, arrived in London on Thursday morning last week from Eastbourne, returning to Eastbourne in the evening.

H.M. the Queen of the Hellenes and H.R.H. Princess Frederick Charles of Hesse visited their Majesties Queen Alexandra and the Empress Feodorovna of Russia, on Monday afternoon.

H.R.H. the Crown Prince of the Hellenes has arrived at Claridge's Hotel from Eastbourne.

H.M. King Nicholas has returned to Cettinje from Venice.

H.R.H. the Regent of Servia has left Belgrade for Nish.

H.R.H. Prince Christopher of Greece is among the guests of Captain and Mrs. W. A. Grant, at Westergate House, for Goodwood.

The Khedivah Mother is rebuilding her palace at Ramleh, near San Stefano. The building dates from the time of Ismail Pasha and has been in a dilapidated state for some time past. The improvements will cost over £E10,000, and a section of the palace has already been made fit for habitation, but the entire work of restoration will not be finished for two or three months.

The Right Hon. Sir Louis Mallet, (his Majesty's Ambassador Extraordinary and Plenipotentiary at Constantinople) had an audience of the King on Monday.

Lord Edward Cecil, Financial Adviser to the Egyptian Government, left Cairo on Monday morning last week for Port Said en route for England.

Mr. R. W. Graves, C.M.G., is at present in London.

Mr. Take Jonescu, formerly Roumanian Minister of the Interior, left London on Wednesday in company with Mr. J. D. Bourchier, the Balkan correspondent of *The Times*, in hopes of reaching Bucharest by an indirect route.

Count Leopold von Berchtold, the Austro-Hungarian Foreign Minister, spent four years in London at the Austrian Embassy. He came to London from Paris in 1899, and was transferred from London to St. Petersburg in 1903.

The style and titles of Lord Kitchener of Khartoum are, in future, to be Baron Denton of Denton, in the County of Kent, Viscount Broome of Broome, in the County of Kent, and Earl Kitchener of Khartoum and Broome. The viscounty and the second title of the earldom are, of course, derived from the Kent property purchased from the Oxenden family.

Earl Kitchener called at the Foreign Office on Monday and saw Sir Edward Grey.

Earl Kitchener will be among the members of the Earl and Countess of Powis's house party at Powis Castle at the beginning of August.

The Earl and Countess of Bessborough are expected at Bessborough House, Kilkenny, next week, where they will remain until the autumn.

Sir David Semple, Director-General of the Egyptian Public Health Department, left Cairo last week for England, where he intends spending a couple of months.

Lord Oranmore and Browne left 12, Cavendish Place, for Ireland, on Wednesday.

Sir John Roper Parkington, Consul-General for Montenegro, and Lady Roper Parkington, have left Green Street, Mayfair, for Harrogate.

Sir Mark Sykes, M.P., left Malton last Saturday for Deganwy, Wales, where he will be in camp for a fortnight with the 5th Battalion Yorkshire Regiment, of which he is lieutenant-colonel.

Mme. Misu, the wife of H.E. the Roumanian Minister, has left London for Kruznack, near the Rhine, where she will stay for some weeks, later proceeding to Aussee, Austria.

Sir Murland Evans has left the Elysée Palace Hotel, Paris, for London.

Mr. Wallace H. Turrell, of Smyrna, has arrived in London.

Dr. S. P. Perestianos, of Athens, has arrived in London.

Colonel B. Semenoff, Military Attaché to the Russian Legation, has arrived in London from Bucharest.

Ali Islam Bey, of Cairo, has arrived at the Piccadilly Hotel.

According to the Roumanian papers Mr Dinu Stolojan, the Prefect of Tulcha, has resigned.

An engagement is announced between Francis Edward Oakes, Sudan Government Railways, youngest son of the late Colonel R. F. Oakes, R.E., of Tunbridge Wells, and Kathleen Frances, youngest daughter of the late Frederick Gregory Jones, of Liverpool and Hawarden, Flintshire.

The marriage arranged between Mr. Leonard F. P. de Smidt, Egyptian Irrigation Service, and Miss Violet Wingfield will take place on Wednesday, August 26, at St. Augustine's, Queen's Gate, at a quarter past two o'clock.

Lieutenant-Colonel G. H. Ford-Hutchinson, D.S.O., who has retired on completion of four years in command of the 1st Battalion Connaught Rangers, saw service with the Dongola Expedition of 1896, as a special service officer, and from the following year until 1899 he was employed with the Egyptian Army, taking part in the Nile Expeditions of 1897 and 1898, being present at the battles of Atbara and Khartoum. For his services he was twice mentioned in despatches, received the D.S.O., two clasps to his Egyptian medal, and the British medal.

Viscount Falmouth, who celebrated his sixty-seventh birthday last Friday, was present at the battle of Tel-el-Kebir and took part in the Nile expedition.

Brigadier-General F. C. Heath Caldwell, C.B., who has been promoted to Major-General, served in the Egyptian Expedition of 1882, and was at the engagement of El Magfar and the battle of Tel-el-Kebir, receiving the medal with clasp and bronze star. Three years later he was again on active service in Egypt, and was present at the action of Hasheen, being awarded the brevet of major and receiving an additional clasp.

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.
Near the lake, with splendid park.

CECIL HOTEL.
In the town and 5 minutes from the station.

Two First-class Family Hotels.
High-class Cuisine. French Chef.
J. SUMSER, Manager-Proprietor.

Sofia (Bulgaria).
GRAND HOTEL BULGARIE
(opposite the Royal Palace).
First-class Hotel. Entirely renovated and beautifully situated in the centre of the city, near Post Office, Theatre, Museums, Banks, etc. Electric Light. Central heating. Baths. Garage. Telephone. Garden. French Restaurant. Good wines. Café. Foreign newspapers. Most frequented by English and American Visitors. Interpreter meets all trains. Rooms from 4 frs.

Mr. John Lawrence Caldwell and Mrs. Caldwell arrived in London last week and are preceeding to Teheran, where Mr. Caldwell will take up his duties as American Minister to Persia.

Amongst the passengers by the P. and O. Company's s.s. "Maloga," which left London last Friday and is due at Marseilles to-day, are the following:—Lieutenant - Colonel Knaggs and Colonel Wright, London to Port Said; and Lieutenant-Colonel H. T. Thacker, Marseilles to Aden.

Sir Murdoch Macdonald, K.C.M.G., Under-Secretary of State at the Ministry of Public Works, Cairo, and Lady Macdonald are in London.

His Majesty the King has been pleased to grant unto Captain Henry Eric Dumbell authority to wear the Insignia of the Third Class of the Order of the Mejidieh, which decoration has been conferred upon him by the Khedive, authorised by the Sultan in recognition of valuable services rendered by him.

On Friday last, at St. Helens, Bushey, Herts., Mrs. Murrell-Wright, the wife of F. Murrell-Wright, Tantah, Egypt, gave birth to a son.

The death is announced in Paris of the widow of the late Dr. Zambaco Pasha, the leprosy authority. This lady, who was the daughter of the late Mr. Demetrius Giovanni Cassavetti of London, and Zagora, Thessaly, was herself a sculptor of some distinction, and had frequently sat in her youth to Rossetti and Burne-Jones.

Captain Flower, Director of the Gizeh Zoological Gardens, has brought with him from the Sudan a large collection of Sudan animals, which will be housed in the gardens.

Surgeon-General W. W. Kenny, who has been placed on retired pay on reaching the age limit, took part in the Sudan Expedition of 1885, and was at the actions at Hasheen and Tofrek, and the affair at Tamai, receiving the medal with two clasps and the Khedive's star.

Colonel the Hon. Augustus Murray Cathcart, who died on July 14 at Scarborough, aged eighty-three, served in the Crimea, being present at the battles of Alma, Balaclava, and Inkerman, and at the fall of Sebastopol.

Major-General O. H. A. Nicolls, who entered his ninetieth year last Friday, served in the Crimea during 1855-56, and was present at the siege and fall of Sebastopol.

We regret to announce the death, which took place at Odessa, of Mr. J. St. Vincent Corcoran, a well-known writer, who acted as correspondent of THE NEAR EAST in South Russia.

The death was announced last week of Count Alexander Roma, member of the Chamber of Deputies for Zante and formerly President of the Chamber and Minister of Education. Count Roma was the leader of the Greek Garibaldian Legion, and was wounded in the last Balkan war.

The death took place at Cairo on Wednesday last week of Dr George Bey Zeidan, the only Arabic man of letters in Egypt with a European reputation. He edited the literary review *Hilal* and was the author of many historical works and a history of Arabic literature.

The death is announced, on July 23, at Paris, of Mr. John R. Reeves, of Alexandria.

On Tuesday Sir William Corbett presented the certificates and medallions, awarded by the Queen Mother of Greece, to nurses from the Manchester Royal Infirmary for services to the wounded in the Greek and Turkish and Greek-Bulgarian wars of 1912-13. The certificate was in Greek, and the medallion in the form of a small silver cross bearing on one side a smaller cross in red enamel. The donor was described in the certificate as "High Protector of the Red Cross." The following are the recipients of the awards:—Nurses Davidson, Gooseman, Cowie, Sloan, Bell, Jackson, Gordon, Green and Scott.

Mr. S. H. Benson, who died on July 21 at his residence, Beechgrove, Sydenham Hill, in his sixtieth year, was before embarking on a commercial career for some years in the Royal Navy. In 1882 he was serving with the late Vice-Admiral Sir William Hewett, V.C., Commander-in-Chief in the East Indies during the first Egyptian Campaign. On the occupation of Suez by the Naval Brigade, Mr. Benson was placed in charge of the commissariat arrangements, and was mentioned in dispatches for his services (Egyptian Medal and Khedive's Bronze Star). Suffering from the effects of the Suez climate in summer, Mr. Benson—then only twenty-nine years of age—was invalided home the same year, and after acting as secretary to various committees at the Admiralty, was eventually invalided from the Navy, never having completely recovered from his breakdown in Egypt. Mr. Benson was governing director of the well-known firm of S. H. Benson, Ltd., Kingsway Hall.

The death took place on Wednesday at Malta of Monsignor Pietro Pace, Archbishop of Rhodes and Bishop of Malta, who was the only Roman Catholic ecclesiastic who has received the K.C.V.O. In 1877 he was appointed Bishop of Gozo, and was translated to Rhodes and Malta in 1889.

APPOINTMENTS, PROMOTIONS, ETC.

Commandant Crainiceanu, the new Roumanian Military attaché in Greece, has taken up his post.

Major M. P. Buckle, Royal West Kent Regiment, has been appointed Acting General Staff Officer, 2nd Grade, Skutari.

H.E. Sir George Barclay, H.B.M. Minister in Bucharest, has returned to his post.

The journey of the British Minister to Servia, Mr. des Graz, has been facilitated by the Austro-Hungarian authorities.

Mr. Neradovitch, the Servian Minister to the Porte, arrived in Constantinople on Friday.

Djevad Bey, the new Ottoman Minister in Belgrade, left Constantinople for the Servian capital on Thursday last week.

The appointment is announced of Lord Inchcape of Strathnever, G.C.M.G., K.C.S.I., K.C.I.E., as one of the two Government ex-officio directors of the Anglo-Persian Oil Co. The other is Vice-Admiral Sir Edmond J. Warre Slade, whose appointment was announced in THE NEAR EAST of July 3.

Essad Pasha, the newly appointed Commander of the Angora Army Corps, will shortly take up his command.

The following diplomatic and consular appointments are announced in the *London Gazette*:—

Charles Louis Des Graz, Esq., to be his Majesty's Envoy Extraordinary and Minister Plenipotentiary to his Majesty the King of Servia (February 8); Ernest Gabriel Lomas, Esq., to be his Majesty's Vice-Consul at Rabat (May 1); Lieutenant-Colonel Keith David Erskine, C.I.E., to be his Majesty's Consul-General at Baghdad (June 1); Raphael Antonio Fontana, Esq., to be his Majesty's Consul for the Villayet of Aleppo, to reside at Aleppo; John Selden Willmore, Esq., to be his Majesty's Consul for the Vilayet of Adana, to reside at Adana (June 15); William Richard Howson, Esq., to be his Majesty's Vice-Consul for Lingah, the Shibkuh Ports, and the Islands of Farur, Kais, Hindarabi, and Sheikh Shuaib, to reside at Lingah (June 16).

The *London Gazette* announces that the following foreign consular appointments are approved by his Majesty:—

Mir Ayoub Khan as Vice-Consul of Persia at Karachi (June 10); Remzi Bey as Consul-General of Turkey at Johannesburg (June 15); Mr. William J. Grace as Consul-General of the United States of America at Aden (June 15); Mirza Ali Akbar Khan as Consul of Persia at Bombay (June 15); Mr. W. Meek as Consul of the Netherlands at Aden, with Consular jurisdiction also in British Somaliland (June 27).

During the absence on leave of Sir David Semple, Director-General of the Egyptian Public Health Department, his duties will be undertaken by Dr. Goodman until the return of Colonel Garner, Sub-Director, who is at present absent on sick leave.

FRIDAY, JULY 31, 1914.

WHY AUSTRIA DECLARED WAR.

The break-up of the Roman Empire of the West was accomplished, so we are told, largely owing to the influx of barbarian races in such numbers that the Roman civilization could not cope with or assimilate the flood of immigrants. In other words, the Western Empire struck upon a rock and foundered. When it was restored it specifically claimed for itself the position of being the Holy Roman Empire of the German nation. In the course of time the dignity of the Holy Roman Empire tended to become hereditary in the House of Hapsburg, but owing to religious difficulties and other internal disruptive forces the strength of the Imperial dynasty had to be drawn from genuinely hereditary dominions outside the area of the elective Empire. Thus it came about that the Hapsburg monarchy obtained numerous non-German subjects. Apart from the Tchechs who were within the German territory, the Hapsburgs ruled over the Magyars in Hungary, Italians in Lombardy, Slovenes in the Illyrian provinces, and, in the course of time, over Roman Catholic Serbs in Croatia, and Roumans in Transylvania. It is beside the point to trace the method by which these heterogeneous dominions were acquired. As a rule it was by marriage in the first place and subsequent reconquest from the Turk. When, however, Poland came to be partitioned, Austria, by a definite act of political aggression, became possessed of a certain number of Polish subjects, and of a considerable population of Ruthenes who had been a subordinate race in the Polish Republic. After the Treaty of Vienna in 1815, Austria thus found herself standing partly in Germany, with actual dominions within the boundaries of the German Bund, and influence extending far beyond her own frontiers; partly in Italy, where she possessed the Lombardo-Venetian kingdom; partly in Poland, which she divided with Prussia and Russia; partly in what has since come to be considered the Southern Slav area; and partly in that Carpathian region inhabited by the Rouman race. This territorial distribution had within it the germs of political disruption; for with the exception of the Magyar nation in Hungary and the Tchech people in Bohemia, Austria ruled over races of whom only a comparatively small part were within her dominions. During the nineteenth century racial controversies became one of the chief factors governing the political developments of Europe, and inevitably the monarchy that was composed so largely of partitioned peoples suffered in consequence of this revival. The Lombard subjects of the Hapsburgs were attracted by the ideal of Italian unity, the chief protagonist of which was the little kingdom of Sardinia. Three wars were required before the Government of Vienna fully capitulated to this militant ideal, and surrendered all but a few of its Italian subjects. The variety of its interests prevented the Hapsburg monarchy from devoting its whole attention to any one national outlook, and in consequence of the war of 1866 Austria was excluded from the German polity. As a result of this a Teutonic state has grown up, which tends to attract, by the force of its nationality, those subjects of the Hapsburgs who are of German origin. It has been the fate of this historic dynasty to see grow up, beyond its territorial frontiers, small and vigorous states which have become centres of attraction to considerable populations within its dominions. If some of his Teutonic subjects were attracted by Pan-German ideals, the Emperor Francis Joseph also rules over many men whose eyes are caught by the glitter of the Servian or the Roumanian crowns. It is true that he does not rule over the whole of the Polish nation, or over the whole of the Ruthenian people. In the former case, however, there is no independent Poland, and it is probable that the lot of the Poles under the Hapsburgs is more tolerable than under the Romanoffs or the Hohenzollerns. Within the year we have observed signs of uneasiness among the Austro-Hungarian Ruthenes, who are being inspired with the long-dormant national consciousness, although for the moment there is no independent Ruthenia to espouse their cause. In the case of the Roumans resident in Transylvania the position is different. A vigorous and sturdy monarchy is seated at Bucharest, and a national propaganda has made that portion of the Roumanian race which lives to the north of the Carpathians vaguely conscious of its ethnical solidarity with the free people beyond those mountains.

Until recently dynastic and other considerations had prevented this question from becoming more than academic, but of late the policy of Bucharest has shown signs of a new orientation, and the magnet of the national crown of King Karl has begun to pull more strongly at the heartstrings of *Rumania Irredenta*. In the case of the Serb populations of the Monarchy, the process has been somewhat similar, although Croatia was acquired by the Hapsburgs by conquest from the Turks. At the end of the seventeenth century Austrian arms had failed to extend its sway over the whole of the territory inhabited by the Serb race. The independent Serb Monarchy focussed the national aspirations of the race, and when the tardy advance of the Hapsburgs into Bosnia took place it was regarded, not as had been the acquisition of Croatia, as the rescue of a Christian population from the Turks, but as the enslavement of a population which desired to become part and parcel of the national Monarchy seated at Belgrade. There are those who maintain that the history of 1849 or 1859, when Sardinia endeavoured to release the Austrian-Italians of Lombardy from foreign rule, is about to be repeated. They say that Servia plays the part of Sardinia to a Bosnian Lombardy, while Roumania is the Sardinia of a Transylvanian Lombardy. Some will even go so far as to assert that the Teutonic provinces of the Monarchy must also of necessity be attracted into the neighbouring German Empire. Meanwhile, the racial difficulty is further complicated by the fact that in the Hungarian portion of the Dual-Monarchy the dominant Magyars are intolerant of racial minorities, and have deliberately neglected to treat the Roumanian and Slavonic subjects in such a way as to win either their loyalty or their co-operation. The late Archduke Francis Ferdinand is believed to have held that it was necessary, in order to counteract the disintegrating propaganda at work among the races of Hungary, to take special measures to make residence within the Monarchy not only tolerable, but enviable. This, it is said, was particularly his aim in the case of the Serbs and Croats of Bosnia and Croatia. Those who supported him not only desired to improve the lot of these populations, but also to extend the influence of the Church of Rome, with which the dynasty had on several occasions identified itself. It is a perfectly comprehensible ambition if, Belgrade being the champion of the Orthodox branch of the Servian race, Vienna should aspire to be that of the Roman Catholic or Croatian branch; and with proper treatment there is no knowing what might not have been the result of such a duel. The Austrian ambitions were, however, handicapped by the political requirements of the dominant Magyars, and Trialism could not be fairly tested. Consequently the propaganda of the Orthodox Serbs had a great measure of success, and the spirit of national unity under a native dynasty, which is its greatest asset, was immensely strengthened by the military successes of the Servian kingdom. Similar, but moderate, achievements, as the result of a deliberate break with Austro-Hungarian traditions, have increased the activity of the Roumanian racial propaganda, and the governing class of the Dual-Monarchy has for some time been face to face with the conviction that decisive and drastic action was neces-

Digitized by Google

sary in order to keep the Monarchy from falling to pieces as the result of centrifugal nationalist attraction.

The Servian successes have had another, but indirect, effect upon the situation. The temper of the Servian Press and public, which has never at any time shown restraint in its attitude towards the powerful neighbour on the north, has undoubtedly risen. Servians consider that the victors of two considerable wars have every right to express themselves more freely than was the case when their country was an insignificant State, stamped with the record of defeat. The unusual, unlooked-for success against the Turk and the Bulgar has so inflamed the national ambitions that for a year past, and more, it has been the chief topic of conversation and composition that Bosnia and Croatia must be redeemed in the near future, just as Macedonia had been in the immediate past. The situation thus arises in which the haughty Austro-Hungarian Monarchy finds itself marked down for partition at the hands of its small neighbours, as though it were a second Poland. Moreover, in spite of their victories, the smaller States do not rely entirely upon their own strength, but calculate upon the support to be obtained from Russia on behalf of a policy which would extend the territorial Empire of Slavdom. Austria has, to a certain extent, the force of religion as well as that dynastic devotion which has so often confounded political prophets in their calculations about the dominions of the Hapsburgs. In any case the present struggle is racial in its origin and racial in its intensity; there is also the added bitterness of religious difference. The dominant Teuton and Magyar are determined to crush the dangerous aspirations of the southern Slav, and to that end invoke the dynastic loyalty of heterogeneous subject races and recall the historic memories of Prince Eugene.

ON THE ROAD TO TROÖDOS.

By Margaret Bovill.

In the month of August Nicosia lies gasping in the arid Mesaoria plain. A tropical sun blazes over the sleeping bazaar, and the officials whose duties do not take them to the summer station of the Cyprus Government work in semi-darkness behind closed shutters. Sheltered from the blinding glare, they read, on the arrival of the Troödos post, the letters of their wives and families, and for a moment the aromatic scent of bracken and pine ousts the familiar atmosphere of minute papers and red tape. Cyprus is famous for its domesticity; and occasionally some devoted wife remains below until, unable to stand the heat or connubial bliss with the temperature at 103° in the shade, she flies with her children to the hills. It is a brief description of such a migration that this letter is intended to convey.

After a week of feverish packing, the house is left gutted. Carpets and curtains are put away, and the fishmoth deprived of an artistic meal by the simple expedient of turning the pictures with their faces to the wall. Even a fishmoth cannot digest glass! The "bread-winner" is left with a mosquito-curtained bed, some chairs and tables, a minimum of crockery, and is up early on the morning of the day of departure, strapping the last box, with perspiration running down his face. All heavy baggage has gone on ahead in bullock carts: linen, cutlery, glass, in fact every extra which a by no means primitive existence entails, from a card table to the "Handbook of Cyprus." Years ago the officials rode up on mules, sleeping one night at a village by the foothills; the children rode in front of the muleteers, and even babies in arms were carried by these rough but tender guardians. Now all is changed! Instead of a tent with only the necessary furniture, there are huts, rude still, but secure from wind and rain. A member of the Public Works Department meets the occupant with an inventory of the contents of No. 1 or No. 2 (for all the huts are numbered), and together they solemnly ring each plate, and religiously count the teacups. A sure Nemesis waits at the end of the season for the careless housewife whose list is short, or whose china does not give out the true metallic ring.

A small train on a narrow gauge starts from Nicosia at 9.30 a.m., and the distracted father packs wife and children, maid and the nursery cat into a comfortable carriage. Buried amidst impedimenta of tea baskets, rugs, books, and a collection of last things, they steam slowly out of the station, leaving him to support a hot, but perhaps a not unendurable existence of two months of bachelordom.

For an hour and a-half the engine puffs through the bare plain, dotted with mud villages, and far away to the south the Troödos range stands shrouded in mysterious blue mist. It seems so far away, and yet by the agency of a motor they hope to reach its cool fastnesses in five hours. Northwards the horizon is marked by a chain of hills lower but not less beautiful than those on the south; their slopes are clad with cypress and pine, and a mediæval castle crowns one of the jagged peaks. The train stops continually at wayside stations, and with much fuss and confusion a Turk gets out, gaudy in brilliantly striped stockings and snowy *vraka;* or a Greek Cypriote woman dressed in the native dress, her long hair hanging in braids under a coloured *mandil*, drags out a heavy basket. A chattering group surrounds her on the platform, anxious to hear the latest news from the capital.

The scenery has a vivid charm, though the spring flowers are withered, and the barley fields have long since ripened to golden yellow and been reaped. The brownness is not all of one tone; it melts into softest ochre splashed with vermilion, and the blue summer thistle adds a spot of colour to the permanent way. On a rounded slope a solitary shepherd pipes to his flock on a reed pipe such as Pan used, a melancholy music, weird and penetrating. A relentless sun strikes vertically down as the train stops at Kopia, where children and baggage are extracted from the hot carriage and packed into a motor shielded from the glare by a hood. The boxes are fastened behind, the cat condemned to a solitary existence in a basket, the chauffeur turns his back on Nicosia as they glide swiftly away past melon fields where the flat green plants cling tenaciously to the parched soil. At Astromeriti, misnamed the Star, the streets are crowded with pariah dogs, who rush with hideous clamour in front of the car; the villagers throng the doorways, dressed in red and yellow, purple and green, the small girl children ridiculous miniatures of their mothers in *mandils* and tight bodices; a baby toddles across the road, and with a jerk the car pulls up as a woman runs out, shakes her unfortunate offspring, and appeals to the "Panayia" (Mother of God) in piercing accents echoed by a dozen female voices all pitched in the same key! With a phlegmatic shrug the chauffeur starts his engines again, the tortuous alleys of Astromeriti are left behind, and a broad stretch of country spreads away towards the mountains. Heat waves shimmer and dance over the thirsty earth. Vegetation there is none, save where an oasis, watered from a well primitive as those of Biblical days, has been created by a frugal villager. A donkey ceaselessly turns in a circle, and the owner sleeps beneath his trees until the midday heat has passed and he can labour once more. A stately string of camels pads along the road, laden with fodder and kerosine tins, the wild camel-drivers sitting motionless as they

slowly leave the miles behind them; dreaming and nodding, typical symbols of the East, they scarcely glance at the motor as it rushes past, eternally undisturbed by the energy and progress of the West.

Presently the gradient becomes steeper, the foothills lose insignificance, and deep gullies seam the sparsely wooded summits. In a deep valley to the right lie villages buried in a luxuriance of fruit trees, apricot, almond, and plum. Above the road is a rock wall rising stony and precipitous, and here and there are some nasty corners. The car glides skilfully round them and runs down a slope to Galata village. In a ravine above, a stream bordered by pink oleanders is in full spate, springs of water gush across the road, and a cool breeze from Chionistra, the Snow Mountain, mingles deliciously with the breath of balsam and ripening vineyards.

The last stage of the journey now begins up a road with a gradient of one in twenty, which contours the mountain sides, crawling along dizzy edges. The bare plain lies below; a resinous scent of pine trees, water herbs, and green things innumerable fills the air; arbutus, alders, and poplar clothe the lower slopes; until the pine trees (*Pinus halepensis*) reign alone, carpeted round their feet with greenest bracken. Beneath a group of planes the chauffeur stops to take in water, coolest, freshest water which murmurs all round, and trickles from a mossy bank over an earthen tile. Once again the car starts, the emerald softness and shade of the plane grove is left behind, and for an hour the engines toil laboriously up the hill.

Below, a wide panorama is unfolded, spreading away to the sea sparkling in the sunlight; between it and the mountains are a hundred evanescent shades of brown, relieved by green patches of forest and irregular red-roofed villages. Over it all fleecy white clouds sail in a sky blue with the azure glory which England never sees. Still, the car breasts the steep mountain road between the solemn pine trees, where a hoopoe perches on a low branch, or a jay gaudy in summer plumage flashes across the path. Up and up until the white gleam of tents catches the sun's rays, and the summer quarters of the company of British troops stationed in Cyprus becomes visible. At the last turning a small walled-in cemetery marks the place where the dead of bygone regiments lie peacefully at rest. A level road runs along the top, and buried amongst the trees are huts built of stone and wood or galvanized iron, each with its path carefully outlined by stones and with a number painted on the door.

The air is sharp and incredibly dry; only sound lungs can breathe its rarified purity, and the strongest man finds quick walking a difficulty.

The journey is ended; mother, nurse, and children alight; and while the former work diligently to reduce order from the chaos of boxes, beds, and bundles which lie in confusion on the ground, the latter play happily among the fallen pine cones. Towards evening beds are made up, a hasty meal has been cooked, and the labours of the day are ended.

A gorgeous sunset, crimson and orange, floods the sky, then fades away as in the dark blue heavens the moon rises, silvering the pine trees, and the branches, shaken by the night wind, sough mournfully with a sound like distant surf.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

It has always been said that the surest barometer of public anxiety is the Stock Exchange, and although to the man in the street the crisis which has suddenly gripped Europe means as yet but little, a measure of the gravity of the crisis may be taken by the crumbling of prices on the Stock Exchanges. It is true that so far London has been comparatively free from the panic and paralysis which has overtaken Continental markets. True, Consols have touched 70 and other stock has fallen in proportion, but the main cause of the disorganisation has been the panic-stricken selling from the Continent. There have been many failures, but on the whole the larger houses have withstood the shock well. Speculative firms at any crisis must be a cause of weakness, and their stronger brethren are not averse from seeing them eliminated. When once outstanding accounts have been settled, the market should assume a more level tone. Already on Wednesday prices in many leading securities had fallen so low that large buying orders were being received, even from Berlin, which brought about a small revival. The Bank rate was raised yesterday from 3 to 4 per cent.

***

One result of the war has been a wholly unprecedented financial crisis which has swept the Bourses of Europe, leaving behind it a pathetic wreckage of failures and insolvencies. In actual commerce shippers in the Near East will be gravely inconvenienced, to say the least of it, by the extinction of Russian lights in the Black Sea, and the consequent rise in insurance rates. I see that Antivari is blockaded, but this is a matter of small moment. Far otherwise is the necessary and praiseworthy action of the Admiralty in prohibiting the export of Welsh coal. Ere long ten thousand funnels will tell the story of this privation, but the Navy will have what it wants, and possible rivals will be reduced to the betrayal of their presence at sea by the use of soft coal.

***

Some time ago, unless I am very much mistaken, reference was made in THE NEAR EAST to the copper mines of Arghana, which are at present worked by, or on behalf of, the Turkish Government; and it was hinted that given adequate capital to provide for their efficient working and the transport of the ore, the mines should prove worth attention. Now I see it reported that an English firm has made an offer of an advance of a million and a-half for the grant of a concession, and that American and German firms are also after the prize. This really looks as if the West was beginning to think that it was safe to invest capital in Turkey; for in the old days the Turkish Government, if it had desired to get rid of the mine, would have had to beg and pray someone to take it on, instead of finding three rivals ready to bid against one another for the privilege.

***

A correspondent has written to *The Egyptian Mail* complaining—and very justly so—of the difficulties that have to be overcome by anyone who wishes to forward a parcel from this country to Egypt C.O.D. He gives two instances that have fallen within his own experience. In one case a friend who had undertaken a small commission for him had (to quote his own words) to go "to three different (London) post offices . . . to fill in five different forms, and write all kinds of things on the box itself"; and it took him three quarters of an hour at the post office, "as the people said they had never done such a thing before, *and payment on delivery was unknown.*" In the second case a firm that had been asked to send out goods C.O.D., forwarded the goods, but asked for a cheque, "as they had sent the parcel to the post office, and it had been returned with the information that the *C.O.D. system was not in vogue between England and Egypt.*" The italics are mine, in both cases.

***

But what an extraordinary state of affairs those italicised sentences indicate. The C.O.D. system has certainly been available for use to Egypt since 1908, and yet it is "unknown" in a London post office to-day! If that is a fair specimen of the intelligence of the Post Office, one can only wonder that the department makes a profit at all. The *Mail's* correspondent suggests that our Postmaster-General should be asked to have printed notices put up in the London Post offices "detailing the method of despatching a parcel for Egypt C.O.D." That should not be necessary. If the counter clerks were obliged to study the Post Office Guide—by the way, why not make their retention of their positions depend on proficiency as tested by periodical examinations in the Guide!—there should be no difficulty in the matter at all. As it is, I can only suggest that any one anxious to send a parcel to Egypt C.O.D. should himself (or herself) study the Guide. It may not save him (or her) having to fill in forms "and write all kinds of things on the box itself," but it should save him (or her) saying (or thinking) "all kinds of things" about the Post Office and its incapable assistants.

***

It is natural that the Anglo-Persian oil scheme should suffer almost total eclipse at the present moment when journalists and members of Parliament have more exciting and agitating topics for exercising their pens and their tongues. However, the scheme which has been consistently supported in these columns has now received the sanction of Parliament. On Monday, the House of Commons authorised by 191 to 67 votes the application of £654,813 from the old Sinking Fund for the acquisition of shares in the Anglo-Persian Oil Company. The passing of this financial resolution synchronised with the announcement in the Press of the appointment of Lord Inchcape as Vice-Admiral Slade's colleague on the company's board of directors. In spite of the strong opposition of many of those interested in the oil business, the scheme commended itself to the judgment and good sense of most fair-minded people. It only remains for the Government to cultivate its own garden.

***

The announcement that Lord Inchcape has been chosen by the Government as one of its representatives on the board of the Anglo-Persian Oil Company is good news, both for the country and for the company. Lord Inchcape strikes me as one of the strongest and most able business men we have to-day. He knows the Near East—and the Farther East, too, for that matter—well, and he is able to take the wide view which is so very desirable in regard to Near Eastern affairs.

***

I have just received an interesting pamphlet which has been reprinted from an article on "Politics and British Trade in the Near East," contributed by Captain Dixon-Johnson to the last number of *The Asiatic Review*. The writer points out the losses which British trade has suffered in the Near East as a result of the Balkan wars. The transference of territories formerly under the rule of the Sultan to the Balkan States and the Chauvinistic economic policy of the latter has seriously damaged the interests of British traders. This, I suppose, we shall have to accept with the best grace possible in the circumstances. But Captain Dixon-Johnson directs attention to future developments and possible dangers. He warns us that this loss in the former European provinces of Turkey "is insignificant in comparison with what it would be should the enemies of Turkey succeed in dividing up her Asiatic provinces. . . ." When will our statesmen understand that we have a vital interest in preserving the integrity and developing the resources of the Ottoman Empire?

***

In view of the fact that so many Egyptian cigarettes are smoked in this country, it may be a surprise to some to learn that no tobacco whatever is grown in Egypt. The cigarettes, so-called Egyptian, are made of Turkish or Greek tobacco, which may be cured and made up in Egypt, but nothing more. The soil of Egypt is not over-favourable for the cultivation of tobacco, but the real reason why the "weed" has not hitherto been grown is that the Ottoman in his wisdom feared the Egyptian variety might compete with the Turkish output. From the additions which have been made to the Greco-Egyptian Commercial Treaty, which has just been renewed for a further nine months, it rather looks, however, as if the Egyptian Government were contemplating the cultivation of tobacco. It was laid down, among other things, in the original version, that should Egypt begin to cultivate tobacco, Greece may be at liberty to denounce the agreement. For this clause has, however, been substituted one granting Egypt complete liberty of action so far as the creation of a monopoly and the introduction of tobacco cultivation is concerned. The treaty has been renewed for nine months only in order to give ample time for the study of this and other points, and also to ensure that whatever new agreement is reached, it should come into force as from the beginning of the financial year.

The Constantinople Lighterage Corporation.

(From Our Trade Correspondent.)

Constantinople, July 25.

I referred in my letter of June 27 last to the action of the shipping delegates appointed by the several Embassies to assist at the meetings of a sub-commission sitting under the presidency of Sir Richard Crawford to regulate the means of transport in this port, in making it a condition at the first meeting, held on June 16, that their participation in the labours of the sub-commission should not be interpreted as implying the abandonment by the foreign shipping companies of the rights of these companies to own and acquire lighters, to use them with all liberty in accordance with their requirements, and the consequent adjournment of the meeting, at the request of the delegates, on the sub-commission declaring that the question was outside its attributions.

The action of the delegates met with the approval of the International Chamber of Shipping convened in the meanwhile, and at the adjourned meeting of the sub-commission, which took place on June 18, the delegates put in a long memorandum, which they proposed communicating to their respective Embassies, by whom they had been nominated. The memorandum invited an expression of the views of the Imperial Ottoman Government as to its attitude towards the acquired rights of the foreign shipping companies to possess lighters and to increase their numbers as circumstances required, and if the Imperial Government contested these rights the delegates regretted their inability to take part in the labours of the sub-commission, and were so reporting to their respective Embassies. The delegates offered the suggestion that with the object of putting an end to the existing unsatisfactory state of affairs the owners of the lighters at present forming the Guild be incorporated into an Ottoman commercial company, to be administered according to modern procedure, and offering consequently all the necessary guarantees to foreign shipping.

The contents of this memorandum having been communicated to the Sublime Porte at a meeting of the sub-commission, held on July 6, the Government authorised its delegates at that meeting to make a statement which was formally communicated to the delegates of the foreign Embassies. The substance of this statement, while emphasising the inconvenience of suppressing the Lightermen's Guild, is decidedly conciliatory, and can be summed up in its two closing paragraphs, of which the following is a free translation:—

"The question of deciding upon the liberty of transport by lighters, irrespective of the monopoly of lightermen, and irrespective of the Ottoman nationality of the owners or the crews of lighters, is one of the attributes of the Mixed Commission.

"There is, therefore, cause to adopt regulations on the other points mentioned above. The participation of the members of the sub-commission being in their capacity of delegates of the Sublime Porte and the Embassies, it follows without question that their participation cannot imply as a consequence a renunciation on the part of shipping companies of the point of view they have always upheld, in so far as regards their demand tending to obtain authorisation to make use of their own lighters."

On the basis of this declaration of its views by the Imperial Government, of which the foreign delegates took note, the sub-commission entered upon the study of the points submitted to it at a meeting held on July 8, and made the following recommendations:—

1. The means proper to assuring always a sufficient number of lighters to the companies.

(a) That the military and maritime authorities of the Imperial Government meet their own requirements by means of their own transport services in the port, and that lighters and other craft affected to the transport of merchandise be exempted from requisition by the authorities.

(b) That the authorities responsible for the control of the circulation of the port take steps to assure that the number of lighters available for the operations of loading, discharging and transit of merchandise (not including coal) in the port shall not be less than 1,000, of a capacity varying from 25 to 50 tons each, not including the "salapurias" (lesser lighters) now in service.

(c) That the Imperial Government take the necessary steps without delay to give effect to the decisions of the Commission formed to investigate the existing deficiencies of the Port of Constantinople (as enumerated in my letter of April 11, viz., (1) Insufficiency of quays; (2) insufficient Customs depots and warehouses; (3) absence of Customs depots for goods in transit; (4) insufficient number of lighters and the bad state of those in use; (5) insufficient mooring buoys in the harbours). In so far as item 5 of this report is concerned, relative to harbour buoys, the sub-commission is of opinion that this question merits serious attention on the part of the Prefecture of the Port, with the assistance of the shipping agencies, and at the same time taking into consideration the project drawn up by the International Commission in 1910.

(d) That the Imperial Government take the necessary measures as soon as possible for the fusion of all the owners of lighters and other craft in Constantinople into an Ottoman Commercial Company, to be administered according to modern procedure and offering consequently all the necessary guarantees to Ottoman and foreign shipping.

2. Establishment of a maximum tariff of charges to be paid in remuneration of services rendered by lighters.

The sub-commission is of opinion that it would be preferable to examine the question of tariffs at the time of the fusion of the owners of lighters and other craft into a transport company, in view of the fact that this tariff could then be based on a sliding-scale in accordance with the operations undertaken by the company. It is of opinion, however, that the maximum tariff of charges should be submitted to the approval of the competent Ministries in consultation with the General Direction of Indirect Contributions (Customs Department), at the same time taking into consideration the observations which may be offered by the Chambers of Commerce and the Maritime Chamber.

3. Responsibility of the owners of lighters for the losses and damages to goods committed to their care during transport, if these losses and damages are imputable to them.

The sub-commission is of opinion that the only effective solution to this question is the formation of the transport company recommended by it under paragraph 1 (d). Such a company would offer all the desired security to commerce and the shipping agencies, in so far as concerns the losses and damages occasioned during transport.

4. Responsibility of the Imperial Government for the integral execution of the abovementioned points in the matter of the service of maritime transport within the limits of the regulations to be elaborated.

The sub-commission is of opinion that if the Imperial Government were to take the necessary steps to carry into effect the recommendation enumerated under paragraph 1, the responsibility of the authorities interested in the regular working of the transport service in the Port of Constantinople would be adequately covered by the execution of the projected regulations annexed with the few modifications suggested by the sub-commission.

So far, I have used the actual phraseology of the sub-commission in the study of the questions put to it. The report ends with yet another reiteration of the proposal for the formation of an Ottoman company to take the place of the Guild. It would seem that this proposal of the sub-commision meets the case, and it is stated that the Government is actively engaged in the formation of such a company.

OTTOMAN DOCKS AND ARSENALS CO.

Sir Adam Block's Position.

In the House of Commons on Tuesday, Mr. King asked the Secretary for Foreign Affairs whether he was aware that Sir Adam Block, British delegate and president of the Council of Administration of the Ottoman Public Debt, was chairman of the Imperial Ottoman Docks Arsenal and Naval Construction Company; whether he had considered the position of the British delegate in connection with the objects and work of this company; whether Sir Adam Block informed the Foreign Office that he was undertaking the position of chairman; whether the permission or sanction of the Foreign Office in this matter was given to Sir Adam Block; and whether any communications on this subject had passed between the Turkish Government and the Foreign Office?

Sir Edward Grey: In the early part of this year I was informed unofficially that the Constantinople Dockyard and Arsenal Company was desirous of obtaining the services of Sir Adam Block as chairman. I replied that the matter seemed one for private arrangement between the company and the Council of Foreign Bondholders in whose service Sir Adam Block was. The Turkish Ambassador, in reply to an inquiry from him, was informed of this view. Understanding from a subsequent communication from the Turkish Ambassador that the Turkish Government desired the appointment and hoped no objection would be made to it, I expressed myself as favourable to it on general grounds. There was no question of my giving permission or sanction to Sir Adam Block, who is not, as British delegate on the Council of the Debt, appointed by or under the control of his Majesty's Government.

Mr. King has given notice that he will ask the Prime Minister whether he is aware that Sir Charles L. Ottley, late secretary of the Imperial Defence Committee, is a director of the Imperial Ottoman Docks, Arsenals and Naval Construction Company, and that this company has been formed for the building and repair of the warships of a foreign Power; and whether he will take steps to provide that any servant of the Crown holding a position of the character held recently by Sir Charles L. Ottley shall be debarred on relinquishing his post from entering directly or indirectly the service of a foreign Power.

Mr. King will also ask Mr. Winston Churchill whether he has been informed that by an arrangement between the Turkish Government and the new Arsenals Company formed for naval construction and dockyards in Turkey any difference on a technical matter is to be referred to the Lords of the Admiralty in England; and whether this arrangement has been sanctioned by the Admiralty.

Turkish Finance.

(BY A FINANCIAL CORRESPONDENT.)

CONSTANTINOPLE, July 22.

Recent Budgets.

The Budget of the present year should be studied in conjunction with those of the past three years if any correct idea is to be formed as to its real value.

The Budget of 1327 (1911-12) was sanctioned by Imperial Iradeh on May 25, 1911, and by it credits were allowed to the various Ministries to the extent of £T35,314,995. The war with Italy broke out in September of the same year, and supplementary credits to the amount of £T2,967,450 were allowed by the Government, making a total of £T38,282,445. On January 5, 1912, the Chamber was dissolved and was to meet again after three months, during which time the elections were to take place. In January and February of that year the Government expended £T2,001.570 of the abovementioned supplementary credit.

The Budget of 1328 (1912-13) was never discussed by the Chamber, nor was it voted, but it was drawn up by the Government on the lines of the Budget of 1327, and, having received the Imperial sanction, came into force. Towards the end of the year Mahmoud Shevket Pasha's Cabinet came into power and raised the necessary money for the continuation of the war by means of numerous short term loans and advances, of which mention is made below. The Budget allowed a credit of £T33,135,860, to which should be added the supplementary credits of £T12,798,556, making a total of £T45,934,416.

The Budget of 1329 (1913-14) was never discussed or approved by the Chamber. The form of the 1327 Budget was therefore of necessity adhered to, and the system of provisional laws and supplementary credits was employed again. The total credits allowed were £T49,066,631.

We have, therefore:—

Total credit allowed for	1327	£T38,282,445
" "	1328	45,934,416
" "	1329	49,066,631
Or a total of		£T133,283,492

From these should be subtracted:—

Estimated revenues for	1327	£T29,895,988	
" "	1328	28,459,079	
" "	1329	29,169,048	
Or a total of		£T87,524,115	87,524,115
Giving an apparent deficit on three years of			£T45,759,377

It should, however, be borne in mind that the whole of the supplementary credits of these three years were not made use of.

The Floating Debt.

During his speech on this year's Budget the Finance Minister referred to the amount of the floating debt in existence at the date of the contract of the 1914 loan (April 15, 1914) as being roughly £T32.5 millions, which is £T13,260,000 less than that arrived at by the above Budgetary calculations. This floating debt was composed of £T24.5 millions of Treasury bonds, advances, etc., and £T8 millions of Government officials' salaries in arrears and money due to Government contractors. The 1914 loan yielded to the Turkish Exchequer £T17,545,000, the greater part of which was used to pay off this floating debt; but neither the long term advances nor the Treasury bonds guaranteed on the land tax (£T5.5 millions) were repaid out of the loan. The former are repayable in three years, and the latter are to be repaid in September, when the second half of the 1914 loan is expected (estimated yield, £T10,000,000). The factor which is most likely to swell the real deficit on the three years' working is that of the requisitions for military purposes. These bonds are now being verified as they are presented at the Ministry of Finance, and the total amount of the debt thus incurred is at present unknown. It will be repaid from the latter half of the 1914 loan.

An Economic Budget.

The Budget of 1330 (1914-15) allows for a credit of £T33,145,828, and for revenues of £T31,112,244, giving a deficit of £T2,033,584, or, in round figures, two millions. It has been compiled on the lines of the strictest economy, but both the Government and the Budgetary Commission are anxious, if possible, to effect still further economies. The item which is receiving principal attention is that of the pensions allowed to retired Government officials and their dependents, and it is pointed out that a State which pays away about half of its total revenue in interest and sinking fund for its various debts cannot afford an official pension list of another 10 or 12 per cent. of its total revenue, for the amount of this credit is roughly £T3.5 millions. Some of the Deputies and also the Budgetary Commission attack the amounts of the salaries of many of the higher officials, especially those who have recently received increases. The Minister of Finance vigorously defends these interests, and justly argues that it is necessary to pay men well if they are to hold responsible positions and to give loyal service.

The Government are striving to remove taxes that tend to hinder the economic development of the country; that is to say, to shift some of the very heavy burden of taxes from the shoulders of the agricultural population on to those of the nation as a whole. This it is hoped to do by means of the 4 per cent. increase in the Customs duties, by the extension of the "temettu" or professional tax to foreigners, and by the establishment of various monopolies, such as sugar, petroleum, playing cards, etc., as was fully described in the newspapers at the time of the signing of the agreement with the French Government.

Increasing Receipts.

It is an undeniable fact that the receipts of the empire are slowly increasing, this increase being mostly due, of course, to the tithes on cereals in the Asiatic provinces. The Greek emigration will have a temporary bad effect in some localities on these revenues, but this should not be of a lasting nature. As soon as the numerous ports and railways contemplated are constructed the receipts will undoubtedly again increase. A sorely felt want is the scientific education of the masses of the people in farming and agricultural matters. This is already being attempted in a most practical way in that the soldiers, who are very largely drawn from the agritural classes, are being given this instruction whilst they are undergoing their military training. This should have most beneficial effects.

As stated above, the Government allow a probable revenue of £T31,112,244. To this the Budgetary Commission adds a sum of £T698,408, which is really not an increase of revenue, but rather an expense not to be incurred, since it is the amount of the first "coupon" of the 1914 loan which has already been deducted by the banks from the capital sum placed at the disposal of the Turkish Exchequer. There are other small changes which make the Budgetary Commission's estimate of revenue £T31,875,205, while its estimate of expenditure is £T32,638,658, leaving a deficit of only £T763,453, against the Government's estimated deficit of £T2,033,584.

Extraordinary Expenses.

The Government's total estimated expense, which is about 34 millions, includes several items which may well be called non-recurring. Prominent among these are:—

1. The annual charge for the part of the debt incumbent on the Roumelian vilayets. This is about £T1,000,000, and it is confidently hoped that at the next meeting of the Paris Conference, which should take place in October of this year, the States now in possession of those vilayets will agree to take over this debt.

2. The annuity of £T1,300,000 on the £T5,500,000 of Treasury Bonds 5 per cent. issued to find the purchase money for the Dreadnought "Sultan Osman." This item will have disappeared entirely when the Budget for 1917-18 is presented for discussion to the Chamber.

If allowance is made for non-recurring expenditure of this sort, it may be said that Turkey has, in theory, at any rate, achieved her Budgetary equilibrium. On July 20, however, the Chamber voted an extraordinary credit for the Ministry of War of £T5,500,000 over a certain number of years, the sum to be procured by the Government by "a special financial operation." It is a small paragraph, but it upsets all calculations of budgetary equilibrium for the present, at any rate.

Djavid Bey's Hopefulness.

Djavid Bey, the Minister of Finance, in introducing the Budget, made, as always, a remarkable and eloquent speech, in which he gave a financial survey and history of the last two years, with an outline of the Government's financial plans for the future. He laid emphasis on the fact that the country must have great recuperative power, as it has been able to survive the Tripoli and Balkan campaigns with far less prejudice than was to be expected, although subjected to a financial boycott by Europe. He foresaw a brilliant economical future if Turkey was prepared to apply to foreign capitalists for the execution of public works with the object of opening up the rich agricultural districts of the country. He enjoined the strictest economy on all classes of the community, coupled with faith in the Government and patient labour for the good of the Empire.

As mention has been made above of different natures of credits, it may be of interest to quote the following extract from the finance laws of the Empire:—

During the session supplementary and extraordinary credits can only be obtained by means of a special law.

When the Chamber is not sitting the Government may increase the amounts of the credits by means of supplementary credits under the following conditions:—

The credits to be increased should have been indicated in the Budget as credits liable to fluctuation.

As soon as the Chamber meets again the supplementary credits are to be submitted to it for approval.

Any heading not marked as fluctuating can be increased by means of extraordinary credits.

Extraordinary credits can only be obtained to balance new and unavoidable expenses which were not foreseen at the time of the formation and voting of the Budget.

When the Chamber is not sitting extraordinary credits are to be obtained by means of a temporary law.

Transfers from one heading to another in the Budget are to be considered as extraordinary credits.

The Ministers are responsible that the above rules be adhered to.

Near East Markets.

SPECIAL REPORTS.

The following information is extracted from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East :—

Damascus. July 18.

The yield of the cereal crops at Hauran, especially that of wheat, is seriously deficient. On the other hand, the crop in the oat-growing lands is excellent.

The prospects of the next vintage are generally favourable.

The prices of raw wool are comparatively high in spite of the abundant supply this year.

The import of manufactured goods has suffered a decline owing to dull trade.

Constantinople. July 18.

Supplies of wheat from Anatolia are still deficient. Better prices are offered for good white qualities of flour. The opium market is active, prices range high, and the demand is good. Mohairs have not improved. Coffee prices are stationary.

BRAILA GRAIN TRADE.

(From Our Own Correspondent.)

Bucharest, July 25.

For some time past the grain trade at Braila has been stagnant. According to statistics now published from January 1 to June 1 some 1,250,000 tons of grain were exported from Roumania, of which only 260,000 tons was shipped viâ Braila, or 20 per cent. of the whole. During the same period of last year 65 per cent. of the whole was exported viâ Braila, which is about the average of this port's exports.

The principal cause of this decline is that Hungary and the Bukowina have of late been importing direct, paying much higher prices than Braila export merchants can afford. Freights have generally dropped severely, and tugs and lighters find little employment, as the Hungarians import with their own river craft.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ending July 17, 1914 :—

The sales this week on our market amount to 45 cases of new crop at 15s. 6d. to 17s., as to quality. It has rained again in many districts in the interior, in consequence of which very high prices are being paid, and in the Carahissar market as high as 19s. to 21s. has been paid for new crop. Owing to this, it is not possible to expect lower figures this season. The arrivals are 625 cases, against 990 at same date last year.

IVORY REPORT.

In their report dated July 24, Messrs. F. W. Bowyer and Bartleet state :—The quarterly sales of the year commenced on the 21st inst. and terminated on the 22nd inst. The supply offered was again moderate, totalling about 72¾ tons. The supply offered consisted of the following assortments: Zanzibar, etc., 10¾ tons, Egyptian 31½ tons, West Coast 10½ tons, Abysinnian 1½ tons, Land Carriage 5½ tons, Waste 11 tons, etc., remainder Rhinoceros, Walrus Teeth, etc. The demand was not so good as usual, and large and medium soft teeth showed a decline of £3 to £4 per cwt. Hard teeth also showed a similar decline. Small sound tusks sold well at full rates, and ball ivory met a good demand at £2 to £3 per cwt. dearer.

East Indian, Zanzibar, etc.—Mostly sold at £3 to £4 decline. Ball ivory very firm at £2 to £3 advance. Egyptian and Tripoli. —In good supply and sold fairly well. Large teeth £3 to £4 easier, smaller teeth full up. West Coast African.—Sold well at about steady values. Abyssinian on the same basis as Zanzibar.

PERSIAN AND TURKEY PRODUCE.

Messrs. F. W. Bowyer and Bartleet report as follows for July :—

Asphaltum.—*Egyptian.*—Market remains dull and no sales to report. Value nominally 70s. per cwt. Syrian character, large business has been done for this commodity at full values.

Gum Ammoniacum.—Demand extremely quiet and no transactions to report. Values unchanged. 70s. asked for good pale free drop, 60s. for blocky, and 50s. for low seedy descriptions.

Gum Assafœtida.—Stocks of common heavy grade are still large, no business whatever having taken place. Good pale almondy might be encouraged.

Gum Arabic.—*Egyptian.*—The position of this article is extremely strong. Spot supplies in the open market are cleared here, and consequently no business can be reported. On the other side all available supplies appear to have been cornered by one firm, and therefore extreme prices are being asked which make business impossible for the moment. *Persian Insoluble.*—No change to report, stocks are small, and higher prices are being demanded for the new crop. Buyers would do well to cover in their requirements at the present moment.

Gum Tragacanth.—Business is still very quiet, and only spasmodic sales are being made. Fine white grades are extremely scarce and very high prices are benig asked. £22 has recently been obtained, and there is no reason why still higher prices should not be realised. All other grades are very dull and prices are easier. Stocks are heavy, but consist chiefly of pickings, under £6 per cwt. Bagdad low grades, also Hog and siftings are particularly neglected.

Gum Mastic.—Prices in the producing market seem somewhat easier, and no further sales have been made. Value on the spot 2s. 6d. per lb.

Galls.—We are pleased to report a revival in the demand for this article, and a large business has been done both in Blues and Greens, and dearer prices have been realised. Blues and Greens are now practically cleared from this spot, but there are a few bags of Whites still available. The new crop is reported to be very short.

Ivory.—Next sale October 20, 1914.

Opium.—"*Druggists.*"—At the beginning of the month reports were circulated that heavy rain had set in through the producing districts, and as the harvest was in progress the opium was very considerably damaged. This news at once excited the market and prices rose from 15s. 8d. to 17s. per lb. c.i.f. for 11½ per cent. within two days. The price to-day for 11½ per cent. is 18s. 3d. and 17s. 6d. 11 per cent. c.i.f. On the spot 11½ per cent. is worth 19s., but even at this price it is exceedingly difficult to find sellers, as the stock here has been materially reduced by the demand caused by the above-mentioned news. "*Soft Shipping.*"—At the present very little is known as to the quality or quantity of the new crop, but we have received an offer of new "Malatia" from Constantinople at 17s. 3d. per lb., c.i.f. London, which so far has not resulted in business. To-day's spot prices are 21s. for finest and 19s. 6d. for good. *Persian.*—We have to report a continued demand for manufacturing, and there is now very little opium testing 9 per cent. or over in this market. A small business has been transacted to arrive at 17s. 6d. for 10 per cent. landed terms. To-day's quotations for spot are : 10 per cent. 18s. 6d. to 17s. 6d., and 8 per cent. 15s. 6d. to 16s.

Senna.—*Alexandrian.*—Consumers are apparently full up, and therefore it is almost impossible to make any progress with the parcels now offering Pods are quiet but firmly held.

Scammony Root.—No demand.

PRODUCE REPORT.

London, July 30.

The political situation is naturally causing considerable anxiety in the produce markets, but so far there has been no material change in prices.

Sugar.

The demand is, as has been expected, poor, and will continue so until the August holiday is past. Beetroot, after a fair amount of business during the week at some fluctuations, is now closing steady at ½d. to 1d. advance; Aug. sold at 9s. 5¼d., Sept. ditto, Oct. 9s. 6d., Oct.-Dec. 9s. 7d. f.o.b. Hamburg. Refined: English is firm to 1½d. advance for Tate's cubes, whilst Lyle's goods are 3d. dearer. Foreign is fairly active, business being done at irregular prices. Granulated: Lebaudy's fine prompt, 14s.; W.S.R. prompt, 12s. 7½d. Cubes: Say's prompt, 15s. 4½d.; German and Austrian, 13s. 5¼d. to 13s. 10½d. Crushed: W.S.R. prompt, 13s. 3d., all f.o.b.

Coffee.

The offerings at auction this week have been moderate in quantity and assortment, with fair competition ruling. Costa Rica fine ordinary sold at 68s., Mexican fine ordinary 65s., Uganda small 57s. to 58s., Mocha 88s. to 100s., Colombian low mid. to mid. 68s. to 70s., and bold fair to fine 74s. to 83s. The speculative market, owing to heavy realisations and depressing foreign advices, has ruled weak, and prices show a further decline of 1s. 6d. to 1s. 9d., Sept. sold at 39s. 9d. to 40s., Dec. 39s. 10½d. to 41s. 3d.

Currants.

The market has been rather quiet. Provincial and Amalias are attracting some attention on account of the discrepancy between present prices and those quoted for new. The remaining stocks of present crop currants are all of excellent quality, and considered as worthy of particular attention during the two months which must elapse before the new crop is on the market. In the meantime news of adverse weather in Greece is to hand, and that the growing crop is likely to suffer to a considerable extent, especially in Zante. Provincial is quoted 23s. to 23s. 6d., Amalias 24s. to 25s., Patras 27s. to 28s., Gulf 26s. to 30s., Vostizza 30s. to 33s., and smalls 24s. to 32s.

Sultanas.

The market is inactive, but no further decline has taken place. The growing crop is progressing well, but high prices are predicted, and the prospect of labour trouble is becoming acute. Smyrna fruit is quoted 27s. to 55s., and Greek 32s. to 50s.

Figs.

Quotations for naturals from Smyrna are dearer this week, but buyers still continue their stand-off policy. It is expected, however, that next month buying will become more general, and from present appearances there does not seem any likelihood of any reduction in quotations.

Dates.

Prices for new crop, although moderate, do not attract buyers in comparison with spot parcels. Persians are quoted 9s. to 12s. (old crop).

Seeds.

Linseed opened firmly this week, but became quieter, London-Calcutta afloat is quoted to-day at 52s. 6d., July-Aug. sold 52s. 9d., Aug.-Sept. 53s., Sept.-Oct., 53s. 6d. to 53s. 9d. Rapeseed is quiet but steady, brown Cawnpore July-Aug. quoted to-day 50s. 6d., yellow Guzerat 55s. 6d., Ferozepore July-Aug. (new terms) 49s. 6d. Cottonseed remains quiet, London-Egyptian spot offered at £8 1s. 3d., August £8 6s. 3d., October £8 8s. 9d., November-January £8 8s. 9d. per ton. Canary seed is easier, for Turkish, in view of the new seed coming on the market; supplies, however, are very restricted. Haricot beans, in limited supply, are quiet, and without much alteration.

Oils.

Linseed oil has improved in value, and the market closes with a strong tone; spot pipes (landed) 26s. 4½d.; barrels 26s. 9d. Rape ordinary brown naked spot 30s., refined (casks) 32s. 3d. Cotton oil, crude, is dearer, but refined is unaltered.

EGYPTIAN COTTON MARKET.

Liverpool Report.

Messrs. Reynolds and Gibson telegraph:—The inquiry for Egyptian spot since our last report has been of a very moderate character, and although a slight improvement is to be noted we do not regard this as likely to prove permanent in view of the grave European complications. At moment buyers refrain from entering into obligations except where compelled, and are adopting a waiting policy. It is exceedingly difficult to foretell to what extent our market might be affected should the present situation be prolonged. Estimated sales amount to 1,400 bales against 1,100 for the corresponding period last week.

Messrs. Davies, Benachi and Co., of Liverpool, have received the following telegram **from Alexandria, dated Wednesday:—**

Market depressed. November, 17, January, 17 3/32. Exchange, three months' date, 96 1/4.

Steamer Sailed.

July 22.—"Italian."

MANCHESTER AND COTTON.

A correspondent of the *Financial Times*, referring to the traffic returns of the Manchester Ship Canal, says that for several seasons now the direct shipments to Manchester of Egyptian cotton have amounted to more than one-half of the total shipments from Egypt of this class of the staple to Great Britain. The imports to Manchester amounted to 215,800 bales, as against 203,100 bales in the corresponding season. Many of the more enthusiastic supporters of the waterway see in the foregoing figures considerable hope that in the not distant future it will be possible to establish a "spot" cotton market in Manchester, despite the strength of Liverpool.

EGYPT'S TRADE IN 1914.

Returns for the First Half-year.

(From Our Own Correspondent.)

Cairo, July 21.

The bulletin just published by the Customs Administration for June, gives the figures for Egypt's foreign trade for the first six months of the current year. The total comes to £E29,320,975, or £2,585,407 more than for the first half of 1913. The exports account for £E15,352,530, and the imports for £E13,958,445, representing increases of £E1,482,086 and £E1,103,321, respectively. Since specie imported increased by £E471,216, and that exported decreased by £E1,378,135, the balance of trade has turned against the country to the extent of £E1,470,586.

Amongst imports, increases are noticeable in sesame (£E49,242), cotton-seed oil (£E42,268), wood for construction (£E53,032), coal (£E112,443), chemical manures (£E159,220), cotton tissues (£E290,705), railway material (£E94,636), agricultural machinery (£E106,868), and copper (£E62,432); while flour decreased by £E170,382, and sugar by £E88,684.

On the other hand, exports of onions rose by £E786,676, although the quantity shipped fell off by 43,000 tons. Cotton, however, increased by £E1,348,092 in value, and 523,179 cantars in quantity. Tanned skins rose by £E24,173, and cotton-seed and cake by £E25,994. The only commodity that showed any falling off was rice, which dropped £E30,391 in value and 1,660 tons in quantity.

Great Britain's share of the imports rose by £E334,526 to £E4,438,495, and of the exports by £E1,090,385 to £E5,998,153, so that more than half of the total increase in trade—and, in fact, two-thirds of the extra exports—has gone to that country. Germany has increased her exports to Egypt by £E247,051, and her imports by £E171,319, Italy hers by £E263,862 and £E63,867, respectively, whilst the third partner in the Triplice has dropped in both categories. France is £E164,244 up in her imports, and all the Balkan States have improved their commercial positions.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, July 29.

The week under review began with hardly a sign of more activity showing itself. Buyers have operated indifferently, and few bids of a practicable character have been heard of. On Friday last quotations became rather steadier, partly as a result of the short time movement, and some sellers were rather more hopeful as to better trade passing in the near future, but their hopes were daunted soon after the opening on Monday, when things began to have an unsettled look and the state of foreign affairs began to weigh far heavier in the balance than any short-time proposals. Quotations began to assume a downward tendency of irregularity, and sellers were placed in a worse position than before. This state of affairs has been considerably accentuated since the conditions abroad have begun to have a black look, and at the time of writing, since the news that war is declared, our market is at present in a most unsettled condition, and all trade for those parts of the world involved is beginning to be at a standstill. Piece goods for Egypt have moved off in odd lots, but buyers have only operated in cases where necessity demands, and advices from the other side have not shown much improvement. Trade for India has been of meagre dimensions. A few fair offers have been reported earlier on in the week, but wires have been received later quoting lower rates and making them unworkable. China business has continued to drag, and operators have been in no mood to buy. The other outlets have been very quiet, and for those affected by the war business is now being suspended. More short time is being talked about in the weaving districts. Manufacturers of coloured woven goods in Nelson and Colne have continued to complain. Home American yarns have not shown much change in quotation until now, when an easier tendency is prevailing. Export numbers have moved off slowly. Bolton counts have met with a featureless demand, but at the time of writing the conditions are getting worse and prices are becoming more irregular.

PORT SAID NOTES.

(From Our Own Correspondent.)

Port Said, July 27.

A Bill of Lading Case.

An action of vital interest to the shipping world has recently come before the Mixed Tribunals here. A Greek commission agent of the town claims damages against the North German Lloyd agents for alleged loss sustained through non-delivery of goods. It appears that the cargo was taken in at Naples, and on arrival of the steamer here, the consignee asked for delivery against a deposit of the cash value of the goods, in the absence of the bill of lading, which had not then come to hand. The steamship agents refused to deliver except on production of the bill of lading, and the consignee alleges loss of market owing to non-delivery.

After two hearings the Court postponed judgment until September next, when further evidence will be heard as to the custom of the port in such cases.

"The Harbour Lights."

The first standard for the electric arc lamps which are to light the harbour was erected a few days ago, and it is intended shortly to put up five more in order to try the effect of the lighting before proceeding further with the project. About twenty-four lamps would be necessary to light the harbour properly, but some doubt exists as to the utility of the scheme. It is thought that instead of being an aid to navigation the lights may have a contrary effect, and a trial is accordingly being made with a few lights in order to decide whether to proceed with the scheme or not.

Heavy Monsoons.

Homeward-bound steamers report bad weather in the Indian Ocean, where the full force of the monsoon is now being felt. Most steamers are behind time. The P. and O. mail "China," was slightly behind her usual time, while the North German Lloyd s.s. "Goeben" arrived two days late. One steamer arrived to-day, having taken thirty days to make the passage from Colombo.

SHIPPING AT JAFFA IN 1913.

According to the Consular report on the trade of Jerusalem during 1913 by Mr. Consul P. J. C. McGregor, there was an increase in the total number of steamers calling at Jaffa, mostly due to the resumption of the Italian service after the war. British steamers were slightly less in number, but it may be noted that the falling off was not in the regular services of coasting vessels plying between Syrian ports and Egypt, nor in the regular Liverpool orange steamers, which continue to hold their own well against the competing lines recently established. During 1912, eighteen British boats and fourteen foreign orange boats left for Liverpool. The figures for 1913 were twenty-one British and twenty foreign.

British lines continue to take the majority of passengers as shown by the following table.

Number of passengers of all classes embarking at Jaffa during 1913 :—

Steamers.	Passengers.
British	10,215
Russian	9,032
Austro-Hungarian	8,177
French	6,503
Italian	1,055
United States	680

Travellers embarking with return tickets previously issued are not included in the above table, except in the case of returning Russian pilgrims.

As a brief but sufficient instance of the difficulties under which shipping labours at Jaffa in the absence of a harbour, it may be mentioned that in December, 1913, there was a period of twenty days during which communication with the shore was impossible, except on one occasion, when the sea abated sufficiently to allow the mails to be landed.

LEVANT SAILINGS.

The three-weekly service to Levant ports, begun in October 1910, by the Levant Steamship Conference, but interrupted by Balkan disorders, is now resumed from the port, says *The Manchester Guardian*. There are to be sailings in August to Gibraltar, Malta, Smyrna, Constantinople, Odessa, Batoum, and elsewhere. The Moss liner "Karnak" departs on the 1st of the month, followed in twenty-one days by the Cunard liner "Thracia."

NEWS FROM ALL SOURCES.

Writing on July 17, our Cyprus Correspondent says :—Two large fires have taken place during the last ten days. One was at Amiandos, on Mount Troodos, at the premises of the Asbestos Mining Company, where damage to the extent of £4,000 is said to have been done; the other was at the fine new flour factory of Nicosia, which has been seriously damaged, the loss being estimated at £7,000. It is said that in both cases the property was fully insured.

The Syrian Protestant College, Beyrout, announces that for the purpose of supplying accurate time to the residents of Beyrout and vicinity and to visiting navigators a time ball has been erected on the tower of the main building of the Syrian Protestant College in Ras Beyrout.

A Cairo correspondent of *The Daily Graphic* writes that, owing to the falling of the Nile, Egypt will have to import nearly all her rice this year. The Nile has not been so low for nearly 100 years, and the facilities for water storage have been insufficient to relieve the distress.

Owing to the declaration of war in the Near East, the Post Office on Wednesday gave notice of delay to the following countries :—Austria-Hungary, Bulgaria, Roumania, and Montenegro.

Mr. W. L. Balls, a former Government botanist, has calculated, says Mr. A. B. Geary, British Vice-Consul in Alexandria, that one seed of cotton, given the application of all possible care and skill, would produce 40,000,000,000 seeds in six years, and gives an actual case of the production of 11,000 bushels of seed of a pure strain of wheat from a single grain in five years, without the exercise of any special care.

The Cairo police have been making searching investigations into the attempt on the life of the Khedive, without, however, discovering any accomplices in Egypt.

Reuter's Agency is informed that a large number of retired British officers have applied to the Servian Legation for service with the army.

The Education Department of the Dakalia Provincial Council (Egypt) intends to erect an up-to-date tannery, which will be placed in charge of a foreman from Leeds, on a three years' agreement. The building is expected to be started in about six weeks.

The Egyptian Ministry of Education has decided to send several native girls of the Government training schools in Cairo to England for higher education.

According to the British Consular Report for the Consular District of Alexandria, just issued, letters, cards, etc., to the approximate number of 87.000,000 passed through the Egyptian post last year, representing an increase of 6½ per cent. on 1912. Parcels carried amounted to 1,069,715, or 41,000 more than in 1912.

The number of depositors in the Egyptian Post Office Savings Bank at the end of 1913 was 282,401, and of these 5,248 were British and 249.997 were Egyptian. The deposits amounted to £E642,678, or an increase of over 12 per cent. on 1912.

The Upper Egypt Irrigation Concession.

(From Our Own Correspondent.)

Cairo, July 21.

On Sunday last an agreement was made with an English syndicate by the Egyptian Government, under which the former was granted a concession for the supplying of water for irrigation purposes to a large area in Upper Egypt, which at present only enjoys what is known as basin irrigation. I am now in a position to give some particulars of this concession, which is one of the most important granted for years past by the Egyptian Government and should, if properly worked, confer very great benefits on the local cultivators and the country at large.

The concession has been granted to Mr. P. W. Stout, who represents the syndicate, in which it is understood Sir John Jackson, Limited, are very largely interested, and who has been carrying on negotiations with the Egyptian authorities for some considerable time.

Its object is the provision of water for "Sefi" irrigation to land situated at Edfu, in the Mudiria of Assuan, and at Sohag, in the Mudiria of Girga, which hitherto for the most part has been able to obtain water only during the period of normal Nile floods, and during the rest of the year has had to lie unproductive. The area that will be eventually affected amounts to about 60,000 feddans, 27,000 feddans of which are situated at Edfu, and the remainder at Sohag.

The syndicate undertakes to erect and work pumps for the purpose of lifting the necessary water from the river on to the areas in question, and to purchase land for the execution of the canalization and drainage works necessitated thereby. It is authorized to take whatever water is required for the purpose from the Nile, and to use for the purpose of distributing this water any existing public canals. The Government, on its side, undertakes not to grant during the duration of the concession any licences for pumping from the Nile or from any public canal to any persons who may intend to make use of such water within the area covered by the agreement. The only exceptions made to this are existing licences and pumps on artesian wells.

In granting this concession the Egyptian Government has taken care that all the rights of the local landowners shall be safeguarded, and that there shall be no opening for the practice of any abuses. Thus, the syndicate is authorised to levy a rate for the supply of water but it is bound to fix and communicate to the Ministry of Public Works the standard rates that it proposes to charge. In no circumstances may such standard rates exceed P.T.30 for water per feddan of any crop, nor may the total charge for all waterings in any one year exceed P.T. 330 per feddan, unless the consent of the Council of Ministers is obtained.

No landowner or cultivator within the area of the concession is bound to take water from the syndicate, and no contract shall be made for more than three years, renewable afterwards year by year. Moreover, although permission is given to execute works that may be inconsistent with the continuation of the present basin system of irrigation within the area of the concession, the syndicate is bound to supply, upon demand and without payment, to all cultivators within the area who may have made no contract with it, at least two waterings during the flood season sufficient to assure the maturing of a flood crop, and to secure to those cultivators as favourable flood irrigation as they would have obtained if the concession had not been granted. This free service is to be made in any year in which the Government certifies that the land in question would have received free flow water. In years where any land would not have received free flow water the syndicate is still bound to provide flood irrigation upon demand to such land, but if no "sefi" water is taken it will be entitled to charge P.T.80 per feddan for one watering, or P.T.40 per feddan for the two first waterings and for subsequent ones at the standard rate.

Provision is made for arbitration in case of dispute between the syndicate and its clients; but in no case may any land situated within the area affected by the concession be seized or sold in payment of any sum due for water supplied by the syndicate.

Pending the completion of the drainage and irrigation system proposed by the syndicate, the latter will have to bear the expense of and, if necessary, carry out all such temporary works as the Government may consider requisite to prevent the work already executed from interfering with the irrigation as basin land of any part of the area affected by the concession for which the syndicate cannot for the time being supply water. Further, even after the proposed system has been completed and is working, the syndicate must permit the Government to execute, at the latter's expense, of course, any works of public utility on the area affected by its concession.

Water is to be distributed by means of canals, and drainage water resulting therefrom is to be disposed of by means of drains constructed by the syndicate upon land acquired by it in full ownership. Public canals may be made use of by the syndicate under certain conditions and after the express consent of the Government has in each case been obtained, and drains constructed may discharge either into existing public drains or into the Nile, and either by free flow or, where that does not exist in adequate manner, by means of suitable pumping installation. All the expense connected herewith or with the upkeep and clearance of public drains and canals utilised by the syndicate will have to be borne by the latter.

The general scheme for the canalisation and drainage of the areas in question must be approved by the Ministry of Public Works before it is put into execution. In fact, no works of any description may be carried out except with the approval of the Ministry and under the supervision of one of its representatives.

In the event of the syndicate failing to provide either water for any portion of the area conceded to it or drainage facilities considered necessary by the Government, the latter will proceed to carry out the necessary work at the syndicate's expense. Similarly, if pumping operations are for any reasons suspended at a time other than that at which a sufficiency of water is available by free flow, the Government has the right to step in and work the whole or a part of the undertaking on behalf of and at the expense and risk of the syndicate.

Not more than 40 per cent. of the holding of any cultivator taking "sefi" water from the syndicate may be planted with "sefi" crops or receive "sefi" water in any one year, until the prohibition to water land with a view to preparing it for a flood crop is removed; and the syndicate undertakes to see that this condition is adhered to in the districts affected. The canalisation and drainage scheme is to include and is to be limited to such canals and drains as can, in the opinion of the Government, be conveniently taken over as public canals and drains at the expiration of the concession. In principle all subsidiary irrigation and drainage channels are to be left to be constructed by the owners of the lands served thereby.

The concession is granted for a period of forty-five years, starting from November 1, 1914. On the expiration of the concession the pumping installations, the drainage and canalization system, and all lands, buildings, and plant used by the syndicate in connection therewith will revert to the Government. The latter will pay the syndicate the value at that date of the main pumping installation, to be fixed if necessary by arbitration in the manner laid down; but no compensation will be payable in respect of any other part of the undertaking.

After November 1, 1939, the Government may, on giving twelve months' notice, expropriate the entire undertaking, and in that event compensation will be paid for the then value of the main pumping installation and for the unamortized cost of the system of canalization of drainage and of all land used in connection therewith. If the expropriation takes place within the nine years following November 1, 1939, the then present value is to be increased in a manner based on a calculation of the profits that might have accrued from the date of expropriation to November 1, 1949. The agreement lays down the manner in which the unamortized capital is to be calculated and the anticipated profits are to be estimated.

If the syndicate has not completed by March 1, 1917, a sufficient portion both of the main pumping installation and of the system of canalization to enable it to supply sefi water to and to discharge its other obligations in respect of an area of 5,000 feddans in the Edfu area, and if by March 1, 1922, the entire undertaking is not in operation, the Government has the right to cancel all or part of the concession. If, on the other hand, the Government introduces perennial irrigation—this is more likely in the Sohag area—the syndicate must transfer its entire system of canalization and drainage, with the subsidiary works and pumping installation, at a price the calculation of which is laid down in the agreement.

The syndicate pays to the Government a deposit in guarantee of the execution of its undertakings and at the same time it agrees to indemnify the Government for any claims it may have to meet in respect of the granting of the concession or the execution or non-execution of the conditions laid down. It also undertakes not to supply water to any land situated outside the area covered by the agreement, and not to assign the benefit of the concession without the consent of the Egyptian Government.

The foregoing are the salient points in the agreement that has been made, the fulfilment of which should considerably increase the productivity of Upper Egypt. The area affected will be in the main devoted to the cultivation of sugar-cane; cotton is as yet not to be extended there, although the land in question is excellent and only requires levelling. The average rental at present is £E4 per feddan, but the scheme should increase it to at least £E10 per feddan.

The water to be used is that provided by the heightening of the Assuan Dam, which was intended to supply reclaimed areas further north and to enable the Government to give perennial irrigation to these and a few other areas in Upper Egypt which had hitherto had only basin irrigation.

PIANOS IN PALESTINE.

(From Our Own Correspondent.)

Haifa, July 21.

Within a period of six months a travelling representative of an Austrian piano factory has been able to sell the large number of sixty pianos in Palestine alone. This is not astonishing in view of the ample facilities accorded for payment. The vendor, who is a German by nationality, is allowed to sell on the credit system, provided the purchaser's status is good. To facilitate the sale of his pianos this agent takes old pianos in part exchange for new ones. The average price of these pianos is 1,000 frs. The agent intends to try Damascus and Beyrout, where he should find an excellent market.

Pianos are ordinarily ordered by wire and are shipped from Trieste on the Austrian Lloyd steamships direct to Haifa, thus enabling the vendor to deliver an order within three or four weeks. Here is an opportunity for British competition, for if British traders really care to strengthen their commercial relations with this country, they can easily do so through the instrumentality of travelling agents. That an opportunity is being missed in this line can be seen from the fact that even the local British Vice-Consul has bought two Austrian pianos, while the English mission at Haifa has also bought one.

Engineering Notes.

Railway Carriages for Roumania.

Our Bucharest Correspondent writes:—The various offers for the railway carriages announced some time ago are now being considered by the Director-General of Railways for fifty-two passenger carriages. According to the specification they must be lit by electricity, and delivery must take place in six months. The order is divided as follows: (a) one lot of fourteen carriages, first-class; (b) one lot of fourteen carriages, mixed first and second-class; (c) one lot of fourteen carriages, second-class; (d) one lot of ten carriages, third-class. Apparently no British house made any offer, but tenders have been received from Germany, Austria-Hungary, Italy, and Switzerland. The results will be published shortly.

Electric Battery Omnibuses.

Tramways have proved the most popular conveyance in the Near East. They are patronised by all classes and at all seasons. The introduction of electricity increased their popularity and success, for there has been a remarkable increase of electric railways in those regions during the last few years. In most towns, however, the tramway service is confined to one or two lines through the more central quarters of the town, with extensions to suburban districts; thus it often happens that other largely populated quarters derive no benefit from the existence of such a service. Some tramway companies in such cases employ horse-drawn 'buses or motor-cars as feeders to their tramway system, but it is stated that the method is expensive and does not pay. It will, therefore, be of interest to such and other electric tramways companies to hear of the trials of an interesting new vehicle which took place in London some days ago. It is an electric omnibus, with Edison accumulators, constructed to the order of an electric tramway company, to be used, with two or three more of similar construction, as feeders to the company's tramway system. It has been proved that systems of battery-driven vehicles in connection with existing electric tramways offer very considerable advantages, as compared with other methods; the economy in utilising the same source of power as the tramcars is secured, while there is no expenditure on fixed equipment such as is involved with a trackless trolley line.

Description of the Vehicle.

The most noticeable characteristic of the vehicle is its simplicity. There is no bonnet, no gear-box, not even any obvious sign of the battery, which is stowed under the seats. These features all make for cleanliness in appearance, to which is added mechanical efficiency and durability. The framing, suspension, and steering follow the usual practice, and the transmission is by means of roller side-chains from a level differential layshaft, the motor being geared direct by propeller shaft to the latter. The motor, specially designed on this service, is carried on a subframe immediately under the driver's floorboard, and is of the series-wound, four-pole, totally enclosed type, with commutator of extra large diameter and width, and shaft on dust-proof, oil-retaining ball bearings. A continuous torque drum type controller gives four forward and two reserve speeds. This is actuated by means of a lever on the steering column. The battery equipment, consisting of sixty A8 type cells, giving a capacity of 300 ampère hours with a voltage of 65, will allow of a run of about forty-five miles on a single charge. The total weight of the complete vehicle is about 8,000 lbs., of which 1,800 lbs. is accounted for by the battery. The body work is designed to accommodate twenty-two passengers. Entrance to the 'bus is from the front end, a folding door, opened and closed by driver, being provided. Thus, fares being collected by the driver, no conductor will be needed.

The Trial.

Two separate trips were made at the trial, the first being an ordinary round trip through some of the busiest and most crowded streets, but giving an admirable demonstration of the remarkable ease with which the vehicle can be handled even under the most exacting of traffic conditions. On the second trip, tests of hill-climbing ability were made, the most striking being up a 1 in 9 gradient; this, a narrow winding thoroughfare, with a very rough surface, was ascended from a dead stop with perfect smoothness at a speed of six to seven miles an hour, with a full complement of passengers. Despite the trying and exceptional nature of these two runs, comprising a total mileage of thirteen, the current consumption was well below the average, being only eighty ampère hours in all, corresponding to a mileage per charge of forty-eight.

A New Process of Case-hardening.

The methods adopted by Oriental ironworkers for case-hardening iron or steel are as a rule primitive, and sometimes objectionable. A new process, invented recently by an American, may be of use to them, as being much easier, cleaner, and more effective than theirs. A compound of the following materials is prepared:—Potassium cyanide, two parts (by weight); sodium bicarbonate, one part; potassium bicarbonate, one part; bone dust, half a part. The ingredients are powdered and thoroughly mixed. The iron or steel to be case-hardened is heated and covered with the mixture, after which it is again heated to a bright red and plunged into water. The depth of the case-hardening may be regulated by the number of times the iron or steel is heated with the mixture.

Iron in Roumania.

H.M. Consul at Galatz (Major Baldwin, C.B.) reports that practically all the iron that comes from the United Kingdom is in the form of sheets, and especially tinplates. In 1911 the value of the sheet iron imported from the United Kingdom was £626,520, or over 70 per cent. of the total. In the market for tinplates, galvanised sheets, and the thinnest black sheets, United Kingdom manufacturers occupy an unchallenged position, but in the thicker gauges of black sheets they are unable to compete against Germany and Austria-Hungary. It is also to be feared that in the market for galvanised sheets they will soon begin to suffer from the competition of the local galvanising mill at Galatz. Although this mill was only erected in 1912, it already appears to have met with considerable success. It has now been taken over by a limited liability company, and, although its present output can only cover about a fifth of the demands of the country, its operations are likely to be extended considerably in the near future.

BRITISH ENGINEERS FOR GREEK FORTS.

The London correspondent of the *Birmingham Post* says he learns from an official quarter that the Hellenic Government have approached our own with a view to enlisting the services of a number of engineer officers to superintend the reconstruction of the fortifications at some of the most vital of the Greek coasts. The decision of the authorities at Whitehall is expected to be given in about a week or ten days, but it is obvious that the request is a somewhat delicate one, and of a character different from the engagement, whether by Greece or Turkey, of officers to superintend the reorganisation of their naval forces.

BRITISH TRADE IN MOROCCO.

A commercial agency which may prove of the highest importance to British manufacturers has been established in London with the object of promoting the sale of British goods in Morocco.

Trade returns show that while French and German trade with Morocco is on the increase, British trade has for some time past been declining, and this in spite of the fact that the markets of Morocco, since the French occupation became effective, have considerably expanded. It is recognised that the keen competition of foreign countries cannot be more effectually met than by establishing an efficient organisation on the spot to give information to British manufacturers and to bring their goods to the attention of the inhabitants. It is understood that the London Chamber of Commerce is taking a sympathetic interest in the new enterprise.

TENDERS INVITED.

EGYPT.

[*The London agent of the Egyptian Government is Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Westminster, S.W., at whose office particulars of tenders marked (L) are to be obtained.*]

Tentage.—Tenders will be received by the Survey Department, Giza (Mudiria), Egypt, for the supply of tentage required during 1914. August 5.

Construction of Road Bridge.—Tenders will be received at the office of the Inspector of Irrigation, Zifta Circle, Mansura, for the construction of a road bridge with swing span of eight metres clear opening, to be erected over the Bahr Bassendila. August 15.

Iron Chains.—Tenders will be received at the office of the Director, Delta Barrage, for the supply of the following articles, required for Barrages and Regulators:—Iron Chains 1 inch 14.80 metres long. Iron chains 1 inch 10.40 metres long. August 8.

Candles.—Tenders are invited by the Egyptian War Office, Cairo, for the supply and delivery of 10 tons of candles (c.i.f. Alexandria, Port Said, or Port Sudan.) September 14.

Brass Rings, etc.—Tenders are invited by the Egyptian War Office, Cairo, for the supply of 6,500 brass rings and 2,000 brass dees. August 17. (L.)

Calico.—Tenders are invited by the Egyptian War Office, Cairo, for the supply of 10,000 yards of blue cotton calico. September 7.

BULGARIA.

Construction of Electric Power Station.—Tenders are invited at the District Finance Offices, Sofia, for the construction of an electric station (power and lighting) for the port of Bourgas. Estimated cost about £10,000. August 13.

SULZER BROTHERS, WINTERTHUR, SWITZERLAND
Steam Engines of all sizes, especially Uniflow Engines, Boilers and Superheaters. Sulzer Diesel Oil Engines from 20 to 6,000 B.H.P. EGYPTIAN FINANCES.

The Need for European Capital.

(From a Correspondent.)

Alexandria, July 15.

The Share Market, both in Alexandria and Cairo, has during the past year been greatly depressed, and speculation is completely demoralised. The effects of the crisis of 1907 are, strange to say, being felt more and more every day. The local credit establishments and industrial enterprises have given fairly satisfactory results during the past twelve months, but the land companies have severely felt recent legislation, and shares in land companies are quoted at rubbish prices. Hotel securities, too, have depreciated generally in spite of the excellent tourist season we had last winter. Small speculators, who have been hardly hit by the slump in prices, are leaving speculative stocks severely alone, and buying the three per cent. lottery bonds of the Crédit Foncier Egyptien, Lots Turcs, Panama bonds, etc.

The depression of our financial market is in strange contrast to the economic situation of Egypt, which is now more prosperous than ever. The vital forces of the country remain unimpaired, as the 1907 crisis was only a crisis of credit which made itself felt more particularly in financial circles. Where is the country that can, like Egypt, boast of an increase of 40 per cent. in State revenue within less than ten years, in spite of a number of reductions having been made in the Customs dues on coal, wood, iron, salt, etc.? The commercial balance is distinctly favourable to Egypt. The Public Debt is being rapidly reduced, and the new drainage and irrigation projects will shortly double the country's powers of production. In such circumstances, it simply shows a lack of discernment in those pessimists abroad who are continually proclaiming the bankruptcy of Egypt.

Cause of the Depression.

What is, then, the real cause of the prevalent depression in this country? The main cause, we think, is the sudden and unexpected withdrawal of credit and of the capital which had been so largely invested here by Europe. It is often asserted that Egypt is overburdened with mortgage debts, and in support of this assertion the figures appearing in Lord Kitchener's last report are quoted. The fact, however, is overlooked that it is with European capital that modern Egypt has been built up. Fifty years ago there were no large towns in the Interior, no irrigation, no railways, no trade, and no Government worthy the name. Egypt produced hardly any cotton, and the cultivated area was comparatively very limited. The fellah lived in the direst poverty.

The influx of European capital since then has regenerated the country, but there remains yet a great deal to be done. Egypt is still in need of capital to reclaim land for cultivation, to improve salt lands, to build towns, endow them with comfortable dwellings, schools, hospitals, etc., and to establish industries, of which the country is almost completely derived. Now, instead of supplying Egypt with the necessary capital for reproductive works, foreign capitalists, who are alarmed at the trend of recent legislation, are mercilessly withdrawing their money. This exodus of foreign capital is an alarming phenomenon which threatens to arrest the rapid progress of the last few years, and to cause a profound perturbation in the economic conditions of the country. There is already a very appreciable depreciation in the value of urban and rural lands, and the scarcity and dearness of money have brought about an epidemic of judicial sales of property.

To guard against these inconveniences, the Government should reorganise agricultural credit, which has radically suffered by the establishment of the Five Feddans Law. The agricultural syndicates will then be co-operative associations for purchases rather than associations of credit. On the other hand, the Government should show more solicitude for the capitalists, on whom so much of the prosperity of the country really depends.

SERVIA'S FINANCIAL POSITION.

The financial position of Servia is discussed by the *Berliner Tageblatt*, which states that the accounts of the Monopoly Administration in 1912, inclusive of the Customs revenue, showed gross receipts amounting to 52,787,000 francs, as compared with 56,678,000 francs in the previous year. As the service of the State debt and the purchase of materials absorbed 47,933,000 francs, there remained a surplus of 4,853,000 francs in favour of the Treasury. The gross revenue in 1913 was more favourable at 54,151,000 francs, and the surplus was much higher at 11,444,000 francs. During the first five months of 1914 the gross revenue amounted to 37,125,000 francs. as contrasted with 17,787,000 francs in the equivalent period in 1913, although the large increase has to be taken into consideration in conjunction with the fact that the monopolies have been extended to other branches. An official announcement made last November estimated the surplus for 1914 at 25 to 26 millions of francs, so that ten millions would have remained for the Treasury after the redemption of all annuities, including the requirements for the loan of 250 millions of francs, which has since been concluded in France. The estimate was naturally based upon the continuance of peaceful times. The proceeds of the loan of 1913 negotiated in France, which have probably not yet been fully placed at the disposal of the Servian Treasury, served for the repayment of Treasury bills and requisition notes. Some time ago the question of floating a new loan in Germany was brought forward. But the rumour was characterised as having no foundation, especially as the time-limit or embargo placed on the Servian-French loan has not yet expired.

RUMOURED ROUMANIAN LOAN.

Application of the Funds.

(From Our Own Correspondent.)

Bucharest, July 25.

A Government journal states that negotiations are in progress with the Roumanian Ministry of Finance and foreign financiers for a fresh loan of £16,000,000, which is to be applied to the purposes of the expropriation of land which is shortly to take place.

Two years ago a bill was passed providing for the expropriation of many monasteries and other corporations, and that the lands thus released from the grip of "the dead hand," and also certain State lands, should be divided amongst the peasants on easy terms of payment, the former owners being indemnified by bonds to the value of their property. The Ministry of Domains is now actively engaged in completing the scheme for the parcelling out of this land amongst the peasantry.

ROADS AND RAILWAYS IN NEW ROUMANIA.

(From Our Own Correspondent.)

Bucharest, July 25.

For five months now the work of constructing high roads and improving and constructing country roads in New Roumania has been pressed on with all activity. The most important of the first-named is the high road from Constantza to Dobritch, 106 kilometres long, which joins the Dobritch-Turtukai, about 60 kilometres in length. These two principal arteries of the new territory are already completed. Apart from these, all high roads and country roads between Dobritch-Armutli and Dobritch-Pealarevo have been macadamized and otherwise repaired. In other words, all high roads which connect the principal centres and produce regions of the new territory with the old have been put in excellent order and opened to traffic.

The construction of the railway lines to connect Tulcea with Constantza and Czernavoda with the new territory is also being pushed on as rapidly as possible. Up till now, of the 83 kilometres between Cobadin and Dobritch at least two-thirds have been built, and the rest will be completed by the end of the year. Here some 800 metres of rails are being laid daily. Of the line Tulcea-Medjidia 35 kilometres are completed, from the latter town to Esser, and the remainder from this point to Tulcea are partly laid. When this is completed direct railway connection from Constantza, Czernavoda and Tulcea with Dobritch, will be established, the advantages of which are considerable, both from the commercial and strategical point of view.

BANK OF ATHENS

(INCORPORATED IN GREECE.)

CAPITAL FULLY PAID - - Dr. 60,000,000.

Head Office: ATHENS. *London Office: 22, Fenchurch Street, E.C.*

BRANCHES.

Stock and Share Markets.

Bank Rate 4 per cent. (July 30, 1914.)

SETTLING DAYS.

CONSOLS.
Wednesday, August 6.
STOCKS AND SHARES.
In Mining Shares the next carry-over is Aug. 10.

Continuation Day.	Ticket Day.	Pay Day.
Tues., Aug. 11	Wed., Aug. 12	Thurs., Aug. 1

LONDON, July 30.

To say that the Stock Market is demoralised pre-supposes a market. There is none. Dealers in the House wisely refuse to take any stocks of any sort or description. In cases where a buyer and a seller can be matched no doubt business can be done. But it can only be done on a cash basis. The old idea of dealing from account to account has disappeared. Wall Street, London, and Berlin are the only Bourses to keep open, for in Paris the Parquet has restricted operations, and the *coulisse* is closed. Almost every member of the House considers a European war inevitable. As such a war means the destruction of credit, and its attendant paper securities, no Stock Exchange man will purchase such securities.

Bank Rate Raised.

Exchange markets are completely disorganised. The Bank rate has been raised to 4 per cent. as a preliminary to a much higher rate.

Internationals Unsaleable.

It is perhaps useless to give prices of foreign securities, for the quotations that appear in the newspapers are purely nominal. Not even Government bonds can be dealt in. The Government broker made a feeble effort to support Consols, but it is clearly understood that the effort was only for the sake of effect. Consols are nominally round about 70. Colonial securities are quoted at very much the same prices as a week ago, but it would be impossible to effect sales, although there is no doubt that, whatever the result of the war, the English colonies will continue to pay the interest on their loans. As the foreign markets are all closed, the newspapers continue to print quotations which are quite stale. Egyptian Unified, for example, are quoted 95-97, but it would be difficult to either buy or sell £500 worth of stock at these prices. Greek, Servian, Bulgarian, and Turkish stocks are quite unsaleable at any price at all. But French rentes and German Threes can certainly be dealt in for cash, although the price of rentes at 76 is as nominal as that of German Threes at 71.

Railway Slump.

All the Home Railway dividends were on the whole quite as satisfactory as the Stock Exchange had expected. But there has been a tremendous slump in Dover A, which are now nominally 33 as against 57½ a year ago. Great Easterns paid the same dividend as last year, but a Continental war would seriously affect the traffics of this road, and the price is therefore 43 nominal. South-Western and North-Eastern both maintain their dividends, but the Midland increased its expenses, and as its traffics had also decreased, the dividend was cut by ¼ per cent. Hull and Barnsley did badly, but this was expected.

Americans Benefiting.

The American market has held its own well, and Wall Street has bravely taken all the stocks offered. The general feeling is that the United States would benefit largely by a European war. The wheat crop is magnificent, and corn up to the average. Therefore, the gold bonds of the leading American railways should certainly be held, as they are an admirable security, unlikely to depreciate seriously. Canadas have been the storm centre of the panic during the whole week. It is futile to quote the price, but they are probably saleable round about 155. Grand Trunks, being largely held by finance houses, must fall on every attempt to realise, irrespective of the bad traffics and gloomy reports from Canada in regard to the wheat.

Rubber and Oil.

The Rubber market needs no comment, as the dealers will not purchase shares, and all business has practically ceased. Rubber itself is weak round 2s. 1d. No reports of any importance have been issued during the week. Oil shares have had very serious falls. Royal Dutch and Shell have been persistently offered. If the war extends, Roumania, Galicia, and Russia would be unable to bale any oil, and this would have a serious effect on the above companies. It is not possible to quote prices, but the newspapers put Royal Dutch at 40 and Shells at about 3½. The latter share has been dealt in. Holders of Mexican Eagle may continue to keep their shares, as, now that peace in Mexico is assured, the company should do well.

Mines Collapse.

Paris has attempted to sell Kaffirs, but the dealers here decline to buy. Prices have shaded off a little, but the falls have not been serious mainly because there has been no business. Chartered have been offered. The Russian and Canadian markets have collapsed. In each case the shops have refused support.

Egyptians Featureless.

The Egyptian market really needs no comment. Paris has not offered very much stock here, and business in Alexandria and Cairo is non-existent. A few National Banks have been dealt in at 13, and a seller of Agriculturals managed to disposed of a small block at prices ranging from 4½—4. Land Banks are quoted 6. Bank of Abyssinia 5s. Delta Light Railway prefs. are nominally 8. Delta Lands have been sold in small lots round 8s. Behera is quoted 8, but without any business. Union Foncière are nominally 1. Alexandria Water keep steady at 12½. Aboukir Land are called 21s. United Lands are 1s. 9d. Trusts 5s. Salt and Soda 14s., and New Egyptian 9s. Markets are said to be 23s. Khedivial Mail preference have not been dealt in all the week, and the price remains unchanged. But a few buyers of ordinary at 11s. have come into the market. In all cases it must be understood that the prices given are subject to arrangement between the broker and the jobber.

Miscellaneous.

In the Miscellaneous market Hudson Bays have been down to 7. Marconis are 1½, and even Vickers and Armstrongs have been sold. This seems an absurd anomaly, as if any security ought to rise it should be those of an armament firm. P. and O. and Royal Mails have been pressed for sale, but the market generally refuses to take stock.

COMPANY NOTES.

Anglo-Persian Oil.

The Government have appointed as ex-officio directors of the Anglo-Persian Oil Company Lord Inchcape of Strathnaver, G.C.M.G., K.C.S.I., K.C.I.E., and Vice-Admiral Sir Edmond J. W. Slade, K.C.I.E., K.C.V.O.

Mines de Kassandra.

In spite of the conclusion of the Balkan war—during which the company had to suffer by the shortage of labour incidental thereto—the total production during the year 1913 amounted to 102,854 tons, compared with 157,812 tons in 1912. Taking into account the stock of coal left over from 1912, which amounted to 46,806 tons, the total amount of coal available for sale was 149,660 tons. Of this 135,978 tons were exported, leaving a stock of 13,682 tons. The balance-sheet shows a loss of £T7,424, after payment of £T7,537 for interest and amortisations. The loss is carried forward.

Banque Francaise d'Egypte.

An amalgamation has taken place between the Banque Française d'Egypte and the Banque Hypothécaire Franco-Egyptienne. At a general meeting of the shareholders of the Banque Hypothécaire in Paris it was decided that the liquidation of the bank should take place, and that all its effects should be taken over by the Banque Française d'Egypte. In future, the Banque Française will continue the mortgage business of the Banque Hypothécaire with its ordinary banking business. The management remains unchanged, and Count Cressaty will continue to act as chairman. The Banque Française's capital has been increased to seventy million francs in consequence of the transaction.

NEW COMPANIES.

Anglo-Oriental Oil Co., Ltd.

A company with the above title was registered on July 18, by Osborn and Osborn, 2, Coleman Street, E.C., with a capital of £100, in £1 shares, the objects being to acquire petroleum-bearing grounds, lands and hereditaments in the region of Bustenari (Department of Prahova), in Roumania, and to carry on the business of an oil, mining and refining company. Minimum cash subscription, 15 per cent. of the shares offered to the public. The first directors (to number not less than two nor more than seven) are: G. O. W. Cheke and A. Gutman. Qualification, £5. Remuneration (except managing director), as fixed by the company. Registered office, 2, Coleman Street, E.C.

Gemsah Oil Reefs.

Under the title of Gemsah Oil Reefs, Ltd., a company was registered on July 24, with a capital of £150,000, in £1 shares, to acquire and deal with any oil wells, mines, oil-bearing, petroliferous and metalliferous lands in any part of the world, and to adopt an agreement with Reefs, Ltd. The minimum cash subscription is seven shares. The first directors (to number not less than two nor more than six) are R. Hamilton Edwards, 20, Copthall Avenue, E.C., and W. Wallis, 233, Stanstead Road, Forest Hill, S.E. Directors' qualification is £100 and remuneration £100 each per annum (chairman £150). Registered office, 52, Gracechurch Street, E.C.

COMPANY RESULTS, &c.

ANGLO-ROUMANIAN PETROLEUM.—Message received last Friday states:—Production of crude oil for the week ended Friday, 17th inst., was 338 tons. Bordeni well No. 24 still flowing intermittently.

ANGLO-EGYPTIAN OILFIELDS.—Gemsah production (week), 2,102 tons, of which Hurghada 84 tons.

BANQUE DE SALONIQUE, CONSTANTINOPLE.—This bank is increasing its capital by ten million francs, making it thirty million francs.

EGYPTIAN DELTA LIGHT RAILWAYS.—The receipts for the ten days ended July 10 amounted to £E5,732 against £E5,860 for the corresponding period of last year.

EAUX DE CONSTANTINOPLE.—Net profits for 1913 were 776,000 francs, as compared with 677,325 francs in 1912. Dividend 80 piastres, as compared with 75 piastres.

OTTOMAN ANGLO-AMERICAN SYNDICATE.—As from July 29, the offices of this company will be situated at No. 1, London Wall Buildings, E.C.

OTTOMAN RAILWAY FROM SMYRNA TO AIDIN.—Receipts for week ended July 25 amounted to £10,539, against £10,748 for the corresponding period of last year.

PORT OF HAIDAR PASHA, CONSTANTINOPLE.—Net profit for 1913 rose to 1,466,871 francs from 1,408,158 francs the previous year. Dividend is maintained at 8 per cent.

ROUMANIAN FOUR AND A-HALF PER CENT.—The Royal Roumanian Finance Ministry announces the numbers of 1,289 bonds of the Royal Roumanian Government Four and a-Half per Cent. Gold Loan of 1913, amounting to £46,213 4s. which have been drawn for payment on October 1, at the counting-house of Messrs. J. Henry Schröder and Co. The numbers are also published of bonds which were drawn for repayment on April 1. and had not been presented for payment on the 1st inst.

SMYRNA-CASSABA RAILWAY.—The net profits for 1913 amounted to 1,659,816 francs, as compared with 1,082,407 francs in 1912. Dividend remains 25 francs per share.

EGYPTIAN MARKETS.—Receipts for the week ended July 23 amounted to £659, an increase of £46 over those of the corresponding week of last year.

COOK'S NILE STEAMERS AND DAHABEAHS.

THOS. COOK & SON have unequalled facilities for Travellers visiting Egypt, now the premier Winter Resort of the World. Their fleet of **Fourteen Large Passenger Steamers** consists of the finest vessels on the Nile, specially built luxuriously appointed throughout, and fitted with every modern convenience.

TOURIST SERVICE.—These large and handsomely-fitted Steel Steamers sail once a week from **Cairo** to **Assuan**, and twice a week from **Assiut** to **Assuan**, the sailings from **Cairo** beginning in November, and from **Assiut** in January.

EXPRESS SERVICE.—The Express Steamers also leave **Cairo** twice a week, the Friday departures commencing in November, and the Monday departures in December.

There is thus a Service of **Five Cook's Steamers per week** ascending the Nile to the **First Cataract** during the Season—three from **Cairo** and two from **Assiut**—calling at all points of interest on the Nile, in connection with which complete arrangements for sightseeing and excursions are made, enabling Travellers to visit, to the best advantage, all the famous

PYRAMIDS, TEMPLES, TOMBS, RUINED CITIES, etc.

SECOND CATARACT SERVICE.—In connection with the above Services there is also a Service twice weekly by First-class Steamer from the **First** to the **Second Cataract**, with through bookings to **Khartoum, the Sudan, and Uganda.**

PRIVATE STEAMERS AND DAHABEAHS. — **Thos. Cook & Son** have several small Steamers for charter at moderate rates, specially adapted to the requirements of Families, Private Parties, Sporting Parties, etc., accommodating from eight to sixteen passengers, with competent crews, and thoroughly equipped. Also a large Fleet of First-class Sailing Dahabeahs, the best on the Nile.

Illustrated Nile Pamphlet free from:

Khedivial Mail Line.

FIRST-CLASS BRITISH MAIL STEAMERS.

GREECE-TURKEY MAIL SERVICE.

Shortest and most picturesque sea passage between Europe and Egypt. Fast steamers in connection with the Orient express train-de-luxe from Paris, Ostend, Vienna, Berlin, and Budapest leave Constantinople every Tuesday afternoon for Smyrna, Piræus and Alexandria. Return from Alexandria every Wednesday afternoon via same ports.

Service between TURKEY, SYRIA & EGYPT.

Fast steamers leave Constantinople every Saturday for Gallipoli, Dardanelles, Mitylene, Smyrna, Chios, Rhodes, Mersina, Alexandretta, Tripoli, Beyrout, Caiffa, Jaffa (for Jerusalem), Port Said and Alexandria. The voyage takes ten days.

Departure from Alexandria every Saturday, and from Port Said every Sunday, for above ports.

CYPRUS SERVICE.

Fast steamers weekly from Alexandria on Tuesday afternoons, and from Port Said on Wednesday mornings, for Famagusta, Larnaca, Limassol and Paphos.

SUDAN MAIL (SUMMER) SERVICE.

Steamers leave Suez Docks fortnightly on Friday, at 5 p.m., for Port Sudan, whence trains may be taken for Khartoum. Calls made at Suakim as required.

RED SEA COASTING MAIL SERVICE.

Steamers from Suez Docks every Monday evening, at 5 p.m., for Jeddah, calling one week at Tor, El-Wedj, Yambo and Jeddah; and in the following week at Jeddah, Port Sudan, Suakim, Massowah, Hodeidah, and Aden.

For information apply to the Company's London Office, 87, Bishopsgate, or at Alexandria, Constantinople and Suez. Passages may be booked at Company's Agencies at all ports called at, or from the principal Tourist Agencies.

NOTES OF THE WEEK.

We are at war. It was not a war of our seeking, but when it became inevitable we did not wait to be struck. We firmly assumed our Treaty obligations and drew the sword. Too often of late have the written and attested words of diplomatists been disregarded on the Continent of Europe, and it is therefore the more creditable to Great Britain that she should have sprung to arms in defence of a document nearly seventy years old. But if the parchment date from 1839, the policy to which it gave effect is far older. From a remote period, when the crown of St. Edward ceased to overshadow French territory, it has been of importance to the inhabitants of these Islands that the adjacent Continent should not be dominated by any one Power. We fight to-day for the freedom of the Narrow Seas, for the freedom from aggressive control of the Low Countries, for the right of the small peoples to exist untroubled by mightier neighbours. We fight to-day with Imperial Hohenzollerns as we fought yesterday with Imperial Bonaparte, or the day before with Royal Bourbons, or before that with the Royal Hapsburgs. History throughout the centuries has dictated our duty; it has fallen to the lot of the present generation once more to take up that task in the performance of which the men who were our ancestors died. It is for us, their descendants, to show that we, too, are fighting men, not unworthy of their reputation, ready, as they were ready, to cease to be dwellers in the kindly sunlight if so be the performance of our duty demand that sacrifice.

A century ago, after best part of a generation of perpetual war, we Islanders reaffirmed our mastery of the Narrow Seas. Many kings and peoples have disputed it with us, and we give credit to the Dutch for having for a moment wrested it from us. But for many a long year our proud claim in war has been that the British frontier is the enemy's coast. That means we claim the freedom of the high seas, and we have ever fought to pin an enemy in his ports. So now we must fight to keep open the food routes to our metropolitan isles and our trade routes to our Dominions, east and west. The sea paths of empire must lie open to us. The motto of England applies to what we have; we invoke Heaven's aid to help us hold our own—*Dieu et mon droit*. Our attitude towards the rest of Europe has been wholly unaggressive. It was only the unjustifiable acts of men avid of conquest upon our friends, and through our friends upon us, which have compelled us to act upon the motto of Scotland, *Nemo me impune lacessit*.

Mr. Redmond's remarkable words in the House of Commons have helped the world to realise that in the face of the German aggression, which is to overwhelm Europe in war, we, like the Romans in Macaulay's Lay, are almost in the happy position when none are for the party and all are for the State. The Nationalist leader has enabled a United Kingdom to face the foe, and, as when last we fought for the freedom of Europe on the fields of Flanders, the enemy has to deal with a Union Brigade.

The Cat of Fate is being very closely watched in Rome and Bucharest. Anxious statesmen in those capitals eagerly await an indication of the direction in which the celebrated animal proposes to jump. The Germans are prodding the beast with bayonets in hopes of influencing its action, and thereby that of their potential allies. Meanwhile "Wait and see" is the *mot d'ordre* of the descendants of Trajan, whether on the Dumbo Vitza or the Tiber. We may point out that it is but a step between a refusal to consider the terms of the Triple Alliance as binding in Rome and a determination to act as opportunity offers, even contrary to the interests of the discarded Allies. If a "Venetian policy" envisages the acquisition of Greek islands it can also be directed against the Dalmatian coast lands which, as was pointed out in THE NEAR EAST of last week, belonged for centuries to the Republic of St. Mark, and for a few years actually formed part of the Napoleonic kingdom of Italy.

At the moment of writing it is being asserted that the Government of Berlin has demanded the assistance of Italy under the terms of the celebrated Treaty which has hitherto bound the armies and navies of King Victor Emmanuel III. to the war chariot of militant Teutonism. The moment is ill-judged for demanding assistance—with menaces, as it is alleged—as Germany is almost universally considered as the outlaw of Europe, and will be treated as such. Should the truculence of Potsdam thrust the sword into the hands of yet another enemy and compel a fourth Great Power to fight against Germany and her ally it will be found that four of the Western nations who owe so much of their civilisation to Ancient Rome will be in arms to uphold

Digitized by Google

the Roman tradition of the supremacy of law in opposition to an onset of Germans from beyond Rhine and Danube who seek to establish the sovereignty of their sword, and affirm the barbarian conception of the dominion of force.

The action of the Porte in ordering a mobilization is as ominous as it is deplorable. The presence of General Liman von Sanders Pasha in Constantinople renders the renewed Ottoman military activity profoundly menacing in the present circumstances, and tends to give colour to the supposition that Germany, not content with measuring strength with us in the North Sea, intends to strike also, but by proxy, in the Levant. Our position as the chief Moslem Power is at stake, and it is essential that we should take definite and drastic steps to affirm our predominant position, and make it clear to all comers that that position is not to be shaken. It is to be feared, moreover, that the orders issued from the Seraskierate will be re-echoed among the neighbouring States, and that the Balkans will once more be plunged in war. The ambition of the Young Turks to recover Salonika, the cradle of their movement, may lead them once more to launch the legions of their Padishah upon the Greeks, careless of the Bulgarians, across whose Thracian provinces they are believed to be preparing to march.

Roumania has asserted that she intends to maintain the integrity of the Treaty of Bucharest. The Ottoman mobilization may mean that she is to be called upon to take action in support of her words. In view of the unenviable position of Bulgaria, it is idle to suppose that King Carol's Government can expect that country to resist the passage of the Turks in order to benefit the Greeks solely under threat of fresh Roumanian aggression on the Danube. Roumania may have an opportunity given her of wiping away the evil memories of yester year from the hearts of the Bulgarians. It may be that she will be called upon to pay a heavy price for her new provinces in the Dobruja in assisting her despoiled neighbours defend the Greeks, whom they detest, from the Turk, who appears to be upon the point of assailing the tottering edifice raised by force at Bucharest. A hegemony cannot both be gained and kept without effort. Roumania must be prepared to defend and enforce what fell into her lap last year, or it will pass to another.

The news, with which we deal more fully on another page, that two foreign banks in Egypt have closed their doors, would in ordinary circumstances excite but little attention as of political significance. In this case, however, it is asserted that an energetic propaganda has been directed from one at least of these establishments, a propaganda which was directed against British interests in Egypt. In view of what has occurred it is not surprising that the Germans should have endeavoured to undermine British influence in a country where it is of vital importance to us that no hostile interests should assail our position. We cannot afford to see a foreign Power astride of the Suez Canal, nor is it easy for us to tolerate the presence of conspirators against the peace of Egypt who shield their nefarious operations under the Capitulations with which the country is cursed. If it is solely due to the existence of the Capitulations that such attacks upon the welfare of Egypt, for which Great Britain is responsible, are rendered possible, then it is manifestly our duty to assist the Egyptian Government to rid itself of these obsolete and unnecessary entanglements.

The appointment of Earl Kitchener as Secretary of State for War, a step which was advocated in these columns last week, has had a highly satisfactory effect not only on home opinion, but also among our Allies. It is felt that his Majesty has been able to make an exceptionally happy appointment, and that the services of an experienced organiser of victory have been directed into that channel where they are most required at the present moment.

In view of the situation in Egypt and the paramount necessity of maintaining the influence of Great Britain in that country and our prestige in the Levant we are glad that it is not proposed that Earl Kitchener's absence from Cairo should be permanent. It is, however, a matter of the first importance that his *locum tenens* on the Nile should be an energetic and capable man ready to deal with any situation which may arise and fully equipped for the purpose. Proposals have been made that part of the Army of Occupation should be withdrawn for service in Europe, but to take such a step would be a blunder of the first magnitude. It is to be hoped, rather, that if any garrisons are to be depleted at the present juncture troops will be drafted into Egypt, and not out of it. To the lay mind it appears feasible that some of the Australian contingent might well be detailed for service on the banks of the Canal which unites them with the Homeland.

The countries of the Near East cannot fail to be affected by the state of war. Algerian ports have been attacked by the enemy, and the whole of French North Africa is in a state of mobilisation. A partial moratorium has been declared in Egypt, and martial law is now in force in Cyprus. In view of this it is to be hoped that in that island, as in Ireland, the voice of agitation will be stilled. The publication of the diplomatic correspondence reveals the fact that the enemy has designs—or had them—upon the Port of Salonika, and there are other indications that the Near East will not be so much "out of the picture" as British opinion was at one time inclined to expect.

Amid the crash of war and the perpetual rolling of the drums, if there be any sympathy left and to spare we may at least extend it to the Emperor Francis Joseph. This aged monarch seems to be faced for the third time in his reign with military disaster. The policy upon which he has embarked does not appear to have been his own, and it is due to the headlong megalomania of the Potsdam militarists that Austria-Hungary was put forward as the disturber of peace, and must now abide by whatever outcome the fortune of war may accord. We cannot think that His Imperial and Royal Apostolic Majesty will be able to ride back in triumph to Vienna, but at least the unswerving loyalty of so many of his peoples to his person and his dynasty will be a comfort, as in 1859 and 1866. Military experts seem inclined to doubt whether the Danube campaign was ever seriously undertaken or meant, but all allow that Servia has put up a creditable resistance, and is likely to prove a formidable antagonist to the Dual Monarchy when the time comes for her to take the offensive into Bosnia.

At a time like this, when those in peril on the sea are menaced also by ships of war and hostile airmen, many of us are feeling the keenest anxiety for friends and relatives embarked upon the Mediterranean, or on their way to or from the mail-ports of Europe which serve the Indian and Egyptian traffic. We know of many who have emerged upon our coasts pathetic jetsam—not of war—but of the mobilization which preceded it. We most earnestly confide that the Franco-British Fleets will prevent commerce-raiding in the Mediterranean and Atlantic, for while troops are assembling on the Continent the overland route is almost closed to passengers.

THE NEAR EAST.

THE NEAR EAST is on sale at all Bookstalls and Newsagents in the United Kingdom. Should any difficulty be experienced in obtaining the paper, readers will oblige by notifying the Manager. Abroad THE NEAR EAST may be obtained in:

LETTER FROM ATHENS.

(From Our Own Correspondent.)

Athens, July 29.

Sympathy for Servia.

The sore trials of Servia and the dangers threatening her have not only produced in Greece a feeling of profound sorrow, but have also given rise to the greatest anxiety. The bonds of brotherhood which have united the two peoples ever since they fought side by side, first against Turkey and subsequently against Bulgaria, are so strong that Greek anxiety on Servia's account at the present time is easily explained. It is obvious that on the coalition of all the States signatory to the Treaty of Bucharest depends the security of the territorial partition effected under that treaty. The weakening and ultimate exhaustion of Servia would necessarily expose all the States concerned to very grave dangers. Greek opinion is now chiefly interested on the all-important question of determining whether Austria merely desires to chastise Servia for what she regards as her unfriendly acts or whether she has designs on the territorial acquisitions of the Balkan States under the Treaty of Bucharest.

This trial has come to test the strength of the pact between the Balkan States of which the present territorial arrangement is the outward and visible sign. Of all the States concerned Greece is perhaps the most seriously affected by the prospect of the re-opening of the Eastern question in its most acute form. For her the trouble could not have come at a worse time, for when the storm burst Mr. Venizelos and the Grand Vizier were on the point of entering upon negotiations in which the existence of the Balkan necessarily exercised a dominating influence.

The ostensible causes which provoked the Austro-Servian conflict had no actual connection with the Balkan question proper, and as long as Bulgaria—either with or without Turkey—refrains from hostilities against Servia, the attitude imposed on Greece as upon Roumania is that of benevolent neutrality. It would appear also that the treaty of alliance between Servia and Greece imposes on neither party the obligation to come to the other's aid where the *casus fœderis* is not invoked. Servia has, at any rate, not suggested as much. The Greek Government, nevertheless, realizing that her moral obligations in this instance coincide with her material interests, has by diplomatic means spared no effort either at Belgrade or in Vienna to save her ally from destruction. If the efforts of the Great Powers fail to stop the war, Roumania and Greece—particularly Greece, by reason of her geographical position—must make active military preparations in order that they may be ready to meet any eventuality; and if Bulgaria mobilizes they must immediately do the same.

This unexpected complication which threatens to deprive Greece at any moment of her chief guarantees for security, and places in danger a part, great or small, of her recent conquests gives food for much reflection.

The Brussels Meeting.

The Austro-Servian trouble, which broke out directly Mr. Venizelos left Athens, and which has completely changed the Balkan situation, will in all probability prevent this meeting which had been arranged at Brussels between the Greek President of the Council and the Grand Vizier. Up to the time of writing Mr. Venizelos is reported to be still at Munich, having decided not to retrace his steps and abandon his project until the last hopes of a peaceful solution of the present trouble had been destroyed.

According to the most reliable information available, the principal question on which the discussions at the projected meetings would have turned would have been the possibility of arriving at a better understanding between the two States. To this end, Mr. Venizelos leaving Athens convinced that a league embracing all the Balkan States would have ensured the dissipation, at his interview with the Grand Vizier, of all the misunderstandings existing between the two nations, the relations of which have always been inspired far more by sentimental considerations, traditional hatred, and the like, than by a proper appreciation of the interests—material, political, and economic—which they have in common.

A tendency to favour such a *rapprochement* with Greece was noticeable among the Turks shortly after the proclamation of their Constitution. These friendly tendencies, it will be remembered, were warmly reciprocated in Greece, but the chauvinism of the Young Turks, and above all their irreconcilable attitude on the Cretan question, checked these good dispositions among the two peoples. To-day the question of the islands is the cause of discord, but it presents itself in a form which allows the Turkish Government to give in and submit to the decision of the Powers without risking its popularity, which would never have been possible when Crete furnished the question at issue. Now that the Greek population of the Asiatic littoral has been replaced by Turkish immigrants the Young Turks might, perhaps, find it easier to renounce their claim on the islands, since the danger they foresaw of the patriotism of the Greeks of the littoral being influenced by the proximity of islands under Greek government has now been removed. In exchange Turkey would gain the friendship and support of Greece in maintaining her territorial status, and would be assured of the possession of Thrace, which Bulgaria will never cease to covet. Greece, on the other hand, has no designs on the European possessions of Turkey, and only asks to be left in the peaceful possession of her recently acquired territories. Turkey has, in fact, everything to gain by a better understanding with Greece. Such an understanding would further relieve the two States of a terrible competition in naval armaments, which if allowed to continue might prove ruinous to both. But Greece may well ask, Are the Young Turks really capable of taking the broad view without which an arrangement between the two States on the lines suggested would be impossible? Unfortunately the declarations of Talaat Bey in the Chamber do not suggest as much. They seem indeed to justify the belief that the Turks are bent on continuing their present adventurous policy. In certain quarters it is suggested that one of the Great Powers (Italy and Austria are both suspect) is hindering Turkey from coming to an understanding with Greece. On the other hand, for reasons already explained, Greece cannot give way on the question of the islands. It would be only after a disastrous war, say the Ministerial journals, that Greece could consent to discuss that question. The Opposition Press expresses the conviction—a conviction shared to some extent in Government quarters—that Chios and Mytilene only constitute the first part of the Young Turk programme, and that if they should ever recover them it would only whet their appetite for a reconquest of all that Turkey has lost in Thrace and Macedonia. Consequently there was little reason for hoping that even if the two Presidents had met their conversations would have led to any practical results.

NOTES FROM THE SUDAN.

(From Our Own Correspondent.)

Khartoum, July 23.

Slatin Pasha's Wedding.

The announcement of Sir Rudolf Baron von Slatin Pasha's wedding has been received here with pleasant surprise, as it was generally believed he was a confirmed bachelor. It is hoped that his marriage will indicate a renewed lease of his stay in the Sudan, where his presence is invaluable, his unrivalled knowledge of the people, more especially of the Arab tribes, coupled with his perfect familiarity with the language, being unique.

As showing the esteem and affection with which Slatin Pasha is regarded, the following incident may be related:—When Mr. McLean, the well-known aviator, arrived in Khartoum in March last, after a harassing and strenuous flight, the Inspector-General (which is Slatin Pasha's official title) was one of the first to welcome him, and he was also one of the few passengers whom Mr. McLean consented to take for a short flight. This journey, which took place early one morning, was witnessed by large numbers of spectators, and the banks of the two rivers were lined with wondering sightseers. There were few who did not regard with amazement the "tair" (bird), which became the native name for the aeroplane. But few knew who was being carried as a passenger, and when it was eventually discovered that it was no less a personage than his Excellency himself there was something akin to dismay among the notables and sheikhs, who at once proceeded to take action. Within an hour or so a number of them met together, and were soon interviewing the Inspector-General about the propriety of risking his life in this way; and rumour has it that a promise was extracted that there should be no further flights.

The Late Captain Hobart.

Captain G. B. Hobart's death, which took place at Kassala on July 1, was very unexpected. He was Acting Governor of the province at the time, and had for many years been attached to the Sudan Government, doing valuable work as a civil officer. Captain Hobart belonged to the York and Lancaster Regiment, and was gazetted to the Egyptian Army in 1906. His death came as a great shock to his friends, who will always remember his devotion to duty, especially at a time when his health was never very robust.

Irrigation Service.

The post of the Inspector-General of Irrigation in the Sudan has been abolished, and the service is divided into three divisions. These are as follows:—The Blue Nile: This includes the Gezira Plain, where preparations are now being made for the irrigation of 100,000 feddans for the cultivation of cotton, and it will also embrace the river and its tributaries from Khartoum to the Sudan boundary with Abyssinia. This division will be in charge of Mr. L. N. Cooper, who will act as Director-General. His headquarters will be at Sennar.

The White Nile: This will extend from Khartoum to the Uganda boundary, and will be in the charge of an inspector, who will have his headquarters at Khartoum.

The Dongola Division: This will include everything on the main Nile and its branches from Wadi Halfa to Khartoum, and as a temporary arrangement Kassala and Tokar. The headquarters will be at Dongola and in charge of an inspector. The inspectors of these divisions will be directly under the Under-Secretary of State, Ministry of Public Works, Cairo.

Rains and the Prospects.

At the present time all eyes are anxiously turned towards the rainfall. It is difficult always to realise how much depends on the necessary rains. Without rain in abundance the very life-blood of the country is endangered, and a time then comes when there is but a thin dividing line between being able to exist and absolute starvation.

The Sudani has yet to be taught that in years of affluence he should put by for a rainy day, and until this first economical rule is obeyed the danger of lean years must always remain.

PUBLIC HEALTH OF EGYPT.

At a meeting of the British Medical Association, held in Aberdeen last week, Dr. A. F. MacCallan, F.R.S.S., of the Department of Public Health, Cairo, gave a contribution on "The Ankylostomiasis Campaign in Egypt." He said that up to a few months ago no serious effort to check the ravages of ankylostomiasis had been undertaken in Egypt, although a certain number of cases were being treated in the wards of the Government general hospitals and at the Church Missionary hospitals. In September of last year arrangements were made by the Department of Public Health, on the initiative of Lord Kitchener, to investigate the disease at a temporary annexe, and the annexe was converted into a travelling hospital in tents with beds for 100 patients. The hospital was inaugurated by the Khedive in the presence of Lord Kitchener on December 1, 1913, at Galiub, a town of 16,000 inhabitants about ten miles from Cairo. The number of ankylostomiasis cases treated up to April 30 had been 1,011; of these, 628 had been cured and 383 relieved. Every endeavour was being made by the Department of Public Health to make the campaign a successful one. The great interest which Lord Kitchener felt in public health was apparent in his report on Egypt for 1913, and it was due to him that a beginning had been made in the organisation of such measures of treatment and of elementary sanitation as would in the course of time lead to an enormous improvement in the present conditions, if not entirely free Egypt from ankylostomiasis.

Professor Sandwith said Lord Kitchener deserved great praise for his interest in the matter, and the organisation was a wise move on his part.

Professor M'Kerron, Aberdeen, gave his experiences of combating the disease in Jamaica and the West Indies; and Dr. Llewellyn Phillips spoke similarly with regard to the eradication of the worm in Egypt.

The Chairman said the papers showed the tremendous advance that had been made in the matter, and they were very glad to hear of the campaign that had been inaugurated by Dr. MacCallan. One looked forward to seeing great advantages being derived from it. He did not know how much of the money was going in the treatment of the disease. Sanatorium treatment for consumption was very good in its way, but they would have to come back to the primary cause, which was bad housing.

Dr. MacCallan said it was hardly possible to put the whole of the affected population through the somewhat expensive treatment, but they hoped in the course of time, if they were able to show sufficiently good results to the Government, to get larger grants of money, and in the course of the next ten or fifteen years they would be able to carry on a universal campaign throughout the Delta and half-way up towards Assuan.

Professor A. R. Ferguson, Cairo, read a paper on "Bilharzial Infection of the Spinal Cord."

JEWS IN ROUMANIA.

The Bucharest correspondent of *The Zionist Gazette* writes:—"The Union of Roumanian-born Jews have once more addressed a petition to the Parliament asking for equality of rights for the Jews born in Roumania. Following up this step of the Roumanian Jews, the Secretary of the Roumanian Culture League, Professor Bogan Duica, answers by a manifestation of an extremely exciting character, published in all the Roumanian newspapers, in which he expresses his thought that the Jewish question is a question of power, at the same time threatening that the slightest attempt at a solution of this problem in favour of the Jews would be answered on the part of the Roumanian population by a pogrom similar to the examples Russia has given. The Roumanian Government maintaining their unfriendly attitude towards the requests of their Jewish citizens, our friends will probably have to face not inconsiderable danger."

THE ELECTIONS IN AZERBAIJAN.

TABRIZ, June 15.*

The elections for the coming Mejliss have been finished long ago in all the provinces, except in Azerbaijan.

Some months ago Shuja-ed-Dowleh—either obeying an order of the Home Minister or trying to show that he is not an anti-Cabinet Governor—gave the Tabriz citizens permission to hold elections, choose their Vakils and send them to Teheran before the Coronation of Sultan Ahmed Shah. Those of the electors who believed in the sincerity of the Governor-General came to vote in large numbers; but when they arrived at the voting places, another party—opposed to elections and to "mashroota"—also arrived and began to disturb the regular process and progress of voting. This finally resulted in active hostilities between the two parties, the "Nationalists" and the "Royalists," and in fists, clubs, and Oriental bad language doing good service in causing black eyes, bleeding noses, and broken teeth to such an extent that the military and the Persian Cossack force were called out to separate the parties and restore order and peace. The result of this quarrel was that finally no elections took place.

Now, as permission was granted by Shuja-ed-Dowleh to hold elections, *how did the rioters dare to disturb them?* Did they act in such a "bold" manner of their own accord? If not, who sent them?

The excuse given for the non-participation of Azerbaijan in the elections was that "the *Mujtahids* of Nejef have given their *fetva* that the Constitution is opposed to Islam in its principles." I may observe that during the Constitution period these same *Mujtahids* had succeeded in finding some verses in the Koran to prove that the *Constitution is in harmony with the Koran and with Islam!*

However, this frank non-participation in the elections is much better than the so-called "elections" which have taken place in some parts of North Persia. Most of the members (vakils) "elected" by the people to uphold the Constitution are men of the most *mustabbid* (absolutist) type, men who own scores of villages and believe in the "divine right" of the landlord to do with his peasant subjects as he pleases, men who squeeze their far-away subjects to get all they can out of them. And the trouble is that these peasants themselves believe in the "divine right" of their landlords! And the new members, when they get to business, will do their best to further the interests of all those who believe in "absolute monarchy" and hate the Constitution. All this will be done actually in the Persian Parliament buildings and in the name of that Parliament; and these men are "elected by the people," because, in the beginning, they were wise enough to present themselves as believers in the Constitution!

The following official letters concerning the elections were exchanged between H.E. Mr. Orloff, the Russian Consul-General, and H. E. Shuja-ed-Dowleh, and have been permitted to be published in the *Jaridé-i-Islam*, a new weekly organ of the Governor-General.

I.

Letter of Mr. Orloff to Shuja-ed-Dowleh:—

"Be it known to his Excellency the highly placed, glorious, kind, graceful, noble, honourable friend,—

"The Foreign Office of His Imperial Majesty and the Legation of H.I.M. at Teheran have informed me that the great Government of Iran have ordered your Excellency to have representatives elected in Azerbaijan for the coming Mejliss. The great Government of Iran have the idea that the prosperity of the population depends upon the election of vakils in order that they may have talks (in Mejliss) and make remedies for the diseases of the nation.

"And they (the Persian Government) believe that if only they could have sincere and non-partisan representatives to look after the interests of the State, the Mejliss could liberate the country from its present anarchy and lawlessness by introducing law and order. And this step of the Government of Iran has been approved by the Government of the Emperor; and by their command I beg to inform your Excellency, in order you may take the necessary steps during the elections, so that nothing will hinder them and that the present fortunate peace may be preserved.

"Taking advantage of this opportunity, I express my respects."

II.

From Shuja-ed-Dowleh to Consul-General Orloff.

"Be it known to his Excellency the highly-placed, glorious, kind, graceful, noble, honourable, respectful friend,—

"Your honourable epistle No. 339 received and the contents noted. Regarding the elections in Azerbaijan, which you mention, I received a telegram from the glorious Ministry of the Interior some time ago, and also one recently. I have informed my friend before and now I will mention again to your honourable memory how grateful the people of Iran in general and the people of Azerbaijan in particular will be for some law and security of religion.

"In foreign lands the constitutional régime confirms the customs, manners, and characteristics of that nation, but, on account of personal hostilities, ignorance, lack of (military) power, actions of the wicked, the evil-minded, the trouble-makers, and the lovers of disturbances during these few years, the unfortunate people of Iran have seen exactly the opposite. The orders of the Government have not been obeyed, and the laws of faith and of religion have been laughed at. The ulema and the chiefs of religion, who were an obstacle, were hanged! In Tabriz and around it the "insurgents" killed over 20,000 people, and the houses of *Mujtahids* and the honourable Ulema were destroyed and looted and they themselves were murdered. And how much property, belonging both to foreign and Persian merchants, was looted by the Karajadoghli and Shahsevan tribes! Both the Russian and the Persian Governments spent large sums of money in compelling these tribes to return their stolen goods and the Government taxes which they had refused to pay for seven years.

"For over five years the commerce of Azerbaijan was asleep; roads were blocked, security of person and property were gone, and the people were in want of one night's bread.

"And now that the Grand Imperial Government and the Grand Government of Iran command me to begin the elections, there is no way of escape but to surrender! But I must make known to you what I think necessary for this purpose (for elections) until we see what will happen later on.

"It must be kept in mind that some of the people of Azerbaijan, especially the tribes of the frontiers, understand the meaning of mashroota as they did before. As soon as they hear the word "mashroota," they will again expect to act as they acted formerly—make trouble, kill and loot, damage the person, the honour, and the property of people, and do harm to the rules of faith and disturb all the law and order of the country! Considering all these things, the elections can take place only on certain conditions:—

(1) "To prevent all these troubles and disturbances, especially the disturbances of evilly disposed persons in this city and the unruly tribes of the frontiers—and more particularly of the atheists who are continually trying to hurt the Islamic faith and religion—we shall need an army of 5,000 men, infantry and cavalry, chosen of the people of Azerbaijan, some of whom shall remain in the centre (in Tabriz) and the rest be sent to the provincial towns, according to their size and need.

(2) "The first condition for those who are willing to be elected as Vakils in Azerbaijan is that they must see to it that not a single word is spoken (in the Mejliss or outside) against the Moslem faith and against the command of the great word of God. Not a word against the holy Koran and its commandments. As soon as a word against our Jaafari faith is spoken and they do not condemn it they must consider themselves as having resigned the Vakilship of the people of Azerbaijan. For the whole fear of the people is from this infidelity which might creep in.

"During the first mashroota the first point of 'Ganoon-Asasi' (the fundamental law) was to protect the Jaafari faith; but as soon as 'men of known character' crept into the business and took charge of State affairs, the first thing was to deny their faith, criticise our religion in newspapers, and write books[1] against Islam!

"No one can show a nation on the face of the earth where the people, after having 'mashroota,' should change their national religion for some other religion. Disturbance-lovers and others who, during mashroota, were in charge of the State affairs, became infidels, and also compelled the people to deny their religion, and the Government had no (military) power in Azerbaijan to punish these disturbers and mean persons.

(3) "At present our kingdom is independent in name only.

(4) "As long as no order and security have been established in Azerbaijan and the neighbouring Powers (Russia and England) will not testify to that effect, Azerbaijan will have to be governed as at present—by military law.

(5) "Absolute safety of person and property must be guaranteed to the representatives in all respects.

"With all these precautions, again, *it will never work!* For mashroota should be by the will of the people, and the great majority of the people of Azerbaijan will never want mashroota, unless it be by the orders of the Governments of Russia and Persia!

"And the small force of soldiers which I have mentioned to my friend certainly will not be considered any too large, *nor* (will it be thought) *that I would desire to take a contrary step.* For if the old books in Teheran and Tabriz be consulted, it will be seen that during the reign of the martyr

* Delayed in transmission.

(1) The book referred to by Shuja-ed-Dowleh is "Sehol-Nabi," published in Teheran during mashroota, which criticises the life and doctrines of Mohammed.

Digitized by Google

King Nasr-ed-Din Shah, as well as during the kingdom of Moozaffar-ed-Din Shah—may he have his habitation in the light of God!—when there was not the slightest disturbance anywhere, there was always in Azerbaijan an army of 6,000 men, both infantry and cavalry, ready for service. At present; with all these disturbances, there is in Azerbaijan no army worth mentioning!

"Taking advantage of this opportunity, I express my respects.

"SHUJA-ED-DOWLEH."

Shuja-ed-Dowleh also sent a long telegram to the Minister of the Interior, informing him of the contents of the letter of the Russian Consul-General, and of his reply, and the five conditions which he had proposed to the Consul-General as absolutely necessary during and after elections. He made an excuse for not replying to the former order of the Home Minister by saying: "I made a few suggestions to you (after receiving your order for elections), but you took no notice of my suggestions; hence, I left your orders for holding elections without a reply."

MIRZA FIROOZ KHAN.

TANGIER TO TEHERAN.

The amazing rapidity with which events have marched during the last fortnight is, as it were, put on record by the August magazines and reviews. Most of them contain articles which touch on the situation created by the assassination of Archduke Francis Ferdinand. But between the writing and printing of the articles events took place which falsified many prophecies and judgments. One writer committed himself to the statement that "it seems unlikely that the murder of the Archduke will lead to war between Austria and Servia." The others are all in the same boat. But in this amazing whirl of events even less deliberate contemporaries are liable to be out of date when published.

***

It is remarkable what a change was effected in public opinion over here by the German invasion of Luxemburg. Not only did it irritate those who had purchased cheap tickets for holiday tours through the Ardennes, Luxemburg and the Eiffel, but it gave even lawyers food for thought. Many folk thought it unkind (to say the least of it) to the young and pretty Grand Duchess; others began to realize that Germany, in spite of the assurances of the "Potsdam Gang," *was* capable of an aggressive act. It must have been a sad blow to professional pacifists—and I gather that many of them shed bitter tears because in defending, or avenging, the neutrality of small and weak States in the Low Countries, Great Britain has to find herself in the position, odious and monstrous in the eyes of the preachers of peace-at-any price, of standing by our friends in the hour of need.

***

Writing as a Scotsman, I cannot help wondering what we of North Britain can have done to deserve these constant attentions from persons of High Dutch extraction. Time was when we Scots clung to the fortunes of a fallen family, and many of us were greatly vexed in consequence by Kings from Hanover. In those days we made an uncomplimentary song about the Parliamentary Sovereigns who ruled over our heads but not our hearts. That was lang syne, and now King Geordie holds King Jamie's place in our affections and is rightfully seized of the Honours of Scotland; but it has come upon us that with high hearts we must go forth once more to war to show another "wee, wee German Lairdie" who seeks to come out from "his ain kailyairdie" and take his neighbours' fields, that, as of old, "oor braw thistle will jag his thumbs." We of the North never loved dragoons—least of all German ones—and many an old memory will stir as the claymore of Scotland leaps from its scabbard.

***

I am told that many diplomatists are greatly shocked that the present conflict should have broken out before the Balkan War had been entirely concluded. No Treaty of Peace has yet been signed between Montenegro and the Porte, but for some time past it is believed that an armistice has been respected by both belligerents. In any case, it must be gratifying to King Nicholas to find himself at war simultaneously with two, if not three, Emperors.

***

Of late years the medical profession has paid considerable attention to the historical factor in disease, with a view to discovering any useful formulas regarding the prevalence or recurrence of epidemics. In this connection Sir John Bland Sutton's address to the members of the British Medical Association in the Mitchell Hall, Aberdeen, on July 30, is of considerable interest. He took for his subject the comparison of old and modern methods of surgery, and in the course of his speech referred to the theories that now obtain concerning the plagues of Egypt. His remarks form an apt illustration of the devastating effect of the application of common sense to the so-called miracles of ancient times. Viewed in the light of modern knowledge, he declared, it was a reasonable hypothesis to assume that a dust storm killed the fish and drove the frogs to take refuge on the land. The dead fish and frogs would prove excellent breeding-places for flies, and they would naturally hatch out in myriads. The last plague was the death of children, and this was probably due to the flies, coupled with an intense heat wave similar to that which oppressed Cairo in the spring of 1909.

***

The "bad language" of the West is usually very bad indeed, by which I mean that it is very poor stuff. When it is not utterly silly, it is generally foul beyond expression, but *merely* foul, not "terrible," as it is sometimes called; and though it is sometimes relieved by humorous touches, of the conscious kind, it is far more likely to run to mere vulgar abuse. The "bad language" of the East—or, at any rate, of the Near East—on the other hand, is often excruciatingly funny, though the individual using it is never aware of it, and yet at the same time, compared with Western "langwidge," it does seem to be extremely efficient. I have seen a quite peaceably disposed muleteer, stung to blazing, raging, mad anger by a single word spoken, quietly enough, by a zaptieh; and I know that a good many men who have travelled in Turkey, Persia, and Egypt are of opinion that Arabic is the "finest of all languages for cursing a man in." But I must admit that when I read Mirza Firooz Khan's description of the fight between Constitutionalists and Reactionaries at Tabriz I was indeed surprised to learn that Oriental profane language could actually be responsible for the loss of teeth—at least, in the way that Mirza Firooz's epistle seems to imply. It must indeed have rasped like a file!

***

The Concert of Europe! International Law! Phrases emptied of meaning in face of the grim realities of to-day. The mailed fist has swept aside all pretences that as between nations there is any law but the will of the stronger. In the report of the Executive Committee of the Balkan Committee for the years 1912-13 it is stated that the records "show that its policy had been a consistent demand for the intervention of the Concert of Europe—a demand based on a recognition of the responsibility of the Powers under the Treaty of Berlin for the evils resulting from the restoration to Turkish rule of the territories and peoples that had been rescued from it by Russian arms." Recent events have charged those words with unconscious irony. The Great Powers assumed a superiority over the quarrelsome little Balkan States. Now, where is this vaunted superiority? But it will probably be remarked by the future historians that the relation between the Balkan Wars of 1912-13 and the Great War which broke out in 1914 was that of cause and effect. The report refers later to "the futility of action by the Concert of Europe." The jealousies which were responsible for that "futility" have now precipitated the European nations into a terrible and ruinous war.

***

I have just read in an Egyptian paper a curious story about an attempted burglary at Assiout. It is to the effect that a respectable householder, hearing a noise, went in search of the explanation thereof, and found it—in the form of "a harried skeleton, stark naked and immovable." After reading this horrible description, which is surely worthy of the late Guy Boothby, I expected to find the curious householder in hot retreat. But, no! He "did not believe his eyes," the sceptic!—so "raised his candlestick over his head to get a better view." And *then*, finding that "it was a living creature, entirely naked, who regarded him with a fixed and piercing gaze," the investigator, having paid the tribute of one "horrified shriek" to the conventionalities, locked the apparition in the room and called in the police. The "skeleton" proved to be the chief of a band of robbers who had intended burgling the premises of the National Bank, which were next door; but he proved game enough to refuse to give his associates away. To me the strangest part of the story is that the writer asserts that in the (Egyptian) provinces it is a common trick of burglars to pursue their operations in a state of nudity "in order to make their victims afraid by pretending to be the devil in person." I could understand the indelicacy if it were practised in order to avoid giving any hold to an indignant householder who might come to grips with the burglar; but to picture even the timid Fellah as being paralysed with fear on seeing "a stark-naked man, making horrible grimaces, in the dead of night," is rather difficult. Is the writer of the story sure of his facts? Or is the practice borrowed from countries further East, and do the robbers rub their bodies with oil? Perhaps some reader in Egypt can tell me. I never heard of such practices in any of my visits to the country.

A BALKAN WAR INQUIRY.

THE REPORT OF THE CARNEGIE COMMISSION.

Inter armis silent leges. Whilst Europe quivers in anticipation of an approaching conflict in comparison with which the recent war in the Balkans seems trivial, it is no time to be discussing who did most or least to offend the susceptibilities of an age which had hoped that war had forgot most of the barbarisms of the past.

And yet, in mere justice to the Dotation Carnegie, and to the one Balkan people which opened its archives, and its territory, to the inquest which all had professed to desire, it is well to chronicle *en passant* the appearance of the Report of the Carnegie Commissioners.

And the first thing one asks is: What is it doing here and now? Why did it not see the light last Christmas? The labours of the Commissioners were concluded in October; why this discreditable and unexplained delay? Why, again, is the French version, the only one yet "published," so difficult to obtain? We have found it impossible to get it through our bookseller. A fortnight back and the London Press had received no copies; the Bulgarian Legation had a single volume, and could obtain no more from Paris. Members of the Balkan Committee were equally destitute.

When the English version will appear seems quite uncertain.

Upon a cursory examination of the text two or three things stand out saliently, to wit, that while no nation or army was wholly guiltless of infringements of the laws of civilized war (and, when in the past, has any army of any race been wholly guiltless?), the degrees in which the combatants offended are widely different.

The commissioners regard the facts as established beyond any reasonable doubt that about *one hundred and sixty villages and towns* in what was Bulgarian Macedonia, and is New Greece, were deliberately destroyed by the Greek army during July, 1913, for the most part without any military necessity whatever. Also that this appalling ravage was done upon a system, and in accordance with orders, or at least after the issue of a General Order by King Constantine inculcating revenge for alleged Bulgarian excesses, which apparently at the time of the issue of the proclamation had not taken place.

They also regard the much-controverted "Intercepted Letters" as genuine documents. They publish facsimiles of some, and have handled and examined many others, and are perfectly assured that there is no ground for holding them to be forgeries.

Readers of THE NEAR EAST will remember that in these artless self-revelations by Greek soldiers, who address members of their families at still-existing addresses in Athens, Alexandria, Milwaukee, and scores and hundreds of other places, and who sign their names to the letters, which bear the Greek field-postmarks, the writers glory in having burnt multitudes of villages according to order, whilst some gloat over scenes of torture and violation.

If the present writer may venture upon a single expression of criticism of a work which must have been difficult in the extreme, and repulsive beyond measure, it would be in the too-great credit extended by the Commissioners to the allegations of the awful Ashmead Bartlett letter in *The Daily Telegraph* of August last.

It does not appear that the Commissioners visited Adrianople. If they had done so, the topographical details of the letter would have been so out of accord with what one sees as to give them grave doubts as to whether the alleged "Russian Official" (since disavowed by Russia) has any personal knowledge of the city since the siege. Writing from my own experiences in Adrianople within ten days of the storm, and from my observations of the surrounding country, I cannot recognize the descriptions or collate the facts.

H. M. WALLIS.

MILITARY SERVICE IN PALESTINE.

(FROM AN OCCASIONAL CORRESPONDENT.)

JERUSALEM, July 20.

A regular state of terror prevails in Jerusalem, on account of the military service rules just now coming into effect. Everyone from the ages of twenty-one to thirty-five is liable for service, and neither money nor excuses are accepted. A man who paid £T30 less than two years ago has just been called again, and as he cannot pay (even if it were of any use), he must leave the country. Just now hundreds are being summoned for fourteen days' training; but everyone is terrified, as last time the training cry was raised the men were forced to stay on for three and even six months' service. Absolute uncertainty prevails everywhere, and the deepest mistrust of the Government. The Greek Patriarch has been summoned to give up 250 monks within his Patriarchate (Greeks by race, but Ottoman subjects) for service. Last week 125 young men, Christians and Moslems, tried to escape, but many were discovered, and detained in Jaffa. This morning thirty-two are reported to have got away. The land is fast becoming depopulated, and the remnant left simply do not feel it worth while to do much in the way of cultivation of the ground, or of trade.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

OTTOMAN ASSOCIATION MEETING.

To the Editor of THE NEAR EAST.

Sir,—I do not know from what source you secured the report of the annual meeting of the Ottoman Association, but I emphatically protest against a phrase which is put into my lips, "that influential papers should be purchased for the purpose of the Association." I never said anything in the world of the kind, as anyone will tell you who was present at the meeting, and, in any case, the words in question are ridiculous.

The suggestion made to myself was that I should arrange for the compilation by English experts of pamphlets or articles dealing with the commercial resources, development, administration, and so forth of Asia Minor, on the lines of similar articles published in English newspapers in connection with Russia, the Argentine, Canada, Spain, and other countries. The further suggestion that such articles should be paid for by the Turkish Government at the rate of £15 each was made by another gentleman entirely without my knowledge. The proposal, as a matter of fact, fell through, but, in any case, it was made to myself privately as a writer interested in Nearer Eastern problems, and had no concern whatever with the Ottoman Association.—Yours faithfully,

E. N. BENNETT.

July 31, 1914.

[Our report was prepared from shorthand notes made by a News Agency reporter, but, of course, we accept Mr. Bennett's disclaimer, and apologize for any annoyance that has been caused him by the reporter's slip.—ED.]

THE HAIFA VICE-CONSULATE.

To the Editor of THE NEAR EAST.

Sir,—I fully agree with "Interested Onlooker's" comments on the Haifa Vice-Consulate, published in your issue of the 10th instant. I may further add that the Vice-Consulate leaves a good deal to be desired. It is the generally accepted view that British representatives in Palestine are either inattentive or indifferent to her prestige and trade interests in this locality.

The Vice-Consul's prolonged absences have been continual during the past year. During his absence the duties are ordinarily vested in the hands of the Acre Dragoman, who, besides being ignorant of the English language, is not conversant with consular business, being a mere honorary Dragoman. In consequence, he is not authorized by the Vice-Consul to perform notarial work, a circumstance which causes considerable inconvenience, not only to British trade interests, but also to people who may be either directly or indirectly concerned in the affairs of the consulate.

People who have the welfare of British interests at heart will undoubtedly agree with me that the time has come for the proper authorities to look into this vital question.—Yours, etc.,

Haifa, Palestine, July 22, 1914. "OBSERVER."

MEDITERRANEAN SQUADRON AT CYPRUS.

A Larnaca correspondent sends us the following particulars of the British Fleet's visit to Cyprus:—

The British Mediterranean Squadron arrived in Cyprus on July 10, the units being divided as follows:—"Famagusta," fourteen destroyers, and the cruiser "Blenheim"; Larnaca, the flagship H.M.S. "Inflexible," with Admiral Sir A. Berkeley Milne, K.C.B., on board, in command; the battle cruisers "Indomitable" and "Indefatigable," the cruisers "Dublin" and "Gloucester," and the torpedo-boat "Harpy," and the admiral's yacht the "Hussar." Three cruisers were sent to Limassol and one to Papho.

Friday morning was occupied in visits by the Commissioner, leading officials, and Consuls. In the afternoon an At Home was given by the Commissioner and Mrs. Wodehouse in St. Lazarus Gardens, which was largely attended by officers from the Fleet and the general public. On Saturday a most successful dance was given by the members of the Larnaca Club, which was attended by Admiral Berkeley Milne and many officers and most of the leading officials, residents, and their families. Dancing took place on the tennis court and was kept up until the early hours of the morning. The buffet and supper arrangements, which had been supervised by Mrs. Patrick, were universally admitted to be the best ever provided at any entertainment in Larnaca.

On Sunday the massed bands played in the Square, by kind permission of the Admiral, and the music was thoroughly enjoyed by the many people who were promenading there.

On Monday afternoon his Excellency the High Commissioner and Lady Goold Adams arrived by motor from Troödos. They at once proceeded on board the "Hussar" and were received with a salute of eighteen guns. The pier had been prettily decorated and was illuminated at night, and this, together with the searchlights from the Fleet playing on the town, attracted great crowds to the Marina. The same night a concert in aid of the Larnaca Hospital was given in the Pathé open-air theatre by the combined theatrical parties of the Fleet, accompanied by the band of H.M.S. "Indomitable." The entertainment, which was under the direction of Lieutenants Acland and Corbett, was pronounced the best ever put before a Larnaca audience. About eighty officers and 250 men from the Fleet attended, and the gross proceeds amounted to about £28, resulting in a handsome balance being handed over to the hospital.

On Tuesday a reception was given on board the flagship in the afternoon, which was largely attended and much enjoyed. On Wednesday morning the Fleet left for the Syrian Coast, and H.E. the High Commissioner and Lady Goold Adams landed from the "Hussar" and proceeded by motor viâ Limassol to Troödos.

THE PRESS ON THE NEAR EAST.

The Condition of Albania.

To the current number of *The Nineteenth Century* Mr. Anthony Dell contributes a profoundly interesting article on "Some Recent Experiences in Albania." As a special correspondent of a daily contemporary he traversed Albania from north to south, and his testimony to the condition of the country is therefore specially worthy of attention. With reference to the Catholic tribesmen of the north he writes:—

The Malissori are poorer than the Mirdites. They have never had a prince or leader, and have fought among themselves, burnt each other's houses and crops, raided each other's cattle, till it is a marvel how they manage to live at all. The Mirdites, on the contrary, have their Prince—Prenk Bib Doda—for whom and for whose family they have unbounded respect. They have also the advantage of possessing in the Abbot of Oroshi—Monsignor Doci—one of the most enlightened men in Albania. Exiled from Mirdita with Prenk as a young man, Doci travelled in Europe, America, and India, and when he came back to Mirdita as the mitred abbot of Oroshi he introduced an European energy into that corner of Albania which made it a little oasis of civilisation in a Turkish desert. . . .

Anarchy in Mirdita is tempered by the influence of the Abbot and of Prenk, who is said to have almost exterminated the blood feud in his territory. In Malta it still rages unchecked.

Mr. Dell shows that the Mpret's present difficulties are with Mohammedan Albania:—

Albania of the south was, until the present troubles, well on the way to becoming an up-to-date State as far as the towns were concerned. Albania of the north was, and is, in a state of complete barbarism, from which, however, it might be wakened in the course of a generation, such is the natural intelligence of the people. But there is also a third Albania—Mohammedan Albania—which occupies all the central part of the country. Here the influence of the priest or hodja is paramount, and is an influence directed against reform of the old Turkish *régime*. In the demand for roads and railways, for unsectarian schools, and, above all, in the demand for the Latin alphabet the hodjas detect the trail of the Christian. The Prince is Christian, and many of his counsellors are Christian, whereas Albania, as they say with truth, is Mohammedan, and has a right to a Mohammedan *régime*. It is this third Albania which is now menacing Prince William's throne.

It will be recalled that Mr. Dell was captured by the Insurgents and held prisoner for some time at Elbasan. He gives an amusing account of his experiences and his intercourse with his captors:—

Discussion of the political situation was rather difficult, but I was given very clearly to understand that Turkey was good and all other countries bad. When I was allowed to sit on the balcony where the Turkish flag was flying men would come and point to it, saying "Osmanli good; Prince of Wied bad." Their distrust of the present *régime* seemed to be centred in antipathy to the Prince. But as I watched the new Government being set up in the town on the ruins of the old, and saw how the new officials were conducting their work, it seemed to me that the issue was a far greater one than the unpopularity of the Prince. Prince William's *régime* is European, or is in danger of becoming so, now that Essad Pasha has gone. The *régime* that the insurgents set up in Elbasan was Turkish. Ex-gendarmes, wearing Prince William's uniform, pinned a star and crescent badge on to their arm when they took service with the rebels. Coffee and cigarettes were brought to every person of quality who came to transact business at the Prefecture. The officials wrote in Turkish on scraps of paper held in the palm of the left hand while they sat cross-legged in their chairs. The hateful Frankish "do it now" system had been swept away, and the old Turkish "wait till to-morrow" *régime* re-established.

Albania has been a prey to foreign intrigue, and as an example of its methods the writer states that "the man who was leading the rebels in Elbasan was an agent of the Young Turks," and "when I was captured the Young Turk agent advised me to say I was Italian, because, as he said, 'Italy is our friend.'"

The Late Archduke.

In the current number of *The Contemporary Review* there appears a noteworthy article on "The Archduke Francis Ferdinand" by Dr. Seton Watson. An able estimate of the late Archduke's character, policy, and aims is given. We quote below:—

Time after time in recent years journalists have discussed the question whether Francis Ferdinand was Slavophil, Roumanophil, Magyrophobe. All such speculation was on utterly wrong lines. From first to last his policy never wavered; it was neither German nor Slav, but simply Hapsburg. He weighed men and tendencies in a dynastic balance, and accepted or rejected them simply as they rose or sank in the scale of dynastic interests. He has often been accused of hatred of Hungary, but this charge was based upon a misconception. With a true instinct he realised the dangers threatening the Monarchy and the dynasty from the oligarchical clique which has so long been permitted to control the destinies of Hungary. He made no secret of his disapproval of Magyar racial policy, and he is believed to have expressed himself on the subject in no measured terms to at least one prominent Hungarian statesman. On the other hand, he showed his sympathy for the Slovaks, Roumanians, and other nationalities of Hungary by maintaining close touch with their political leaders, whom he more than once received in private audience. But there is good reason to suppose that he distinguished carefully between the corrupt and chauvinistic oligarchy and the Magyar people as a whole, and fully realised their innate possibilities as one of the strongest bulwarks of Hapsburg rule as almost the only race in the Dual Monarchy which has no future to hope for beyond the existing frontiers.

The writer's remarks on the alleged Servian complicity in the assassination are especially important. He writes:—

Those who seek to establish a connection between the murder and the "regicides of Belgrade" are on a false scent. It is but the latest—the most infamous because the most successful—in a series of political crimes, of which all the authors without exception were Croat or Serb subjects of the Habsburg Crown. The attempt of Zerayitch upon General Vareshanin, the Governor of Bosnia, of Jukitch and Planinshtchak upon the dictator Cuvaj, of Doytchitch upon the present Ban of Croatia, Baron Skerlecz, were merely symptoms of a discontent which is universal, and which will grow deeper and fiercer unless Vienna and Budapest apply themselves to a radical solution of the Southern Slav question. Bosnia, Dalmatia, and Croatia are a seething pot which needs no stirring from outside; the initiative lies within. The furious language employed by the German-Austrian and Magyar Press against the Serbs, and their arrogant abuse of Servia, was only too comprehensible in the days immediately following the murder. But calmer reflection ought to show that while a connection between the assassins and Belgrade has been definitely established, it is as absurd to accuse official Servia of complicity as Italy of inspiring the Irredentist assassin Oberdank in 1886. The coffee-house politicians of Belgrade may denounce Austria-Hungary as the arch-enemy, but all responsible Servian statesmen are fully aware of the urgent necessity for improved relations between Servia and her great neighbour. This hideous crime not merely accentuates tenfold all causes of friction between them, but is calculated to revive in Europe the not unnatural prejudice against the "nation of regicides," and renders the lot of the Serbs within the Monarchy more unenviable than ever.

THE PRESS ON THE WAR.

Turkey and Egypt.

The Express understands that the Turkish mobilisation is not directed against any of the Balkan States, but has Egypt as its objective. The advance is to be through Syria, and use will be made of the various recently constructed railways. The railway to Mecca will especially aid in a rapid transport of Turkish troops towards the Egyptian frontier, while the various forces in Arabia will be transported to the north. The Khedive is now in Constantinople, and is not over-friendly to Great Britain. Enver Pasha, the Turkish War Minister, is a pro-German. He has whipped up the remnants of the Turkish army into a respectable fighting force. There are now something like 200,000 Turkish troops available for any enterprise which this ambitious young man—egged on by Germany—may care to undertake. A large proportion of these troops are already in Asia Minor.—*The Daily Express* (August 6).

The Aims of Germany.

Germany aspires to supremacy, and to supremacy as complete as that claimed by Napoleon. She would have all the other Powers her subordinate allies. She would drag them all in *Schlepptau* in her wake. She would endow them with independence indeed, but independence of the kind which Prussia enjoyed after Jena or the South German States when Napoleon bestowed crowns upon their princes as the reward of their complaisant subservience to his mandates. Her present conduct to Belgium is the measure of her ideas of the independence of others, as it is the measure of the trust that can be reposed in her plighted faith.—*The Times* (August 6).

The Spirit of the British People.

Now that the nation realises what are the issues at stake, there is no hesitation and no weakness. The fervent and stubborn patriotism of the British people has asserted itself in the most unmistakable fashion. . . . It is preparing to face what lies before it in a grave, sober, and steadfast spirit. It is under no illusions as to the nature of the contest on which it is entering. It knows that its whole heritage, indeed its very existence, is at stake. It is well aware that even the most complete victory will entail heavy losses, great hardships, cruel sufferings for all classes of the community. But it is doggedly resolved to endure all sacrifices in order to uphold the honour of the Flag and maintain the integrity of the Empire.—*The Morning Post* (August 6).

The Duty of Great Britain.

The British nation is always at its best in a war crisis. What is, or at any rate what appears to be, apathy or indifference in small things turns in great matters to coolness and steadiness. There are, of course, here as elsewhere, in all times of crisis, doubts, hesitations, anxieties, and confusion, but these are superficial. What is fundamental, what is the essential, the dominant note, is the determination to keep at all costs a straight course. Translated into terms of the present crisis, this means that the British people are going to maintain the pledges which they have given to others by deed, if not by actual word. They are going to do what they have openly and clearly allowed others to expect they will do—they feel their obligation to be just as sacred as though it had been set down on paper and sealed with a hundred seals. Our duty is to stand by our friends, and we shall stand by them, be the burden never so heavy. But though duty is a sufficient consideration, it is not immaterial to remember that even if we were in no way bound in conscience and honour to stand by France and Russia, we must stand by them in the last resort merely from motives of self-interest.—*The Spectator* (August 1).

The Great Illusions.

The great illusions of well-meaning English pacifists and the honest anti-Russian fanaticism of English Radicals were called in aid of the widespread sympathy which all Englishmen must feel for the finer aspects of German culture, whilst in the background lurked the less reputable influences of German cosmopolitan finance. Englishmen, knowing their Imperial Germany better, hesitated rightly enough to hamper the desperate efforts of British diplomacy. They could, indeed, afford to remain silent, being convinced that in the end Germany herself would betray the true inwardness of her purpose.—Sir Valentine Chirol in *The Times* (August 5).

FRENCH NATURAL SPARKLING TABLE WATER.

"The Champagne of Table Waters."

KEEPS YOU FIT.

HOT CLIMATES.—Perrier, now famous all over the world, is the ideal drinking water for hot climates. Its delicacy and vigour stimulate the digestion and brace up the system.

P.C.B.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

Haifa Vice-Consulate. July 30.

Sir J. D. Rees asked whether the British Vice-Consulate at Haifa was to be raised to the level recently attained by the consulates of other Powers at that place.

Sir E. Grey: As at present advised I see no reason for altering the present status of the post. I understand that the fees received at this post were only £30 last year, which does not justify a salaried appointment.

Parcel Post to Persia.

Answering a question put by Sir J. D. Rees, who asked for a cheaper parcel post to Persia, Mr. Hobhouse said: In the absence of a parcel post agreement between this country and Russia, the parcel post with North Persia can only be conducted through the intermediary of some third administration having agreements both with this country and Russia. The present service is carried on between the United Kingdom and Germany, all parcels being forwarded to Germany for onward transmission by such routes as Germany employs for her own service. Negotiations for an agreement with Russia have been in progress for some time past, and, in the event of their successful issue, it would probably be possible to set up a parcel post by way of Liverpool and Batoum. I fear, however, that such a service would serve no useful purpose. Apart from the consideration that it would be very slow and infrequent, as compared with the present daily service over the overland route, the postage on a parcel of the maximum weight (11 lbs.) sent by the suggested route would be actually higher than that on a similar parcel sent by the existing route.

Suppressed Newspapers in Egypt. August 4.

Sir William Byles asked whether the Egyptian Government had allowed *Wadinnil*, one of the suppressed papers, to reappear without giving any reasons for such exceptional treatment; whether the Egyptian Government intended to consider the case of other suppressed newspapers; and whether instruction would be given to his Majesty's Agent and Consul-General in Egypt so to modify the Press law in that country as to enable newspapers to defend themselves in open trial before suppression.

Mr. Acland: I am making inquiries as to this case, and will inform my hon. friend as soon as possible.

Banned Egyptian Paper.

Sir William Byles also asked whether Mr. Kyriakos Mikhail, who represented the Coptic cause in this country some time ago, had been refused permission to start a newspaper, and, if so, why?

Mr. Acland: The fact is as stated by the hon. member. Mr. Mikhail applied for permission to publish a newspaper in two languages, but his application was refused, as no such publications are allowed by the Egyptian Government.

The Egyptian Frontier.

Sir J. D. Rees asked whether an arrangement had been concluded between the Italian Government and the Senoussi, of the Djarabub and Kufra Oases, and whether there was a prospect now of the delimitation of the Western frontier of Egypt being undertaken.

Mr. Acland: I have no knowledge of such an arrangement, and there is no immediate prospect of the delimitation in question being undertaken.

The Anglo-Persian Oil Contract. August 5.

On the order for the third reading of the Anglo-Persian Oil Company (Acquisition of Capital) Bill,

Mr. Gretton (Rutland, Opp.) asked for an assurance that the Treasury felt justified at the present moment in issuing bills for the money required for the purposes of the Bill.

Mr. Montagu (Cambs, Chesterton) said the Bill was being passed in pursuance of an agreement already made and assented to by the House. There is nothing in the situation, he added, which would justify us in withdrawing from our obligations.

The third reading was agreed to.

MAILS TO THE NEAR EAST.

On inquiry at the General Post Office yesterday morning our representative was informed that so far there had been "no interruption in the dispatch of mails to the Near East," but that the uncertainty for what the near future will bring in its train may compel the postal authorities at any moment to refuse acceptance of letters for each or any mail.

"The main point to be borne in mind by English correspondents," remarked an official to our representative, "is that, whilst we dispatch mails as best we can in accordance with scheduled time, we are in doubt as to whether letters, newspapers, and other communications will ever reach those to whom they are addressed. In any case, there is bound to be considerable delay in the delivery consequent upon the necessity of sending mails by sea instead of overland. No advice or notice will be issued to the public either as to transmission or delay of mails unless circumstances arise which will compel their publication.

"So far as incoming mails are concerned, matters are not nearly so satisfactory. Mails from the Near East which ought to have reached England on August 1 are not yet to hand."

The P. and O. liner which left this (Friday) morning is taking the mails for Egypt and India that are generally dispatched in the evening *viâ* Brindisi, that route being obviously closed.

Telegrahic communication with Germany, Austria, and Hungary is completely suspended. Telegrams for Roumania, Bulgaria, and Montenegro are only accepted at the sender's risk, and are subject to censure. The normal route to Servia is interrupted.

LORD KITCHENER'S NEW POST.

The announcement of Lord Kitchener's appointment as Secretary of State for War has been received with expressions of unqualified approval in the Press.

The Times (August 6) says:—

We need hardly say with what profound satisfaction and relief we hear of Lord Kitchener's appointment as Secretary of State for War. . . . It was unthinkable, indeed, that so great a military asset should be wasted at such a time, and we heartily congratulate the Government on the promptitude with which they have confirmed the popular choice. In the huge task of equipping and dispatching and supporting our land forces, as well as in perfecting the measures for protecting these shores, Lord Kitchener's services will be invaluable. Let us repeat that the appointment will be equally welcome to our friends on the Continent.

The Morning Post (August 6) says of the Prime Minister:—

He has taken a step which will commend itself to the judgment of his countrymen, and in particular will be welcomed by the Army, in recommending his Majesty to appoint Field-Marshal Earl Kitchener to succeed him as Secretary of State for War. This is entirely in accord with the principle long advocated in these columns that the Cabinet should have among its members at least one qualified by military knowledge and experience to take part in its deliberations upon questions of foreign policy. That in time of war a tried General should have charge of the direction of the military administration accords with the dictates of common sense, and is not inconsistent with the traditions of Cabinet Government. The appointment will especially at this moment contribute to strengthen the public confidence.

Adverting to the same subject, *The Daily Telegraph* (August 6) says:—

Lord Kitchener is, above all, an organiser, and we hope we may also adopt the French phrase and call him an organiser of victory. He is at his very best in carrying out all those laborious preliminary details and those minute and important arrangements and correspondences on which depends the ultimate success of an army in the field. He understands the nature of his human instruments; he knows how to choose his subordinates, in whom he can inspire unswerving obedience; he has an iron will, and is not moved from his purpose by any of those distracting accidents which often mar the resolution and spoil the judgment of weaker men. Nor is it the least of his recommendations that his name is famous abroad, and that France, in especial, in whose defence he originally drew his sword, will welcome his appointment as the best proof of our determination to see this weighty matter through.

BALKAN COMMITTEE REPORT.

We have received the Report of the Executive Committee for the years 1912-1913, presented and adopted at the annual meeting of the Balkan Committee on July 15. We quote some extracts:—

The records of the Balkan Committee show that its policy had been a consistent demand for the intervention of the Concert of Europe—a demand based on a recognition of the responsibility of the Powers under the Treaty of Berlin for the evils resulting from the restoration to Turkish rule of the territories and peoples that had been rescued from it by Russian arms. . . . They testify also to the desire of the Committee that the Turks might some day introduce reforms, under outside pressure, if not spontaneously, and to its practical and sustained efforts to strengthen the hands of the genuine Turkish reformers. They prove that the Committee, so far from being actuated by blind and unconditional hostility to the Turkish people and Turkish Empire, availed itself of every opportunity to encourage and support any plan of reforms that might be proposed by Turkey herself or imposed on her from without, and it steadfastly abstained from aiding or encouraging any revolutionary movements among the subject populations of the Porte; and even as late as April, 1912, recognising the difficulties with which the Young Turks were faced, enhanced as these difficulties were by the war with Italy, the Committee addressed a letter to the Turkish Government suggesting a spontaneous plan of reforms whereby the proposals for international control might be countered and checked.

After referring to the unexpected success of the Balkan Allies, which "opened out a prospect of the realisation of Mr. Gladstone's noble ideal of a confederation of Balkan States, and the peaceful and happy possession of their lands by the peoples who inhabited them," the report continues:—

But what the unity of the Balkan peoples had achieved was largely frustrated by the unhappy disunion of the Balkan Governments, and territory won from the Turks was retaken by them as a result thereof. True to its principle of impartial interest in all the Balkan peoples, the Balkan Committee urged his Majesty's Government to take the initiative in urging the Concert of Europe to support mediation between the Balkan States, and pressed upon the Governments of the latter a partition amongst themselves of the territories wrested from the Turks, based on the recognition of racial affinities and the wishes of the local populations. . . . It has recently addressed an appeal to the Balkan States to summon a conference to discuss means whereby the civil and religious disabilities of the alien minorities may be diminished by mutual concessions, and to the Powers to withhold their recognition of the Treaty of Bucharest until they are satisfied that real efforts are being made by the States themselves towards the realisation of conditions of justice for all the populations within their territories.

In appealing for continued support, the report urges:—

The power of Turkey, though weakened and diminished, is still a factor to be reckoned with in the political life of South-Eastern Europe and in Asia Minor, and so long as there still exist subject populations exposed to that lawless domination the friends of freedom must carefully watch its actions. And until happier and more equitable conditions be established in the new Balkan States, and the danger of renewed racial and religious strife be finally averted in those lands the Balkan Committee must continue its efforts to secure justice, liberty, and peace for all the Balkan peoples.

ENGLISH HIGH SCHOOL FOR BOYS,
NISHANTASH, CONSTANTINOPLE.

English Public School System. New building. Healthy situation. 45 boarders taken. Preparation for London Chamber of Commerce Examinations. Special Advanced Class for Languages and Commercial Subjects.

SCHOOL RE-OPENS SEPTEMBER 14th.

For Prospectus apply to the School, or to
A. T. WAUGH, Esq., The British Consulate, Constantinople.

ENGLISH SCHOOL,
NICOSIA, CYPRUS.

Preparation for Public Schools and for Commerce. Modern Languages. Turkish and Arabic if desired

ENGLISH GAMES.

Complete charge taken. Very healthy climate. Boys remaining for the summer holidays are taken to the Mountains. Moderate Terms.

Apply REV. CANON F. D. NEWHAM, B.A.Cantab., Director.

ENGLISH HIGH SCHOOL FOR GIRLS,
PERA, CONSTANTINOPLE.

An English Education on the lines of the best High Schools in England. Girls are received from the age of 5 to 17 years:—Kindergarten, age 5 to 7; Junior School, age 8 to 12; Senior School, age 13 to 17; and are prepared for an English Examination which admits them direct from this School to the University.

For Prospectus and particulars apply to the School, No. 1, Rue de Pologne, Pera, Constantinople.

The New School Year will begin in September, 1914. An Entrance Examination will be held on the first day of term.

Applications for admission, particularly as Boarders, should be made early, as the number of places is strictly limited.

G. E. CHARTERS, B.A., London, *Directress.*

NEAR EAST BOOKSHELF.

AN AMERICAN IN MOROCCO.*

At the present moment those who are interested in the inter-relation of Christendom with Dar-ul-Islam will read with attention that chapter in Mr. Holt's recently published book which deals with the numerical might of the Moslem. He uses the phrase "Islam must not be awakened by the noise, either of the approaching footsteps, or of war in Europe." Within the next few weeks the latter sound will probably assume proportions unparalleled in history. The conditions against which the author warns his readers will then have been realised. Will Islam awake? That is the question which is of peculiar importance to this country, inasmuch as his Majesty is Padishah over more Mohammedans than is the Khalif in Constantinople. Great Britain is in contact with Islam from Gibraltar to the remotest recesses of Asia, and over an immense area of Africa, and even Polynesia. Mr. Holt suggests that Islam is at the beck and call of the Khalif, and that its fighting strength may at any moment be aroused against the Nazarene by the proclamation of a Jihad. We do not attempt to deny that considerable potentialities are contained in the threat of a Holy War, but we must remember that modern hostilities demand an expensive scientific equipment, and that civilisation has for years past been elaborating mechanical protection against the daring onslaught of a *Ghazi* rush.

In the battle of Omdurman very many gallant men sacrificed their lives almost in vain, from their point of view, to the cry of "Din! Din!" It is, of course, possible that the Maxims should jam, or that ammunition should fail, and then it would go back to the old days when battles were settled by put of pike. In such cases the religious frenzy which inspires the *Ghazi* in his war-like enthusiasm would doubtless be a very serious factor, and we are far from belittling the danger of a religious rising on the part of militant Islam. It is, however, permitted to us to question the accuracy of Mr. Holt's figures in spite of the missionary activity that has signalized the rapid advance of the Mohammedan religion and civilization in Africa during the last generation. We are of opinion that Mr. Holt has been very seriously misled as to the actual number of Moslems; this is more particularly the case in his estimates for Africa and the Russian dominions, and we cannot agree that "Mohammed is supreme" in the Austrian provinces of Bosnia and Herzegovina. According to the latest information, the number of Bosniaks is a little over 600,000, while the Christian population is considerably more than double that number. The expressions which the author uses lead us to believe that he may contemplate as possible a fresh advance of Turks into Europe. This, indeed, at the present juncture, is more than probable, and we must remember that in the past amid the dissensions of Europe, when Germany and Austria were convulsed with war, both internal and with several of their neighbours, the opportunity arose which enabled the Horse-tails of the Ottomans to appear before the walls of Vienna. At a period such as the present it is idle to prophesy; the future is more than depressing. The military activities in the seat of the Khalifate are ominous, and we confine our criticisms of this important chapter to reiterating our belief that the author has very considerably over-estimated both the numerical and the fighting strength of Islam, which, it should be remembered, is far from united within itself.

In the rest of his book Mr. Holt, who for a long time held a diplomatic position as United States' representative in Morocco, has collected a number of diverting personal experiences and anecdotes about Moghreb-al-Aska. Not the least humorous of his adventures was that when he went in consular state to hold a court some distance south of Tangier, and was permitted to realize that Morocco is East, and that as a rule in the East they hurry no man's cattle, as time is but a detestable invention of the foreigner, and a matter wholly beneath the consideration of a native gentleman.

Justice and Jews are also matters upon which the author regales his readers with much illuminating information. He also tells us how to make a salad, and the recipe which he provides is so alluring as to make the reader impatient of our callous insular methods of compounding so delicate a dish.

Time was when Portuguese, Spaniards, and English had dominion over Tangier town. It is an historical fact that it has had the least possible influence upon the appearance of the city, or the manners of its inhabitants. It so happens that this delectable spot is actually west from Greenwich, so far as compasses are concerned, but for all that it is East, and even now as one rides out of the gate *en route* for Tetuan or Al Kazar one passes into a country where Islam is still militant, and the Christian is a despised intruder—a country where primitive traditions still hold undisputed sway—where dignity forbids that a father should deign to sit at meat with his son, and custom prescribes the use of a wooden plough, and permits the infliction of judicial penalties which were discarded in Europe centuries ago.

Mr. Holt writes in a pleasant style, and has produced a collection of reminiscences well worth reading by that numerous class of tourists which has "touched at Tangier," for there are few who travel to Gibraltar or cruise in the Mediterranean without doing so.

* "Morocco the Piquant." By George Edmund Holt. (Heinemann. 6s. net).

BOOKS RECEIVED.

A Western Awakening to Islam. By Lord Headley. (J. S. Phillips. 1s. net.)

The Balkan Wars, 1912-13. By Jacob Gould Schurman. (Princeton University Press. 4s. 6d. net.)

Messrs. Harrap will have ready very shortly a book which has been written by Mr. Woislav M. Petrovitch, Attaché to the Servian Legation in London, entitled "Hero Tales and Legends of the Serbians." Chapters are included on the national customs and characteristics, and translations are given of some of the ancient ballads still sung by the bards to the peasantry. The book will be illustrated in colour by Messrs. William Sewell and Gilbert James.

H.M.S. "AGINCOURT."

One of the warships which the British Government has taken over on the outbreak of war is the "Sultan Osman I.," which is at present at Devonport. The previous history of this battleship is distinctly curious. It was originally laid down in 1911 for the Brazilian Government as the "Rio de Janeiro." In 1913 its owners decided the vessel was unsuited to their requirements; it was placed on the market, and found a ready purchaser in Turkey.

Originally the "Sultan Osman I." was intended to be of 31,600 tons, but a change in the Brazilian Presidency resulted in a change of the design, and the vessel is actually of 27,500 tons displacement.

The most remarkable feature of the new Dreadnought is the large number of turrets. British ships have never had more than five turrets, but the "Sultan Osman I." carries no fewer than seven. Its armament consists of fourteen 12-in. guns, with a subsidiary armament of twenty 6-in. guns, while there are three 21-in. torpedo tubes. The speed of the vessel is given as 22 knots, while her armour belt is nine inches in thickness. The "Sultan Osman I." is now to take her place in the British Navy under the name of "Agincourt."

7	25	Friday	15	15
8	26	Saturday	16	16
9	27	Sunday	17	17
10	28	Monday	18	18
11	29	Tuesday	19	19
12	30	Wednesday	20	20
13	31	Thursday	21	21

To-morrow will be the anniversary of the wedding, in 1889, of Princess Militza of Montenegro, to H.I.H. the Grand Duke Peter Nicolaievitch of Russia.

Sunday is the birthday of H.I. and R.H. the Archduke Joseph of Austria, grandson of the last Palatine of Hungary, and nephew of H.M. the Tsar of the Bulgarians.

Tuesday is the birthday of H.R.H. Prince Christopher, youngest brother of H.M. the King of the Hellenes.

Wednesday will be the anniversary of the wedding, in 1883, of H.M. the King of Servia to the late Princess Zorka of Montenegro.

Wednesday is the birthday of H.I.H. the Cesarevitch.

King Constantine of Greece celebrated his forty-sixth birthday last Sunday.

H.M. the Queen of the Hellenes, with T.R.H. the Princesses Irene and Helene, has arrived at Kronberg (Taunus) from England, and has proceeded to Friedrichshof Castle.

T.R.H. the Crown Prince of Greece and Prince Christian of Greece left early this week for Southampton to embark on the yacht "Miranda."

A Reuter's telegram from Durazzo, dated July 29, stated that the two children of the Prince and Princess of Albania would be taken on the following day to Sinaia, the residence of the King of Roumania, near Bucharest.

According to the *Wady-el-Nil*, the Khedive has transferred the accounts of the Khedivial Khassa from the National Bank of Egypt to the Banco di Roma, the closing of whose doors is referred to in another column.

We understand that Bishop Blyth is now on his way to England. A Jerusalem correspondent writes:—The Bishop of Jerusalem left Jerusalem by the afternoon train on July 21, on his way to England. The station was crowded, at least 200 people being there to see him off, including foreign consuls, workers of the C.M.S. and L.J.S., Christians of all creeds, Moslems and Jews. The Pasha sent his secretary to represent him. The Bishop went straight to his compartment, and everybody went in there to see him and say good-bye. The Greek Patriarch, who had not heard in time the exact date of his departure, telegraphed his farewell to the Bishop at Jaffa; he also telegraphed to the Greek Archimandrite at Jaffa to meet the Bishop at the station there, and to call upon him at the hotel the next morning. Past and present pupils of St. George's Schools, both boys and girls, swelled the numbers at the stations at Jerusalem and at Jaffa. On Wednesday, July 22, the Bishop left Jaffa by Russian steamer for Port Said, where he embarked for England on the Union Castle s.s. "Llandovery Castle." The Bishop, who is well, is travelling by long sea in order to get a little rest, in view of the work awaiting him in England.

Sir Valentine Chirol has postponed his departure for India.

Mme. Grouitch is shortly leaving town for Servia, but before going she is organising a volunteer corps of surgeons and nurses for the Servian auxiliary hospital. Mme. Grouitch during the last Balkan war was personally in charge of one of the largest hospitals.

Bishop Brindle, who is so well known and popular in Egypt, has been lying seriously ill at the Bishop's House, Nottingham, since July 20. We are glad to learn, however, that the condition of his lordship has lately shown a decided improvement.

On July 31, Mrs. Chafy, the wife of Ralph Evelyn Westwood Chafy, Acting Consul at Port Said, gave birth to a daughter.

Aberdeen University last Friday conferred the honorary degree of Doctor of Laws upon Sir John Bland Sutton.

Mr. W. Lawrence Balls is proceeding to the South-Western States of America as a consulting expert on the development of Egyptian cotton growing in that region.

Sir Reginald Wingate, who left London last Sunday for Egypt, travelling by way of Marseilles, was amongst the travellers by the last train of the regular Continental service from Charing Cross. Lord Kitchener was on the platform to see Sir Reginald off.

At Firle Church, Sussex, on Wednesday, the marriage took place of Major Cyril Eustace Palmer, D.S.O., Royal Artillery, attached to the Egyptian Army, son of the late Colonel Robert H. Palmer, Bengal Staff Corps, to Miss Nina Kathleen Scarlett, only daughter of Mr. and Mrs. Harry Scarlett, of Prestone, Firle. Mr. Scarlett gave away his daughter, and Captain Poston, R.A., was best man. The bride's gown was of white satin trimmed with Brussels lace (the gift of her mother), with a lace and chiffon train. There were two pages and five bridesmaids. A reception was held at Prestone, Firle, but there will be no honeymoon, as Major Palmer is under orders to return to Egypt.

The marriage arranged between Mr. Ronald Devereux Carty, F.I.C., of Heliopolis, Cairo, and Eileen Maude Pile, only daughter of Sir T. D. Pile, Bart., of Kenilworth House, Willesden Lane, will take place at Trinity Church, Cricklewood, at half-past two o'clock on the 29th inst.

The marriage arranged between Hilary Gresford Evan-Jones, 1st Battalion Welsh Regiment, youngest son of the Rev. R. and Mrs. Evan-Jones, of the Vicarage, Newtown, Montgomeryshire, and Nancy, only child of Major W. N. Bolton, late Wiltshire Regiment, and the late Mrs. E. K. Bolton, will take place on Friday, the 28th inst., at Troodos, Cyprus. The bride and bridegroom will leave for England immediately after the wedding.

The engagement is announced of Ione, second daughter of Anthony P. Ralli, of New York, to Henry Butler Allen, of Philadelphia.

The marriage took place on July 30, at the Armenian Church, Manchester, of Armenak H. Kehyayan, youngest son of the late Mr. H. Kehyayan and Mrs. Kehyayan, of Beyrout, to Marjorie Arouceyak, only daughter of the late Mr. S. Eliazarian, and Mrs. Eliazarian, of Westpoint, Hale.

Mr. Drewitt, engineer of the Central Gharbieh Drainage Scheme Service, has been authorised by the Egyptian Government to go on a mission to England and Switzerland in order to study on the spot technical questions in regard to drainage schemes that may be applicable to the Baltim Pumping Station.

Ismail Pasha Abaza, the newly elected member for Hehia, in the Egyptian Legislative Assembly, left Alexandria ten days ago for Constantinople, where, it is understood, he will be received in audience by the Khedive. He had intended to make a tour of Europe and to return to Egypt in the autumn, but this plan will no doubt be altered now.

Colonel A. W. Collard, District Barrack Officer, Irish Command, who has been granted an extension of one year in tenure of appointment from October 1 next, was present at Suakin in the Sudan Expedition of 1885, and received the medal with clasp and bronze star.

Major-General Villiers Hatton, C.B., whose will has just been proved, left the Green Standard of the Khalifa, taken in the Battle of Omdurman, to the Royal United Service Institution.

Mrs. Irene Osgood, the well-known novelist, writes from Guilsborough Hall, Northampton:—"I should like it known to the military authorities that I am prepared to place my houses and grounds in this district at their disposal for the reception of wounded officers and men. Altogether I could find room for a considerable number who may require nursing, and I feel confident that many other owners of country houses will gladly do the same."

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.
Near the lake, with splendid park.

CECIL HOTEL.
In the town and 5 minutes from the station.

Two First-class Family Hotels.
High-class Cuisine. French Chef.
J. SUMSER, Manager-Proprietor.

Sofia (Bulgaria).

Brevet Lieutenant-Colonel N. J. G. Cameron, who has been appointed Deputy Assistant Quartermaster-General in the Irish Command, served in the Nile Expedition of 1898 at the battles of Atbara and Khartoum, being mentioned in despatches, and receiving the medal with two clasps.

Major-General C. J. Blomfield, C.B., D.S.O., commanding the 1st (Peshawur) Division in India, who has been appointed colonel of his old regiment, the Lancashire Fusiliers, saw service with the Nile Expedition of 1898, and was present at the battle of Khartoum.

Mr. Boutigny, managing director of the Société Orientale de Publicité, and proprietor of several newspapers in Cairo and Alexandria, left for Athens lately on a tour through the Balkans.

Mr. John R. Reeves, whose sudden death at Asniéres, near Paris, on July 23, we announced last week, was formerly General Manager in Egypt of the Imperial Ottoman Bank and Chairman of the Board of the Société Anonyme de Commerce, formerly G. Franger and Company.

Count Alexander Romas, who died on July 23 at Castella, was born in 1863, and belonged to a noble family of Zante. He studied at Athens and Paris, and early in life, maintaining the tradition of his family, devoted himself to politics. As an adherent of the party of Theodore Delyannis he was several times Minister of Public Instruction, and President of the Chamber. After the assassination of Theodore Delyannis, President of the Council, King George, in agreement with the Delyannist party, offered the succession to Count Romas, who, however, declined it, declaring that he did not consider himself equal to the task. This courageous refusal only increased the respect of the Greek people for him. In 1897, when Ricciotti Garibaldi led his legion to the help of Greece, Count Romas, then President of the Chamber, offered himself as a simple volunteer to the Italian general, and by his valour won the rank of captain. In 1912, when the Balkan States began their mobilisation, Count Romas set to work to mobilise volunteers, largely at his own expense. This right was specially granted to the veteran of Domokos. With his volunteers, he entered on the campaign of Epirus, and was wounded at Driskos, before Janina. This spring, when Epirus rose, Count Romas was the first to answer the appeal of the Provisional Government with his volunteers.

Oliver Bainbridge, the traveller, author, and lecturer, who enjoys the personal acquaintance of the Queen of Roumania, tells the following interesting story :—

During the Russo-Turkish campaign of 1877, many Roumanian soldiers were wounded, and Queen Elizabeth—"Carmen Sylva"—who constantly visited the hospitals, found that some of the patients died because they chose death rather than disfigurement.

It occurred to her that if one yielded others would follow, and one day, when the surgeon was turning away sorrowfully from an obstinate patient who could be saved only by an operation, she approached and added her own entreaties. Still the soldier reiterated that, if his leg were amputated, he should be taken for a mendicant like the wretched outcasts of the Carpathians. "I am not a beggar," said he, proudly, "I will lose my life, but not my honour." "It is true," said the Queen, "you are not a beggar, but I am"; and she threw herself on her knees at the bedside. "I have never prayed but to God, but now I supplicate you to listen to His wish and mine. Let your leg be taken off, and spare your life to your country and me, and——" "And if I consent, my lady, what then?" "Why, then," she said, joyfully, rising and seizing his hand again, "I will give you the most beautiful cork leg in Europe; it shall work with springs, and when the war is over, you shall come and dance at the palace with your sons." "I consent," he said, softly, "but you must hold my hand during the operation." After that there was no more opposition to the surgeon's wishes since they were also those of the beloved lady of the land.

Until recent years the Roumanian had a strange pride which caused him to abhor the idea of medicine and surgery, and to consider the loss of a limb as terrible as that of life itself. He had become accustomed to the idea that only beggars are so disfigured, and believed that no necessity should constrain him to such a loss.

Mr. Littlewood, Director of the Veterinary Service at the Ministry of Agriculture, and Piot Bey, the chief veterinary surgeon of the Domains Administration, had been authorised by the Egyptian Government to take part in the tenth International Veterinary Medical Congress, which was to have met in London in a few months' time.

Herr Fritz Kreisler, the famous violinist, who is a captain in the Austrian Army, has rejoined his regiment, and is now stationed at Graz. Mme. Kreisler has accompanied her husband and has become a Red Cross nurse.

On August 1, at 8, Kensington House, Kensington Court, Mrs. Herbert, the wife of Reginald Herbert, Ministry of Public Works, Cairo, gave birtl: to a daughter.

APPOINTMENTS, PROMOTIONS, ETC.

Earl Kitchener has been appointed Secretary of State for War.

The following statement was issued from 10, Downing Street on Wednesday: "In consequence of the pressure of other duties, the Prime Minister has been compelled to give up the office of Secretary of State for War. The King has approved of the appointment of Lord Kitchener as his successor. Lord Kitchener undertakes the duties of the office for the time being, in view of the emergency created by the war, and his post in Egypt will be kept open.

A Reuter's message states that President Wilson has nominated Mr. Garrett A. Droppers, a professor at the Williams' College, as United States Minister to Greece.

Lewa Drake Pasha, Adjutant-General, Egyptian Army, has returned to the Sudan from leave.

Mr. J. Harris, recently appointed to the British Consulate in Cairo, has arrived there and taken up his duties.

The Cyprus Gazette announces that his Excellency the High Commissioner has been pleased to appoint Mr. Alan Lenox Conyngham Stuart, Acting King's Advocate, to be a Member of the Executive Council of the Island from July 4, 1914.

The Cyprus Gazette announces the following Acting Appointments :—Captain A. E. Gallagher, D.S.O., Local Commandant of Police, to act as Chief Commandant of Police and Inspector of Prisons (June 18). Mr. A. J. Cunningham, Assistant Island Postmaster, to act as Island Postmaster (June 18). Mr. A. L. C. Stuart, President, District Court, Limassol, to act as King's Advocate (July 4). Mr. P. P. Higgins, Assistant Locomotive Superintendent, to act as Traffic Inspector in addition to performing the duties of his substantive appointment (July 10). Mr. A. Merrifield, Assistant Engineer, to act as First Divisional Engineer, Public Works Department (July 10). Dr. S. Constantinides to act as District Medical Officer, Limassol (July 11).

A Reuter's telegram from Vienna, dated July 30, states that a despatch to the *Albanische Korrespondenz* from Durazzo announces that Colonel Schaeffer has been appointed Commander-in-Chief of the Albanian Forces. Colonel Schaeffer was at one time an officer in the Cretan gendarmery.

Captain G. M. Ponsonby, Royal Inniskilling Fusiliers, has been selected for employment with the Egyptian Army.

Dr. Fabricius, German Vice-Consul in Cairo, has been transferred to Constantinople.

The members of the foreign military and naval missions in Greece have been granted two months' leave, Reuter states.

DOMESTIC ANNOUNCEMENTS.

BIRTHS.

COOPER.—On July 23, at Sheffield, the wife of Mr. Henry Cooper, Ministry of Agriculture, Tantah, of a daughter.

TITE.—On July 22, at Croydon, Surrey, the wife of Mr. Herbert W. Tite, of a son.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

UPPER EGYPT.

Luxor.
The Winter Palace. The Luxor Hotel.
The Karnak Hotel.

FRIDAY, AUGUST 7, 1914.

THE WAR OF THE NATIONS.

The march of events in the course of a single week has been fateful indeed. From the possibility that the conflagration lighted by Austria-Hungary on the banks of the Danube might spread to other parts of the Continent we have passed to the grim reality of Europe at war. The quarrel between the Dual Monarchy and Servia can now be viewed in its true perspective. Where in the manifesto to his people the Emperor Francis Joseph declares that the intrigues of a malevolent opponent compel him to grasp the sword after long years of peace, he would have spoken more truthfully if he had used the word "ally" for "opponent." Belgrade, defended only by a few Servian rifles, has been bombarded from the safety of Hungarian territory across the Save and Danube; but for more than a week the Austro-Hungarian army has been content apparently to be foiled of its intention to invade Servian territory. From this circumstance it can only be inferred that the desire to chastise Servia for her malevolence was entirely a secondary consideration with the Austrians in their declaration of war. The attitude of Russia, if Servia were to be attacked, was known beforehand, and there could be no doubt that France would stand by her ally; if the neutrality of Great Britain were counted upon, there was little justification for the serious miscalculation. In the face of the inevitable result of her action Austria-Hungary, supported, or more probably egged on, by Germany, threw down the gauntlet. The quarrel with Servia provided the pretext; the actual issue was between the Teuton and the Slav, as a stepping-stone to the establishment of a German hegemony in Europe, and thus in the world as a whole. Towards this latter goal Germany has been striving with set purpose ever since the Emperor William II. took over the direction of the nation's affairs. But the success of the Triple Alliance has been checked by the formation and subsequent consolidation of the Triple Entente. In neither of the attempts which Germany has made to weaken or break that entente has she succeeded, while on the top of her failures came the Balkan wars, with the Turkish reverses and the aggrandisement of Servia and Greece. Simultaneously the inherent weakness of the Triple Alliance began to make itself felt with the clash of Austrian and Italian interests in Albania. To allow things to drift would mean to pave the way for an ultimate breach between the two countries, and with it the final shattering of the Emperor William's ambitions. Germany's actions have shown that her resolve was taken and her plans matured before the delinquencies of Servia supplied the *casus belli*. With Austro-Hungarian support she has embarked upon a desperate attempt to place her heel on the neck of Europe.

The realization of Germany's ambitions involve the humiliation of Great Britain and the dismemberment of the British Empire. However much the Slav peoples may impede the march of Austria-Hungary to the Ægean or French prosperity constitute Germany's *bête noir* in Europe, it is the British Empire which places a barrier across Germany's path. On the battlefields of the Continent, therefore, and in European waters will be fought out the grave issue whether Great Britain shall retain what she holds or whether Germany shall take possession of our heritage. Minor issues there will also be. Germany's methods of waging war, her violation of Belgian territory, prove that she recks nought of the dictates of civilisation or her pledged word when these stand in her way. Under the hegemony of a nation so unprincipled not a single one of the smaller States of Europe could feel assured of its liberty and independence. In this struggle that has been forced upon her Great Britain is fighting for the future of free government, not only in Europe, but in the world at large. But while indirectly we champion the cause of Belgium, Holland, and the Balkan States, our position as a Moslem Power has been directly challenged. It is in this direction that Germany's eyes are mainly fixed. The Moslem world, which looks to us for guidance and protection, has made no complaint to Germany, nor does it labour under the impression that it would be better off under German guardianship. Germany, on the other hand, is not inspired by concern for Moslem interests. Altruism has never taken root in Berlin, and the German Government sees in the Moslem nations merely suitable quarry in its hunt for the exercise of world power. Let the Moslem world bear this in mind, as it follows the fortunes of the nations of Europe now engaged in a life and death struggle. Military exigencies may require that the fighting take place in the North Sea or in the heart of Europe. But on the results of that fighting depends the position of Great Britain on the banks of the Ganges, the Nile, and the Euphrates.

With such issues at stake our risks in this European war are greater than those of our antagonists. Our efforts must, therefore, be proportionate. The struggle was not of our seeking, but now that the gauntlet has been thrown down we take it up with the greater readiness, as we know that the hopes of those whose existence we have safeguarded and whose interests we have fostered in the past are centred in the result. Although we might have postponed the challenge, we could not have avoided it permanently. If Germany could have arranged things to her own liking, she would have preferred to deal separately with Russia and France before she turned her attention to the final goal of her ambitions. Events, however, shaped themselves inconveniently for her, and in company only with Austria-Hungary she faces Russia, France, and Great Britain. Momentarily the tide of war seems to have rolled back from the Balkans; but it is not to be expected that, if Austria-Hungary finds that all her efforts are required elsewhere, she will be content to see the Near East at peace. Left to themselves, the Balkan States can hardly fail to appreciate the lesson which recent events will have brought home to them. If the Balkan Alliance that took the field against Turkey were in existence to-day, with or without the inclusion of Roumania, the Austro-Hungarian ultimatum could never have been delivered. Whatever the issue of the present war, these States will be able to look with but little confidence towards the future if they remain still divided. Austria-Hungary will have realised this fact, and must be anxious to prevent any influences at work for consolidation. Whether her preoccupations elsewhere will prevent the success of her diplomacy in this direction remains to be seen. Turkey has already mobilized. The reason given is concern lest her neutrality should be violated. We trust that the explanation is the correct one, and that neither Turkey's readiness for war nor an Austrian undertaking to redress by an attack on Greece the Greek naval superiority in Turkey's favour will lead the chauvinists of the Committee of Union and Progress to sacrifice Ottoman interests for fresh schemes of adventure. Although the naval strength of Great Britain is in the North Sea, the Triple Entente is capable of acting in the Eastern Mediterranean as well.

INDIA AND THE WAR.

[We reproduce below the leading article from to-day's *Indiaman*, which will, we feel sure, appeal to many of our own readers almost as forcibly as it must to the readers of our companion journal.—ED. *N.E.*]

We write in the heart of an anxious but absolutely tranquil London. Britain thinks too little in ordinary times upon the influence of the example of her people upon the Asiatics and Africans, for whose welfare she is ultimately responsible. Despite their Empire, the British are an insularly minded race. But we can imagine the thrill of pride with which Anglo-Indians in India are now reading the cabled reports of the serene confidence in which Britain has faced one of the supreme crises of her history. It is thus, and not otherwise, that a mighty nation confronts its fate. And yet there is no harm in saying now that it might very easily have been otherwise. On the last three days of last week there were signs of panic—a general anxiety to obtain supplies of cash and food, a general difficulty in meeting the sudden rush. An accident saved England. The practice of half a century has made the first Monday in August a public holiday, and in the ordinary course of events all business would have been suspended from midday Saturday till Tuesday morning. The real causes of the suspension were in actual fact unprecedented; but the suspension itself was accepted as usual, and before Tuesday morning came the temper of the nation had adjusted itself to the cruel circumstances of the time.

Much of what is happening now will have been half forgotten by the time that this paper is circulating in India—buried beneath the rush of subsequent events. But there are one or two facts of a kind to govern the whole development of affairs with which we can profitably deal. The first of these outstanding facts is the declaration of Italian neutrality. This will probably prove to be of immense moment to India. Even before British action was determined upon, the news meant that the Mediterranean was still open for such ships as cared to use it. Had Italy joined Austria the allied squadrons would have been slightly superior in strength to the French Fleet. Holding the mouth of the Adriatic, the Allies would have been in a position to attempt to prevent the junction between the French ships moving eastward from Toulon and the British ships moving westwards from Malta. Anyone with a strategic eye would have discerned in this situation the prelude to a ding-dong struggle for Mediterranean supremacy, during which the waters of the inland sea would have been dangerous to peaceful vessels. No one wants to run unnecessary risks, and but for Italy's neutrality the *mot d'ordre* would have already gone forth that passenger and cargo ships bound for Western Europe from the East should return to the course of the old Indiamen and make for port viâ the Cape. It may be that some owners are adopting this course now. At the time of writing the Austrian Fleet is still in being, and has some capacity for mischief. But the Austrians are hopelessly outnumbered at sea, and their tale will soon be told. Meanwhile the passage to Britain viâ the Canal and the Mediterranean, though not without an element of risk, cannot be described as a piece of reckless bravado. This tremendous difference in the situation has been created entirely by the attitude of Italy, who is thus in the rare position of being able to practise with dramatic effect a policy of masterly inactivity. Sir Edward Grey's statement in the House of Commons on the fateful Monday before the war began shows how concerned British diplomacy was to give the Germans no opportunity of representing Britain as the aggressive party, and of thus invoking the aid of Italy under the terms of the Triple Alliance. The issues which Italy had to determine were both grave and complex, and it may at first sight seem special pleading to suggest that the question of the Indian mail service had any bearing upon her decision. Nevertheless, it must be borne in mind that Italy attaches the greatest importance to the maintenance of the Brindisi arrangements, and the suggestion that the mails will in future be carried viâ Marseilles or sent viâ Piræus when the new Greek railways are built is the signal for much excited comment in the Italian Press. Italy seems to regard the service as the visible emblem of her high place among the world's commercial Powers, and as the modern revival of the great Venetian tradition of intercourse with the East. Her position in this respect has certainly been strengthened by a decision which leaves the Canal route still practicable.

Finally, we would speak of Russia. Opponents of the war in England made great play of the danger of creating a stronger Russia, and one hysterical sheet even spoke of us as intending to leave her in a position to absorb India at her leisure. We propose to honour this argument, in its more moderate form, with some consideration. Indian opinion has had reason to fear Russian aggression in times past. The point we now desire to bring out is that this aggressive Russian policy has always been spasmodic. Russia has been consistent in her endeavour to obtain access to the warm water, but has not been consistent in her choice of her sphere of action. Her pressure has shifted from Northern Sweden to the Black Sea, from the Black Sea to India, from India to the Far East, and from the Far East, with a slight pause at Persia, to the Adriatic. All the time she has sought to take the line of least resistance, and everywhere the resistance has been too great for her. It is this continual variety in her aim which has made it doubtful whether Russia was a Europan or an Asiatic Power. A parallel doubt as to whether Britain would become an Asiatic or an American Power existed, we may note, in the middle of the eighteenth century after Canada had been won and before the American colonies had been lost. Now we hope that the issue of this war will settle Russia's position for all time, and will settle it by giving her the status in Europe which has always been her dearest ambition. We shall be told that Russia established on the Adriatic is really as great a menace to the maintenance of British rule in India as a Russian move in Afghanistan. Before exposing the fallacy underlying this argument let us note that such a change in the direction of Russian influence would at least relieve the special pressure on India, and by converting the necessities of policy from army corps into ships would distribute the burden more equably over the whole Empire. But the real point is that Russia herself does not contemplate the extension of her own direct sovereignty to the Adriatic. Her grievance is that, under present conditions, a Slav who enters the area of Western European thought is lost to Slavdom. He abandons his faith, embraces Latin Christianity, and regards Holy Russia as an heretical Power. Russia's established method of redressing this evil is to create Slav States strong enough to touch Western Europe without being absorbed by it, but maintaining their connection with Mother Russia by means of an Orthodox National Church. The establishment of a strong Roumania, a strong Bulgaria, and a strong joint Serbo-Montenegrin State will carry Russian influence to the Adriatic in precisely the way that Russia desires. It will realise her aim of maintaining her touch with the Westernised Slavs. In pouring out her blood and treasure for the furtherance of that aim, we believe not only that Britain is accelerating the inevitable tendency of European policy, but is relieving India from her one serious external menace.

YŌST

"The Typewriter for Beautiful Work"

The latest visible-writing model of the Yōst Typewriter is far in advance of any previous accomplishment in the writing machine world. From every point of view it is all that can be desired. Strong, simple, speedy, light in touch, and reliable to the last degree. Every description of writing or figuring can be negotiated on a Yōst with the utmost ease and speed. Prominent among the Yōst innovations which have met with great success is

The YŌST *for* Writing Arabic.

In proof of the favour with which this machine has been received, we are able to announce that the Yōst Company has been honoured by the Turkish and Egyptian Governments with contracts for the supply of Arabic-writing Yōsts.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

Two years ago our financial people looked upon the moratorium which existed in the Balkans much as though it had been a rare beast in a cage, and its unfortunate possessors were pitied in their unenviable plight. The creature has now been imported and may be inspected daily in the City of London. He is not nearly so dreadful as was reported, but his diet is peculiar, as it takes the form of 10s. banknotes. Still, those of us who know the Levant have fared well enough on tenpenny paper, so there is nothing to worry about. Doubtless the sanitary authorities will see to it that the half-pounders do not remain in circulation too long. In any case we have a splendid opportunity for restoring the crown piece into general circulation. Timid folk will find that five or ten pounds' worth of these admirable coins convey a very satisfying sensation of wealth to the possessor. I suggest that banks might fitly crush the panic-monger, should there be any left now that the Germans are gone, beneath the weight of these comforting coins.

***

I gather that the financial dislocations of the past ten days are now regarded as being almost a nightmare of the past. The great machine of commerce has been readjusted during the prolonged Bank Holiday and the issue of £1 and 10s. notes and the increase in the amount of silver in circulation has enabled it to come to its new bearings. Hopes are freely expressed that it will work well and efficiently in its altered circumstances. I have, indeed, heard it stated by an eminent authority in the City that the new position is very much more prosperous than could have been expected a few days ago, and that prospects were favourable, if account were taken of the numerous restrictions to which British trade is for the moment subjected. We now know where we are and upon what we have to calculate. Most people seem to be fully determined to practise reasonable economy and patience and to make the best of the situation, which is not nearly as bad as it might be.

***

The fall in the Bank rate is in itself a most welcome sign of the return of confidence. Normal conditions naturally cannot be restored until the end of the war, but trade can prosper in sub-normal conditions. What it wishes to avoid is the financial "temperature," which is indicated by a Bank rate in double figures.

***

The various strands of international finance are so closely intertwined that there is small wonder that many countries wholly outside the area of the original disturbance have been most disastrously affected. Egypt has been no exception to the rule, the export of food has been prohibited and a bank holiday proclaimed. Moreover, two foreign banks have had to close their doors, while the Government has considered it necessary to make National Bank of Egypt notes legal tender to any amount. The failure of the Deutsche Orient Bank and the Banco di Roma is hardly to be wondered at, inasmuch as a great deal of their financial activity appears to have been directed to political rather than strictly commercial ends. This may account for their collapse, as these banks have expended money on abstracts which in time of crisis cannot figure as realisable assets.

***

I do not think that when the history of the past week comes to be written our descendants will have any need to feel ashamed of the way in which the nation faced the serious trouble that has been forced upon it so suddenly. As to what has been done by our statesmen and politicians, it is not my province to say anything. But I am proud of the way in which our financiers, merchants, and business men, big and small, have kept their heads, and set to work to adapt themselves to the change of circumstances without delay. The people as a whole, too, as far as I have been able to judge, have taken the coming of war wonderfully well. Here and there a selfish individual has rushed off in haste to lay in a stock of provisions, and here and there there has been a foolish panic regarding the possible shortage of gold; but on the whole the selfish members of the community have been conspicuous by their fewness.

***

"A Lloyd's telegram from Monte Video states that a Government Decree has been issued ordering a general moratorium till August 8. The Stock Exchange and banks are not to open." When my eye caught the above announcement in an evening paper on Tuesday the full significance of the financial crisis was borne in upon me. It is indeed surprising that the shock of European events should affect South American finance. But that Uruguay—stable, peaceful Uruguay—should be embarrassed is almost beyond belief.

***

On Thursday of last week, I notice, Sir J. D. Rees, in the House of Commons, asked questions in connection with two subjects that have been prominently before readers of THE NEAR EAST of late—the Haifa Vice-Consulate and the parcels post to Persia. As to Haifa, the questioner wanted to be informed whether our Vice-Consulate was to be converted into a Consulate. Sir Edward Grey replied quite bluntly that he saw no reason for altering the present status of the post, and added that the fees received at the Vice-Consulate last year were only £30, which would not justify a salaried appointment. If Sir Edward's hands were not so full as they are I should suggest to him that in this instance he is taking a rather narrow view of the case. It is the advertiser who secures customers nowadays; even nations cannot afford not to advertise; and a Consul—of the right kind—is a very fine advertisement for his country. Moreover, as I understand it, one of the chief points urged by those who are agitating for a salaried, "full-blown" Consul is that, owing to the existing state of affairs, we have not secured anything like the share of trade we might have if we had such a representative—which, in turn, would, of course, mean that with a salaried Consul in charge the fees would mount up.

As to the parcels post to Persia, Sir Edward thought something might eventually be done in the way of setting up a post by way of Liverpool and Batoum, but he was inclined to "fear that such a service would serve no useful purpose." I suppose very little is to be gained by talking, or writing, about this topic just now; but I must remark that it does strike me as an unbusinesslike arrangement that British parcels for Persia, which have to be delivered by Russia, can only be sent by a service "conducted through the intermediary of some third administration having agreements both with this country and Russia." In fact, the arrangement strikes me as so roundabout and unsatisfactory that I can hardly regret its breakdown, since I feel sure it must result in the evolution of a better system.

***

I saw by a Reuter's message from Teheran that the officer commanding the "Swedish" Gendarmerie had notified the Persian Premier that he must ask his Government to withdraw the Swedish instructors unless their arrears of pay and expenses are paid up by the 1st of this month. But either no report has since appeared in the Press on the subject or else I have missed it in the exciting events of the past three or four days. At any rate, I am wondering whether Persia managed to put her hands on the £23,000 odd that the bill amounts to. I hope so; for I should be sorry for the sake of our trade to see the Swedes leave Persia just now.

***

Egyptian cotton growers will note with satisfaction that the demands for raw material made upon them by Lancashire spinners will in no respect be minimised by the decision arrived at on Friday of last week for compulsory short time in the mills. Only users of American staples will be affected by the policy, over 80 per cent. of whom voted in favour of short time for three months between now and October 10. It is estimated that there are ten million or so spindles engaged in the spinning of Egyptian cotton, and these will continue to run full time. This description of yarn is gaining popularity among manufacturers on account of its superior quality.

***

I have been interested in an article on "The Export Trade of Egypt," which occupies the place of honour in the July *Journal* of the British Chamber of Commerce of Egypt. Apart from cotton and cotton seed, the principal articles exported by Egypt, of which we take a considerable share, are: Onions, oil cake, eggs, wool, hides, leather, and leather goods. In these we appear to have been increasing our purchases of eggs and wool; but in all other items our imports have fallen off considerably since 1895—the date to which the statistics published in the *Journal* go back. Thus for the years 1895-1899 the average value of exports was £E13,068,373, of which our proportion was 51.9 per cent., whereas in 1913 our proportion of the total exports (£E31,267,087) was only 43.1 per cent. And over the same period our proportion of the total cotton exports has sunk from 49.1 per cent. to 43.1 per cent.; of cotton seed from 89.5 per cent. to 56.5 per cent.; and of sundry exports from 36.3 per cent. to 30.1 per cent. If these figures should depress them, non-smokers may find some consolation in the knowledge that whereas in 1895 we took 27 per cent. of the total of Egypt's export of cigarettes, our purchases for last year were only 15 per cent.—represented by the paltry sum of £E59,160.

British Shipping in War.

For more than a year the highly important subject of the insurance of British shipping in time of war has been under the consideration of a sub-committee of the Committee of Imperial Defence. The Sub-Committee was composed of Mr. F. Huth Jackson (chairman), Lord Inchcape, Sir Norman Hill (of the Liverpool Steamship Owners' Association), Sir R. Beck, Mr. A. Lindley, and Captain M. P. Hankey. The question they had to consider was whether a practical scheme could be devised for submission to the Government for the prevention of British steamers being laid up in time of war, and for the protection of over-seas commerce against excessive rise of prices in insurance rates. The report of the sub-committee is now available, and on Monday Mr. Lloyd George announced that the Government propose to give immediate effect to the scheme.

The scheme proposes that the State shall assume 80 per cent. of the war risks on vessels leaving port after the declaration of war. The State is to file the premiums on vessels for new voyages within certain limits; and no premium is to be charged (by the State) in respect of voyages already begun at the outbreak of war. The sub-committee assumes that 5 per cent. of the British vessels at sea or in the enemy's ports at the outbreak of war will be captured, and that a further 5 per cent. of steamships available for foreign trade will be captured in the course of the six months following.

The Times (August 4) summarizes the recommendations of the sub-committee as follows:—

(*a*) in the case of hulls:—

(1) That arrangements should be made with the existing clubs, or mutual war risks associations, that they shall extend their existing standard forms of policy to cover the King's enemy risks up to the arrival of the vessels at the final port on the voyage which they are making when war breaks out or hostilities have begun, and for ten clear days after such arrival.

(2) That arrangements should be made with the existing clubs or mutual war risks associations for the issue of policies covering the King's enemy risk on vessels starting on voyages after this country is at war.

(3) That the State shall reinsure 80 per cent. of all these risks.

(4) That no premium shall be charged by the State in respect of voyages current at the outbreak of war.

(5) That for voyages begun after the outbreak of war the State shall fix the insurance premium to be charged on a voyage basis, and shall receive 80 per cent of such premium.

(6) That the State shall have the right to fix and vary the premiums from time to time, as may be considered necessary, within a suggested maximum of 5 per cent. and a minimum of 1 per cent.; but a rate agreed for a specific voyage shall hold good if the vessel sails on that voyage within fourteen days of the completion of the insurance. On the other hand, if the starting of a voyage is delayed under the orders of the Admiralty the assured shall have the option of cancelling the policy and receiving back the premium paid.

(7) That the clubs shall run the remaining 20 per cent. of these risks, both before and after the outbreak of war, receiving for voyages commencing after the outbreak of war 20 per cent. of the premiums fixed by the State.

(8) That all expenses shall be borne by the clubs.

(9) That the club policy shall contain the following warranties:—

(*a*) That no ship insured by the State shall start on a voyage if ordered by the Admiralty not to do so, and that under both the policy relating to a new voyage and the policy relating to the completion of the voyage any orders that the Admiralty may give as to routes, ports of call, and stoppages shall be obeyed. Provided that, in case of breach, the above warranty shall not operate if the assured can satisfy the Committee of the Club that such breach happened without the fault or privity of the assured and of the owners and of the managers of the ship.

(*b*) That the ship insured shall be deemed to be at all times fully insured against all perils covered by an ordinary Lloyd's policy (with collision clause attached) and containing an F. C. and S. Clause, and no claim whatever against which the ship is deemed to be otherwise insured as aforesaid, or against which she is in fact insured by any other insurance policy, shall be recovered under the Club policy.

(10) That ships so insured undertake, as far as possible, to carry out the orders of the State in regard to their routes, ports of call, and stoppages. Failure to carry out such orders will involve an appropriate penalty, but such failure shall not be treated as a breach of warranty.

(11) That each Club and its constitution shall be approved by the State.

(12) That the State shall be represented on the Committee of each Club.

(13) That the basis of values for the purposes of State insurance shall be the value accepted for income-tax purposes—that is to say, the first cost of the vessel without allowance for the cost of alterations or additions, less depreciation at the rate of 4 per cent. per annum, but without any minimum limit per ton.

(14) That the Club shall not be bound to pay a loss if the ship be recaptured or released, or restored to the assured within six months after the date of capture.

(15) That claims shall be dealt with and settled by the Committee of the Club. If a claim be settled with the approval of the State's representatives on the Club Committee, the State to pay on the agreed figures. If the State's representatives protest against a proposed settlement, the liability of the State under its policy of re-insurance to be settled (failing agreement to refer to arbitration) by the Courts of Law.

(16) That in the event of loss by destruction or capture, the first payment by the State shall be made at the end of six months after the event.

(17) That the liability of the State shall be discharged in three equal instalments at six, nine, and twelve months from the date of loss or capture, with interest at the rate of 4 per cent. per annum.

(18) That a Board of Experts shall be appointed to advise the State on the question of rates and variations of premiums, and that the State shall have one or two representatives on this board.

(19) That this arrangement shall only extend to vessels which are in the Clubs and which are under the British flag and registered in the British Isles.

(20) That the State should be prepared, if necessary, to make similar arrangements with other bodies than the existing Clubs, provided such other bodies represent a sufficiently important amount of tonnage and can provide satisfactory machinery for the protection of the State in the matter of values and of claims.

92. (*B.*) In the case of cargoes—

(1) That no arrangement shall be made for the insurance by the State of cargoes afloat at the time of the outbreak of a war in which we are a belligerent.

(2) That immediately after the outbreak of such a war a State insurance office be opened in London for the insurance by the State against King's enemy risks of cargo starting on a voyage after the outbreak of war.

(3) That the rate of premium charged by the State for covering these risks be a flat one, irrespective of the voyage or the character of the cargo insured.

(4) That the State shall have the right to fix and vary such rates of premiums, within a maximum of 5 per cent. and a minimum of 1 per cent. But a rate agreed for a specific voyage shall hold good, provided the cargo starts on such voyage, within fourteen days. If, however, the voyage is delayed under the orders of the Admiralty, the assured shall have the option of cancelling the policy and receiving back the premium paid.

(5) That the values of cargo for State insurance shall be the values agreed in the marine insurance policies covering the same cargo.

(6) That these marine insurance policies must be produced at the State office, when the State insurance of war risks is finally arranged.

(7) That the premiums for insurance must be paid in cash to the State office when the provisional insurance is effected.

(8) That if, when the marine insurance policies are produced, the values in those policies shall be less than the amount provisionally insured in the State office, the premium on the excess value will be refunded, but no increased value on a shipment will then be accepted.

(9) That marine insurance policies will only be accepted by the State if issued by members of Lloyd's British Insurance Companies, and other approved Insurance Companies and Underwriters.

(10) That claims under the State insurance policy shall be settled on the basis of the marine insurance policy, but such marine insurance policy shall be deemed to contain such standard clauses (if any) as may be approved by the State in regard to the particular class of cargo insured.

(11) That the State insurance of cargo shall be confined to cargo on vessels insured by the State.

(12) That the State shall be prepared to insure all cargo on such vessels, irrespective of the nationality of the owner of such cargo, except, of course, enemy cargo.

(13) That a Board or Boards of Advisers shall be established to assist the Government both with the administrative work of the State office and with the settlement of claims.

(14) That one of these Boards should be appointed at once with a permanent secretary.

OTTOMAN DOCKS AND ARSENALS CO.

In the House of Commons last week, replying to Mr. King, who asked whether he had considered the objects and conditions of the Imperial Ottoman Docks, Arsenals and Naval Construction Company; and whether the British Ambassador in Constantinople had taken any part in furthering the formation of this company. Sir Edward Grey said:—"As I stated on March 5 last, I am informed that the Turkish Government has granted a concession to a combination of the firms of Armstrong and Vickers for the organisation and reconstruction of the existing dockyards at Constantinople. This agreement was the result of private negotiation between the Turkish Government and the firms interested, in which his Majesty's Government had no participation."

Mr. King also asked the Prime Minister whether he was aware that Sir Charles Ottley, late Secretary of the Imperial Defence Committee, was a director of the Imperial Ottoman Docks, Arsenals and Naval Construction Company, and that this company had been formed for the building and repair of the warships of a foreign Power; and whether he would take steps to provide that any servant of the Crown holding a position of the character held recently by Sir Charles Ottley should be debarred on relinquishing his post from entering, directly or indirectly, the service of a foreign Power.

Mr. Asquith: The answer to the first part of the question is in the affirmative. As regards the last part I would refer my hon. friend to the replies which I gave on this subject on March 20, 1912, and January 9, 1913.

AN ALGERIAN EGYPT.

Among the many interesting papers read at the Congrès des Colons Français de l'Afrique du Nord at Lyons few attracted the audience more than that of M. Edouard Buchère on "Le Sud-Constantinois: une Nouvelle Egypte Algérienne" (says a Paris contemporary). M. Buchère described the region as a country very little known and of remarkable fertility, situated at the entrance of the Algerian Sahara, more extensive than Egypt, and containing enormous areas of excellent land, which are enriched each winter by the detritus brought down by the torrents descending from the phosphate mountains of the Aurès. There are more than a million hectares of these excellent lands lying dormant.

M. Buchère has successfully cultivated the soil in those regions for many years past, having obtained good results from dates and cereals as well as from sheep-farming. The production of cotton, however, is to be greatly extended, as the climate and soil of South Algeria appear to be identical with that of Egypt.

SPECIAL REPORTS.

(From Our Own Correspondent.)

Khartoum. July 27.

For the month of June the rain reports are on the whole well up to the average. In the southern provinces the latest indications are everywhere promising, and in the Gezira, where heavy cultivations are always in progress, the news of good rains is encouraging.

In Dongola locusts have done serious damage, and the young dura in the Korti district was completely destroyed. At Damer, in the Berber province, where there are cultivations of maize and cotton, the locusts were at their worst, devouring most of the trees.

CROPS IN THE S. BALKANS.

According to the French Vice-Consul at Baurgas, the corn prospects in the South of the Balkans will be inferior this year to that of last year, from the point of view both of quantity and of quality. Recent storms which had been preceded by dryness were the cause of great havoc in the fields.

On the other hand, the corn having been scorched by the sun after having greatly swollen under the influence of persistent rain, the grain was not able to ripen into a good condition, and in many places it shows signs of blight. From this concourse of unfavourable circumstances, the Consul adds, it seems safe to surmise that the harvest of 1914 in Southern Bulgaria will be inferior by a third to that of 1913, which was a good average.

THE ARABIAN DATE HARVEST.

The date harvest in Turkish Arabia this year promises to be a bumper one, according to *The Egyptian Mail*, but there are other factors which make date exporters view the situation with some apprehension. A shortage of labour is apprehended. Owing to the unsettled state of affairs, those Arab tribes who come once a year to the towns, bringing with them wool and other articles for exchange, are, it is stated, likely to remain in their homes, and consequently the labour of their women folk will not be available. This will hinder considerably the packing of the dates.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna. report as follows for the week ending July 24:—

The sales this week on our market amount to 77 cases of old and new qualities at 17s 6d. to 19s. 6d. as to quality and crop. To-day's price for 11.1/2 per cent. mixed goods is 18s. 3d., and for uniform selected quality same render 18s. 6d. Heavy showers of rain have again fallen early in the week in some of the interior districts, causing further damage to the poppy. Next month we shall be able to give a more or less correct estimate of the crop, but from all accounts we don't think it will be over 7,000 cases, some dealers of which make it out only 5,500 to 6,000 cases. The arrivals are 753 cases.

PORT OF TANGIER CONCESSIONS.

The International Technical Commission which has been considering the question of concessions for the port of Tangier concluded the examination of the new proposals of the International Society for the Development of Tangier in Paris last week. Agreement was almost reached on the technical and financial bases of the concessions. The Commission will meet again in November to draft the final text of the convention and specifications.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, August 5.

Business in the market during the past week has been entirely suspended. Such abnormal conditions have never existed before in the lifetime of the oldest member of the Exchange. Owing to the extension of the Bank holiday and the closing of the American and Liverpool raw cotton markets, it was decided yesterday (Tuesday) by the directors of the Manchester Exchange to close that building until Friday morning. Trading on ordinary lines, of course, has been quite impossible, and the bulk of the time of buyers and sellers has been spent in dealing with old contracts and making arrangements for stopping deliveries wherever possible. Manufacturers of cloth find it useless to press supplies upon customers which are not wanted and cannot be shipped. The owners of many weaving sheds have decided to close down for an indefinite period, and unless there is a distinct change in the situation, the Lancashire industry will be at a standstill within the next few weeks. A special meeting of the Master Cotton Spinners' Federation was held yesterday (Tuesday) when it was decided to urge the members to complete the short time working, already arranged, without delay. This, of course, refers to the American section. It was also decided to ask spinners producing Egyptian yarns to consider the matter of curtailing production on an organised scale. The prospects are very uncertain, and home users of yarns have instructed spinners to stop deliveries until further notice. Of course, contracts of this character are delivered against as required. For the time being, export trade has come to an end.

SUDAN MARKETS REPORT.

The following are extracts from the monthly report for June of the Central Economic Board, Sudan Government:—

Gum.—During June 1,717,900 kilos. of gum, valued at £50,319, were exported viâ Port Sudan, and 2,013 kilos, valued at £54, viâ Halfa. During the five months, January to May, 1914, 7,379 tons of gum were carried on the Kosti—El Obeid Railway, as against 7,873 tons during the corresponding period of last year.

A Kordofan Province report states that the amount of gum brought into the El Obeid gum market during June was 11,020 kantars of 120 rottles (54 kilos.). This compares with 23,612 kantars in the corresponding month of 1913 and 22,507 kantars in 1912. Prices have continued high. According to a Kassala Province report, the quantities of gum imported and exported at Gedaref and Mafaza during May were as follows:—Gedaref: Exported, Hashab, 1,670 kantars of 110 rottles (49 kilos.); Talh, 457 kantars. Imported: Hashab, 1,564 kantars, Talh, 433 kantars. Mafaza: Exported, 557 kantars Hashab, and 83 kantars Talh. Imported: Hashab, 583 kantars; Talh, 120 kantars.

Cotton.—A Berber Province report for June states:—At Zeidab a start has been made in cotton growing on the native-owned land. Cotton seed has been taken up readily, especially in Berber District, where over twenty ardebs were distributed among 500 sakias which had sufficient water available and some of it is coming on well. Ashmuni seed has been distributed in Shendi District, Zeidab Nyassa round Zeidab and Damer, and Darmali American in Berber.

PRODUCE REPORT.

London, August 6.

Sugar.

The last few days have witnessed a state of great suspense in speculative circles, and a considerable enhancement in the value of available sugar. At the time of writing, although the market is practically closed, some business has been done in spot sugar at from 10s. to 25s. advance. Crystallized Trinidad sold at 30s., and foreign refined at 25s. to 40s. Tate's and Llye's goods are still not offering.

The general supplies of sugar in stock and afloat were:—In Great Britain, according to Board of Trade Returns, June 30, Raws, 231,600 tons; and refined, 83,700 tons; in Germany, July 1, 783,200 tons; Hamburg, July 25, 112,640 tons; Austria, July 1, 436,700 tons; Trieste, July 22, 14,700 tons; France, July 1, 261,130 tons; Holland, July 1, 49,000 tons; Belgium, July 1, 80,490 tons; and afloat, July 30, 59,350 tons. Total for Europe 2,112,510 tons.

Coffee.

Owing to the extension of bank holidays and the political crisis, the coffee and other markets are closed. The actual spot market, however, has not altered. The whole of this year's crops have been received here, and the present stocks will have to last until the end of the year, so that there is no reason to fear serious alterations.

Currants.

It is difficult to foretell to what extent the market will be affected by the war, but it is fortunate that existing stocks are quite sufficient for average requirements for the next two months, but any attempt to inflate prices might be attended with undesirable results.

Sultanas.

Stocks on the spot, with the exception of fine fruit, are fully ample for all immediate requirements. There has been a fair demand, with a more general enquiry, for fruit from 38s. to 42s. The position respecting the new crop is, so far, unchanged, and no news has been received reporting any further damage.

Seeds.

Oilseeds remain nominal. Canary seed is inclined to be weaker. Blue Peas' prices have advanced 10s. per quarter, and business is very difficult; holders of any stock are more inclined to await developments than to sell. Haricot Beans are in a worse position, dealers refusing to sell. Butter Beans have been a very strong market, apart from any war news.

MORATORIA IN THE BALKANS.

In the House of Commons, in a written question, Sir Godfrey Baring has asked the President of the Board of Trade whether the merchants of either Bulgaria, Greece, Servia or Turkey had demanded a moratorium because of the crippling effects of the recent conflict in the Balkans; and, if so, the date at which the merchants of each country first availed themselves of the privilege afforded by such a moratorium?

Mr. Burns writes:—As far as I am informed, a moratorium was declared in Bulgaria on October 2, 1912, and expired on September 25, 1913. In Greece a moratorium was declared on October 6, 1912, and expired on January 21, 1914. In Servia a moratorium was declared on October 14, 1912, and expired on January 30, 1914. I am not aware that any moratorium was declared in Turkey. I have no information as to the dates at which the merchants of each country first availed themselves of the privileges afforded

Engineering Notes.

Sewage Farming in Egypt.

In his report on the trade of the consular district of Alexandria for 1913, Mr. Vice-Consul Geary writes:—Sewage farming in Egypt is profitable, although it does not pay in Europe, because the water, which constitutes the bulk of sewage, is the greatest need of Egypt, but for the most part superfluous in Europe. On the completion of the purification works of the Cairo drainage scheme a large stretch of desert will be irrigated, which has proved to be capable of producing the finest garden produce; for sewage in Egypt practically consists of Nile water enriched with special plant foods deficient in the soil and necessary for the production of crops. Purified sewage is quite inoffensive, and drinkable water can be created by increasing the degree of purification. Sewage farms should prove a great success in this country.

The Engineer in Egypt.

In awarding certificates to the successful students at the Crystal Palace School of Engineering a few days ago, Mr. Anthony G. Lyster, president of the Institution of Civil Engineers, appealed to young engineers to remember that their duties were not limited to professional work. Among their other duties was that of the defence of their country. Speaking on the prospects of the young engineer at the moment, Mr. Lyster suggested that no doubt each student had come into contact with persons who insisted that the profession was overstocked. Such statements must not be allowed to dishearten them. Civilisation was spreading through the world, and although there might be an increasing difficulty in getting suitable work in this country, Egypt, India and other Dominions beyond the Seas offered vast fields for enterprise.

A Novel Aero Craft.

The Egyptian Gazette refers to a novel craft that has recently appeared on the Nile. It is air propelled and is described as "a large punt-like boat, drawing very little water, and propelled by two 9-feet blades standing in the air like small masts at each end of the boat. These propellers are worked by separate benzine engines, the attachment of one being by a steel cog chain and of the other by a leather band. This latter is being experimented with in the hope of lessening the terrific noise which at present accompanies the working of the propellers. The boat is capable of attaining great speed, and the absence of anything necessitating depth of water makes it specially suitable for navigation of the river at low Nile." The *Gazette* understands that the boat is the property of a wealthy resident of Giza, who has great ambitions for the future development of air-propelled craft.

Flying Machines in War.

Owing to the sensational rumours concerning the employment of airships and aeroplanes in war, people are wont to exaggerate their powers as aggressive weapons. With regard to aeroplanes, the results of bomb-dropping competitions, and the experience of Italian aviators in Tripoli and of Greeks in the Dardanelles, have been so uncertain and inconclusive that little real knowledge has been gained on the subject. It is asserted by experts that an explosive dropped from a height of sixteen hundred feet has attained a velocity on reaching the earth of over three hundred feet per second, so that much of its explosive force is unavoidably lost, and if the charge is very great the bomb is resolved into a number of ineffective atoms. Shrapnel with a time-fuse is also useless at present. It is, therefore, believed that explosives aimed during the day time at living objects will not do much harm, and any fears on this score are groundless. With regard to the dropping of explosives on inanimate objects, the outlook is somewhat different, for it is maintained that in this case, to be effective, at least 150 to 200 pounds of explosive matter should be the minimum weight of each projectile, and for this purpose aeroplanes are useless. An airship is the only aerial vessel capable of effective use for the dropping of explosives, since it can keep an exact course and can remain stationary over a definite point. But there is a most effective weapon for the use of aviators in aerial combat—an automatic rifle or machine gun which can be used from the ground or from an airship or aeroplane, and the existence of such a weapon does not encourage the use of airships. The real value of flying machines in war remains to be proved, for up to now they have been practically an unknown quantity.

A New Type of Crude-Oil Engine.

At the recent Royal Agricultural Society's Show, a crude-oil engine by Messrs. Fielding and Platt, Limited, of the Atlas Works, Gloucester, roused considerable attention. It was a four-stroke-cycle engine of 45 b.h.p., on the semi-Diesel principle, running at a speed of 240 revolutions per minute, with a cylinder 12½ ins. in diameter, and a stroke of 22 ins. The fly-wheel was 7 ft. 4½ ins. in diameter, with a face 15 ins. broad. A characteristic feature of this engine is that the cylinder is supported throughout its length by the frame, there being no overhang. The combustion chamber carrying the valves is a casting with an independent water-jacket, so that no water-joint is necessary between it and the cylinder casting, and hence there is no danger of leakage taking place. This facilitates the control of the temperature of the two parts, and the engine will run "dead light." The joint between the cylinder and combustion chamber is effectively protected. Covering is effected by varying the fuel supply, maintaining an explosion for each cycle. The oil injection pump always has the same stroke, but the supply is regulated by means of an auxiliary valve, or by-pass, controlled by a lever and cam, which in turn are operated by the governor. This auxiliary relief-valve is opened early or late in the stroke of the pump, according to the requirements of the moment. The fuel is injected 5 per cent. of the stroke from the back dead centre. The fuel is injected through by a simple 1-16 in. hole fitted with a none return valve. The engine will use any grade of oil up to 0.95 specific gravity, and consumptions as low as 0.45 lb. per brake-horse power hour have been recorded with it. The cylinder and piston are lubricated by a positive pressure adjustable lubricating pump driven off the cam-shaft.

Suction Gas from Wood Refuse.

The cost of fuel has often barred the adoption of mechanical powers for the development of many promising industries and agricultural pursuits in the Near East. Coal, except in districts near seaports, is obtained at a price considerably higher than in England; oil in some districts is cheap, but in others is dear, owing to import duties, and gas can only be obtained in large towns where it is used for lighting. In recent years, however, the introduction of suction gas plants has offered such great advantages that their use is constantly increasing, and many factories in towns, pumping and irrigation plants and a variety of local Oriental industries are now met in all directions using such plants for motive power. But, again, some difficulty is experienced in their use when anthracite, or other fuel which is needed, has to be imported. A suction gas plant, therefore, which could work with fuel produced and obtained on the spot appeals to every enterprising individual in those regions; and the new patent "wood refuse" suction gas producer of Messrs. Ruston Proctor and Co., of Lincoln, is a plant which will undoubtedly be found most suitable and economical in all districts throughout the Near East.

The Wood Refuse Plant.

It is a suction gas producer which can work continuously upon wood refuse, such as chips, wood blocks, shavings, sawdust, etc., from sawmills, bark, olive refuse from oilmills, cocoanut husks and shells, rice husks, cotton pods, and many other waste materials. It can also, if desired, consume anthracite, lignite, brown coal, coke, peat, etc. Indeed, the apparatus seems to possess very remarkable digestive powers, whilst its motive force is extraordinarily economical. The plant is of simple construction. It comprises a generator and a dust collector, a tar extractor, and a sawdust scrubber. Special cleaning rods are provided to enable the pipes to be cleaned while the plant is working, without interfering with the flow of gas to the engine, continuity of working being thus satisfactorily obtained. The fuel is fed through the top cover, direct into the fuel container, without the use of a second valve or slide, which is dispensed with in order to give more latitude in the shape and size of the wood blocks or other fuel. Previous to arriving at the combustion zone, the fuel passes down through a distilling chamber, where it comes under the influence of the high temperature of the surrounding gas, which the volatile portion helps to enrich. The fuel is practically changed into charcoal

by the time the incandescent zone is reached. The gas cleaning arrangement is specially commendable. The gas passes through films of falling water, which cool it and free it from dust, the resultant sludge being removable through the water-seal. The water can be used over and over again. Very efficient also is the rotary tar extractor; and by the time the gas has, in addition, been passed through the sawdust scrubber, it is in a very clean state, ready for use by the engine. This plant can be made in all sizes up to 400 b.h.p.

A MOTOR LAUNCH IN EGYPT.

Action in High Court.

In the King's Bench Division of the High Court, London, on Saturday, Mr. Justice Bailhache delivered judgment in an action raised by Mr. Arthur George Mitton Dickson, Sub-Governor of the National Bank of Egypt, residing at Alexandria, against Messrs. John Birch and Co., Limited, merchants and engineers, 2, London Wall Buildings, London, for damages for breach of contract, or alternatively for breach of duty in connection with the sale of a motor launch. Hearing of the case extended over four days.

The circumstances of the action, as related by Mr. A. Adair Roche, K.C., counsel for the plaintiff, were as follows:—About the middle of 1912 Mr. Dickson, while on a visit to this country, placed with defendants a contract for the supply of a motor launch for cruising in the neighbourhood of Alexandria and along the north coast of Egypt. The conditions he stipulated were that the vessel should be seaworthy, suitable for navigation on rough and choppy seas; that the compartment set apart for the passengers should be well ventilated, so that their comfort should not be interfered with by smells or vapours arising from the engine-room; that the engines should be specially strong, and of such a character as to be adaptable for the use of petrol or paraffin; and that the launch should be of "the best Thames workmanship and finish." The launch was delivered at Alexandria in May of last year, the price paid by plaintiff for it and certain "extras" being about £750. After repeated trial trips and examination by experts on the spot, the vessel was found not to come up to the standard of requirements stipulated for. Instead of being capable of a speed of ten knots per hour, its utmost capacity was found to be only eight. In consequence of its defects, plaintiff returned the launch to London. The action was alternative in its terms, concluding for damages against defendants as vendors and also as agents in that they were negligent of their duty and did not take adequate care to see that the commission placed with them was efficiently fulfilled.

Mr. Arthur G. M. Dickson, the plaintiff, in the course of his evidence, explained that his reason for placing the contract with defendants was that he had been abroad ever since he left Oxford, and was therefore out of touch with expert advice. He therefore felt it essential in his own interests to have what he described as a screen between himself and any boat and engine builder by whom the launch might be ultimately supplied.

Cross-examined by Mr. Gregory, K.C., for the defendants, Mr. Dickson admitted that he had suffered no pecuniary damage from the launch having a lesser speed than that guaranteed, but he contended that the deficiency had deprived him and his friends of considerable pleasure.

Mr. Justice Bailhache pointed out that if the vessel had not the speed agreed upon, Mr. Dickson had a perfect right to reject it.

Mr. James Smith, a launch expert from Alexandria, stated that the launch in its present condition was not worth more than £200.

The defence was that Messrs. Birch and Co. were merely acting as agents as between plaintiff and the Ailsa Craig Motor Co., the builders, that all the conditions mentioned in the contract had been complied with, and that deficiency in speed was due to faulty lubrication of the engines on the part of the plaintiff or those acting on his behalf.

Mr. Justice Bailhache, in the course of his judgment, reviewed all the points in the action. Mr. Dickson, he said, wanted a fast and stylish launch with which to cut a bit of a dash before his friends at Alexandria. He found that Messrs. Birch and Co. acted as principals and not as agents. He had come to the conclusion that in some respects the launch supplied was not in accordance with contract. He took it that the measure of damages was the difference between its value as and when delivered in Alexandria and its value as it would have been had it been delivered in accordance with contract. The lack of speed did not cause Mr. Dickson any pecuniary damage, but it did away with the pleasure which he anticipated he could afford his friends at Alexandria. In this respect the launch was worth materially less to him. For this he would make an allowance of £50. Then as to workmanship and finish. A witness sent by defendants to inspect the boat at Alexandria had described them as disgraceful. That was not a conclusive description, but rather a general expression of opinion, but it showed at least that in the opinion of Messrs. Birch and Co.'s representative the finish of the boat was not at all what it should have been. In respect to want of finish and inadequate ventilation, he would make an allowance of £50. For defects in connection with the engine, he would allow £75, making £175 in all, and for that amount he would give judgment with costs.

TENDERS INVITED.

EGYPT.

[*The London agent of the Egyptian Government is Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Westminster, S.W., at whose office particulars of tenders marked (L) are to be obtained.*]

Woollen Blankets.—Tenders are invited by the Egyptian Ministry of the Interior for the supply of 6,800 woollen blankets required by the Prisons' Department. August 27. (L.)

Stoker Wagons.—Tenders are invited by the Ministry of Public Works, Cairo, for the supply of twelve stoker wagons for handling coal. Aug. 15.

Extension of Water Supply.—Tenders are invited by the Local Mixed Commission of Zifta for the extension of its water supply system. Aug. 26.

Drinking Water Installation.—Tenders are invited by the Local Commission of Mattaria for the drinking water installation of Mattaria Menzala. Oct. 10.

The Committee of the British Red Crescent Society have granted £200 for the relief of the distress among the Moslems of Southern Albania.

NEWS FROM ALL SOURCES.

The Zionist Gazette reports that a Mr. A. Blum, who was formerly the owner of a factory for artificial teeth in America, has settled down in Palestine and is going to establish there a similar concern, where he trusts to be able to employ hundreds of Jewish workmen in this enterprise.

The Egyptian Ministry of the Interior announces that the Vacuum Oil Company was the successful tenderer for the supply of petroleum to the police. The adjudication was held on June 25, and the successful tenderers price was £E1,326,985 milliemes.

The Meteorological Office of the Sudan Government Survey Department reports that the rainfall for the Sudan for the month of June last was 10 per cent. above the average. This behoves well for this year's flood.

During June, 5,253 sheepskins and 884 hides were exported from Halfa Province, and 617 hides and 17,335 were exported from Red Sea Province.

The Board of Trade have received a telegram from Odessa, dated Monday, stating that in the Black Sea all lights have been extinguished.

A Berber Province report, dated June, states that the dom nut trade has slackened somewhat, 5,304 kantars having been weighed up to June 26.

Shipping Intelligence.

THE SITUATION.

Sailings Suspended.

So many liners and freight steamers have been commandeered for the conveyance of troops and the munitions of war to the Continent that shipping to the East and all quarters of the world is in a state of stagnation. Enquiries also elicit the fact that the Admiralty has, for obvious reasons, imposed upon steamship companies the need for a measure of secrecy being observed as to future sailings.

At the offices of Messrs. Thomas Cook and Son, Ltd., we were informed that they are not booking passengers for the Near East with the assurance that they can sail at any given date. A meeting of the managers of the great steamship companies was to be held on Thursday afternoon, to decide upon something like a uniform table of sailings. But even if such a table could be arranged, the sailings might be countermanded at any moment.

Mr. Taylor, chief of the Correspondence Department of the P. and O. Company, stated: "The only thing definite we can say at the moment is that we expect to dispatch the "Mooltana" for the East tomorrow (Friday) and by instructions of the Postmaster-General she will carry the Eastern mails. More than that we cannot say. We do not know and cannot say what our arrangements for next week will be."

A wire from our Liverpool correspondent states that all sailings to the Mediterranean from that port have been stopped.

Liverpool steamship companies will be amongst the principal sufferers by the outbreak of hostilities, as a large number of the lines have regular services to the ports of the nations which are now at war. Those lines having trading relations with Mediterranean ports are temporarily suspending their services awaiting the trend of events. It is felt that if Italy should retain her present attitude and remain neutral it will simplify matters, as the British and French Mediterranean fleets will be well able to protect shipping from any attacks by the Austrian Navy and any German warships that might be in these seas.

An official of one of the large Liverpool lines running to the Mediterranean told a representative of the *Journal of Commerce* that they had a steamer due to leave the Mersey at the end of the present week, but they would wait a few days before coming to any decision as to whether they would dispatch the steamer.

An official of another Liverpool line running to the Mediterranean also said his firm were awaiting developments. Their next steamer had been announced to sail from the Mersey on the 8th inst., but her departure had been postponed until they saw what was going to happen, and it would also affect future sailings. Shippers had to a certain extent suspended their shipments.

A gentleman connected with the passenger department of another of the Mediterranean lines from Liverpool informed a representative of *The Journal of Commerce* that some of their steamers were at present lying at Constantinople and Alexandria, where they would remain until events had developed, when they would order the steamers accordingly. For the present they had decided to suspend their sailings.

A Reuter's telegram states that the Dardanelles and the Bosphorus have been closed, but merchant vessels will be able to go through the straits with pilots.

The Position in the City.

Effects of the War.

As soon as it was known that Austria had refused to consider Servia's reply as satisfactory the Vienna Bourse was closed. This at once brought about a general closing of all the other Continental Bourses. The Paris Parquet alone kept open, but here the dealings were for cash and no time bargains were allowed. The London Stock Exchange remained open until Thursday night. It was closed on Friday, and may remain closed for an indefinite period. A certain number of unimportant failures occurred at the settlement. The decision of the Committee to close the House was arrived at because the arbitrage houses could get neither cash nor stock from the Continent, and threatened to hammer themselves on Friday morning unless the House was closed. The Committee did not apparently realise that they could easily have postponed settlement and prevented any more hammering. Dealers inside the House have for so many years been accustomed to make prices and abide by the price quoted that they hailed the closing with relief. Nevertheless it is certain that on Wednesday and Thursday no dealer would make prices or deal except for cash.

Closing of the Stock Exchange.

It is believed that the banks were glad to find the Stock Exchange closed as they feared a further depreciation in their securities. But neither the banks nor the Stock Exchange quite grasped the position. The public has been accustomed to look upon the bulk of its investments as equivalent to cash. But these investments can only be turned into cash through the medium of the Stock Exchange. That closed, the savings of the country were immobilised. Also, neither the Chancellor of the Exchequer nor the brokers and bankers seem to remember that large war loans will have to be made almost immediately, and that these loans can only be made through the machinery of the Stock Exchange. Therefore, the closing of the House was a tactical blunder. Wall Street was compelled in self-defence to close also. Therefore, to-day there is not a Stock Exchange in the world where business can be done, except the Paris Parquet. Here it is possible to deal for cash.

Some people opine that the extension of the Bank holiday, which meant that all banks were closed for five days, was a blunder. It was, at least, an unprecedented experience. Banks in Berlin, Paris, St. Petersburg, and Brussels have remained open and conducted their usual business. Why, then, should the London banks have closed? It is true that England is in a state of war, but her condition can hardly be compared with that of France or Belgium. The bankers' excuse for closing was the paucity of the gold supply, and the fact that no one would change a £5 Bank of England note. The Government have decided to issue 10s. and £1 notes, and they have also arranged that postal orders shall be legal tender. But they might just as well have suspended the Bank Act and taken the other measures on Friday last week, and thus have saved an enormous quantity of gold. They would, in addition, have relieved the anxieties of the trading community of Great Britain and done much to re-establish English credit.

Plenty of Money.

No one need be in the least uneasy in regard to finance. England has lent money to the whole world. Our colonies, most of the South American States, and the whole of North America will continue to remit the interest. We are not largely involved in loans to European States. Therefore, the present war will not greatly affect the payment of interest. The vast sum remitted each month for interest will more than pay for the food supplies. As long as we keep control of the sea we shall secure both our gold and our food. The politicians should have realised this. There was no reason for closing either the banks or the Stock Exchange and it will take some weeks to dispel the distrust caused by the ill-considered action.

Paper money is in use all over the world. The United States, which is certainly one of the richest countries, uses nothing else. In France, Germany, and Russia the note circulation amounts to about £526,000,000, of which France has £267,328,000, Germany £95,000,000, and Russia about £163,000,000. The note circulation in Great Britain is £55,000,000, but the bulk of this is undoubtedly held by the banks in notes of high value, and is therefore not available for ordinary purposes of commerce. The Government proposes to make the note issue redeemable in gold at the Bank of England. This seems a quite unnecessary and somewhat dangerous step to take. Suppose that an unreasoning panic occurs? The Bank would then be unable to pay out gold for notes, and further steps would have to be taken to protect our gold supplies. It is a pity to makes two bites at a cherry.

Action of Foreign Bankers.

There are serious rumours going round the City in regard to the action taken by the foreign banks in the late crisis. Many stockbrokers are in the habit of borrowing money from the foreign banks for the purpose of carrying over stocks at the settlement. On the day before the settlement these loans were arranged as usual. Nevertheless, the money was not forthcoming. This was a gross breach of faith, and it was only with the greatest difficulty that other bankers could be got to take up the position. In some cases the foreign banks had actually written to the brokers engaging to find the money, and only withdrew at the last quarter of an hour. The Stock Exchange is very sore, and now declares that this withdrawal was a prearranged plot done with the deliberate intention of producing a panic in the House. Such a statement is, of course, incapable of proof. But it is a fact that will not be forgotten for many years that the banks did write to the brokers promising the money, and that they did withhold this money at the last moment, knowing perfectly well that such action would ruin many firms.

It is also well known that at least one of the great German banks sent out a circular to its clients nearly three weeks ago urging them to sell every security they possessed. This bank, when it sent out the circular, must have had private information of the Austro-German coup and must have been informed that war was intended. This same bank shipped the whole of its securities, gold, cash and notes, to Germany at the beginning of the fateful week in which war broke out, but long before anyone except insiders knew that the position was critical. It will be many years before the German banks will dare to establish themselves in London again, for the City will never forget the trick that was played upon it.

It is expected that strong pressure will be brought to bear upon the London Stock Exchange, and that it will be re-opened, at any rate for cash dealing, very shortly. That means that Wall Street will follow suit, and these two exchanges should be able between them to do a large financial business and a quite reasonable trade in certain stocks and shares.

War undoubtedly destroys credit, but it does not destroy the capacity of a trader to make money. The United States will benefit largely by the war. South America will also supply foodstuffs at a great profit to itself, and the Italian manufactories will be kept busy with orders during the whole length of the war. Many of our own manufactories will be full of orders. Therefore, there is no reason for any unnecessary alarm. Business has received a severe shock, but it will soon settle down.

BULGARIAN WAR CREDIT.

Under date of July 31, Reuter's Sofia correspondent states :—The Government has proposed in the Sobranje a Bill to open a credit of £6,000,000 for war material, to be spread over four financial years. As the Sobranje will shortly suspend its sittings, the Premier asked that the Bill, which had already been prepared for some time, should be passed with all speed. In view of the favourable attitude of the Opposition, it is expected that the Bill will be passed unanimously.

COMPANY NOTES.

F. W. Cuming and Co., Ltd.

A company with the above title was registered on July 30, with a capital of £10,000 in £1 shares, for the purpose of acquiring and taking over any business of insurance agents and brokers now carried on in Egypt, the Sudan and the Levant, or elsewhere. The registered offices of the company are at 7, Bloomsbury Square, W.C.

Jaffa-Jerusalem Railway.

According to a report received by the *Zionist Gazette* from Jaffa, the receipts of the Jaffa-Jerusalem Railway for 1913 amounted to Frs. 13,000,000. The company distributed on original shares (nominal value Frs. 500), Frs. 4.0625 per share, and on bonds (nominal value Frs. 500), Frs. 33.9584. The company is believed to have a large reserve fund, but the amount is not mentioned in the report.

Anglo-Persian Oil.

A meeting of the holders of the First Debenture Stock of the above company, secured by a trust deed dated May 25, 1909, and made between the above company of the one part, and the Duke of Sutherland, K.G., and the Right Hon. the Earl of Lichfield of the other part, was called for Wednesday, 5th inst., for the purpose of considering, and, if thought fit, passing the following resolution:—"That this meeting of the holders of First Debenture Stock of Anglo-Persian Oil Company, Limited, secured by a trust deed dated May 25, 1909, and made between the company of the one part, and the Duke of Sutherland, K.G., and the Right Hon. the Earl of Lichfield of the other part, hereby approves the appointment of the Right Hon. Sir Francis J. S. Hopwood, G.C.M.G., of 13, Hornton Street, Kensington, London, W., as one of the trustees of the said trust deed in the place of the Duke of Sutherland (now deceased)."

The Earl of Lichfield presided. Mr. F. C. Strick proposed the resolution, which was seconded by Mr. G. W. Kelbe, and carried unanimously.

COMPANY RESULTS, &c.

CREDIT FONCIER EGYPTIEN.—Ten numbers are announced of 3 per cent. bonds of the 1886 issue, of the 1903 issue, and of the 1911 issue, drawn for repayment on August 1.

OTTOMAN THREE AND A-HALF PER CENT. LOAN, 1884.—The numbers are announced of 579 bonds which have been drawn for repayment at par on October 15.

BAGHDAD TRAMWAYS AND ELECTRIC LIGHTING SYNDICATE, LTD.—Satisfaction has been made to the extent of £8,400 (being amount issued), on May 7, of trust deed dated April 2, 1914, securing £15,800. (The charge has now been cancelled.)

TRAMWAYS D'ALEXANDRIE.—Receipts during the period from October 1, 1913, to June 30, 1914, amounted to Frs. 1,801,920, as compared with Frs. 1,733,142 in 1912-13, an increase of Frs. 68,778. During the same period the receipts of the Ramleh system amounted to Frs. 1,424,789, an increase of Frs. 46,640 over those for the corresponding period of 1912-13.

CIE DES EAUX DE SCUTARI ET KADIKEUI, CONSTANTINOPLE.—A dividend at the rate of 6 per cent. per share has been declared for 1913.

ANGLO-ROUMANIAN PETROLEUM.—Production of crude oil for the week ended July 25 was 380 tons.

EGYPTIAN MARKETS.—The receipts for the week ending July 29 amounted to £605, this being a decrease of £62, as compared with the corresponding period in the previous year. The total from the commencement of the year is £31,059, a decrease of £1,550.

COMPANY MEETING.

ORIENTAL CARPET MANUFACTURERS.

The following is the report of the directors of the Oriental Carpet Manufacturers, Ltd., submitted to the sixth ordinary general meeting held at Smyrna on July 11 :—In conformity with No. 60 of your articles of association, we have invited you to attend this general meeting in order to put before you the results of the year's trading to December 31, 1913, and to submit the accounts for your approval. As you know, gentlemen, a very severe crisis has prevailed during the past year affecting industry and commerce the whole world over. Your company was bound to be affected to a certain extent by a period of depression in business consequent on the late wars, the results of which made themselves acutely felt not only in the Balkan States but also in Central Europe. The volume of our sales in Europe was naturally reduced; fortunately, however, this reduction was amply compensated by an increased sale of our goods in America, and by the importance which our manufacture in Persia has already attained. This clearly shows the advantages of a policy of expansion, and the benefits which your company derives in possessing manufacturing centres not only in Turkey but also in Persia and India, and selling branches in almost every part of the world. As regards the goods produced by your manufacturing districts in Asia Minor, we have obtained as a result of our efforts in the past a very high standard in quality and style. We are now devoting special efforts to our manufacture in Persia; we are quite satisfied with the results so far obtained, results which have exceeded our best expectations. It must be remembered, however, that owing to the extended area and the vast importance of the carpet industry in Persia, several years must elapse before our manufacture can attain the high standard of excellency obtained in Asia Minor and thus secure for your company that supremacy which it holds unchallenged in this country. On the other hand, even as things are at present, we have already reached a yearly turnover in Persian carpets of about £600,000 on a total output of £1,800,000; the business done by us therefore represents approximately a third of the total production of Persia. This result, although satisfactory as a start, is open to considerable increase in proportion to the development of our manufacture in that country. We are all the more keen on this development as Persia offers great possibilities. We sent one of your directors to Persia last year on an extended visit which lasted several months, in order to apply our own methods and system of manufacture, and it is our intention to continue this policy of sending yearly one of your directors thoroughly conversant with the business for the inspection of all looms and for the improvement of our manufacture.

The Company and the Government.

Now, gentlemen, it has been insinuated that we are meeting with difficulties in obtaining an increase of weavers in this country, and that your company is not enjoying the sympathy and support of the Ottoman Government. These rumours are absolutely devoid of truth, and in order that you should be perfectly clear on this point, we wish to assert that weavers have never been so plentiful and that we are and always have been on excellent terms with our local authorities. We even take pride in saying that the latter have on all occasions extended to us their fullest and immediate support, and ever afforded to us all the protection necessary for the development of our industry. We may mention here that we have on several occasions been requested by friends of our company to officially contradict these malicious rumours as well as the alleged discord amongst our directors. We have always replied in such cases that it is not in the province of directors' duties, nor compatible with the dignity of the board, to give official denials every time an outsider, whether from personal interest or other motives, causes rumours of this nature to be spread about. But as this report is for the edification of our shareholders, we can declare without reserve that no disagreement has ever occurred amongst the members of your board. Further, all decisions have so far been taken with the unanimous consent and approval of your directors, the majority of whom, as a matter of fact, have large sums of money invested in your concern, and are in consequence more interested than other people in its success. Finally, the results obtained during the past year, notwithstanding the severe crisis, afford the best assurance as to the future of your company.

Company's Investments.

You will remark in our balance-sheet that the figures in connection with our holdings in other companies have attained £831,917 17s. 3d. We should like to repeat here that these investments, which have again increased this year by reason of the purchase of the shares of the Ottoman Cloth Company, Ltd., consist of shares in subsidiary companies established in different parts of Europe and America, and which are exclusively owned and controlled by your company. For your guidance, we should also point out that these shares have yielded approximately £80,000 during the past year, which represents a capital return of nearly 9 per cent. on the investment. We trust we may not be mistaken in assuring you that this return is likely to be increased in the future. In conclusion we would mention that though it is not possible to foresee how long the present crisis will continue, and the effect which same may have on future business, nevertheless we have every reason to be satisfied with the results obtained during the first four months which compare favourably with the results obtained over the same period of last year.

Profit and Loss Account and Division of Profit.

In conformity with the resolution taken at our last general meeting, we secured the services of Messrs. Russell, Harris and Co., chartered accountants, to assist your auditors. These gentlemen examined your accounts and balance-sheet, and the following are the results after final audit :—Your profit and loss account, after deduction of all charges attained, after including the sum of £8,392 11s. 11d. carried forward from last year, the total sum of £236,698 19s. 6d., against £212,720 1s. 11d. for the year 1912—*i.e.*, an increase of £23,978 17s. 7d. In this connection we desire to state that the above amount represents the net trading profit of your business, and is quite independent of the premium realised on the 12,000 shares which had remained in reserve and which were sold at the beginning of last year. This premium has, as a matter of fact, been applied exclusively towards various depreciations and reserves, with reference to the balance-sheet will make clear to you. We would have proposed, gentlemen, to pay a dividend equal to that of last year, that is to say 25frs. per share, were it not that your board has deemed it prudent, under the present critical circumstances, to strengthen your financial resources by reducing the dividend and carrying forward a considerable sum which always remains the property of the shareholders. With this object in view we recommend that the dividend be reduced to 20frs. and that your profits be dealt with in the following manner :—Net profits for the year 1913, including the balance carried forward from last year, £236,698 19s. 6d.; 6 per cent. statutory interest on 200,000 shares £60,000, board of directors, 5 per cent on £100,000, £5,000, to the shareholders, balance to make up 16 per cent., £100,000—£165,000; leaving a balance of £71,698 19s. 6d., of which we propose that you reserve for depreciations £20,000, and to carry forward the balance of £51,698 19s. 6d. Your total dividend for the past year will, therefore, be 16s., or 20frs. per share. An interim dividend of 12.50frs. having been paid in January, you still have to receive 7.50frs. If you adopt our proposed distribution, the balance of your dividend will be paid against Coupon No. 10 at the rate of 6s., or 7.50frs., or 33 gold piastres, on and after July 20 at the following places :—Smyrna, at the head office of the company and at the offices of the Imperial Ottoman Bank; Constantinople, at the Wiener Bank-Verein; Paris, at the Société Générale, 54, Rue de Provence, and at the Crédit Mobilier Français, 30, Rue Taitbout. As already mentioned, the delay and difficulty of communicating with our distant agencies, notably those in Persia, cause much unavoidable loss of time (and this has been more pronounced this year) in the receipt of the necessary documents for the drawing up of the balance-sheet. Hence we have been obliged to postpone the general meeting to July 11 and the payment of the dividend to the 20th of the same month. We, however, fully realise the inconvenience of this delay, and are considering the means of overcoming same in the future. We are making certain modifications in connection with the accounts of our more distant agencies, and we are confident that we shall be able, next year, to convene the general meeting and pay the dividend at an earlier date. The financial crisis recently experienced, fostered by a continued state of war and political unrest in the Near East, has emphasised the importance of stringent financial supervision in a company so extended as yours. With this consideration before us we have decided in future to only pay the 6 per cent. statutory dividend on January 1 as is customary with other companies that are in the habit of paying an interim dividend. In order, however, to avoid any misunderstanding on this point, we would like to add that this conservative measure will not influence the total dividend (of which it is absolutely independent) and should not consequently in any way suggest the idea that the balance of the dividend may not be superior to the interim dividend.

Nomination of Directors and Auditors.

In accordance with your articles of association your directors, Messrs. James Baker, John Arachtingi, Charles B. Fritz, Arthur E. La Fontaine, Eugène Lautier, and M. N. Pappadopoulo, retire by rotation, but being eligible, offer themselves for re-election. Mr. Isidor Gunst, whose state of health precludes him from taking an active part in the business of your company, tendered his resignation at the end of last year, so that the number of your directors is now temporarily reduced to seventeen. In July, 1913, we regretfully had to accept the resignation of Mr. R. Mattheysz, which was sent in for reasons of health. The vacancy was at once filled by Mr. George Baker, who was appointed by Messrs. G. P. and J. Baker, Ltd., in virtue of their original holding of the F shares and the privileges attached thereto as per No. 92 of your articles of association. The retiring auditors, Messrs. John Boscovich and R. E. Turrell, being eligible, offer themselves for re-election.

Resolutions.

The following resolutions were put to the meeting and passed unanimously :—

That the report of the directors as well as the accounts for the year 1913, and the distribution of profits be approved of, and that a dividend of 16 per cent. be declared. An interim dividend of 10 per cent. having been distributed on January 1, 1914, that the balance of 6 per cent. be paid on and after July 20 on presentation of Coupon No. 10.

That the retiring directors, Messrs. James Baker, John Arachtingi, C. B. Fritz, A. E. La Fontaine, Eugène Lautier, and M. N. Pappadopoulo be re-elected.

That Messrs. John Boscovich, ex-manager of the Bank of Athens, and Reg. E. Turrell, sub-manager of the Bank of Salonika, be re-elected as auditors for 1914, at a remuneration of 1,000frs. a year each. Also that Messrs. Russell, Harris and Co., chartered accountants, be elected as joint auditors and that their remuneration be fixed at £200 per annum.

That the purchase of the ordinary and founders' shares of the Ottoman Cloth Co., Ltd., be approved and ratified, as shown by the documents read at the meeting and by the explanations given on that subject.

NOTES OF THE WEEK.

The declaration of war against Austria-Hungary by Great Britain is the logical consequence of the previous declarations of war which have emanated from Berlin, Paris, and St. Petersburg. It could with propriety have taken place some days ago, and, indeed, it is more than likely that the solidarity of the Triple Entente would have received this additional confirmation last week had not the presence of German warships in the Mediterranean made it desirable to deal with the maritime forces of the Teutonic Alliance piecemeal. Austria-Hungary must now unaided bear the brunt of a naval war against the united Anglo-French Fleets in those waters. It is little more than half a century since the Imperial meeting at Villafranca terminated the last war between France and Austria. With the Austrian branch of the House of Hapsburg and its successors of the House of Lorraine this kingdom has never before been at war.

The publication of the White Paper containing the diplomatic correspondence which preceded the outbreak of war has done much to confirm the impression, prevalent for some time past, that some sort of arrangement existed between Austria-Hungary and the Porte for joint action in certain eventualities. The objective was —or possibly is—Salonika. In view, however, of the collapse of the Austro-Hungarian operations against Servia, it is to be hoped that the Porte will not endeavour to carry out single-handed a policy which was to have subordinated Ottoman interests to the ambitions of the Teutonic Alliance. The very fact that the only representatives of the armed might of that Alliance which have presented themselves to Turkish observation have been hunted fugitives in itself must tend to check any bellicose enthusiasm on the part of those in authority in Constantinople who would otherwise have embraced this opportunity for attempting to recover their lost provinces.

The acquisition of two German warships by the Porte places at least one formidable weapon at the disposal of the Ottoman Navy. The "Goeben" herself, although listed as a battle-cruiser, possesses the proportions and fighting value, in competent hands, of a Dreadnought. The purchase is considered by some international jurists to be invalid, inasmuch as a belligerent, according to the practice of British Prize Courts, cannot sell a warship to a neutral during a war, even though the attempted sale take place in a neutral port and after the dismantling of the vessel. This is a point for subsequent settlement. For the moment we may take it that the "Goeben" and her consort are now disqualified from further participation in the present war. There are those, however, who are inclined to anticipate yet another complication which will once more place this great ship in the fighting-line, and indeed the very possession of such a ship is in itself a temptation to the Committee in Constantinople to use it to further their ambitions. From the point of view of our enemies the transaction is highly profitable, as they have apparently realised a property which the fortune of war had already placed in jeopardy, and to which, in international law, their title was conditional.

The satisfaction to which the acquisition of the "Osman I." and the "Reshadieh" by the British Admiralty gave rise in Athens will probably be somewhat dashed by the appearance of the "Goeben" on the Ottoman Navy List. The balance of naval power in the Ægean now tends to incline against the Greeks. The "Averoff" is now—unfortunately for the prospects of peace in the Near East—no longer the dominant factor in Helleno-Turkish relations. No one who realizes the strength of the attachment to the tradition of Salonika among certain members of the Committee on the one hand and of the feelings of innumerable Turks on the subject of the Islands on the other can fail to recognize that the arrival of the "Goeben" is a very grave complication of the vexed Ægean Question. The situation is indeed serious, if not quite serious enough to justify the rumours that are afloat at the time of writing. Perhaps the most satisfactory feature of the situation is that Mr. Venizelos is making most strenuous efforts to reconstitute the Balkan Alliance, and that the leaders of the other political parties in Greece are apparently ready to co-operate with him in the crisis. Thus, even if Turkey should be ill-advised enough to risk all at the present time—a folly of which we still hope she will prove incapable—her weight in the scale on one side will in all probability be at least balanced by that of her neighbours on the other.

At the moment of writing only one more Balkan State, Montenegro, has joined in the European conflict. But, according to *The Times*, Roumania, like the Porte, has ordered a mobilization, while the Bulgarian Government has found itself compelled to ask for special credits to be applied to the defence of the country, and it is to be hoped that the apparent intention of the Cabinet of Sofia to resist Ottoman aggression, even though aimed at Greece and only requiring right of way across Bulgarian Thrace, may give pause to those members of the Committee in Constantinople who seek to redress the balance of Fate by plunging once more into war now that there is no Europe left to interfere.

The action of the Servian Government in embarking on a war with Germany was rendered necessary as a precautionary measure. The Servians had reason to

Digitized by Google

believe that Baron von Griesinger, the German Minister, and Major Brousart von Schellendorf, the Military Attaché, were not entirely disinterested spectators of their movements, and considered it wiser to forego the pleasure of their company. Similar action inspired by similar motives has also been taken in Montenegro, and the German Minister has now left the Court of Podgoritza. It is doubtful whether German and Serb troops will ever have occasion to cross bayonets, but doubtless the Kaiser Wilhelm will draw comfort from the appearance of two more monarchs in arms against him, by quoting Macaulay in a Proclamation.

The military situation along the borders of the Serb States does not appear to have undergone any decisive development. As far as it is possible to discover, action is limited to frontier skirmishes, and no substantial movements of troops have as yet been made public. The Austrian bombardment of Belgrade is reported to be proceeding intermittently. If this be the case, it must be that the Austrians are inspired by the devil of destructiveness, for it can now hardly be imagined that they have any further intentions to begin a forward movement against Servia. The Montenegrins appear to have reached the sea at Budna and to have done much to render Cattaro an uneasy place of residence for Austrians from their positions on Lovtchen, against which the Austrian operations have so far failed of success.

The possession of Lovtchen, the mountain which dominates alike Cettinje and Cattaro, has become a bone of contention between the Hapsburg and the Petrovich monarchs. The Austrians desire it as being essential to the proper defence of Cattaro, and, naturally, the Montenegrins desire to keep what is their own. Nor is Italy disinterested, as, with Lovtchen in the hands of the Austrians, Cattaro becomes an almost impregnable naval station over against Italy. The bonds of the Triple Alliance have not yet been strong enough to drag the Roman Government into a war wholly distasteful to the Italian people, and such a blow to Italian *amour propre* as would be the Austrian acquisition of Lovtchen at the present moment might well react in such a way as to render even the maintenance of a benevolent neutrality impossible.

It is difficult to know nowadays what may be believed, and it is to be hoped that the statement to the effect that King Nicholas, after declaring war upon Austria-Hungary, at once proceeded to occupy Scutari is unfounded. We know that Scutari is not a Montenegrin town, and that its inhabitants have no wish to pass under the yoke of the mountain monarch. Europe is weary of the question of subject minorities. We fight to save small States from German aggression. France fights to free her kinsfolk from Prussian oppression, Russia has taken the field to liberate Slavs from Teutonic or Magyar tyranny, Servia is in arms to gain provinces from the Austrian dominion for the national monarchy. In circumstances such as these King Nicholas must not be permitted to enslave the Albanians of Scutari. Let him win back the cradle of his House in the Hertzegovina, let him take Cattaro, which his predecessor held for a few months with British aid a century ago. But let him retire from Scutari; a piratical raid into Albania on the part of King Nicholas will meet with no sympathy in this country. Such action is on a par with the German invasion of Luxemburg, and even the sentimentalists who might be inclined to support Montenegro because she is a small country will remember the grim record of her troops when last they were in Albania.

In the present circumstances when Western Europe is fighting, if not for its actual existence, at least for the maintenance of Belgium and the international obligations which were supposed to protect her, it appears to be a foregone conclusion that Albania will suffer. Already proposals are being discussed whereby that unhappy country is to be parcelled out as "compensation" among its neighbours. We still maintain that the doctrine of the Balkans for the Balkan people should be upheld. The argument that as Albania was accorded independence by Europe solely on account of Austro-Hungarian insistence she must now be torn to pieces by those at war with her chief protector is of no weight. The facts remain that the Albanians have been given their independence in the name of Europe, and that they have no wish to be enslaved by neighbours of alien race and creed. It may appear foolish to some of our readers that we should at such a moment endeavour to inculcate respect for international agreements where Albania is concerned. We must, however, insist that if Great Britain has drawn the sword to prevent a co-guarantor from violating further the international agreements which protected small States in the north-west of Europe, she is equally bound to see that similar agreements be respected even in the Balkans. The violation of international morality by the German Emperor does not entitle other potentates to pursue a similar course.

The announcement that Egypt is in a state of war and has been placed under the protection of Great Britain can only be interpreted as meaning that the allegiance of the Khedive to the Sultan is now officially recognized as being of minor importance to his relations towards Great Britain. Egypt was not in a state of war while her nominal suzerain was engaged in hostilities from 1911 to 1913, but the case is different when the sovereign of the Army of Occupation draws the sword against the Teutonic emperors. We do not wish to tilt at any tradition so long as it is merely harmless and picturesque—such as that which constitutes Abbas Hilmi an Ottoman pasha and the hereditary "viceroy" in the name of the Ottoman Padishah—but we consider that the time has now come to put an end to the régime of the Capitulations in Egypt which so very gravely hamper the exercise of the Khedive's sovereignty.

The notification to Egyptian officials recently published in *The Times*, desiring them to proceed to Egypt at the earliest opportunity, was so worded as to excite comment. In times of emergency such as those in which we now live it is naturally essential that administrators should be at their posts, whether those posts be on the shores of the Mediterranean or at home, as it is obvious that men in responsible positions cannot expect to enjoy holidays when their own country is at war. The restriction against taking their wives is at once wise in view of the extreme pressure upon transport facilities to the Near East from this country, and reasonable in that there is no necessity to expose European ladies to the heat and discomfort of an Egyptian August. We cannot see that there is any ground for alarmists to read more into the somewhat brusquely worded summons in question than is required by the obvious facts of the case.

We have on several occasions found it necessary to reprobate various Balkan peoples for the atrocities perpetrated by them upon enemy populations or subject minorities, and at the time we attributed their detestable actions to a lack of civilization, and the deteriorating influence upon their national character of their comparatively recent subjection to the Turks. Now, unhappily, it is our duty to record the horrible deeds of the officials of Governments which a month ago figured as pillars of civilization and enlightenment, Great Powers which considered themselves, and were commonly allowed to be, immeasurably superior to their adversaries or clients in the Balkans. The unbridled truculence of the Germans, their shooting of unarmed and untried travellers in Baden, and their savage enforcement of the most cruel interpretation of the Laws of War in Belgium find a fitting echo in the inhuman executions in Prague and elsewhere in the Dual Monarchy which have now been recorded. No excuses, such as can be advanced on behalf of the peoples of the Balkans, can be found for these Great Powers. It appears in the one case that a Liberal civilization has deliberately subjected itself to a brutalizing militarism. In the other case fear has bred cruelty, and a desperate faction endeavours to prop its tottering power with ever-increasing oppression and blind terrorism.

EASTWARD BOUND.

EXPERIENCES OF MOBILIZATION.

(From Our Special Correspondent.)

P. and O. s.s. "Moldavia,"
off Gibraltar, August 5.

I left London on Saturday morning. It had been an anxious night, and no one connected with a newspaper at least had closed an eye. Rain threatened, but the stations were thronged with the usual Bank Holiday, paper-bagged crowd. I said to my taxi-driver that things looked bad. "Yes," he replied, "I hope it will hold up over the week-end." This morning we were informed that war had broken out between England and Germany, and would we please be sparing of the provisions. One cannot help wondering what English people think of it now. "Der Tag" has come, and everybody in this boat at least is anxiously awaiting news at Gibraltar.

The contrast between my taxi-driver and the Frenchman when I arrived in Paris was very marked. The order for the mobilization of the "Armée de terre et de mer" had been issued at five o'clock on Saturday afternoon. I reached the Gare du Nord two hours later, and began to realize dimly what the mobilization of a great nation meant. I do not suppose anyone will see the like of it again. The porters had left in a body. Frantic passengers were running about with trolleys trying to discover their baggage among the mountains of trunks. Half a dozen expresses were standing in the station, for the most part not yet unloaded, and there seemed very little prospect of ever getting your luggage. One would not have thought that just now was the precise time to choose to travel, but there were many people who were bound on their annual holiday. I noticed in particular a clergyman who would as soon have thought of abandoning his yearly climbing trip in Switzerland as of voting Liberal, and an American with a pretty wife who, armed with many shrimping nets of various shapes and sizes, was bound for some Normandy *plage*.

Outside the station confusion became worse confounded. There were a few taxis and fiacres, but not nearly enough to go round. People fought and struggled for seats, and the drivers, cynically determined that war should be profitable to at least one class of persons, charged a louis for a three-franc journey. When I returned later in the evening to the Gare du Nord the station had been closed. Hundreds of men, women, and children stood or sat about disconsolate. The approaches were littered with bundles and luggage of every description. Crowds of reservists were already arriving and endeavouring to force their way through an exceedingly narrow *grille*. There were the same scenes at the Gare de Lyon. Impossible to enter unless you were a soldier, and although the words "Officier Anglais" proved an "open sesame," you had to do everything yourself, and I for one am rapidly becoming expert at moving large masses of bags and suit cases piled on unwieldy French trucks.

And there was a deadly earnestness about these Frenchmen. A few irresponsibles careered about the streets of Paris chanting the "Marseillaise." Camelots rushed along the boulevards shouting the latest edition; the streets seemed alive with taxis driven at even greater pace than is the reckless wont of the Paris driver. Otherwise things were curiously quiet. Groups of men discussed the situation with serious faces. They fully realized the enormous responsibility which France was taking, but there was no other course, and this is the moment, "la revanche," which France has been waiting for for years. The one question on everybody's lips seemed to be, "Will England march?"

Plight of British Officers.

All the way down to Marseilles it was the same thing. Only as one got further south the enthusiasm seemed to increase. The 500 miles or so of railway was patrolled and guarded throughout, and at every 200 metres stood a sentinel in dirty white jumper, who was forced to listen good-naturedly to the witticisms of his friends on board the train. We left Paris about midday, and our progress was very slow. I had the good fortune to meet a number of British officers who were returning to Malta. Many had been recalled from leave in a hurry; some had only been in England a few days. No one had been warned what he might expect with a nation in arms. Some had endeavoured to get through Italy and been turned back. Two had been present at the first acts of war early on Saturday morning just north of the Swiss frontier. They had been turned out of their train by a German guard; the line had been torn up; and they had been forced to wander ten miles before finding shelter and regaining the railway. One officer is still limping from the effects of standing for sixteen hours in the crowded train.

Fortunately, before starting our party raided the buffet, which had been closed "faute de garçons." A metre or two of bread, some ham, and many bottles tided us over the worst period, but even so we were a sorry spectacle when we did ultimately arrive at Marseilles on Monday afternoon, twenty-five hours after leaving Paris. Very few of us have any baggage. That seems irrevocably lost. But everybody has been enormously impressed with the spirit in which France is mobilizing, and is inclined to wonder in a mild way how the War Office really did expect so many officers of the Malta garrison to return to their posts, and whether anybody in England has the faintest knowledge of the utter dislocation of everything caused by a general mobilization.

La Levee en Masse

There is no doubt about the popularity of the war in France. No one seems to have hesitated. There are thousands of acres of corn still uncut, but the country has answered as a man to the call to arms. Troop train after troop train passed us on our slow way south. They were decorated with box, spruce, and laurel, and everyone cheered everybody else. At Avignon, where an army corps is concentrating, I particularly noticed the smart way in which a whole regiment—the 56th—detrained, formed fours, and had marched away in less than ten minutes from the moment of arrival. A gallant old captain, wearing the picturesque uniform of the Chasseurs, and painfully new boots with enormous mountain nails, told me that everyone in the mountains of Savoy was coming in. There were only men over fifty, women and children left. He himself had begun his service in 1884. As the 56th came into Avignon he stood up and made them a stirring speech.

At Marseilles things were a little quieter—the same enthusiasm, the same subordination of everything else to things military. But there was at least one remarkable thing — an Italian proclamation, apparently more or less official. It set forth that Italy had not forgotten Magenta and Solferino, and that she wished France luck in her struggle against Germany. Further, 2,000 Italians resident in Marseilles offered to serve under the French flag.

England at War.

Had it not been for the courtesy of Captain Gordon of the P. and O. liner "Moldavia"—the "Carthage" of the Transatlantique Line, on which we had counted to take us to Malta, had naturally been mobilized—we might all still be marooned at Marseilles. Fortunately, Captain Gordon was induced to ship us all—there are close on eighty now—to Gibraltar, where we hope to catch the intermediate P. and O., and so to Malta. By the time this reaches England we should just about be reaching that unlovely spot.

It is hard to realize that we are at war; that British ships will again be sailing the seas with decks cleared for action. Two French Dreadnoughts have just passed us going south-east, otherwise, save for a native craft or two, we have seen but few vessels, and anything of any size has glumly refused to disclose her nationality.

GREEK TOPICS.

BY "LASCARIS."

German Excavations.

For some time the German archæological school at Athens has been carrying on excavations at the Ceramic cemetery. These excavations, which have brought to light many fine works of art, have also revealed the real position of the cemetery at Athens. At a depth of about four metres the excavators discovered the double road leading to the Dipylon, which was the most important entrance to Athens, and led straight on from the Dipylon to the Academy of Athens. The whole of this road was embellished by the monuments of the most distinguished men of Greece from the time of Cimon. An immense funereal monument has been discovered eight metres below the ground. The statues that decorated it lie beside it, mostly broken. A huge dog also lies there. Everything is in marble and beautifully worked. They belong to the fourth century B.C. The archæological school of Athens is still carrying on excavations in this spot, which has excited great interest of late.

City Improvements.

It has been decided to appoint a special committee to consider plans of the City of Athens, and to draw up rules as to buildings, roads, etc., as well as for the extension of the city. This is by no means an uncalled-for work, for the original plan of the city was made in the year 1831, just after Greece had been freed from the Turkish yoke, and when it was like a Turkish town, with narrow streets, and guiltless of pavements. Since then the main streets, such as Hermes Street, have been enlarged two and even three times, causing great inconvenience to the owners of shops. It is thought that the city will not be extended beyond its present bounds. Athens is not densely populated like Paris or many German towns, but it would certainly be improved in every way if a few parks, or, at any rate, large squares were sprinkled over it. During the hot summer days Athenians appreciate a quiet, green spot like Kolonaki or the Zappeion. The much-talked-of plan for bringing water into Athens seems on the point of being accomplished. If a little water can be spared for fountains in these gardens or squares, Athens will become an ideal capital in summer as well as winter.

The Refugees.

Concerts, bazaars, and entertainments of all kinds are still being organised almost daily in Athens for the benefit of the numerous refugees who have flocked into the capital of late.

Owing, no doubt, to this influx of refugees, Athenian landlords have raised their already preposterous rents by 30 per cent. There have been, in consequence, several indignation meetings, and the comic papers represent the future inhabitants of Athens taking to tents. Meanwhile it is pleasant to record that the wealthy owner of several spacious houses has placed them at the disposal of the refugees free of rent.

The Queen Mother's Activities.

The Queen Mother, Olga, is President of the Mount Parnese Consumption Hospital. Only twenty years ago there was not a single hospital in Greece for the treatment of consumption. The poor afflicted with this disease were sent to an underground ward, where they were attended to by an old couple, since no one in tolerable health would venture near them. During the Græco-Turkish war of 1897 the widow of Mr. Schliemann had occasion to visit this dreadful spot, and she was so much impressed by the state of neglect in which those poor patients were left that she determined to erect a hospital for the treatment of consumption. This she did at the foot of Mount Hymettus. The building now erected under the auspices of Queen Olga will be rather a sanatorium after the style of those in Switzerland. It will have one great advantage over them, however, for the sun in Greece lasts many more hours per day than in Switzerland, and it is considered a great help in the cure of consumption.

The Queen Mother also intends starting a school near her summer residence at Tatoi for training girls in dairy and other agricultural work. These girls will, it is hoped, render valuable assistance to the country, for agriculture is now engrossing much attention in Greece. Not very long ago those who possessed lands were in the habit of selling or letting them to pay for having their sons sent to study medicine or law. The few that cultivated their land were considered eccentric, and generally made a mess of it. Of late years, however, Ministers like Mr. Theotokis have had their sons trained as agriculturists, and do not appear to regret it.

GREECE AND THE WAR.

ATHENS, August 13.

The *Embros* expresses surprise that the present war did not break out sooner than it did. The paper adds:—"The courage of the Belgians, the decision of the Swiss, the eagerness of the Portuguese, the Dutch and the other nations who are ready to march with the French, give some indication of the grandeur of the aim in view, which is, however, not one of revenge or for the restitution of Alsace and Lorraine, which really belong to France, but is a fight for the liberty of peoples, the resurrection of the right of nations and the freedom of Europe from despotism."—Reuter.

THE SERVIAN SOLDIER.

A favourable estimate of the fighting value of the Servian Army is given in a pamphlet issued by the General Staff of the British Army and compiled from reports supplied by British and other officers who were present during the various operations of the recent Balkan war. The raw material of the Servian infantry is said to be excellent; the men are strong, healthy peasants, inured to hardship and fatigue. Though the majority are illiterate they are quite intelligent. They possess a form of courage which may be brutal, but is certainly suited to the circumstances of a Balkan campaign, based as it is on the most callous indifference to bloodshed and death, combined with natural ferocity. These men, if left to themselves (as they frequently were), preferred a short, sharp bayonet fight to the slower, if less costly, process of taking up fire positions. In an action to the west of Monastir proof of this thirst for cold steel was revealed after the attack. Two lines of Turkish soldiers were found on the ground, every one of whom had been killed by a bayonet thrust. That was a night attack against half-starved and ill-led Turks, but there were cases in which the same tactics were successfully used against the brave and stubborn Bulgarians. Many other instances of bayonet fighting (the pamphlet continues) might be quoted, all of which go to prove that the Servian infantry is possessed of great dash, and that the men have still a large element of the savage in their characters, which makes them prefer cold steel to more distant fighting, where they cannot see the result of their efforts. At the same time, the individual training of the men is by no means neglected. The principles of tactics are explained to them, and initiative is encouraged. The Servian infantry persistently used the entrenching tool when attacking, and used it with much skill.

Mr. Oliver Bainbridge is making arrangements to deliver a series of illustrated lectures in London and other important cities in England on "Bulgaria and the Tsar Ferdinand," which should prove of unusual interest, as Mr. Bainbridge is not only an eloquent and witty speaker, but is also trustworthy in his statements. The Right Hon. Earl Curzon of Kedleston, Chancellor of Oxford University, in writing to Mr. Bainbridge, says: "I thank you for your address on India with its manly and outspoken corrective of so many calumnies and fictions, and I shall look forward greatly to the appearance of your book." *The Daily Chronicle* says:—"Mr. Bainbridge lectures before educational institutions and learned societies, and has always made a point of getting his information first-hand from Ministers, Secretaries of State, mayors, and other qualified persons." Mr. Bainbridge enjoys the personal acquaintance of the Tsar and the Tsaritsa of Bulgaria.

TABRIZ CITY COUNCIL.

TABRIZ, June 30.

When Shuja-ed-Dowleh entered Tabriz there were here three institutions symbolical of the Constitution—the Anjuman, the Adlié, and the Baladié. After his entry many of their members (each institution had twelve members) who were foolish enough not to hide or run away were caught and sent to the gallows. The few members who neither hid themselves nor lost their heads, but are as free now as ever, are those who had two faces —one looking forward, the other looking backwards! These are of the type of men who will say one thing and do another thing; who preach one way and act in the opposite way. They are of the class of men who lie awake all night thinking how to act so that they may be looked up to by the public as most righteous and saintly, and at the same time endeavour to invent new means to cheat and fool people; how best to take advantage of their name, influence, wealth, inclinations, and good-will.

These men, while acting the part of staunch Constitutionalists as members of these institutions, were at the same time secretly working for the best interests of Shuja-ed-Dowleh. In other words, they were acting as *traitors* towards the Tabriz people, who had trusted their best interests to their care, and were acting as *spies* for Shuja-ed-Dowleh. They were sending daily reports to him as to what was spoken in the Aujuman, the Adlié, or the Baladié, and by whom, and what was going on in the city itself in the bazaars, in police and gendarmerie headquarters, and in the palace of the Governor-General.

Shuja-ed-Dowleh was in Vosbinj, besieging Tabriz, and he was making his plans according to these reports of his agents. In his letter addressed to the Russian Consul-General,* Shuja-ed-Dowleh says:—"For over five years the commerce in Azerbaijan was asleep; roads were blocked . . . and the people were in want of one night's bread." His Excellency neglects to add that it was he himself who had closed the roads to Tabriz; himself who was the cause and the instrument in bringing about the murder of 20,000 people; himself who caused the commerce to stop; himself who, closing the roads, had cut off the people's bread supply! His Excellency neglects to say who looted and levelled to the ground the houses of some of the leaders of the Moslem religion, and who appropriated their furniture and costly rugs. Instead of blaming the "insurgents" and atheists, it would be well if Shuja-ed-Dowleh looked into his mirror, where he would see who was the cause and instrument of all, or nearly all, that he mentions in his famous official letter, and for which he lays the blame at the door of real Persian Constitutionalists and the Babis, or Bahais, whose belief differs from his own.

The day after Shuja-ed-Dowleh made his triumphal entry into Tabriz he ordered the buildings of the Anjuman, the Adlié, and the Baladié to be destroyed, literally razed to the ground, by the ditch-diggers; the costly half-Persian and half-European furniture was looted; the large and antique rugs were appropriated, and—most of the members were hanged!

Now, these buildings were *not* owned by the three institutions referred to. They were the property of private individuals, and it is a positive fact that some of the owners of these buildings were not "mashrootajis" at all. The buildings were simply rented, like any other house; but they were doomed to go, because as long as they stood untouched they would have served to remind the people of the past, of the Constitution.

Shuja-ed-Dowleh had twice been ordered, both by the Regent and by the Home Minister, to hold elections, and twice had he neglected to obey their orders or pay the slightest attention to them. But when ordered by the Russian Consul-General "to take the necessary steps and hold elections," he had "no way of escape but to surrender!" And a new Baladié, or city council, has been formed in Tabriz—but not by election. The members, twelve in number, have been appointed. Eight of them are Moslems, chosen by Shuja-ed-Dowleh, and the remaining four are Armenians, Russian subjects, appointed by Consul-General Orloff. Two of the latter are lawyers, and will act as Jurist-Councillors.

The appointment of these Armenians is fortunate for Tabriz citizens. For Persians themselves are corrupt and too lazy to work, as was plainly proved during the short life of the Constitution. The members of the Mejliss proved incapable and useless, spending more time in quarrelling among themselves than in work; and the provincial Anjumans were worse than useless, passing their time in executive work and doing their best to fill their private purses.

The Anjuman, for example, would order that the butchers should not kill diseased animals nor sell old meat. The next day the butchers would call a meeting, subscribe some 2,000 to 4,000 tomans, and distribute that sum to two or three leading members of the Anjuman, and from that day on the order would become a dead letter. This is why the appointment of four Armenians in the new Baladié is wise and fortunate.

A notice, signed by Nasr-es-Saltana, President of the Baladié, informed the citizens that the reasons for reopening the Baladié are that it may watch over "the reforms of the city (paving, widening, and lighting—instituted by the Russian Consul), cleanliness of the streets and of foodstuffs, the regulation of prices, and especially to see to the cleanliness of *hamams* (bath-rooms), barbers' shops, restaurants, butchers' shops, and the supply of water.

The Baladié also exercises control over the indirect taxes (on opium, alcohol, and slaughter-houses). Ten shahis are charged for each full-sized bottle (20 ounces) of alcohol, and one kran for each sheep or goat killed. Difficulties now arose between the new Baladié and Mr. Molitor, the Belgian finance manager. For hitherto the Finance Department had had control over the duties of indirect taxes, but the new Baladié (which is synonymous with Shuja-ed-Dowleh) advertised that the Baladié would sell by auction to the highest bidder the annual income of the indirect taxes. Mr. Molitor replied that he had no knowledge of Nasr-es-Saltana, and that, by the order of the Teheran Government, he should stop the salaries of all those who are the members of this "appointed" Baladié!

So the saloons and slaughter-houses were being visited both by the officers of the Baladié and by those of the Belgians, each claiming the right of control over them; the mutton was being stamped both by the stamp of the Belgians and by the stamp of Baladié, and each party demanded one kran for each animal killed from the butchers. As a result of this there was a "strike" of one day by the butchers, who killed no animals, and the city of Tabriz had to get along without flesh food on that occasion.

The strike of the crafty butchers settled the question—and settled it in real Persian style! The officers of the Finance Department were beaten off by order of Shuja-ed-Dowleh; their uniforms and badges were torn from them, and they were told not to dare to be seen again around the saloons and slaughter-houses! They have not been! And now the Baladié rejoices over its triumph over the *frangi*.

ROUMANIA AND THE WAR.

ALLIANCE OR ENTENTE?

With the exception of the actual belligerents, no country can be watching the march of events with greater anxiety than Roumania. In broad principle her policy has been enunciated; it is, with the help of Greece, to maintain peace in the Balkans. Servia's quarrel is with Austria-Hungary. She has been joined now by Montenegro, and the two sister States will have their work cut out for them on the north and west. It is to their interest that they should be free from all fear of aggression on Servia's eastern frontier. To this end they have to rely upon the understanding with Roumania and Greece that the terms of the Treaty of Bucharest are to be respected, and that any attempt on the part of Bulgaria to reverse the verdict of that agreement will be discouraged and, if necessary, prevented by armed intervention. With Roumania, Greece, and Servia ready to uphold the Treaty of Bucharest, there would be little encouragement for Bulgaria and Turkey to attempt to alter the map of the Balkan Peninsula to their joint advantage. But Servia has her hands full on the west, and to the Chauvinists of the Committee of Union and Progress there may seem to be a sufficiently sporting chance in favour of Turkey and Bulgaria in trying conclusions with Roumania and Greece alone. If they should arrive at such a resolve it will not have been without the stimulus of interested advice from other quarters. Germany has shown her belief in gambling with heavy stakes, and she is not likely to have any scruples in plunging as many countries as possible into the present war. Promises, we may be sure, will come thick and fast at such a time, and they may sound far more alluring to Turkish ears than they did to the ears of the British Foreign Office. Justification for this surmise is to be found in the adventures of the German cruisers, the "Goeben" and "Breslau." These ships have taken refuge in the Dardanelles with a view to being sold to the Turkish Government. Their period of usefulness as units of the German Navy was virtually over. They had to leave Turkish waters within twenty-four hours and once more run the gauntlet of British cruisers, or they had to allow themselves to be dismantled and to remain interned until the end of the war. Germany appears to have hit upon another solution of the problem by selling the ships to Turkey, or, more correctly speaking, by making the Porte a present of them for the time being, inasmuch as there can be no transfer of the funds necessary to complete the transaction. According to international law, such a sale is invalid. This difficulty will not trouble Germany, but it ought to cause Turkey to pause. The German bribe is calculated to prove a severe test to Ottoman statesmanship. Great Britain, through no fault of her own, has been compelled to take over the two men-of-war building in this country for Turkey. The loss of these ships leaves the naval superiority in the Ægean Sea in Greek hands, and the Porte must naturally be tempted to restore the balance by means of Germany's tempting offer. If it does so, Germany can hardly fail to have imposed conditions, present or future, and those conditions will not make for the continued tranquillity of the Balkans. On the other hand, if Turkey sincerely desires peace, she has the certain knowledge that it will not be broken by Greece during the European War without aggression on Turkey's part, while at the conclusion of the war she stands to receive full compensation for the ships taken by Great Britain, and will probably be able to replace them without undue delay.

The danger lies in the fact that the German bribe comes at a time when it will reinforce the activities of the Committee's hotheads. By making war at this juncture Turkey would be once more staking its existence, and this time for the sake of two men-of-war, with or without a liberal allowance of German promises. The Ottoman Army, if it hoped to derive any advantage from hostilities, would not be on the defensive, but, presupposing an agreement between Turkey and Bulgaria regarding their common frontier, would have to invade Roumanian and Greek territory. By embracing the German cause or acting on Germany's behests the Porte would range itself against Germany's present enemies, who, when their major preoccupations were over, would be left to deal with the Ottoman Empire as they may think fit. Nothing short of the madness which seems to have developed in Central Europe with such disastrous possibilities could drive Turkey along this path of self-destruction. One may be doing the Porte an injustice by suspecting it of contemplating war; but the fact remains that it has seen fit to order a mobilization, and is doing a questionable act in taking over the German cruisers. It protests that its intentions are pacific, but in all the circumstances it is impossible not to regard the mobilization as a deliberate playing with fire. Little difficulty would have been experienced in obtaining the goodwill of the Powers of the Triple Entente, and with them of Roumania and Greece, towards Turkey's obviously right course, a declaration of neutrality. The Roumanian and Greek Governments had, indeed, already set the example, and if Germany and Austria-Hungary demurred to such action on Turkey's part, the natural inference to be drawn was that they were thinking of their own interests and not Turkey's.

The Porte has done its best to increase the anxiety in Roumania, and the Bucharest Government has been obliged to order a partial mobilization. Bulgaria has also mobilized, but is still credited with a resolve to maintain neutrality. Greece is not likely to leave her northern friend in the lurch, and the possibility of the chance collision that may precipitate war, even in the absence of deliberate intent, is spread over a wide area. It is to be hoped that special precautions will be taken to avoid the possibility of "frontier incidents" along the Dobruja boundary. The desire on Roumania's part for the maintenance of peace in the Balkans is as sincere as it is natural. Both politically and economically her chief concern must be to experience a long period of internal and external quiet in order to develop the resources at her command, the exploitation of which is only just now being begun on a scale commensurate with the country's position. At this precise season Roumania looks to the free export of her harvest, which, with the products of her oilfields, constitutes the main source of her wealth. She can wish neither to have the movement of her products in her own country dislocated by a state of war nor their transport over the seas hindered. In regard to the war between the Great Powers her political interests coincide with her economic interests. Recent events in the Balkans have led to a *rapprochement* between Roumania and Russia, while the country has voluntarily emancipated itself from the false position of a mere appendage to the Triple Alliance. While dynastic considerations may make it difficult for the Roumanian Government to adopt an attitude actively hostile to Germany, the fact that there is no love lost between it and Austria-Hungary, and that it is at the expense of the Dual Monarchy that the Roumanians look to realise their national aspirations, must cause the country at heart to side with the Triple Entente. Economically Roumania is almost entirely dependent on the States now ranged against German and Austro-Hungarian aggression. Half of the cereals exported find their way to Antwerp. In 1911 the value of Roumania's export trade was 691,720,000 frs.; of this amount 213,468,000 frs., or nearly 31 per cent., represented transactions with Belgium, while Holland came second on the list with a value of 76,907,000 frs. The value of the exports to the countries opposed to Germany was four times as great as that of the goods sent to Germany and Austria-Hungary. There remains the question of the control of the sea in the event of a protracted war. Without in any way anticipating events in the North Sea, it has to be recognised that the interests of Great Britain, France, and Belgium will prompt them to do everything in their power to offer safe convoy and a profitable market to the cereals and oil that form Roumania's staple wealth. Roumania, no less than the Powers of the Triple Entente, wishes to see free access, through the Bosporus and Dardanelles, accorded to the merchant vessels engaged in her export trade. If any act of Turkey's should threaten that shipping the

Digitized by Google

four Powers may feel it necessary to deal promptly with the situation thus created.

In the interests of Turkey we may hope that there will be no need for such action. Good relations have been established between Bucharest and Constantinople, and it should be easy to institute a friendly "conversation" for the advantage of both States. In the meantime Roumania may not feel called upon to take sides in the war between the Great Powers, but she will be playing her rôle in showing her determination to champion the cause of peace in the Balkans. If the time comes for altering the map of Europe in the interests of the permanent peace of the Continent, the part played by Roumania will be laid to her credit. The aspirations of her people are known, but it is too early to tell whether or in what way their realization will be granted or accelerated.

TANGIER TO TEHERAN.

One lives—if not amid alarums and excursions—at least amid rumours. These are frequently ferocious. An unkempt gentleman assured me a few days ago that all the Germans were killed, and earnestly desired to sell me a copy of a yesterday's evening paper at double its normal price. Another man gravely asserted that the "Goeben" had been sunk. The suggestion was welcome—so bloodthirsty have we become—but its verisimilitude was somewhat impaired by the added detail that the feat had been achieved by one of his Majesty's ships known to be on the North American station.

***

I was told the other day of an incident which shows the admirable spirit in which the people of this country received the news of the Declaration of War. A friend of my informant had just taken a shooting for the Twelfth. The day after the announcement of war he received a letter from the man who had let him the shooting, to the effect that he would no doubt not be sorry to be freed from his bargain now, and that in the circumstances he was quite welcome to "cry off."

***

Not very long ago a correspondent in Turkey asked me how I thought the Territorials would take to real soldiering. I can answer his question now quite positively. They are taking to it like the proverbial duck takes to water, and their cheerfulness under all circumstances is good to see. Which reminds me of a retort made by a member of the force to a member of the public who thought to be witty. The Terrier was one of a number who were leading a string of horses off to some depot. The animals were of the heavy type, evidently for draught purposes, and while most of them were certainly good-looking, one of them, though serviceable, no doubt, was very far from noble in appearance. Nor did its disposition appear to be either active or amiable. One member of a little crowd who had gathered at a street corner to see the procession pass said to the man who led this ignoble steed: "Hullo, Charley! going to turn *'im* into a charger?" And without a second's hesitation the answer came back: "No. *He's* going down to Horsham to give the German prisoners the food they are accustomed to at home."

***

The way in which mails are arriving—or not arriving—is a mystery to me, and to a good many other people besides. I am not complaining about it, of course. I mention the subject only because it seems to be of interest owing to the curiosities of delivery. I have, for instance, heard of single letters coming through from Egypt and Greece with an apparent delay of only two or three days, and of batches of newspapers getting through from the former country by a post which seemed to have brought no letters at all. And I understand that outgoing mails are even more freakish. Our own G.P.O. has been covering itself with glory, compared with the Continental offices. But even so, sea carriage cannot be as punctual as land carriage, and delays must be numerous and lengthy for some time to come I suppose. We must all "grin and bear it." And our friends abroad must "take the will for the deed" in regard to correspondence.

***

A correspondent, writing on August 5, who had reached Gibraltar on the way home by sea, gives a passing glimpse of the harbour there in a letter hastily written to catch the mail. I quote part of the despatch:—"We are held up here, as German vessels are reported to be beyond. The harbour is full of vessels, also held up. No one is allowed on shore. Some German cargo ships and one German East Africa liner were run in early this morning by our war vessels. Two or three small Spanish cruisers are visible. I have just heard we have ten minutes to post in."

I like the announcement made by Reuter's Special Correspondent in St. Petersburg, that Brother Anthony Bulatovitch, a former officer in the Russian Guards, and more recently head of the Mount Athos Monastery, has applied for a commission, while at the same time retaining his monkhood." It will be remembered that Brother Anthony, who was hailed by many of his compatriots as "the mad Hussar," was founder of the heresy of the Name of God which had to be suppressed by Russian soldiers with fixed bayonets. No one need be surprised at the good father's action as, during the Russo-Japanese War quite a large number of monastic reservists were recalled to the Army—and went.

***

But what on earth does Reuter's correspondent mean when he says: "According to ancient custom, he would head the troops in a uniform covered with a cowl, *and would challenge his opponent to single combat*"? (Italics mine.) The "uniform covered with a cowl" is a delightfully picturesque touch; so is the "single combat" proposition. But I am afraid that if M. Bulatovitch should indulge in any such chivalrous ceremony as that he would merely become food for German powder. Just at present the Germans do not seem to be in a chivalrous mood.

***

I have just read in a Sudan paper of the death at Tewfikia of a Corporal R. Fraser, R.E., who had been employed under the Posts and Telegraphs Department. He had come in to Tewfikia from Awoi for medical advice, which he seems to have needed very badly, for he had been the only Englishman at Awoi, where he had been working for six weeks, and he had been suffering from malarial fever and dysentery. When I add that he was a general favourite amongst his fellow-employees and non-commissioned officers of the Egyptian Army, and that he had been in the Sudan four years, I have told you all I have learnt from the Khartoum journal. The story is very simple, and with so many stirring events to read about just now my readers may find it "flat." But it seems to me to be worth telling because Corporal Fraser, R.E., is typical of a good many of our fellow-countrymen who keep our flag flying in odd corners of the globe. We only hear of them now and then, by pure chance; for they have a positive horror of "the limelight." But the Empire that has such citizens is *not* decadent.

***

A Greek correspondent informs me that in Greece a new law laying down regulations concerning school doctors is about to come into operation. In most respects the new arrangements seem to me to be admirable. The doctor, for instance, will, at the beginning of each scholastic year, give his opinion as to the number of hours during which the pupils are to be kept at lessons. If this means that he will examine the children and see that they are not overworked, it is excellent; for I understand that the tendency in Greek schools is to press the poor little scholars far too hard. Then, too, besides seeing that the pupils are properly vaccinated and attending to their gymnastic instruction, the doctor will "select the print of the books to be used at school" and see that the forms used for the pupils of different sizes are of the right height. These last-mentioned measures are, of course, to protect the youngsters' sight; and for the reason already given they are to be commended; though, to be sure, one would have thought that some central body might have "selected the print of the books" and fixed the height of form to be used by the pupils of varying heights. But when I am told that the doctor is also to "inspect the site" on which any school is to be erected, it seems to me that the new law goes a little too far! Surely such work lies in the province of the architect; and even if we admit that the architect is fallible and given to theorising, does not the same remark apply to the doctor with at least equal force—especially in regard to such questions as site?

***

Some little time ago, it will be remembered, our Bucharest correspondent referred to the iniquitous traffic in children that was carried on in Roumania by certain bands of Tziganes, who stole the little ones, maimed them, and then either used them themselves or sold them to other scoundrels for the purpose of exciting the compassion of and extracting money from the charitable. A correspondent has sent me some particulars of further operations of this kind on the part of the Tziganes, which he thinks might interest my readers. I am sincerely obliged to him, but I really must refrain from publishing any details of the particular case to which he draws my attention. It is one that should be sifted thoroughly, but I gather that the Roumanian police are showing commendable activity in the matter, and that the Bucharest Press is doing its best to keep public indignation up to the mark. Certainly no punishment could be too severe for the fiends who, having first broken a child's body, next proceeded to deform both its mind and spirit, which is what actually occurred in the case in question.

CORSAIR.

NEAR EAST BOOKSHELF.

THE LIFE OF THE NEAR EAST.*

We know of no writer of fiction who can equal Mr. Pickthall in conveying the atmosphere of the Near East to his reader. His "Saïd the Fisherman" would be hard, indeed, to beat as far as the native portion of the book is concerned, and though Saïd loses our sympathy when he comes to England, that is his fault rather than Mr. Pickthall's. In "The Valley of the Kings" we are all the time in Palestine or Syria, and though there are European characters in the book the author handles them so cleverly—he associates himself so closely with the native view, that is to say—that we are never conscious of any jar such as we receive at the end of "Saïd."

The story is simple enough, though with regard to the "Valley" which gives the book its name it is quite possible that a number of readers will be somewhat surprised. It is in the delineation of Oriental character that the interest of the book lies, and in this respect it will certainly make a very strong appeal to all those who care for the Near East. The dreamy, really lovable Iskender, the unheroic hero; his shrewish mother, fawning on the "Mission Ladies" to their faces and exercising her by no means poor powers of abuse upon them as soon as their backs are turned; the superstitious uncle, Abdullah, converted by a "miracle" into a prig, and afterwards relapsing into a sot; Mitri, the Orthodox priest; Daud and Selim, sons of the hotel proprietor, proud and fanatical, but as ready as Iskender's mother to fawn on a European; the crowd of rascally dragomans—all these are life-like portraits, and some of us will no doubt think we must have met the originals of one or more of them.

Mr. Pickthall does not moralize. He tells his story—tells it ruthlessly, it seems, at times. And the result is that we find our sympathies captured for the "natives" in spite of all their shortcomings. Iskender may be a hopeless kind of liar, but that is because he *cannot* see the truth; and when the tragedy comes we are sorry for him—far more sorry than we are for his "Emir," although the latter be English. The whole thing is inevitable, in fact; but it is made so as much by the "Emir's" carelessness as by Iskender's exercise of his imaginative faculties. The finale, however, is quite true to life, and, though it leaves us rather sorry for Iskender, we are not half as sorry for him as for the de-Orientalized Asad, who fulfils his ambition by becoming an "English clergyman" and marrying an English wife!

"The Valley of the Kings" is a leaf taken right from the book of Life as lived on the edge of the Orient, where Moslem ways are striving so hard to make their mark in the East. Messrs. Dent deserve the thanks of those who are interested in that part of the world for including it in their attractive Wayfarer's Library.

"Bonaparte et l'Egypte," by I. D'Ivray, is an historical work of great interest to students of the origins of modern Egypt. It is published by Lemerre at 3 frs. 50 cms. The writer, who has lived a long time in Cairo, was able to gather together a good deal of traditional material supplied to him by direct descendants of men who were connected with Napoleon's Egyptian campaign. A good account is given of the work of Napoleon in Egypt, and the curious side of the French occupation of Egypt—the part played by women and the adoption of the Mohammedan religion by General Menon—is also fully dealt with.

* "The Valley o' the Kings." By Marmaduke Pickthall. (The Wayfarer's Library. Dent. 1s.)

MAILS FOR THE NEAR EAST.

The latest information regarding the mails obtained from the Chief of the Foreign Department of the General Post Office yesterday morning is that they are entirely disorganised by the war—"completely mixed up" was the expression used. One symptom of the war has been the abandonment of the Universal Postal Union, which was to have met at Madrid next month. Indian mail delivery in London, including, of course, that from Egypt and the Near East, has been dislocated. At the moment of writing a mail from India had arrived, but whether it contained bags from Egypt could not be definitely stated. It was due to arrive on August 9. Mails due from the Continent, described as "various," and due in London on July 29 and onwards, had not yet been heard of.

"We are giving no information whatever as regards the routes for India and the East," a King William Street official informed our representative yesterday, "but you may state that they will all be by sea. We are sending a mail to-night with postings up till midnight; and with a supplementary mail up to six o'clock to-morrow night by the P. and O. 'Nankin' for Egypt, India, and the Straits Settlements. The mail for Australia, which will, of course, take bags for Egypt, is being sent by the P. and O 'Beltana,' posting up to six o'clock to-night (Thursday). As regards next week's mails, no definite information can be given."

We are also informed that, in addition to these, mails will be despatched to-night (Friday) to Cyprus, Jaffa, Jerusalem, and Beyrout via Plymouth. Inward mails due next week are believed to be on their way through the Mediterranean, but future prospects are less hopeful since last Saturday's boat is reported not to have left Bombay.

Telegraphic communication has been greatly dislocated. Telegrams for India, Straits Settlements, etc., can only be accepted via the Eastern Telegraph Company, and can only be accepted at sender's risk as to delay. There is also serious delay in the transmission of telegrams to Austria, Hungary, Roumania, Bulgaria, Montenegro, Turkey, and the Balkans. In each instance telegrams can only be accepted at sender's risk.

DECLARATIONS OF WAR.

It is difficult to know exactly when a state of war began to exist between the various belligerent States, but as nearly as possible the dates on which war was declared, or notice was given that a state of war was considered to exist, are as follows:—

Austria-Hungary declared war on Servia.....	July 28.
Germany declared war on Russia	August 1.
Germany declared war on Belgium	August 4.
Germany declared war on France	August 4.
Great Britain declared war on Germany	August 4.
Austria declared war on Russia	August 6.
Montenegro declared war on Austria-Hungary ..	August 7.
France declared war on Austria-Hungary	August 10.
Great Britain declared war on Austria-Hungary	August 12.
Montenegro declared war on Germany.....	August 13.

THE EVE OF RAMADAN IN KHARTOUM.

The Khartoum correspondent of *The Egyptian Gazette* gives an interesting account of the celebrations in Khartoum on the eve of Ramadan. He says:—The eve of Ramadan was ushered in with intense enthusiasm by the native element here. A procession composed of a company of Egyptian Infantry with band and pipers, headed by police mounted on camels and horses, and followed by a great number of sheikhs and notables carrying gaudy banners and leading a huge crowd of din-producing adherents, paraded the city for a couple of hours. An attempt to organise a kind of trades-exhibition was made and numbers of carts with artisans at work accompanied the procession. Intermingled with the official parade were scores of syces mounted on their masters' horses, donkeys, or bicycles; veiled ladies, some in carriages, and others on carts or riding donkeys; and all the tag rag and bobtail that Khartoum boasts. . . . The whole effect was grotesque in the extreme and proved immensely amusing for the few European onlookers. The one touch of dignity and orderliness in the procession was given by the two stern-visaged British policemen who were riding at the extreme end of it—held responsible, I presume, by our happy-go-lucky authorities that no really untoward incident occurred.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

L'EMPEREUR D'ALLEMAGNE ET APRES.

Monsieur le Redacteur de THE NEAR EAST.

Monsieur,—Permettez-moi d'expliquer en quelques mots à nos amis d'Orient les causes de la lutte gigantesque qui se poursuit en Europe à l'heure qu'il est, et comment nous envisageons l'avenir.

La situation se resume en peu de mots, soit : "l'Empereur d'Allemagne lutte contre le monde entier, et le monde entier est contre lui." Un homme dans cette position ne saurait être que ou insensé ou fort detestable. C'est donc dire qu'il est de toute façon en fausse position.

Or voici comment les choses se sont passées jusqu'à présent. Des vilains Serbes ayant assassiné l'héritier présomptif de l'Empereur d'Autriche, ainsi que sa femme, l'Autriche outragée demande à la Serbie la punition des coupables en lui imposant certaines mesures de procédure. Celle-ci s'incline à la demande de l'Autriche et sur douze paragraphes de la sommation elle en accepte dix, sans discussion, et demande arbitration sur les deux restants. Celà aurait dû suffir à l'Autriche, mais elle n'a pas été satisfaite, et 48 heures après, elle attaque la Serbie. La Serbie, pays slave et orthodoxe, en appelle à la Russie. La Russie prie l'Autriche de pauser dans ses mesures de vengeance et demande à la France et à l'Angleterre ses amis d'employer leurs bons offices auprès de l'Autriche à cet effet. Sir Ed. Grey remue ciel et terre pour calmer l'Autriche, et prie l'ambassadeur d'Allemagne de l'aider. Celui-ci demande des instructions à Berlin, mais on lui dit de ne pas s'en méler. Alors l'Empereur de Russie s'adresse à l'Empereur d'Allemagne solicitant son concours, mais comme entre temps il avait jugé propre de procéder à un commencement de mobilisation pour montrer à l'Autriche qu'il ne pouvait pas être indifferent au sort de la Serbie, l'Empereur d'Allemagne fait le têtu, et lui repond en lui reprochant sa mobilisation et le sommant à la cesser immédiatement, avant de rien plus discuter avec l'Autriche. Une telle sommation à la Russie ne pouvait avoir d'autre réponse que ou le silence ou la rupture immédiate. La Russie prefère de garder la silence, alors l'ambassadeur d'Allemagne l'importune pour qu'elle réponde. Elle lui déclare alors qu'elle ne pouvait pas arrêter sa mobilisation. Sur ce, l'Empereur d'Allemagne lui déclare la guerre, car lui-même avait prévu la rupture et s'était préparé. Sir Ed. Grey renouvelle ses efforts avec le bon concours de la France, et même de l'Italie, en montrant à l'Empereur d'Allemagne les conséquences sérieuses de l'entrainement infaillible de la France et probablement de l'Angleterre. Rien n'a valu, car sa Majesté ne voulait pas croire que l'Angleterre refuserait de marchander avec lui pour sa neutralité. Alors il déclare la guerre à la France aussi.

Celà devenait déjà assez inquiétant, mais l'Angleterre reste spectatrice, n'ayant promis à la France que la protection de ses côtes du Nord, où elle rangea sa flotte, quand, tout à coup, elle entend que l'Allemagne a violé la neutralité de la Grand-Duché de Luxembourg et de la Belgique, neutralités garanties par elle ainsi que par l'Allemagne et la France. Cette violation avait pour but de venir attaquer la France du côté le moins fortifié. Sur ce l'Angleterre somme l'Allemagne de ce retirer du terrain defendu dans 12 heures. L'Allemagne ne repond pas et persevère dans sa marche sur Liège. L'Angleterre, se voyant attaquée dans les pays sous sa protection directe, n'avait pas d'autres moyens que de pourvoir à leur défence. Son ultimatum expirait le 4 ct. à minuit, le 5 matin elle était en état de guerre avec l'Allemagne, d'autant plus qu'elle commençait à mépriser la politique allemande qui avait même cherché à la corrompre.

L'Allemagne se bat donc actuellement avec l'Angleterre, la Belgique, la France et la Russie simultanément. L'Autriche se bat actuellement avec la Russie et la Serbie seulement, n'ayant pas encore attaqué ni la France ni l'Angleterre, qui n'ont aucun intérêt à l'attaquer. L'Italie reste neutre, quoique faisant partie de la Triple Alliance, qui cependant ne l'engage à sécourir ses associés qu'au cas où ils n'auraient pas provoqué la guerre.

Voilà l'histoire de cette guerre terrible qui ne finira que ou par l'annihilation du régime impérialiste en Allemagne, ou par la victoire des Allemands contre tous les Alliés, portant l'Empereur Guillaume au trône du monde entier !

J'ai dit plus haut que le monde entier était contre l'Empereur d'Allemagne. En effet, outre ses combatants ci-dessus enumérés, les Etats-Unis, l'Espagne, le Portugal, le Japon et la Chine le regardent de mauvais œil et quelques-uns même disent qu'il est fou.

L'Allemagne n'en périra pas pour celà quoi qu'il arrive, mais au contraire sa population si industrieuse et si capable, aussitôt delivrée de ce cauchemar prussien, se sentira des ailes pour aller jusqu'aux cieux !

Il est contre la nature des choses qu'une telle population soit à jamais armée jusqu'aux dents, et faisant le fanfaron à propos de botte à chaque instant pour plaire à un homme ambitieux jusqu'à la témérité. Elle s'épuise inutilement, et finit par être tout simplement ridicule.—Agréez, etc.,

Londres, le 10 août, 1914. ISKANDAR SEFI.

THE POSITION OF TURKEY.

To the Editor of THE NEAR EAST.

Sir,—To-night London is excited by the news that the Turkish Government has purchased from Germany the "Goeben" and "Breslau," which had sought shelter under her neutral flag in the Dardanelles. To-morrow morning, I have no doubt, every newspaper in London will criticise severely the action of the Turkish Government, and will warn us that it would not be safe for us to rely very strongly on Turkish neutrality. I submit that it would be wise to defer judgment until all the facts relating to this curious international deal are made public. The Turkish Government is in a difficult position. Germany, a Power with whom her relations for many years past have been of a most intimate nature, is now engaged in a life-and-death struggle with her enemies. Germany is naturally seeking aid in quarters where she knows she has friends. She is, in fact, scouring the earth for friends, and the few nations she is not seeking to terrorize she is strenuously endeavouring to bribe. Tremendous pressure is being put on Turkey to throw in her lot with the Austro-German alliance.

The Triple Entente, on the other hand, has no wish to attract Turkey to its side; if she remains neutral the requirements of the nations concerned will be fully satisfied. But necessity over-rules policy in time of war, and the compulsory purchase by the British Government of the two Turkish battleships building in England adds to the difficulties of the Turkish Government in their efforts to resist the pressure of the pro-German faction in Constantinople. The projected Turkish war against Greece was, we all thought, made impossible for years to come when our Government announced that it had exercised its right to purchase the Turkish battleships under construction in England, and the regular pro-German faction in Turkey must have gained many recruits in the last few weeks in consequence.

The purchase of the "Goeben" and "Breslau" helps the Turkish Government out of the most pressing of its present difficulties. The naval strength of Turkey is restored to the standard holding good a few weeks ago when she was expecting immediate delivery of her first "Dreadnought," the German sale having neutralised the British purchase.

The more sober element in Turkey is not anti-British, and the mass of the people do not desire war with this country, but the forcible annexation by Greece of all the islands commanding the Dardanelles is a matter upon which Turkish opinion cannot possibly be divided.

England can help Turkey in many ways at the present juncture. She is a Power with whom we are on friendly terms, and if we would retain her friendship we should at least try to understand her present difficulties.—Yours, etc.,

August 12, 1914. PRO-TURK.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

The Suez Canal.

August 6.

Sir C. Cory asked the Under-Secretary for Foreign Affairs whether it was possible for the Government to arrange with the Suez Canal Company in Paris to delegate authority to the London office of the Suez Canal Company for the payment of Canal dues in London and telegraph instructions to Port Said to permit boats to pass through the Canal.

Mr. Acland: The hon. baronet was only able to give me notice of this question ten minutes ago, and I have not been able to obtain a full answer. I will go to the office and see how the matter stands. I know that it is in hand because information was given to us about it this morning.

Sir C. Cory: It is of great importance, because I understand that all steamers are hung up in the Canal.

Arming the Indian Marine.

August 10.

Colonel Yate raised the question of the Indian Marine, and asked whether orders had now been issued for the arming of the vessels of the Royal Indian Marine.

Mr. Charles Roberts (Under-Secretary for India): The Secretary of State is unable to make any statement on the subject.

Anglo-Persian Oil.

The Speaker reported that the Royal assent had been given to the Anglo-Persian Oil Company (Acquisition of Capital) Act, 1914.

The House subsequently adjourned until August 25.

THE RED CRESCENT SOCIETY.

Urgent Appeal to Ottoman Subjects.

The Ottoman Consul-General in London, in his capacity as President of the London branch of the Ottoman Red Crescent Society of Constantinople, which is under the high patronage of his Majesty the Sultan, applies urgently to all Ottoman subjects in Great Britain and the British Empire to send at once their donations to this society, as it has been decided to place for hospital and relief work all the funds at the disposal of the noble British nation, whose Army and Navy are now at war.

It is the duty of all Ottomans to respond at once to this urgent call, as their nation received so much help from the British nation during the troubles of the Balkan, and particularly the Italian wars. An immediate response to the call is expected at the temporary offices (35, Mildmay-chambers, 69, Bishopsgate) of the London branch, which is under the Honorary Presidency of the Turkish Ambassador in London.

THE WAR.

PRESS AND PUBLIC OPINION.

Press and Public continue to face the situation in an admirable spirit of quiet determination and confidence—in which over-confidence has no part. There is plenty of enthusiasm, but it is of the quiet, undemonstrative kind, and it is manifesting itself principally in eminently practical ways. The men and women of the country—to say nothing of the ubiquitous Boy Scouts—are preparing themselves for whatever may come. Meanwhile they rejoice in the gallantry shown by their allies. We publish some extracts from typical articles.

Altkirch and Liege.

Writing on "The French and Belgian Situation," the Military Correspondent of *The Times* says (August 10):—

The attack of the French brigade upon Altkirch, and the hustling of the Germans out of Mulhouse, was most gallant, and was conducted with all the dash and impetuosity of the French Army in its best days. It is now patent to everybody that the French can engage equal numbers of Germans with success, and we congratulate our allies most cordially upon the result of their first encounter in their hitherto lost provinces.

The Morning Post (August 8), in a leading article, entitled "Looking Forward," says:—

The encounters as yet reported are but a prelude. The successful defence of Liège by the Belgian troops is a proof of the bravery and staunchness of England's old allies of Waterloo days. It is a good omen at the start for which men may be thankful. But its importance must not be exaggerated, nor too much credence given to the reports of German losses or to the belief that the German "plans" are upset. A good general discounts repulses of this kind, and is not dismayed by them. The report that the German commander asked for a truce is puzzling, for it is not usually the combatant who attempts to take a fortress by a *coup de main* who calls for a truce when he is repulsed. The great armies have not yet come into touch, and can hardly yet be ready for moving forward. Our countrymen must therefore be content to remain for some days longer in suspense, which they can best meet by exerting themselves each and all in preparation for what is to come.

In a leading article on "The Lessons of Liège," *The Times* (August 10) pays the following well-merited tribute to the Belgian troops:—

"Shield and friend" was the motto of the Flemish craftsmen in the great battle at Courtrai, in which they laid low the chivalry of France. "Shield and friend" after 600 years may well be the motto of their sons to-day. They are fighting in the same cause, and the friends in whom they have trusted for support are hurrying to their aid. They have made the task easier for us all. They have borne the first brunt of the German onset, and the success with which they have stemmed it cannot but quicken the confidence of their allies.

The Spirit of our People.

And immediately following comes an equally well-merited tribute to our own people:—

The sermons which were preached in all the chief churches and chapels of this country yesterday afford one proof of the spirit in which England enters into this war. It is a grave and firm spirit—the spirit of men and women who know that the struggle before them is formidable, but who undertake it in the reasoned and assured conviction that their quarrel is necessary and just.

They cherish no enmity against any single Power. They know that the German people do not govern themselves, and have but little responsibility for the acts of the German Government. They are as little moved to anger by the German insults of the last few days as they were by the flatteries which the authors of these insults lavished upon them, until the German Government discovered that England would keep her word to Belgium and would not be bribed into deserting France. They do not lose their tempers, and they wonder at the lack of dignity and self-respect which has led to such shameful exhibitions of pettiness and of brutality elsewhere. They have a perfectly definite object before their minds, and they will keep it before their minds till the war is done.

The Policy of Blood and Iron.

The publication last week of the "Correspondence Respecting the European Crisis" (Cd. 7467) must have served to convince the most ardent friends and well-wishers of Germany that the responsibility for the present war cannot be attributed to Great Britain. In an article on the subject *The Spectator* (August 8) remarks:—

We go into this war with an absolutely clear conscience. The "War Lord" decreed war for Europe, and it is as necessary for the honesty, cleanness, and quiet of Europe that he should be stopped and rendered harmless as it was necessary for Great Britain to save Europe from Napoleon. No fair-minded person who reads the Blue-Book will be able to doubt for a moment where the guilt lies. The policy of Germany has been throughout the traditional policy of "blood and iron," the policy of diplomatic disingenuousness that formerly victimised the Danes, the Austrians, and the French. Friends of Germany in this country who have been accustomed to allow German diplomatic language its full literal value will see now that there has been no change whatever in German methods. The method of Bismarck still goes on—except that an extraordinary clumsiness of which he would have been quite incapable has been introduced. When the German Emperor says that he has worked for peace we can only turn with a bitter smile to the accusing facts. He sent personal messages to the Tsar, doing lip-service to peace. But unfortunately, he knew and approved of the Austrian ultimatum to Servia before it was sent, and when Servia, acting on the advice of Russia, had almost abjectly given way on nearly every point he still did not relent from his policy. He went on to speak with a capacity for self-deception which was unrivalled—it was either that or intentional duplicity—of Russia threatening Germany! Before that, when Sir Edward Grey had begged the Powers to send representatives to arrange peace, all accepted the invitation except Germany. Yet the Emperor up to the moment when the greatest war of history began was speaking of his love of peace. We may now measure exactly the guiltiness of such diplomacy.

The same note is struck in the leading article in *The Morning Post* already referred to:—

The Emperor called out his army in as great a hurry as the Austrians had got up their attack on Servia. Days later, with deep reluctance, days after Germany had begun the mobilisation which her statesmen and generals had always said meant war, the French Government ordered mobilisation. The British Government waited still longer. Yet the Emperor has the effrontery to say to his people: "In the midst of perfect peace the enemy surprises us."

There is no word in the proclamation as to the cause for which Germany is fighting. The only motive alleged is "latent hostility on the East and on the West and beyond the sea." In other words, Germany has gone to war for the same reason which induced the Prussian lieutenant to strike the Alsatian with his sabre, because she was afraid she might some day be attacked. The Emperor issues this statement long after the question who was the aggressor has been answered before the world by Italy's proclamation of neutrality.

It would be easy to add to these two statements of the case against the Kaiser. But it is surely unnecessary.

"K. of K." at the War Office.

The nation is undoubtedly delighted by the appointment of Lord Kitchener as Secretary of State for War. Here and there criticisms may be heard, but they come from quarters that make it safe to ignore them. The following—the opening and concluding—passages from an article in *The Saturday Review* put the case very clearly:—

Lord Kitchener's appointment as Secretary of State for War secures, what is not always secured under our system of government, the presence of the right man in the right place. . . . In appointing Lord Kitchener to the War Office the Cabinet has again proved that it can rise to a great occasion. His presence there will give the nation a feeling of confidence which it could not have had under Mr. Asquith—whose great ability in other spheres could not obscure the fact that he is a novice at War Office administration—or under Colonel Seely; and confidence that is not misplaced is an asset of value at the beginning of a long fight.

The few and barely audible criticisms of Lord Kitchener's appointment may be dismissed. Those who have not yet grasped the meaning of war complain that constitutional custom has been violated by the presence of a soldier in a Cabinet of civilians. They forget that the Duke of Wellington was once Prime Minister. They suggest that Lord Kitchener will not be responsible to Parliament. They forget that he is a member of the House of Lords. They protest that in some strange way the Constitution will be damaged by his appointment. They forget that if the War Office were not competently run we might soon not have a Constitution at all. The answer to these people is that he is the best man for the work, and that in Kitchener, French, and Jellicoe the nation has men it can trust.

The Dominion's Support.

The Times (August 11) voices the general sentiment of gratitude with which the generous support of the Dominions has been received by the Motherland as follows:—

Nothing has cheered Britons more than to know that in this unprecedented crisis we have the whole of the Dominions with us. The magnificent gift of Canada, recorded yesterday, is the most practical possible form of help. Canada is sending as a free offering a million bags of flour of 98lb. each, which represents 2lb. of flour for every man, woman, and child in the United Kingdom. The generosity of our kinsmen across the Atlantic has made an impression which will never be forgotten. When we add to it the fact that our Toronto Correspondent says that the Canadian Expeditionary Force of 20,000 men could easily be doubled or trebled, we begin to realize how great is the debt we shall owe to Canada, and understand, as we never did before, the depth and the intensity of Canadian loyalty.

THE PRESS ON THE NEAR EAST.

Servia and Austria-Hungary.

The Independent (New York), of August 3, has an interesting note on the enmity of Servia and Austria-Hungary. We quote below:—

Imagine a country about the size of Maryland, but with twice the population though without Maryland's mineral and maritime wealth; a mountainous country, four-fifths of it uncultivated, much of it oak forest. It is a decapitated country; the upper classes killed off, driven away or proselytised during the Ottoman occupation, no princes of either the monarchical or mercantile kind, few capitalists or great landowners such as dominate neighbouring Roumania. It is a land of peasant proprietors; "A Poor Man's Paradise," the scribbling tourist is fond of calling it, although it is doubtful whether the poor man enjoys living in such a country as much as he does where there is more money going, even though he does not have so much of it as some others. The people are Slavic by race, Asiatic in culture, four-fifths of the adults illiterate, Greek Orthodox by religion, frugal, hard-working, independent, democratic and patriotic.

Given such a people in such a country, what are they to do for a living? Obviously not much except to grow grain and meat for export. Hogs can find their food in most of the oak woods and be fattened on the corn of the fields, but where can they be sold? Not to the southward, for the Mohammedans of Macedonia and the Jews of Salonika do not eat pork. But to the north just across the Danube is a big, rich country inhabited mostly by Catholics, who have no aversion to swine-flesh except on one day of the week. Austria-Hungary is then the natural market for Servian products, and here they mostly go. But whenever Austria wants to annoy Servia or to please Hungary all she has to do is to raise the tariff rates on trans-Danubian produce or prohibit the importation of Servian pigs or poultry by quarantine rules on the ground of some supposititious disease. By the practice of such tactics, called by the German writers *Schwein-politik*, Austria has reduced Servia to a condition of economic dependence from which Servia is striving to free herself by securing an outlet to the sea and so to the wide world market. But so far Austria has checkmated this endeavour. Last year, at the sacrifice of some 70,000 men, Servia cleared the way to the Adriatic, but now finds herself shut out from the sea by the interposition of the Albanian principality manufactured for the purpose.

Carnegie Commission's Report.

Under the heading, "The Balkan Wars," a note is published in *The Manchester Courier* (August 11) commenting on the Carnegie Report. We quote below:—

At present the world is unlikely to pay much attention to the Report of the International Commission appointed to inquire into the causes and conduct of the Balkan Wars, which is just published. But the work is well worth study when the world can find time to undertake its reading. . . . It investigates with remarkable clearness and thoroughness the causes that led to the Balkan outbreaks, and the nature of the warfare waged therein. Most instructive chapters are contained in those parts of the book which deal with the subject of the campaigns from the point of view of international law. War provides the great instruction book in this hazy science. And the most salient feature of the matter is the complete contempt to which the actual time for the testing of its principles reduces this highly interesting branch of academic inquiry. As soon as a war closes the savants set to work to elucidate and define the new principles which it has brought into being and developed in connection with international law. But when the next crisis arrives practice proceeds invariably to make short work of the latest principles laid down for its guidance.

Impression of Greece.

In his weekly "Literary Letter" C. K. S., of *The Sphere*, in the issue of August 8, gives some impressions of a brief visit to Greece. He writes:—

A week in Athens is all too short a period in which to see its many attractions. A friend had recommended me to the Hotel Continental, although there are two larger hotels in Athens, but I was glad that he had done so, for from my bedroom windows I had separate views—from one of the Acropolis, with the Parthenon standing out gloriously to the setting sun, and from the other of the Hill of Lykabettos. . . . One correspondent asks me what impression this visit to Greece made upon me so far as things modern are concerned. The answer is easy. I was greatly impressed with the extraordinary faculty of adaptation shown by the modern Greek. The occupier of a country which has in it many signs of barrenness, of a lack of material resources, his faculty for making two blades of grass grow where one grew before, is extraordinary. I was also immensely impressed by the patriotism of the Greek—his passionate love of country. During the recent war thousands of Greeks threw up their livelihood in various parts of the world, and particularly in the United States, and returned to be enrolled among the soldiers of their country. That is why at every turn in Athens wherever you meet a soldier you almost inevitably find that he speaks some kind of English.

The Servian Warriors.

Mr. Philip Gibbs contributes to *The Graphic* (August 8) an article, entitled "What I Saw of the Servians," giving a lively description of the scenes he witnessed in Servia on the outbreak of war between the Balkan Allies and Turkey. Describing the arrival in Belgrade of reservists from the country, he writes:—

They were mounted peasants from the hill-country, and looked as though they had come riding out of the historic past of Europe, when Attila the Scourge came sweeping across the plains. They wore long black hair beneath sheepskin caps or broad felt hats tied beneath their chins, and short brown jackets with loose shirts tied about their waists with scarlet sashes. Their horses were lean and shaggy, with wooden saddles made of sticks roped together, and with enormous wooden stirrups and reins of coarse fibre. As they rode into Belgrade they stood up in their stirrups and gave forth ear-piercing yells. The unmounted peasants from Servian villages who had been brought up to join the last reserves were elderly men or very young boys, who slouched about in an aimless way, carrying bundles on their backs, before being drafted down to Nish. Their costumes were of startling variety and crude colours. Many of them wore sheepskin coats, with the shaggy wool inside, the skin decorated with garish embroideries or primitive paintings. Their baggy trousers were tucked into loose gaiters worked with red stitches, and their flat oval sandals were almost as large as tennis rackets. They were simple, smiling fellows—born fighting men, as their history shows, yet with all the poetry and piety of the peasant in the Near East, who is inspired to racial hatred by old ballads and folk-lore, and who goes to battle after confessing his sins, praying to his saints, and lighting a candle to bring him victory.

The women are as warlike as the men. The writer continues:—

Yet the Servian women have the fighting spirit, and they would tear to pieces any man who played the coward when his country was in peril. Some years ago they organised a "League of Death" to help in the defence of Servia against Austria when the inevitable war should take place. Society women and peasant women practised shooting and learned the elements of military drill. It will be interesting to know if these women are playing any part in the present war.

Turkish Telephones.

It will be remembered that, at the time of the opening of the Constantinople telephone service, our Constantinople Correspondent gave details of its working. In the July number of *St. Martin's-le-Grand* Miss Florence Hunter tells how she organised a telephone staff in an almost incredibly short time:—

Seven Mussulman girls are now operating, five of them being at Kadikeuy Exchange, which is in the residential neighbourhood of the better-class Turks, to the families of which these particular girls belong. They are, without exception, daughters of professional men or officers of high rank in the army. It is unnecessary for these particular girls to earn their own living, but they are pioneers of the Feminist movement, showing their less fortunate sisters what it is possible for the Turkish woman to do, and are upheld and aided in their efforts by Talaat and Djemal Beys and others equally prominent and powerful in the present Ministry. The girls do not wear the "tcharchaf" nor the veil at their work, but only the thinnest silk scarf to cover their hair, and even this is discarded at times when the workmen are not present. The remainder of the female staff is composed of Greeks, Armenians, Jewesses, Syrians, Italians, Bulgarians, one Russian, two Maltese, and others, but all are Ottoman subjects. My two Exchange managers are Jews, and the male clerks on the traffic staff are Armenians, so that the staff is typical of the city, and truly as cosmopolitan as the subscribers. So far, the verbal and written "service" complaints have not numbered 1 per 1,000 per week; possibly too happy a state of things to last, as the subscribers here acquire more than one "telephone habit." Each operator must speak correctly French and Turkish, and know the Greek numbers, but we are refusing the latter from subscribers as much as possible, and hope to cease it altogether, for, as the Greek subscribers were at first allowed this privilege, the Armenians were clamouring for Armenian, and, owing to the many languages spoken, it was impossible to pander to them all. Turkish was, therefore, chosen as the language of the country, and French for the many foreigners. Although some of our staff are wonderful linguists and can "get along" in anything up to nine languages, few can really speak more than two correctly.

Articles to Note.

"The Balkan Policy of the Habsburg Empire," by Theodor von Sosnosky, in *The Contemporary Review* (August).

"The Murder of the Archduke—The Cause and the Consequences," by J. Ellis Barker, in *The Fortnightly Review* (August).

"Some Persian Plays," by Evelyn Howell, I.C.S., in *Blackwood's Magazine* (August).

"The Murdered Archduke," by Edith Sellers, in *The Nineteenth Century* (August).

"The Sarejevo Tragedy," by Count Henry Lutzow, in *The National Review* (August).

"The Pirates of Algiers," by E. March Philips, in *The Edinburgh Review* (July).

PERSONAL & SOCIAL

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. New style.	Julian. Old style.	—	Moslem.	Jewish.
1914. Aug.	1914. Aug.		1332. Ramadan	5674 Ab
14	1	Friday	22	22
15	2	Saturday.....	23	23
16	3	Sunday	24	24
17	4	Monday	25	25
18	5	Tuesday	26	26
19	6	Wednesday	27	27
20	7	Thursday	28	28

To-day, 22 Ramadan, is the birthday of H.I.H. Ahmed Tewhid Effendi, nephew to the Heir Apparent of the Ottoman Throne and son of H.I.H. Seif-ed-Din Effendi.

To-day is the birthday of Grand Admiral H.R.H. Prince Henry of Prussia.

To-morrow, 23 Ramadan, is the birthday of H.I.H. Fatima Sultana, great niece to the Sultan and daughter of H.I.H. Ibrahim Tewfik Effendi.

Monday is the birthday of H.I.R.H. the Archduke Karl Franz Josef, the Heir Presumptive of the Dual Monarchy.

Monday, 25 Ramadan, is the birthday of T.I.H. Kadrie Sultana, sister to Fatima Sultana, and also of Saliha Sultana, daughter of H.I.H. Vahid-ed-Din Effendi and niece to the Sultan.

Tuesday is the birthday of his Imperial and Royal Apostolic Majesty the Emperor Franz Joseph of Austria, King of Hungary.

Tuesday is the birthday of H.R.H. Prince Nicholas, second son of the Crown Prince of Roumania.

Tuesday is also the birthday of H.H. Prince Philip of Saxe-Coburg and Gotha, elder brother of his Majesty the Tsar of the Bulgarians.

Thursday is the birthday of Prince Mohammed Ali, brother of H.H. the Khedive of Egypt.

Princess Arthur of Connaught gave birth to a son, at her residence in Mount Street, shortly before midnight on Sunday.

The King held a Council on Thursday last week at a quarter past one o'clock. Field-Marshal the Earl Kitchener of Khartoum was sworn in a member of his Majesty's Most Honourable Privy Council. At the Council his Majesty handed the Seals of Secretary of State for War to Lord Kitchener, who took the Oath of office and kissed hands upon his appointment. Lord Kitchener had an audience of his Majesty after the Council.

In place of a third private secretary, Lord Kitchener has appointed a personal military secretary in Lieutenant-Colonel O. A. G. Fitzgerald, of whose abilities the new War Secretary has had ample proof in recent years. Colonel Fitzgerald has lately been military attaché at Cairo, and he had formerly been associated with Lord Kitchener, either as aide-de-camp, or military secretary, or Staff officer, both in India, on his Lordship's mission to Japan, Australia, and New Zealand, and when he commanded the troops during the Coronation.

A *Daily Mail* telegram from Copenhagen reported that the ex-Shah of Persia, Mohammed Ali Mirza, and his family had arrived at Malmö (the Swedish port opposite Copenhagen), in a ferry boat from Tarsnitz, in Germany, together with 1,500 Russian fugitives. The ex-Shah is reported to have stated that he had fled in consequence of riots in Germany. He left on the same night for Russia.

Prince Haidar Fazel was prevented from accompanying Prince Aziz Hassan on the yacht "Kavalla," which left Egypt for Constantinople on July 29. Contrary to expectations Princess Neamet-Allah Hanem, sister of the Khedive and wife of Prince Kamal-ed-Din Pasha Hussein, could not embark for Constantinople on the Russian boat which conveyed the Khedivah, and the Princess left by the "Ismailia," of the Khedivial Mail Line on July 29.

T.R.H. the Crown Prince of Greece and Prince Christopher of Greece have left Claridge's for the Continent. Prince Cantacuzene has also left Claridge's for the Continent.

It is reported that H.R.H. Prince George of Servia, elder brother of the Crown Prince, was struck by a piece of shell and rendered unconscious while watching the Austrian bombardment of Belgrade.

Prince Antoine Bibescu, of the Roumanian Legation, has arrived in London from the Continent.

Admiral Sir John R. Jellicoe, who is in supreme command of the Home Fleets, with the acting rank of Admiral, was a Lieutenant of the "Agincourt" during the Egyptian War of 1882.

Vice-Admiral Sir Frederick Charles Doveton Sturdee, K.C.B., C.V.O., C.M.G., who has been appointed Chief of the War Staff at the Admiralty, got his first opportunity of seeing active service when the "Hecla" assisted in the bombardment of Alexandria. As Lieutenant Sturdee, he took part in the subsequent land operations, and was rewarded with the Egyptian medal with Alexandria clasp and the Khedive's bronze star.

Vice-Admiral Sir Cecil Burney, who commands the Second and Third Fleets, with his flag in the "Lord Nelson," was, it will be recalled, the British representative off the Montenegrin coast last year and the temporary Governor of Skutari after the blockade by the International Squadron under his command. For this he received the K.C.M.G. He served during the Egyptian War of 1882, and in the Sudan in 1884.

Vice-Admiral Sir Lewis Bayley, who commands the First Battle Squadron with his flag in the "Marlborough," served during the Egyptian War of 1882.

Vice-Admiral E. E. Bradford, commanding the Third Battle Squadron, with his flag in the "King Edward VII.," was a Lieutenant of the "Achilles" during the Egyptian War of 1882.

Vice-Admiral Sir Douglas Gamble, commanding the Fourth Battle Squadron, with his flag in the "Dreadnought," became Naval Adviser to the Ottoman Government in 1909.

Rear-Admiral Sir David Beatty, commanding the First Battle Cruiser Squadron, with his flag in the "Lion," served with the Nile gunboat flotilla during the Sudan campaign, when his distinguished services brought him the D.S.O. and promotion with only six years' seniority.

Rear-Admiral C. E. Madden, who has been appointed Chief of Staff to Admiral Sir John Jellicoe, served in the Egyptian War of 1882.

Mr. Ronald Graham, Adviser at the Ministry of the Interior, has left for Egypt.

Bishop Blyth has reached Gibraltar on the Union-Castle liner "Llandovery Castle," which has been held up there.

Harvey Pasha, Commandant of the Cairo Police, was expected to arrive in Cairo on Saturday last from Europe, via Port Said.

The Hon. Mrs. Julian Byng, whose husband commands the British troops in Egypt, has offered to the Tendring Hundred her fine house, Thorpe Hall, at Thorpe-le-Soken, Essex, for use as a Red Cross hospital. The offer has been provisionally accepted. The house will hold about thirty patients.

General Villaret and the other members of the French Military Division in Greece have left the Piræus for France. The Prime Minister, Mr. Venizelos, went on board the vessel to bid farewell to General Villaret, and expressed the hope that the French Military Mission would soon return to resume its work of reorganisation in Greece.

General Sir Bindon Blood, G.C.B., who has been appointed a Colonel Commandant of the Royal Engineers, saw service in Egypt in 1882, including the battle of Tel-el-Kebir. He was mentioned in despatches, and, in addition to the medals, received the brevet of Lieutenant-Colonel.

The marriage was celebrated on August 8, at St. Stephen's Church, Gloucester Road, S.W., between Mr. Hermann Nathaniel Bowden Smith, of the Egyptian Ministry of Finance, and Miss Daisy Beatrice Porter,

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.
Near the lake, with splendid park.

CECIL HOTEL.
In the town and 5 minutes from the station.

Two First-class Family Hotels.
High-class Cuisine. French Chef.
J. SUMSER, Manager-Proprietor.

Sofia (Bulgaria).
GRAND HOTEL BULGARIE
(opposite the Royal Palace).
First-class Hotel. Entirely renovated and beautifully situated in the centre of the city, near Post Office, Theatre, Museums, Banks, etc. Electric Light. Central heating. Baths. Garage. Telephone. Garden. French Restaurant. Good wines. Café. Foreign newspapers. Most frequented by English and American Visitors. Interpreter meets all trains. Rooms from 4 frs.

Cyprus.
THE CYPRUS HOTEL CO.
Open all the Year round—
LIMASSOL (Olympus Hotel).
FAMAGUSTA (Savoy Hotel).
For Summer Seasons—

daughter of the late Mr. G. E. Porter, I.C.S. Miss Turner was the only bridesmaid, and Mr. Humphrey Bowman, Director of the Egyptian Educational Mission, was best man. Canon Bartlett, cousin of the bridegroom, officiated.

A Rome telegram dated the 12th inst. reports the arrival there of Sir Louis Mallet, H.M. Ambassador in Constantinople, on his way to Turkey.

The Hon. Mrs. Harold Nicolson gave birth to a son last week at Knole, the residence of her parents, Lord and Lady Sackville. Mr. Harold Nicolson, who is the son of Sir Arthur Nicolson, Permanent Under-Secretary for Foreign Affairs, and was previously an attaché at the British Embassy in Constantinople, is at present working in the Foreign Office.

Mme. Grouitch, the wife of the Servian Permanent Under-Secretary for Foreign Affairs, with a party of surgeons, nurses, and dressers, left Charing Cross on Wednesday afternoon for Nish.

Mr. Rowland Snelling, editor of *The Egyptian Gazette*, has arrived in London from Alexandria. Chevalier Aquilina has also arrived in London from Alexandria.

Major H. C. B. Hopkinson Pasha, Commandant of the Alexandria City Police, left Alexandria on July 30 by the Austrian s.s. "Cleopatra" for Europe.

Capt. R. E. Russell, Assistant Director of Intelligence, Sudan Government, has left England on his return to Khartoum.

Mr. A. D. Alban, British Consul, left Cairo on July 29 for Port Said en route to England.

It was announced in the *London Gazette* of the 4th inst. that H.M. the King has given orders for the appointment of Lieutenant William Lloyd Jones, Middlesex Regiment, as a Companion of the Distinguished Service Order, in recognition of his services whilst in command of a party of twenty-five rank and file of the 3rd Battalion King's African Rifles, on the occasion of a reconnaissance on September 3, 1913, on the east shore of Lake Rudolph, East Africa Protectorate.

Colonel the Hon. W. Lambton, C.M.G., M.V.O., D.S.O., who is to be General Staff Officer 1st Grade, 3rd Division, Bulford, served in the Nile Expedition of 1898, and was present at the battles of Atbara and Khartoum, being mentioned in despatches and receiving the medal with two clasps.

Lieutenant-General H. Kent, Colonel of the Middlesex Regiment, who was eighty-nine on August 3, served as Captain in the Crimea, being present at the affair at McKenzie's Farm, the battles of Alma and Inkerman, and the siege of Sebastapol.

The Paris correspondent of *The Times* under date August 11 gives an account from the *Matin* of an episode which occurred near Nancy, two days after the outbreak of war. A French detachment came into contact with German troops supported by artillery. The Germans retired, leaving behind them a young officer badly wounded by a bullet in the abdomen. The French soldiers picked him up and did what they could for him, but he died in a few minutes. His last words were, "Thank you, gentlemen, I have done my duty. I have served my country, as you are serving yours." This young officer was Lieutenant Baron von Marschall, son of the late Baron Marschall von Bieberstein, who was the German Ambassador at Constantinople and for a few months German Ambassador in London. His pistol and helmet have been brought to Paris.

Mr. J. A. Leach, of the Sudan Civil Service, acted as best man at the wedding on the 10th inst. of Mr. Arthur Gordon Leach, Indian Civil Service, to Miss Margaret Woods, daughter of Mr. V. S. Woods, of Maryfield, Retford. The ceremony took place at St. Andrew's Church, Chelsea.

It was reported yesterday morning that Sir Walter Gilbey had recovered consciousness and taken nourishment. His condition is more hopeful.

The death in London is announced of Mr. Robert Francis Harper, Ph.D., Professor of Assyriology at Chicago. Professor Harper was born at Ohio in 1864, and graduated at Chicago in 1883. He was instructor at Yale University from 1886 to 1892, when he was appointed Professor of Assyriology at Chicago. He was made director of the American School of Archæology at Jerusalem in 1906. The great work of his life was the publication of the texts of the Assyrian letters and reports of the reigns of Sargon, Sennacherib, Esarhaddon, and Ashurbanipal, preserved in the British Museum.

Among the passengers who left London last Friday by the P. and O. steamer "Mooltan," for Port Said, were Colonel Bernard Pasha, D.S.O., Financial Secretary to the Sudan Government; Mr. Callender, of the Egyptian State Railways; Lieut. Drury, R.N., Sudan Ports and Lights Administration; Major J. S. Liddell, R.E.; Major Sir George Macaulay, General Manager, Egyptian State Railways; Mr. J. P. McGillivray, Mr. G. L. Roussin, Dr. A. M. Ruffer, Major Stack, Mr. Ronald Storrs, Captain Symes, Captain Townsend, Colonel H. P. Uniacke, etc. A large number of passengers engaged passages at the last moment, including many Egyptian Civil Service officials, who left hurriedly in response to the official notification in *The Times*.

APPOINTMENTS, PROMOTIONS, ETC.

The King has been pleased to approve of Mr. L. Enyalis as Consul of Greece at Larnaca.

In view of the announcement that a state of war has been proclaimed in Egypt and that the protection of the country has been entrusted to Great Britain, it is to be inferred that General the Hon. Julian Byng, C.B., G.O.C. of the British force in Egypt, is virtually at the head of affairs in the country during Lord Kitchener's absence.

Lieutenant E. H. Davidson, Gordon Highlanders, has been appointed adjutant of the Camel Corps School at Cairo, in succession to Captain G. J. Brownlow, Rifle Brigade.

General Radko Dimitrieff, the Bulgarian Minister in St. Petersburg, has resigned his post and accepted a commission in the Russian Army, in which he has served on previous occasions.

Mr. G. D. Hornblower, Chief Inspector, Egyptian Ministry of the Interior, will fulfil the duties of Abdallah Pasha Sfer, Assistant Director of Public Security, who is at present on leave, until the return of Mr. Monteith Smith.

El Bimbashi W. Middleton, Camel Corps, has been appointed Staff Officer, Khartoum district.

El Bimbashi T. B. Vandeleur, Equatorial Battalion, has been transferred to the Camel Corps.

On the occasion of the retirement of H.E. El Lewa E. B. Wilkinson Pasha, from service in the Sudan, the Sirdar has issued the following farewell order:—

The Sirdar desires to express his appreciation of the excellent services rendered by El Lewa Wilkinson Pasha during the sixteen years he has served in the Army of his Highness the Khedive, during which period he has held the following important appointments with marked ability and success:—Officer Commanding, Camel Corps; Governor, Kassala Province; Director of Agriculture and Forests. On behalf of all ranks the Sirdar desires to wish him every success in his future career.

The following British officers have been taken on the strength of the Egyptian Army with the rank of Bimbashi and posted as follows:—Captain Guy Thwaites, Army Service Corps, to the Department of Supplies; Captain David H. Thorburn, the Cameronians, to the 3rd Battalion; Captain Thomas R. Colville, Duke of Cornwall's Light Infantry, to the 14th Sudanese; Captain Herbert F. C. Hobbs, West Yorkshire Regiment, to the 9th Sudanese; and Lieutenant Walter L. Clinton, the King's Royal Rifle Corps, to the 11th Sudanese.

DOMESTIC ANNOUNCEMENTS.

BIRTH.

WILLIAMSON.—On August 12, at Glenthorne, South Godstone, the wife of G. W. Williamson, Judge, Sudan Courts of Justice—a daughter.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

FRIDAY, AUGUST 14, 1914.

THE MEDITERRANEAN SITUATION.

The tangled skein of conflicting interests in the Mediterranean has been partially cut through by the outbreak of hostilities between Great Britain and Austria-Hungary. We know where we stand so far as the Austrian fleet is concerned. But there are other factors in the situation which are at present uncertain, yet by their future action they are capable of profoundly modifying the situation of the Western Allies in the Mediterranean. At the moment of writing it is believed that the Austrian fleet is at the head of the Adriatic, consequently it should be possible for the united strength of Great Britain and France to restrain it from becoming a menace to the transit trade further south, and for the time being the centre of interest may be permitted to shift from Pola or Trieste to other places. It is always easier to deal with a declared foe than to provide against this or that problematical contingency. The transfer of the "Goeben" and her consort from a belligerent to a neutral Power in time of war may afford ground for diplomatic protest in Constantinople, but the important fact remains that if a formidable engine of war has for the moment passed out of the line of battle arrayed against us it has been placed at the disposal of the Porte, and we must confess that those who control the policy of Stamboul have of late failed to impress the West with any sense of the reality of their protestations of pacific intentions. The ambitions and regrets of one section and another of the Committee can readily be appreciated, and among many will even secure a measure of sympathy, but we can only regard it as unfortunate that the means of gratifying those ambitions and avenging those regrets should come to hand at a moment when Europe no longer exists to exercise collective restraint upon the policy of Constantinople. It must be remembered, however, that as the European powder magazine has now exploded the action of the Foreign Office need no longer be modified and restrained almost to the point of inefficacy for fear of consequences upon the diplomatic equilibrium. We have returned with remarkable rapidity to primitive conceptions of diplomacy—we have ourselves declared war twice within ten days—and more meaning can now be introduced into a Note than was possible a month ago.

While the question of the Ægean thus becomes more uneasy, and imperatively demands great tact and firmness on the part of Great Britain to prevent it from becoming dangerous, the question of the Adriatic has been brought appreciably nearer to a solution. The Italian ship of State, however, still hangs in the wind. We are assured that unless some act of folly on the part of the Western Allies should affront Italian *amour propre* the Roman legions and squadrons will not be drawn up in battle array against us. It is, indeed, asserted that, in the present circumstances, any attempt on the part of Signor Salandra's Cabinet to embark upon war as a member of the Triple Alliance would have the most disastrous internal consequences, and that the existence of the dynasty itself might be imperilled. On the other hand, popular enthusiasm could readily be kindled for another war against Austria, even if it be not already aflame. It must be remembered, moreover, that the tradition of its history impels the House of Savoy towards action against the House of Hapsburg. The records of the past tell how Italy has been torn "leaf by leaf" by the Alpine dynasty from its secular Austrian antagonists. Much of this was accomplished before the spirit of Italian nationalism had grown to that vigorous strength which overturned the Temporal Power of the Pope and displaced alien dynasties in its enthusiasm for Italian unity. That national spirit now identifies itself with the historical traditions of its ruling House. The paper bonds of the Triple Alliance may for the moment keep the King of Italy in an unnatural amity with the Court of Austria, but the Italian public thinks of the Trentino and Trieste, and all the heritage of St. Mark which was once Italian and is now "under the heel of the foreigner." Moreover, in these days, when military memories and militarist ambitions exercise so great an influence on the course of history, it is interesting to remember that the Italian Army has the disasters of Custozza to reverse, and the Navy has the defeat of Lissa to avenge. In these circumstances it is hardly surprising to learn that the Consulta is believed to have decided to make the fate of Lovtchen Mountain above Cattaro a test question, and to be inclined to regard its permanent occupation by Austria as an adequate *casus belli*.

Apart from these two questions of the Ægean and the Adriatic we may, thanks to the activities of the Allied Fleets, regard the commercial situation in the Mediterranean as being on the high road to becoming normal. The interruption of communications and the delay of mails will shortly be a thing of the past, and the steps which are being taken to increase the numbers of the Army of Occupation make it obvious to all the world that Great Britain is not only determined but is also in a position to defend Egypt and the Suez Canal against any hostile aggression. That being the case, those of us who are not in the fighting line may very well prepare to "carry on." We live by trade, and if our naval strength be such that it can guarantee the safety of the high seas and the route to India we must take every advantage of the fact and redouble and redouble again our commercial activities in order to enable the national purse to stand the drain of war. We must take this opportunity to recover old markets and open new ones during the enforced mercantile incapacity of our great rivals in the commerce of the Near East and beyond. It is for our merchants to see to it that the volume of British shipping under the Red Ensign passing through the Suez Canal suffers no diminution, but rather increases mightily, for the war-year of 1914.

THE NEAR EAST.

THE NEAR EAST is on sale at all Bookstalls and Newsagents in the United Kingdom. Should any difficulty be experienced in obtaining the paper, readers will oblige by notifying the Manager. Abroad THE NEAR EAST may be obtained in:

PARIS. Librairie Hachette, 79, Boulevard Saint-Germain; Librairie Galignani, 224, Rue de Rivoli, and at Railway Bookstalls.

CONSTANTINOPLE. Economic Co-operative Society, Pera; Benjamin Rawe, British Oriental Bazaar; D. Marianopoulo, 280, Grande Rue de Pera; and The Nautical Bazaar, Galata.

THE CHARM OF PALESTINE.

(From a Correspondent.)

In The Near East for May 16, 1913, there was a review of the book, "The Land that is Desolate," by Sir F. Treves. To those—and they are many—who resented the title of this book it was a curious coincidence that in close proximity on the same page occurred the words, writ large, "A Misleading Title." For those, indeed, whose acquaintance with Palestine runs into more months, if not years, than the distinguished author spent days in the land, the title is an absurd misnomer, and one which the reviewers of this ably written but depressing book have done but little to rectify. But when the circumstances under which Sir Frederick Treves toured Palestine are taken into consideration the pessimism pervading his book is not surprising. If a tourist selects January—the coldest and wettest month—for a visit to the Holy Land, and happens to strike the coldest and wettest January for many seasons for a short, hurried, and very superficial visit to a few spots in the land; if he has the misfortune consequently to arrive when no spring verdure has yet risen from the water-logged earth; if even in the semi-tropical climate of Jericho he shivers with cold, and, when he would go from Damascus to Beyrout, he is unable to pursue that picturesque route because the railway is blocked with snow, then he may, indeed, form the private opinion that the land is dismal and wet and cold and unproductive. But such a visit does not authorise him to write on the normal conditions of Palestine.

If there is one outstanding feature of at any rate the mountain regions of Palestine it is its glorious climate, its long succession of days of clear air, fresh, invigorating breezes, and wonderful sunshine and skies. Miles of country through which the author passed sadly viewing the dank, sodden fields and dripping, leafless trees were a few weeks later, when the miracle of spring had transformed them, vast stretches of green corn, while each path was edged with flowers of every hue. Moreover, Sir F. Treves saw only a small portion of the country. He traversed the two railway lines; but the route of the one lies chiefly along the bottom of a long, winding mountain gorge; while the author's acquaintance of the other was mainly restricted to a dismal journey shut in a luggage van with a dying engine-driver.

Here and there through this book the drip of rain and cold winds are felt, and the present writer, who anticipated that probably these experiences would find themselves enshrined in a book, foresaw that the dismalness of it all would colour the whole outlook. Can anyone honestly call this land "desolate" who has, let us say, traversed in April mile after mile of rustling cornfields in Samaria or Esdraelon, or has ridden hour after hour through the great granary of the Hauran, where the cornfields reach the horizon on every side? In other parts of the land it is possible to pass village after village nestling amid orchards of olives, pomegranates, quince, and figs, and the vineyards cover vast stretches of the surrounding hillsides. The land may be "desolated," perhaps, by its rulers, but under any civilised government it might "blossom as the rose," and only a jaundiced eye could fail to observe its evident possibilities. But even to-day Palestine, viewed under any but the depressing conditions encountered by Sir Frederick Treves, possesses for the majority of cultured people a unique attraction.

In what does the charm of Palestine consist? Why is it so great in the eyes of some writers that the descriptions savour of exaggeration to the sober-minded, while to others—to quote, for example, two distinguished writers, Sir Frederick Treves and Mark Twain—the charm seems scarcely to exist? Surely it depends very much on the spirit in which the visit is made and on the point of view of the visitor. That there must be true beauty inherent in the scenery of Palestine is surely proved by the never-ending succession of those who visit the land to paint and sketch. Sir F. Treves, in some exceptional gleam of sunshine, speaks rapturously of the Dead Sea and the mountains of Moab; but during eight or more months annually he might see atmospheric and colour effects in mountain, lake, or sky as beautiful as this in very many other districts. Palestine, though so small, contains a variety and richness of scenery quite out of proportion to its size. This, however, is not the first claim that Palestine has to interest. It is necessary to be well versed in history to appreciate the land thoroughly. Only a mind stored with the facts of history, sacred and profane, supported by an imagination capable of conjuring up its past glories can find true enjoyment in the land. That Sir F. Treves has this capacity, and might under happier conditions have written a very different book, is evident from his remarks about Jericho. But Jericho is but one site among a thousand, all full of historical associations.

Naturally it is to the student of the Bible that Palestine will have the greatest appeal, and here the points of interest are so many and so various—the scenes of countless incidents, the daily enaction of customs familiar through the Bible from childhood's years, the whole daily life, and the main features of scenery, climate, and meteorology so teeming with suggestion—that one would have thought that to anyone familiar with the Bible as literature—quite apart from any religious convictions—the land must necessarily have a fascination.

For those to whom the events of the Gospels are of primary importance in Life and Thought, how much more real this is! So much remains unaltered outwardly in the daily life that it requires but little imagination to recreate scenes in a setting far nearer the actual than any picture can suggest. More recently archæology, by revealing evidences of the life and culture of the earliest times, some 4,000 or 5,000 years ago, has added a new fascination to the land. Some will see in recent excavations only the unearthing of featureless heaps of stones and broken pots, but to those with even a slight interest in archæology it is possible in imagination to stand on the mighty ramparts of a Gezer, or a Megiddo, or a Jericho of long ago, and to see the long succession of armies—Canaanite, Egyptian, Hebrew, Greek, and Roman—sweep by, to see the evidences of the dim beginnings of culture and belief, and to picture the daily round of life in ages long anterior to written contemporary record. Every student knows how much this has contributed to the intellectual appreciation of the Old Testament. But these are things not for the globe-trotter, but for those who will spend at least some months in the land.

Some come to the country almost entirely ignorant of Bible history, while even more tourists know nothing of its secular history. To those who know practically nothing of the Maccabees, of the greatness of provincial Rome in the second and third centuries, of the rise of Mohammedanism, and of the romance of the Crusades, at least half that Palestine would illustrate is entirely lost. What is more romantic than those great cities of the Decapolis, such as Amman, Jerash, Beisan, and Umm Keis, of which the ruined theatres, columnated streets, triumphant arches, and countless tombs still exist to-day after fifteen centuries amid tangled weed and rushing water? Where are ruins more appealing in their utter desertion—left stranded by the change of commercial routes—than the vast remains of Palmyra, the many-coloured rocks of Petra, the weird basaltic ruins of the Leja, or the giant walls and columns of Baalbek? Can any European, claiming descent in some degree, perhaps, from the Crusaders, view unmoved the still extensive remains of the five great castles that guarded Northern Palestine, or stand, perchance, at Athlit while the sea washes restlessly over the floor of the great banquet house where the sorrowing members of the Latin kingdom of Jerusalem gathered for one last feast before their final departure?

So much has been said of historic interests that it is only possible to touch on the modern features of Palestine. Sir F. Treves has passed through the land, but has failed to appreciate the modern romance of Zionism. Is it not a romance that thousands of men and women from Russia, Roumania, and other overcrowded Jewish centres, owing to the desire to found again a national centre in the land of their fathers, have, for the last twenty or thirty years, been struggling amid much

Digitized by Google

discouragement, disease, and even disaster? They, at least, with their enthusiasm and idealism, backed up by modern agricultural methods and hard manual labour, show that they do not admit that this, their land, is "desolate."

A sympathetic attitude towards all forms of beliefs is essential. To some Protestants—and it would seem that Sir F. Treves is among them—a vast amount of the religious life of Jerusalem and other centres is a closed book. One whose only contact with the Eastern Churches is a superficial view of certain services at the Church of the Holy Sepulchre, the witness, perchance, of a gorgeous procession of bishops, is in no position to write about them. A sympathy with varied forms of seeking God, a certain historic feeling towards the great branches of the Catholic Church, an appreciation of all the heroism and devotion which has kept the individuals faithful to their beliefs amidst worldly temptations, bitter persecutions, and not infrequently bloody massacres, are necessary in one's attitude towards the great Eastern Churches in Moslem lands, whether Greek, Armenian, or Syrian. The Western mind is on these questions so far removed from the Oriental that only years of residence can make the average Englishman recognise the gold amid the dross, and wish rather to see the former purified than to see all swept away, to be replaced by something alien to the people. How many, for example, can see nothing at the centre of Christendom but what they consider "idolatry," or at best formalism, forgetting altogether the religious devotion, the tears and blood of the long centuries of Christendom, and ignoring what such a spot as the traditional site of Christ's empty sepulchre means to literally millions of Christians to-day.

RED CROSS ACTIVITIES.

The organising of the Red Cross activities—hospital accommodation, care of sick and wounded, provision of clothing, and the like—is proceeding with energy. Offers of hospital accommodation and other assistance continue to be made to the authorities, both by individuals and by the committees of existing hospitals in different parts of the country. Movements are on foot for organising several base and field hospitals, and it is satisfactory to learn from *The Times* that these projects have called forth generous subscriptions. The British Red Cross Society announces that the offers of hospital accommodation from private sources are already vastly in excess of any probable needs, and that those who are anxious to assist the sick and wounded can best do so by giving money, which should be sent to the Secretary, British Red Cross Society, Devonshire House, Piccadilly.

The Queen has become President of a Committee of Ladies of Justice, Ladies of Grace, and Honorary Associates of the Order of the Hospital of St. John of Jerusalem in England to provide hospital, medical, and other comforts for the sick and wounded. Full particulars can be obtained from St. John's Gate, Clerkenwell.

The Queen has appointed Adeline Duchess of Bedford to be chairman of the Ladies' Committee of the Order of St. John of Jerusalem.

Sir Robert Lucas-Tooth has given £10,000 to Lady Dudley towards forming the fund for the Australian voluntary hospital for war service, organised by her and accepted by the War Office. Sir Robert Lucas-Tooth has also promised to act as chairman of the committee. Australians who are interested in this patriotic undertaking should forward their donations to Sir Robert Lucas-Tooth, care of the Bank of New South Wales, 29, Threadneedle Street, E.C., and the envelopes should be marked "Australian Voluntary Hospital Fund."

A Base Hospital at Seat of War.

The Duchess of Westminster is arranging and organising a base hospital to go to the seat of war with all possible speed. She has obtained the consent of the British Red Cross Society and the approval of the Director-General of the Army Medical Service, also the generous services of Mr. Gordon Watson, other medical men, and trained nurses. She is giving £1,000 and guaranteeing £400 a month so long as the hospital is required, and she now appeals for further aid. All offerings of money and help should be sent to the secretary, the Duchess of Westminster's War Hospital Fund, Drummond's Bank, Charing Cross.

Lady Sarah Wilson has issued an appeal for funds to organise and equip a base hospital for English, French, and Belgian soldiers, to be established at a convenient spot on the Continent, the locality of which would be determined by the progress of hostilities.

Lady Sarah Wilson writes:—"We know full well that the Government arrangements for the sick and wounded will be in every way as efficient as the Expeditionary Force itself; but in a struggle of this kind, when all available hospital space will be taxed to its utmost limits, it would be an inestimable boon to the Army Base Hospitals to have some cases—perhaps the most severe ones—taken off their hands. During the Boer War over 20,000 patients were treated in a supplementary hospital. I propose to form a small committee and to run the hospital under the auspices of the Red Cross Society. I further hope to engage the best available surgeons and nurses. If the public will entrust me with their money I will guarantee that—as far as energy and hard work will go—the soldiers will get full benefit for every penny subscribed."

Subscriptions and any gifts in kind should be sent to Lady Sarah Wilson, 16, Grosvenor Street, W., which the Hon. Mrs. George Keppel has offered as an office for the proposed fund.

Lord Harrington has offered through Lady Perks to place Harrington House, Kensington Palace Gardens, W., at the disposal of the Committee of the City of London branch of the British Red Cross Society; and Mrs. Benyon, wife of the Lord Lieutenant of Berkshire, is forming a central depôt for the county at the Town Hall, Reading. The depôt is under the management of Mr. W. C. Blandy, 1, Friar Street, Reading. Sir Robert and Lady Harvey, of Langley Park, Slough, having offered their house to the St. John Ambulance as a hospital or convalescent home for officers, Lady Harvey will be grateful for any sort of contributions. Colonel Burn, M.P., Sir Francis Layland-Barrett, and Mrs. Dundee Hooper have offered their houses at Torquay.

The Committee of the Providence Free Hospital, St. Helens, Lancashire, have placed at the disposal of the authorities all their available accommodation for the treatment of sick and wounded soldiers and sailors, and Harestone Hall, Caterham, will be immediately offered for the purposes of a temporary hospital for officers. Twenty-five beds have been offered by the Committee of Management of the Italian Hospital, Queen Square, W.C.

British Red Cross Headquarters.

Queen Alexandra, who was accompanied by Queen Amelia of Portugal, on Monday paid a visit to Devonshire House, where the British Red Cross Society has its headquarters. Queen Amelia has offered her service in the nursing department.

The Empress Eugenie has sent £200 to the funds of the British Red Cross Society. The total amount of the special subscriptions received since Saturday exceeds £8,000.

The society has received an immense number of offers of assistance. There are upwards of 1,900 voluntary aid detachments, with a total personnel of some 60,000.

Many ladies have come forward anxious to serve as nurses, but, it is pointed out, only trained nurses can attend troops in the field. There is, however, much good work which can be done by women who have not these qualifications. Foremost is the provision of clothing, hospital requisites, medical comforts, and foods.

Provision of Clothing, etc.

The Queen has given a splendid lead in the work of co-operation with existing societies which understand the needs of the sick and wounded in the matter of clothing. A few days ago she sent a Lady-in-Waiting to the Polytechnic, Regent Street, where Mrs. James Cantlie (who founded the Women's Voluntary Aid Section of the British Red Cross Society during the Balkan War) is in charge, for a number of the approved patterns of the British Red Cross Society. Patterns of pyjamas, shirts, bed-jackets, and nightingales were immediately sent to Buckingham Palace.

Since then, at Devonshire House, complete sets of paper patterns, with directions, have been prepared, and can be had on application for 1s. 3d. Women who are forming sewing parties would be well advised to follow Queen Mary's example and apply to the Red Cross Society for their patterns.

Ladies who do not belong to any society are advised to find out what is being done in their district, and join or form a local class for sewing work at once. The Primrose League for the time being is non-political, and the local branches, who will provide themselves with a supply of Red Cross patterns, can be joined by any woman who is anxious to help. When a number of articles have been made, they should be carefully listed, the list should be attached firmly outside, with a duplicate placed inside, and the parcel sent to the Secretary, British Red Cross Society, Devonshire House. Pyjamas are most wanted, and next to them dressing-gowns.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The disappearance of the "Goeben" from the German Navy List, for the moment at any rate, removes a formidable disturber of traffic from the Levant, nor do I—in my robust faith in the British Navy—anticipate much trouble from the Austrians at sea. This seems to mean that what is left of Europe now has an opportunity for dividing up the carrying trade and the commerce of our enemies. If the Porte will kindly remain at peace we ought to see a most notable increase in British shipping and British imports in the Near East. "It is an ill wind that blows nobody any good," so let us try to benefit as far as possible from the enforced absence from the Levant of our chief competitors, who are engaged in trying to make good their "place in the sun," while we make their hay for our benefit.

***

A correspondent invites me to call the attention of my readers to the splendid openings for British enterprise that are bound to occur in the near future owing to the elimination of German competition. My correspondent is afraid that our business men will be "*too* anxious to do what they can for the nation in other ways," so that they "may neglect opportunities and openings of the kind I refer to." There is—to the credit of our business men—some reason for the fear; but I fancy that as soon as we have got the war machine running as smoothly as such a machine can run, our business men will be ready enough to take advantage of any opening that may be made by force of circumstances. In point of fact, I have very good reason to believe that one or two of our biggest firms are already preparing to annex some of the fields in the Near East that have been exploited by the Teuton of late. In so doing the firms in question are not in any way "counting their chickens before they are hatched"; they are merely preparing to fill a void which would otherwise have to be filled by one of our foreign rivals.

***

The Washington correspondent of *The Morning Post* says that the sympathies of the South are with England to-day, as the sympathies of England were with the South in 1861. As he further explains, a vital interest of the South is at stake; for the South depends for its prosperity on the cotton crop, and if it cannot be realised the people of the South will be "in almost as desperate a condition as they were during their own war half a century ago." If they are deprived of the English market many of them will be ruined, so the sooner the sea is cleared of German cruisers and it is safe to ship cotton to Europe the better, say they.

The question of the Haifa Vice-Consulate, upon which I touched briefly last week, is evidently of strong interest to a good many people. And the more I hear of it the more it seems to me that here is a very genuine case for inquiry, investigation, and — apparently — some radical change. Particulars of four or five specific cases of what I can only characterize as extraordinary dilatoriness on the part of our representative have been put before me, and I can testify that there certainly is a very strong feeling that things have been allowed to drift far too long. At the present time we must not—and, of course, we do not—expect the Foreign Office to take any action at all in the matter. But as soon as the war is over I hope something will be done. It is quite certain that Haifa is destined to become a highly important centre of trade, and it behoves us to be worthily represented there, even though at first the Consulate may not "pay" directly.

***

The question put by Sir Clifford Cory in the House of Commons last week as to the Suez Canal Company delegating to its London office authority to receive payment of Canal dues seemed a very natural one, and the information published subsequently by the Canal Company's London representative to the effect that since 1884 it has been possible to pay transit dues through Messrs. Rothschild and Sons undoubtedly came as a big surprise to most people. For my part I am not in the least ashamed to admit that I had never heard anything of the arrangement, for I am informed that at a meeting held in the City last Friday of representatives of the principal French and British consigning firms not a single person knew anything of the existing facility, and none of the shipowners with whom I have talked on the subject was any better off.

***

The Egyptian Government accounts for the period April 1 to May 31, 1914, recently published in the *Journal Officiel*, are fairly satisfactory, showing an increase in revenue and a decrease in expenditure when compared with figures for the corresponding period of last year. The figures are as follows:—Revenue, £E2,560,420, against £E2,481,300 last year; expenditure, £E3,965,038, against £E4,005,196 last year. These two months are the slackest of the year financially, so that the position is as sound as can be expected. Whereas receipts under some heads have fallen off (e.g., the land, date, and urban taxes, in which the drop is marked, the figures being £E394,504 for the two months of this year, against £E525,688 for the corresponding period of last year), under others there has been a more than counterbalancing increase.

***

In a letter received a few days ago an Athens correspondent informed me that the Greek Government had formally approved of the conditions of tendering for the work of supplying Athens and the Piræus with water, and that the publication of invitations to tender might be expected in a very short time. The letter was undated, but I gather from internal evidence that it was written about July 28-31. The outbreak of war will, of course, almost inevitably upset these arrangements, or at least lead to a postponement of the date for delivering tenders—which, my correspondent informed me, was fixed for March 30 next. At the same time, I hope that British firms will not forget that the work must and will be undertaken in the near future. The scheme, I understand, is to bring water from Lake Stymphalia or the River Melas, and the contract will include the provision and laying of a complete system of supply pipes.

***

I notice that the feasibility of introducing sericulture on a large commercial scale into Egypt is being discussed in the Egyptian Press. There seems to be no doubt that the climatic and other conditions are favourable. Mr. W. H. Cadman has undertaken experiments during several years past to discover which species are most adaptable to the climate, food supply, etc., of the country. These experiments prove, I understand, that there is no fundamental obstacle to establishing the industry. Its prospects of eventual success, however, depend on the adoption of well-considered measures to establish it on a sound basis. There is first the problem of food supply. Mulberry trees are plentiful in Egypt, but for the purposes of silk farms it is necessary to have plantations of small shrub-like trees carefully pruned so as to produce the highest average of leaves which can be picked in the shortest time and with the least labour. Such plantations would, it is stated, have to be cultivated for three years before they would produce a suitable crop. Secondly, there is the problem of preventing disease and the introduction of unsuitable or unhealthy species. It would be advisable that strict regulations, along with penalties for infringement, should be instituted, otherwise a policy of *laissez faire* would involve needless initial difficulties, and probably injure the infant industry so gravely as to discourage those who had entered upon it from persevering in their enterprise.

***

I learn from *The Queensland Agricultural Journal* that the Government of the Australian State is setting apart certain areas in the central and southern districts for the experimental growing of Egyptian cotton. This is said to be the outcome of a visit paid by a Mr. E. E. Wood, a planter from the Southern States of America, who, having seen Queensland, described it as "the finest cotton growing country on God's earth." Of course, this is but an American "boost"—a kind of recognition of colonial hospitality—but it is known that for months past the Agricultural Department of Queensland have been negotiating for the purchase of the best specimens of Egyptian cotton seed for trials in their experimental stations. In this they are receiving the help and advice of the English Cotton Growers' Association. Special attention has been devoted to specimens of an extraordinarily fine Egyptian cotton produced, after many years' experimenting, on the estate of Mr. Pangalo, at Mit Ghamr, in the Dakahlia Province. This is said to be brownish in tint and very silky in texture. Its staple is said to be the strongest of all varieties of Egyptian growth, and the return from the plant is claimed to be the highest. Mr. Pangalo is naturally anxious to retain control over the cultivation of his new plant and to prevent the seed getting into the hands of outsiders without certain stipulations, but specimens are now being grown at the experimental stations of the Queensland Agricultural Department with results that have yet to be known.

Near East Markets.

TURKISH TRADE AND THE WAR.

(From a Syrian Correspondent in London.)

The Turkish Government has taken the precautionary measure of prohibiting the export of cereals from the Empire, but I understand that dates may be exported. Otherwise the crops of the country are plentiful, except on the borders of Egypt, where they are deficient.

Malting Barley.

On account of this prohibition we shall be deprived of the useful Smyrna and Hama qualities of malting barley for the time being. Fortunately, the malting season has not begun yet, and by September the prohibition may be rescinded.

Exchange in Turkey.

For the present, there are no transactions, as all exports and imports are suspended with Europe, and the Government has declared a general moratorium in the country. Consequently, there can be no demand or sale for bills on Europe. Locally, however, the value of the pound sterling must have gone up considerably.

German Banks in Turkey.

As here, the German banks in Turkey have closed their doors, being unable, in consequence of the war, to get any money from Germany or elsewhere to carry on their usual business. I understand, however, that by concerted action with their European branches in foreign countries they collected all the gold they could get, and shipped it to Berlin, leaving their trustful clients abroad with unpaid cheques and bills to a considerable amount. I cannot hold out much hope for their creditors.

German Ships.

Some German ships are reported to be detained in German ports, with cargo on board paid for in Germany for account of Ottoman subjects. I would advise any whose property is thus held up to send at once particulars of such goods to the German Ambassador in Constantinople, and hold his Government responsible for their safe delivery within a reasonable time, or, in default, invoice them back to him, with interest added until payment, on notarial paper.

Baghdad Railway.

The Baghdad Railway concession must now be considered lost to Germany, and must revert to the Ottoman Government. Germany will probably not have the means or credit to carry it through.

Probable Duration of the War.

If Germany sues for peace it may end within a short period, as not one of the Allies desires to prolong the shedding of blood or the punishment of innocent German "gobes-mouche" for the folly of their leaders. Should, on the other hand, a temporary success harden the hearts of the German war party, the hammering will have to continue until the war spirit oozes out on the anvil, and the world is rid of this remnant of barbarism in Europe.

EFFECTS OF THE BALKAN WARS.

H.B.M. Consul-General at Budapest, Mr. W. G. Max Müller, in his report for 1913 on the trade and commerce of Hungary, states:—

The year 1913 was, from the economic point of view, one of the worst which Hungary has experienced for the past thirty years. Everything suffered from the Balkan wars—finance, commerce, and industry. The steady rise in the rate of interest charged by the banks, the consequent diminution of confidence in business circles, and the cessation of the supply of money from abroad came near to causing a disastrous financial crisis.

Austria-Hungary was obliged by the events in the Balkans to resort to measures of defence which countries farther removed from the scene of the conflagration were able to dispense with. The mobilisation entailed not only an expenditure of many millions, but also the withdrawal from productive work of many thousands of able-bodied men. The closest commercial connection usually exists between Hungary and the Balkan States, and the war naturally had a very adverse effect on trade in this direction.

PRODUCE REPORT.

(From Our Own Correspondent.)

London, August 13.

Sugar.

The market is quiet, with not much doing. Closing prices for Foreign cubes on the spot are 35s. to 36s. per cwt.; granulated, 30s. to 31s.; crushed and chips, 32s. English: Tate's No. 2 cubes sold at 35s., and crushed at 32s.

Coffee.

There is no alteration to report, and there is still no reason to expect any serious effect in this market.

Currants.

The market is easier, Pyrgos being offered at 26s.; Zante, 28s. to 29s.; Gulf and Panarity, 23s. to 31s.; Vostizza, 32s. to 34s., and smalls, 28s. to 32s.

Sultanas.

There is no demand. Common to fine fruit is offered from 29s. to 52s.

Seeds.

Oilseeds remain nominal; linseed, London-Calcutta, spot, quoted 52s. Mustard seed is well held, but the demand is not active. Haricot beans have been in request at enhanced value, in view of probable scarcity. In canary seed there is not much actual business passing, but with restricted supplies and uncertainty as to shipments, all descriptions are dearer.

Oils.

The market is generally quiet, with little business passing. Linseed oil: Spot pipes, landed, sold 26s., and barrels ditto 26s. 6d.

Oilcakes, etc.

Owing to present state of affairs prices have advanced, but not to any appreciable extent; at the same time, quotations are irregular, and more or less nominal. Linseed cakes, best London made, have been sold at varying prices from £9 5s. to £9 15s. East India seed pures do not offer at the moment. Russians are in small supply, and are quoted at about £9 per ton. Cotton cakes: Egyptians, in store, meet a steady sale, and present value is £5 10s. to £5 12s. 6d., while for early shipment £5 10s. ex ship has been accepted, with English makes offering at £5 12s. 6d. to £5 15s., and Bombay at £5. Decorticated cotton cake is sparingly offered at about £8 10s. per ton ex quay. Locust beans are advanced, and there are sellers of ready parcels of whole at £6 15s. and kibbled at £7 5s.

Corn.

Wheat: The market generally is quieter, and operators are gradually settling down to a trading level. Sellers, however, offer very sparingly. Choice white Kurrachee, on passage, is quoted 45s. Parcels are quiet and against sellers. Maize is firm, but little offering; 30s. to 31s. 3d. required for La Plata afloat, and 28s. Sept.-Oct. Barley not offered. Oats are neglected.

SITUATION IN SALONIKA.

Die Nachrichten für Handel, of Berlin, has published a German Consular report stating that the tension in Macedonia and Asia Minor between Greece and Turkey has rendered the situation in Salonika more acute, resulting in an almost complete stagnation of trade. The report adds that several firms have wound up their affairs, as they were unable to continue business and feared they would be declared bankrupt as soon as judicial bankruptcy proceedings were allowed.

According to *The Board of Trade Journal*, the Acting British Consul-General at Odessa (Mr. J. Lowdon), in his forthcoming report on the trade of that district in 1913, states that the Russian Steam Navigation and Trading Company has put the six large passenger steamers, which were built abroad, on the Odessa-Alexandria service. Next autumn four more vessels will be ready for the Odessa-Caucasus service. The company intends ordering new steamers to replace those on the Odessa-Caucasus line.

SUDAN PRODUCTS.

For some time past the analytical experts at the Imperial Institute, South Kensington, have been devoting special attention to products from the Sudan with results which when they obtain the publicity they merit are certain to lead to remakable developments of the resources of that country and remunerative investment by British capitalists. Samples of every conceivable marketable commodity have been sent to the Institute experts, and their merits and commercial value have been compared with similar products from all parts of the world. Where scientific investigation warrants, the producers are receiving all encouragement and advice from the Institute. To mention only one article for which there is at present an increasing demand, and for the cultivation of which the Sudan is specially suitable, we find that the analytical and commercial advisers at the Institute report most favourably upon samples of linseed which have been submitted to them. These, they report, are of such exceptional quality as will command a very good price in the open market. The commercial experts, whose opinion, of course, must be regarded as unbiassed in so far as they are partial to the products of no particular country, say that the Sudan linseed would be worth 47s. 6d. per quarter in small quantities, and would sell freely at 44s. per quarter if marketed in large consignments. It will be well if those whose commercial interests are closely allied with the prosperity of the Sudan keep closely in touch with the scientific experts at the Institute, and avail themselves of their services in the analysis of products for which an outlet is sought in this and other countries.

PALESTINE ORANGES AND CROPS.

The following report has been received from Jaffa by the *Zionist Gazette*:—

This year's exportation of oranges is finished, and we think it interesting to give below a detailed statement about the exportation of oranges from this port:—

Exportation of Oranges from Jaffa, 1913-14.

Destination.	Nos. of cases.
Liverpool	587,481
Manchester	400
London	4,626
Other parts of England	3,361
Marseilles	3,412
Hamburg	9,487
Trieste	58,492
Odessa	148,409
Egypt and Red Sea	149,846
Turkey	268,942
Roumania, Bulgaria, etc.	19,405
Total	1,553,861

The prospects for the next season are quite promising, indeed, as the flowering season took its normal course. The grain-crop is now at its height, and generally speaking the results can be looked upon as favourable, particularly in the wheat-harvest.

From Gaza a good or average-crop was expected, but the harvest is far below expectations. The same has been reported from the German Colony "Wilhelma," near Jaffa, where the field-mice do considerable harm.

The prospects for the summer-seeding are said to be favourable; only the water-melons, a remarkable exportation article, suffered seriously from heavy rainfalls in the month of April.

SODA PRODUCTS IN TURKEY.

Of late there has been a steady increase in the manufacture of soda products in the Ottoman Empire, with the result that home chemical manufacturers have instructed their agents to concentrate greater attention on the needs of that developing industry. The imports of caustic soda of 70° to 72° and of carbonate of soda at Aleppo amount annually to 2,500 to 4,000 barrels of 100 kilogs of the former and 1,500 sacks of 100 kilogs of the latter. These products are used in the Turkish soap factories, of which there is an increasing number, and in conjunction with similar products of local manufacture. The consumption of bicarbonate of soda amounts to about 200 sacks a year.

It is reported that there is a ready sale for naphthaline at Varna (Bulgaria), where the trade of furriery is fairly developed. The sale price of naphthaline is about 26.50 frs. per 100 kilog. c.i.f. Varna with 2 per cent. discount for payment in cash.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, August 12.

The market has been open during the past week, but, so far as fresh business is concerned, practically nothing has been done. Trade is thoroughly disorganised as a result of the European war, and in numerous directions production of yarn and cloth is being more and more curtailed. The Liverpool Futures market has been closed, but business on the spot has been partially resumed. The outlook at the moment is gloomy, and until arrangements can be made for the resumption of the shipments of cloth there is little hope of relief. We hear that endeavours are being made to make up a cargo for a boat to Egypt during the next day or two, but certain houses have been informed by their representatives on the other side that they fear they will not be able to send remittances for some little time. With regard to India, shipments are suspended, but hopes are expressed of some boats going through during the next week or two. In the meantime manufacturers do not know which way to turn; they can neither sell nor deliver, and undoubtedly the trade has never passed through such a crisis as is now going on. Financial matters are attracting considerable attention, and there is a fear of difficulties sooner or later. In the meantime, all traders are determined to make the best of the situation, and there is much forbearance with each other. Practically no business has been done in yarn, and quotations in both American and Egyptian qualities are quite nominal. By the end of this week a great number of mills will be entirely closed.

SPINNERS OF EGYPTIAN COTTON.

At a meeting last Friday of members of the General Committee of the Employers' Federation, who are representative of the Egyptian section of the spinning trade, the following resolution was unanimously adopted:—

"That all spinners of Egyptian cotton are recommended to run short time during the present crisis, and the appeal made by the Emergency Committee that in doing so all that is possible should be done to alleviate the hardships of the operatives is endorsed."

This notice has been sent out to the members.

RAW SILK PRODUCTION.

According to "provisional" statistics of the production of raw silk throughout the world, issued by the Union of Raw Silk Merchants of Lyons, the total production of the Near East in 1913 was under that of the previous year. The following figures give the production in lbs., the figures in parentheses being the "provisional" production (in lbs.) for 1912:—

Syria and Cyprus, 1,080,000 (881,849); Anatolia, 904,000 (936,965); other Turkish provinces in Asia, 287,000 (264,555); Adrianople, 187,000 (for European Turkey, 573,202); Bulgaria, Servia, and Roumania, 276,000 (319,670); Greece, Salonika, and Crete, 463,000 (110,231, excluding Salonika); Caucasus, 849,000 (870,826); Turkestan and Central Asia (exports), 496,000 (617,294); Persia (exports), 463,000 (496,040). The total for 1913 is thus 5,005,000 lbs., as compared with 5,070,632 lbs. in 1912. The grand total is estimated at 59,636,000 lbs., as against 56,951,600 lbs. "provisionally" estimated last year. The corrected grand total for last year is given as 59,448,000 lbs., the greatest ever recorded.

ALBERT SINGER
KHARTOUM SUDAN

EXPORT OF GUM ARABIC AND SUDAN PRODUCE.

Agency for firms desirous of introducing their brands of goods into the Sudan.

Established 1900.

WOOLLEN CLOTHS IN TURKEY.

The Chamber of Commerce Journal translates from the report of the Belgian Consul-General at Smyrna some interesting remarks regarding the trade in woollen cloths in Asiatic Turkey.

The report states that the imports of cloth into Smyrna tend to increase, and average in value £200,000 to £240,000 a year. The imports in 1912 were 589,778 kilos. Cloths of ordinary quality, including woollen and cotton mixtures, are mostly imported to Smyrna. England formerly had the first place, but now follows Austria; she sends ordinary beaver cloths, stuffs for great-coats and cloths for outfitters. These articles cost from 1s. to 5s. a yard. The fine qualities for tailors are supplied from Scotland at prices from 7s. to 10s. a yard. France sends fine tissues, figured, fancy and plain, pure wool cheviots and wool and cotton mixtures, costing from 2s. 9d. to 8s. a metre. Austria and Germany have considerably developed their trade in cloths in recent years at the expense of England, France and Belgium; their success is due to their imitation of the cloths of the last-named countries, to the regular visits of travellers, and to the facilities for payment which are accorded to customers; these countries supply a large quantity of fancy cloths of all kinds. Austria also supplies plain-coloured cloths, called "levantines" or "Orient," the demand for which is considerable in the interior. Germany's speciality is very cheap articles from 2s. to 4s. 9d., and Austria sells cloths at medium prices from 3s. 2d. to 6s. 4d. Belgium sends fine fancy cloths which have a good reputation for durability. Military cloths come chiefly from England and Austria and are sold at 1s. to 3s. a yard. A company recently formed produces cloths of ordinary quality destined for the Ottoman army.

At Aleppo, the report states, Oriental cloths, plain or coloured, with stiff dressing, come from Austria and Germany to the value of about £28,000 a year. There is an increasing trade in new cloths, the value of which is £18,000 a year, the imports being from Belgium, France, Austria and Germany. England sends Union cloths, castor and melton; Belgium supplies merinos and cashmeres, dyed black and dark blue, in widths of 100 to 105 cm., used for making clothes for Mussulman women, to the value of £1,600 a year. Woollen flannels come principally from France, Germany, Austria and Belgium to the value of £2,400. Square shawls of German origin are imported to the value of £4,000. The shawls are of wool or cotton, in sizes from 80 by 80 to 170 by 190 cm. Prices, 1s. to 6s. 4d. each.

Blankets to the value of about £630 a year are imported into Tripoli from France, Austria and Germany. The ordinary article destined for emigrants is required in sizes 185/135 by 170/120 cm., at prices from 10d. to 1s. 1½d. Cloths to the value of £7,200, mainly from England, Belgium, Austria and France, are imported. Fancy descriptions are required in small pieces of 2 m. 75. Half pieces and whole pieces are only required in the plain goods.

In Trebizond the imports of drapery and novelties amount in value to £9,200, mainly from Belgium, but also through agents at Constantinople, who send their representatives periodically to this place. England, Austria and Germany also participate in the trade. In plain articles, pure wool black cheviots of every-day quality are used. Roubaix firms supply an article which is well appreciated. The attention of manufacturers is drawn to the need for a fine appearance in the cloth, the price of which should not exceed that of competing goods. The tissue should also be well milled. The imports into Samsoun amount to 141,000 kilos., value £33,600, from Austria, Bulgaria, France, Germany, and a small quantity from Belgium. The articles imported are chiefly chayaks or Bulgarian cheviots.

The imports of caustic soda of 70 to 72 degs. and of carbonate of soda at Aleppo, Turkey-in-Asia, amount annually to 2,500 to 4,000 barrels of 100 kilos. of caustic soda, and 1,500 sacks of 100 kilos. of carbonate of soda. These goods are used in the local soap factories in conjunction with similar products of local manufacture. The consumption of bicarbonate of soda amounts to about 200 sacks a year.

CRETAN TRADE.

The Board of Trade Journal publishes some interesting extracts from a forthcoming British Consular report on the trade of Crete for 1912 and 1913. It is suggested that the observance of the following points is likely to have a beneficial effect on British trade with that island—(1) The appointment of good local agents, who should be well provided with the necessary samples to show to their clients. (2) Cretan merchants prefer quotations c.i.f. Cretan ports to quotations f.o.b. British ports. (3) The metric system is the best understood in Crete. Tons and cwts. are generally understood, but metric system quotations are infinitely more satisfactory. It is also easier to calculate in francs and centimes than in £ s. d. (4) Shipments should be "via Piræus." Other routes are longer and more costly, besides being unsatisfactory owing to the necessity for two or more trans-shipments. (5) It is well-nigh impossible to expect to do business on a cash basis in the Levant. The usual terms are from three to six months, or cash against documents at a bank in Crete with 5 to 6 per cent. discount. (6) United Kingdom merchants would do well to understand that the appointment of agents and the sending of samples is not sufficient for the purpose of developing their trade. They, therefore, might do well to imitate their foreign rivals by letting their travellers include, at least, a flying visit to Crete in their yearly itineraries to the Near East. The local agent often needs stimulating, if good use is to be made of him, and the traveller could see to this. The latter could also study local requirements on the spot and take home the necessary notes, besides getting a first-hand knowledge of the commercial standing of his customers. (7) The language of the country is modern Greek, but French and Italian are in use for foreign business correspondence. It is very rare to find any English understood. (8) United Kingdom firms should take more notice of the Government and municipal contracts. Many Government and municipal contracts have been put up lately in Canea and Candia, such as construction and equipment of ports, tramways, electric lighting installations, waterworks, cold storage depot, and the supply of road rollers, motor watercarts, motor stone breakers, etc. It is difficult to suppose that United Kingdom manufacturers are unwilling to look at these contracts, while Continental firms are only too happy to tender.

The view is expressed that it seems as if Crete is at last entering on a period of tranquillity, and tranquillity means prosperity, which in turn means economic development. If this is so, then the day is not far off when ports, roads, railways, tramways, and all the other necessities of economic expansion will be set on foot, and in all this the United Kingdom is surely well able to take her part.

TRADING IN EGYPT.

In his report on the trade and commerce of Alexandria for the year 1913, the British Vice-Consul (Mr. Arthur B. Geary) states:—"A correspondent with a long experience of business in this country maintains that the United Kingdom would considerably increase the volume of trade between the two countries if the home manufacturer were more accommodating among other things in the matter of credit. The methods of our German, Austro-Hungarian, and Italian rivals might be studied with advantage, and in many cases initiated. Manufacturers in those countries are willing to accept bills payable at four, six, or eight months from date of delivery when once they are satisfied as to the standing of the purchaser.

"As to representatives in Egypt, the Consul writes, there seems to be a growing tendency to appoint salaried representatives of British firms in Egypt, as soon as the growth of business renders this advisable, instead of relying entirely on local agents. There can be little doubt that an employee, whose career is bound up with the success of his firm, while his profits in most cases increase automatically with the increase of business that passes through his hands, is more likely to advance the interests of his firm than an agent who has many irons in the fire. Where the business does not justify the appointment of a salaried representative it might be possible for more than one non-competitive firm to appoint a joint representative."

Engineering Notes.

War in the Air.

There are people who live in constant dread of a sudden apparition of a procession of Zeppelins and attendant aircraft. We had an instance of this a few days ago, when a foreign prisoner barricaded himself in his cell to escape the German bombs. Fortunately for the security of the realm the vast majority of British people are too eminently practical and logical to pay more than passing attention to this prominent arm of the German War Lord. And there is no reason why they should do otherwise; for, as we pointed out in these notes last week, aircraft manœuvres have hitherto given very inconclusive results. And we must remember that both airships and aeroplanes will be compelled when taking the offensive to remain at a very high altitude for fear of being disabled by hostile gun fire. One of the most satisfactory weapons for use against aircraft is an automatic machine gun weighing twenty-five pounds, which requires no special mounting. There is no recoil, and it can be fired at a rate of from 350 to 750 shots per minute. The calibre is .30, and the cartridges are provided from a drum-shaped magazine capable of containing fifty shots, which can be emptied in four seconds, and refilled in half that time. The barrel is surrounded by a cylindrical aluminium jacket with some twenty grooves, which is enclosed in a light steel tube 3¾ inches in diameter, a portion of the tube projecting beyond the muzzle at a reduced diameter of 2⅞ inches. The enclosed grooves, forming continuous air-ducts, have free communication with the air, and each time a shot is fired a draught of cool air is sucked in through these ducts. The cooling process is thus automatic, and the use of water or any other liquid is obviated.

In connection with this subject it is interesting to note the opinion of a German with regard to the potentialities and limitations of the Zeppelins. Mr. Charles Schaeffer, lately auditor for the Zeppelin Airship Company, Baden-Baden, according to a telegram from New York, said to a London newspaper representative there that Germany largely depends upon her fifteen Zeppelin dirigibles for success in the battle against France and Russia, but he believes that their usefulness will be destroyed by what he calls "fanatical" French aviators who will risk their lives to disable them. "They are an excited, warm-blooded class," Mr. Schaeffer added, "and the sacrifice of human life in the air would be nothing if it resulted in the destruction of one of Germany's great air cruisers. The body of the ship is composed of eighteen ballonets. Eight of them can be pierced by shells and the craft will remain afloat. Aeroplanes, of course, can ram them, and cause a collapse of the steel and aluminium framework." To what extent flying machines can be used in war we shall soon see; at present they seem to be useful only for strategical reconnaissance.

A Fire-fighting Machine.

A fire-fighting machine of an entirely new type that has recently been put into the service of the London Fire Brigade, will interest many municipal authorities in the Near East who are anxious to introduce modern methods and modern equipments in their brigades. The machine is a handsome motor van, fitted with an engine of the War Office subsidy type, and a gear-box giving four speeds and reverse. It is designed to attain a maximum speed on the level of twenty-five miles per hour. The principal use of this emergency tender is to assist in fire fighting in enclosed spaces, as, for example, in basements and cellars, and also to provide greater safety for firemen when they work in a vitiated atmosphere. It is equipped with powerful searchlights and cluster lamps to illuminate the scene of a fire at night. The power for these lamps is obtained from a dynamo driven by the car engine, and giving a current of 100 ampères at 100 volts. Two searchlights are carried, each being of 3,000 candle-power. An electrically operated fan, capable of pumping 400 cubic feet of air per minute, is direct coupled to a motor. The object of this fan is to pump clear air into smoky basements, sewers, etc., with a view to enabling the firemen to see what they are doing. On each side of the van are compartments containing two sets (four in all) of self-contained breathing apparatus of the Proto type. These enable four of the crew of the vehicle to live in an atmosphere of poisonous gases for one hour. The Proto equipment includes a leather helmet, goggles, and a breathing apparatus providing a supply of oxygen and caustic soda to absorb the carbonic acid which results from respiration. There are many other equipments of the vehicle too numerous to be described here. The machine is, in fact, completely equipped with the most modern devices to render it entirely efficient for the work for which it is destined.

The Engineering Editor of "The Near East" will always be pleased to answer inquiries from readers respecting any machinery or appliances described in these pages.

New Harbour in Palestine.

The Jewish colony, Chederah, between Jaffa and Haifa, will before long have their own harbour, which will greatly further the trade of the district, says the *Zionist Gazette*. Baron Edmund Rothschild, of Paris, is having this entire installation made at his expense, and will attend the celebration of the laying of the foundation-stone.

Large Pumps for Egypt.

Particulars have reached us of the pumps now being supplied for the irrigation works in the Behera district, which indicate that the plant to be installed is of the most modern type, showing a great improvement on older designs. The pumps are of the Humphrey pattern, similar to those in use at the Metropolitan Water Board's reservoir at Chingford, but with some novel improvements. The valves are of a special design, enabling them to shut fairly close, even when obstruction fouls the seating. The pumps are eight in number, with a total capacity of 792,000,000 gallons per twenty-four hours at a lift of 19 ft. to 20 ft. The maximum internal diameter of the combustion chamber is 8 ft. 8 ins., and its height about 14 ft. The water valve-box—7 ft. in height—has a diameter of 8 ft. 8 ins. The gas-producing Mond plant, consisting of nine producers, working on anthracite, one of which is a spare, will gasify 44 tons per day, and it is supplied under a guaranteed consumption of 1.15 lbs. of coal per water horse-power.

Electrical Goods in Turkey.

A correspondent writes:—"With the markets of the world closed to Germany, other countries must, of necessity, have recourse to Great Britain for manufactures hitherto supplied by that country. Official reports indicate that the Mediterranean is now clear of German ravagers of commerce, and that trade with the Near East will speedily be open to this and friendly countries. It only remains for British manufacturers and producers to act on the advice given by Mr. Bonar Law in the House of Commons, and make a bold bid for commercial fields vacated by the Germans. They can secure those fields and retain them for years to come. Turkey has for long been a large purchaser of German wares, particularly those required for illuminating purposes. Included among them are all varieties of electric lamps and fittings, gas apparatus, and incandescent mantles of all descriptions, for which there has been an increasing demand in the Ottoman Empire for ten or more years. A report recently issued by the French Chamber of Commerce at Constantinople points out that, with the exception of the competition of France, Germany has enjoyed practically a monopoly in the supply of electric and gas requisites for lighting purposes. Indent agents in Turkey and the Near East are cosmopolitan in their business ideas and business methods. They are just as anxious to fill orders for British as for German manufacturers if terms are anything like equal. We have authority for stating that some of our home manufacturers at least are reversing this, and that within three months Turkish buyers particularly will have price lists and catalogues printed—in their own language—which will convince them that England is still the workshop of the world, with resources even superior to those of the country with which she is now at war.

Mining in Greece.

The mining industry of Greece, says a consular report, is considerable. Lead is the principal product, but in this report a full account is given of the iron industry, which is a comparatively new discovery. Large deposits of iron ore occur in the neighbourhoods of Thebes, Locris, Karditza, and other places in Bœotia, and the shipments in 1912 amounted to some two million tons. The marble industry is less important than was formerly the case. It may be that Bœotia will one day be the richest part of Greece, for the draining of Lake Copais has added to it a large tract of very fertile territory, and if the iron mines continue productive, the district will be extremely flourishing.

TENDERS INVITED.

EGYPT.

[*The London agent of the Egyptian Government is Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Westminster, S.W., at whose office particulars of tenders marked (L) are to be obtained.*]

Grey Cloth.—Tenders are invited by the Egyptian War Office for the supply of grey cloth for overcoats. August 26.

Paving Stones and Bondstones.—Tenders are invited by the Ports and Lights Administration, Alexandria, for the supply of 6,500 square metres of paving stones and 350 square metres of bondstones. September 1.

Office Supplies.—Tenders are invited by the Railways and Telegraphs Administration, Cairo, for the supply of office supplies. October 1 (L).

Span Bridges.—The Ministry of Public Works invites tenders for the supply, transport, and erection of three swing span bridges and four lift span bridges. Tenders to be sent to Director-General, Central Gharbia Drainage Projects, 3, Soliman Pasha Street, Cairo. September 30.

Shipping Intelligence.

THE SUEZ CANAL.

Shipping and Tonnage Returns, 1911-1913.

A White Paper was issued last Friday giving the returns of navigation through the Suez Canal for 1913, as compared with those of 1911 and 1912. The returns are given in eleven tables, and the following are extracts from the summary of the contents of these tables as given in the despatch of the British directors of the Canal to Sir Edward Grey:—

The net tonnage for the past year shows a decrease of 241,236 tons as compared with that of 1912, and an increase of 1,709,090 tons as compared with that of 1911. The reduction of the transit dues to 6.25 frs. per ton from January 1, 1913, together with the slight reduction of tonnage, had the effect of reducing the gross receipts, which amounted in 1913 to 126,650,934 frs., as compared with 136,423,831 frs. in 1912, and 134,762,199 frs. in 1911.

The number of vessels which passed through the Canal was 4,969 in 1911, 5,373 in 1912, and 5,085 in 1913, of which 3,089 in 1911, 3,335 in 1912, and 2,951 in 1913 carried the British flag. There has been a decrease of 795,137 tons last year as compared with 1912 in the tonnage of British vessels, which amounted to 11,715,947 tons in 1911, 12,847,621 tons in 1912, and 12,052,484 tons in 1913. During the same period, the tonnage of German vessels has increased from 2,790,963 tons in 1911 to 3,025,415 tons in 1912, and 3,352,287 tons in 1913.

The percentage of British vessels and their net tonnage in 1913 was 58 and 60.2 respectively, as compared with 62.1 and 63.4 in 1912, and 62.2 and 64 in 1911. The percentage of German vessels and their net tonnage was 15.3 and 16.7 respectively, as compared with 13 and 14.9 in 1912, and 13.4 ad 15.2 in 1911, while the percentage of net tonnage of the other maritime nations using the Canal in 1913 remained practically stationary as compared with the preceding year.

Of 3,867 merchant vessels and vessels in ballast of a net tonnage of 14,847,861 tons passing through the Canal, 2,709 ships of a net tonnage of 10,733,372 tons were British, being 70 per cent. of the number and 72.2 per cent. of the tonnage; 478, or 12.3 per cent., were German vessels, whose tonnage was 13.7 per cent. of the whole; Holland, France, Austria-Hungary, Russia, Norway, Sweden, Denmark, and Italy combined furnishing a total of 17.7 per cent. of the vessels and 15.5 per cent. of the tonnage of the carrying trade to the East through the Suez Canal.

In the ten years 1891-1900, the annual net tonnage ranged from 8,698,777 tons to 9,738,152 tons, and the transit receipts from 83,422,101 frs. to 90,623,608 frs. The mean net tonnage per vessel, which in 1881 was only 1,517 tons, rose from 2,067 tons in 1891 to 2,926 tons in 1901, and to 3,940 tons in 1913.

Forty steamers, exceeding 492 ft. in length or more than 59 ft. in breadth, with a draught of over 26 ft. 3 ins., passed through the Canal in 1913. The percentage of vessels drawing less than 26 ft. 3 ins. was 91 in 1913, as compared with 93 in 1912 and 1911 respectively, whilst that of vessels drawing more than 26 ft. 3 ins. was 9 in 1913, as compared with 7 in 1912 and 1911.

During 1913 316 vessels passed through the Canal for the first time, 18 of which were warships and 99 belonging to shipping companies whose vessels regularly use the Canal, and who furnished over 90,000 net tons to the traffic of the Canal..

The mean duration of passage for all vessels navigating the Canal was 16 hrs. 19 mins. in 1913, while the percentage of vessels navigating by night as well as by day amounted to 96.9 per cent. in 1913, as compared with 96.3 per cent. in 1912.

The number of troops carried through the Canal during last year amounted to 88,748, as against 73,248 in 1912. There was an increase of 18,330 Turkish, 951 French, 560 Japanese, 513 Dutch. 243 German, and 19 Spanish, against a decrease of 4,917 British, 131 Portuguese, and 56 Italian troops as compared with 1913.

The number of civilian passengers amounted to 169,641 in 1913, as against 164,333 in the preceding year, being an increase of 5,308; while the number of pilgrims, emigrants, and convicts was 23,846 in 1913, as compared with 28,822 in 1912, or a decrease of 4,976. In the year 1870, 26,758 civil and military passengers were carried through the Canal; in 1880 the number rose to 98,900, in 1890 to 161,352, in 1900 to 282,203, and in 1913 to 282,235, as against 266,406 in 1912.

During last year the tonnage from north to south was increased in each of the chief classes of merchandise, namely, coal, petroleum, railway material, and salt, by 225,094, 45,020, 89,956, and 17,705 tons respectively, as compared with the preceding year.

In the traffic from south to north there were increases in:—Rice (358,986 tons), manganese (245,848 tons), cotton (106,070 tons), oil seeds (100,781 tons), various minerals, and grounds nuts; while the chief decreases in the tonnage of this traffic were barley (501,543 tons), wheat (435,032 tons), sugar (347,313 tons), gram (175,558 tons), and soya beans (97,924 tons).

The traffic with the Indian peninsula has decreased, comparatively with 1912, by 589,000 tons, while there are increases of 130,000 tons with China, Japan, and Vladivostock, and of 65,000 tons with Australasia. Traffic with Siam has doubled during the past year, and there is an increase of 50 per cent. in the traffic with Indo-China. The traffic with the American coast of the Pacific has increased from 174,000 tons in 1912 to 272,000 tons last year. This is attributed to the anxiety of creating traffic in this region in anticipation of the opening of the Panama Canal.

While considerable attention has been paid of late to the relative advantages of the Suez Canal and Cape routes to and from Australia, it may be pointed out that the number of vessels sailing from Europe to Australia via the Suez Canal during 1913 represents only 30 per cent. of the total sailings, the route via the Cape being much more frequented. This preference for the Cape route is explained by the development of British exports to Australia, which are favoured by the Australian preferential tariff and cheap freights, and for which a long sea journey is not detrimental. The Cape route is also cheaper in the case of the emigrant traffic. The route from Australia to Europe via the Suez Canal is, on the contrary, more frequented than the Cape route, 303 vessels out of a total of 508 having preferred this route during 1913, and this is explained by the desire to save time and to arrive in Europe at fixed dates.

Seven-eighths of wools exported from Australia are imported into Europe via Suez, the buyers insisting on this route in order to obtain fixed dates of arrival in Europe for the periodical sales in London. Fifty per cent. of Australian frozen meat also is imported by the Suez Canal, owing to the rapidity of the journey as compared with the Cape route. The owners of certain tramp steamers also prefer the Canal route in order to avoid the winds and contrary currents of the Cape route at certain seasons when the engines of their vessels are not sufficiently powerful.

We reproduce below the Table showing the shipping and tonnage that passed through the Canal during the year 1913, arranged under their respective flags and categories:—

Flag.	Merchant Vessels.		Mail Steamers.		Warships and Transports.		Government-chartered Vessels.		Vessels in Ballast.		Totals.	
	No.	Net Tonnage.	No.	Net Tonnage.	No.	Net Tonnage.	No.	Net Tonnage.	No.	Net Tonnage.	No.	Net Tonnage.

NEWS FROM ALL SOURCES.

The Council of Ministers has decreed Egypt to be in a state of war.

A general commercial moratorium has been decreed in Egypt until September 15. Rents and salaries are exempted from its operation. The banks are authorised to pay only 5 per cent. on deposits up to a maximum of £3,000, therefore the Deutsche Orient Bank has been re-opened. The Bank rate has been reduced from 10 per cent. to 7 per cent.

Steamers arriving at Malta report that Constantinople is on the verge of riots owing to the scarcity of food. Fancy prices are being paid for flour.

The export of grain from Turkey is prohibited.

A moratorium, to last until September 13, has been declared in Cyprus.

It is announced that the exportation of grain and cattle from Cyprus is prohibited.

The Constantinople *Gazette* publishes an Iradé according the Minister of War a supplementary credit of £T3,000,000.

The Constantinople Correspondent of *The Times* telegraphs, under date August 9:—According to the *Tanin*, the Minister of Finance has issued a statement to the Agence Ottomane to the effect that the Imperial Government, in order to relieve the financial situation, has authorized the Imperial Ottoman Bank to issue bank-notes for £T1 and for 50 piastres. The Bank will withdraw notes of the denomination of £T100 and £T50 to the face value of the new issue.

In a message dated August 6, Reuter's Constantinople correspondent reports:—"Owing to delay in the arrival of specie, the Government has enacted a provisional law that the banknotes of the Imperial Ottoman Bank must be accepted on the same terms as specie in all parts of the Ottoman Empire for all transactions, public or private.

"While the law remains in force the Ottoman Bank is not obliged to pay in specie the value of the banknotes."

H.M. Embassy at Constantinople has forwarded a copy (in French) of the revised Turkish pilgrim regulations for the year 1914-15, which may be seen by firms in the United Kingdom at the Commercial Intelligence Branch of the Board of Trade.

A Reuter's message from Sofia, dated August 8, says:—"The Sobranje has voted a three months' moratorium. Parliament has also passed a resolution suspending the proceedings for high treason against the Stambulovist Ministers."

1,316 sheep, 205 cattle, 8 goats, and 2 camels were exported from Haifa Province in June. According to a Berber Province report, there was a big seasonal drop in the sales of livestock in El Damer during June, sheep totalling 1,242 only and cattle 118.

The Board of Trade desire to call attention to the fact that by an Order in Council, dated July 16 (Statutory Rules and Orders, 1914—No. 1,095), certain denominations of "B. G." (Birmingham Gauge) gauges for iron and steel sheets and hoops were authorised for use in trade on and after November 1 next.

The Board of Trade are in receipt, through the Foreign Office, of the translation of a Greek Royal Decree, dated June 27-July 10, 1914, which provides that, from September 1-14, 1914, the importation into Greece of sugar packed in any manner will be permitted, the existing regulations being abolished from that date.

Dr. R. T. Glazebrook, Director of the National Physical Laboratory, Teddington, wishes it to be known that the statement that he is Secretary to the British Section of the International Petroleum Commission at Bucharest is incorrect.

We understand that the first directors of the newly registered company, F. W. Cuming and Co., Ltd., are Mr. F. W. Cuming and Mr. E. Mille, both of 23, Sharia Soliman Pasha, Cairo.

At Mersina, in Asiatic Turkey, the following goods are imported each year:—About 400 bales, of 60 kilos. each, of sole leather, 500 dozen glacé kid skins, and 200 dozen patent calf skins.

Owing to the disruption of communications with Sweden and other countries, the Swedish Chamber of Commerce in London announce the suspension of the publication of the monthly journal of the Chamber.

The importation of coal into Egypt during the period January 1 to July 30, amounted to 895,135 tons, against 829,506 during the corresponding period of last year.

The directors of the Royal Mail Steam Packet Company have intimated to members of their office staff who have been called out for duty with the Territorial Army that their salaries will be paid in full during their absence and their posts kept open.

The R.M.S.P. Co. announce that in order to meet the pressure from Americans wishing to return to the United States, they have decided, subject to sufficient inducement, to despatch their steamer "Arcadian" from Liverpool on Monday next, the 17th inst., to New York direct. The fares to New York will be from 500 dollars upwards.

Married men, and those having dependents, serving in the Territorials or reserve forces of army and navy, in the employment of Mackie and Co., Distillers, Limited, White Horse Bonded Stores, Argyllshire, Glasgow, Liverpool, and London, will, till further notice, receive full pay, which will be given to their dependents. Their berths will be kept open for them on their return, and in future a preference in employment will be given by the firm to men who are serving or have served in the defensive forces of the country.

The North British and Mercantile Insurance Company have granted leave of absence with full salary to all members of the Territorial force on their staff.

No regulations exist in Morocco in regard to commercial travellers, and no restrictions are imposed on them. Commercial travellers' samples are admitted free of duty provided they are re-exported within six months.

According to the weekly circular issued by Messrs. R. J. Moss and Co., of Alexandria, 3,617,366 ardebs of cotton seed were exported from Egypt between September 1, 1913, and July 23 of this year.

At the request of the Bulgarian Government, the Porte has authorised the running of a bi-weekly train service between Sofia and Dedeagatch.—Reuter.

The Sudan as a Field for Investment.

In an article contributed to the *Financial Review of Reviews* on "The Finances of the Anglo-Egyptian Sudan," Mr. Percy F. Martin, F.R.G.S., who only recently returned from an extended visit to the country, deals with the question of the openings for investment of capital in the Sudan. He says:—In considering the Sudan as a field for investment, it must be remembered that it is more suitable for exploitation than for settlement; it is not a "white man's country" in the accepted sense of the word, and even the Egyptians do not thrive there as they thrive in their own land.

No doubt, as the expansion of the country comes about through official efforts, there will be openings for private undertakings which offer reasonable opportunities of realizing sound profit. It is unfortunately true that the greater amount of British capital which has found its way into the Sudan hitherto has proved unprofitable. As already indicated, a considerable part of the invested capital was put into the country before it was ready to receive and profit by it, and without any sufficient inquiry having been made into existing conditions and future prospects. That this money should have been partially or entirely lost should occasion but little surprise.

Of the surviving industries—such as the Sudan Plantations Syndicate, Ltd., formed in 1904, the Sudan Goldfields Company, Limited, formed in 1908, the Sudd Fuel (Suddite), Limited, formed in 1911, good account has been rendered, while even better results in the near future may be anticipated. Less fortunate proved the Sudan Mines, Limited, formed in 1903, which seemed to have carried on more business in Cornwall and Norway than in Central Africa; or the Sudan Development and Exploration Company, Limited, formed in 1905, which, having attempted to run a flotilla of steamers on the White and Blue Niles, finally offered to sell the fleet to the Government, who purchased it upon very favourable terms.

Latter day mining enterprise has proved, perhaps, less encouraging than any other kind of industrial undertaking in the Sudan; and yet there are not wanting those who affirm that the great prosperity of the country may yet prove to be in its undiscovered mineral wealth. Not one tithe of the vast area of the Sudan—extending to 5,624,000 square kilometres—has been prospected, and no one really knows what hidden natural treasure it may contain.

What we do know is that gold, silver, and other precious metals were worked in ancient Egypt some thousands of years ago; Diodorus, the Roman historian—who, however, never visited Africa during his thirty years of travel and research—declares that a record in the tomb of Osymandyas at Thebes (supposed time XIX. dynasty) gives the total produce of gold and silver mines at "32,000,000 of minae," which would be equal to about £133,000,000 sterling. Diodorus does not give these figures upon his own authority, however, but upon that of Hecatæus, who died about 476 B.C., and certainly did travel in both Egypt and Libya. No reliance can, however, be placed upon the estimates of this early Greek writer, for even his own countryman, Herodotus, throws doubts upon some of his statements.

Prospecting has been undertaken almost from the time that the Sudan was reoccupied, but up till now nothing sensational has occurred to reward the enterprise of the pioneers. In 1903 Messrs. Lake and Currie sent out a representative, Mr. G. R. Casey, to prospect a concession in Dongola covering 28,000 square miles; during the three years that the concession endured nothing but some old gold diggings, together with some lignite, salt, and iron deposits of no commercial value were discovered. The following year, 1904, a well-known mining engineer, Mr. Arthur Llewellyn, a member of the firm of John Taylor and Sons, Limited, went out to the Sudan and spent several months prospecting for the Egyptian and Sudan Mining Syndicate, Limited. The licences upon the concessions, however, were allowed to expire in September, 1907.

Another unfortunate concession was that held by the Egyptian Sudan Exploration Company, which was abandoned in August, 1903, after Professor Link, M. Pearless, and Mr. G. A. Wright had all spent several months in investigating an alleged mineral bearing area in Kordofan lying between latitudes 10° 30′ N. Nevertheless, it was of Kordofan that the extremely optimistic Russeggar had written—"the bed of every stream exhibits a gold-bearing alluvium."

At about similar dates—*i.e.*, between 1900 and 1904—other companies or syndicates were formed in England to take up Sudan gold mining concessions. These included the Gabait Mining Syndicate, an affiliated concern to the Sudan Mines, Limited, which engaged the services of Mr. Noel Griffiths and Mr. W. H. Snell; the Egyptian and Sudan Minerals, Limited, which employed Captain McCormick and Messrs. Joseph Badge, H. Lancaster Hobbs, and G. Graves Gifford—all of whom are or were excellent men, and well-known in their profession; the London and Sudan Development Syndicate, which was prospected by several equally capable mining engineers—Messrs. C. K. Digby-Jones, Seal, Greaves and Ackerman—for Messrs. Bewick and Moreing—and J. H. Mears; the Nubia (Sudan) Development Company, which was served by Messrs. Peregrine, Wilson, and A. Mackinnon; the Suakin Mining Syndicate represented by Messrs. A. P. Griffiths and Joseph Slick; the Sudan Gold Fields, Limited, whose prospecting work was carried out under the supervision of Mr. Arthur Llewellyn; the Sudan Exploration Company, also under the control of Messrs. John Taylor and Sons, who employed Mr. Arthur Thomas to prospect the company's concession; the Tokar Prospecting Syndicate, Limited, whose concession area was examined by Messrs. W. H. Stockley and J. F. Morris; and finally the Victoria Investment Corporation whose area was prospected by Mr. Stanley C. Dunn, an exceptionally competent young mining engineer who holds a responsible position under the Sudan Government as geologist.

Of the above twelve mining enterprises only one—the Sudan Gold Fields, Limited—has retained its original concession, and this concern confines its work at present entirely to the extraction of gold from the Um Nabardi Mine ore, and the development of that mine underground. All the other eleven enterprises have either surrendered their concessions or have allowed them to expire by effluxion of time.

Disappointing as the results must have proved hitherto, both to the entrepreneurs and to shareholders who helped to find the capital to enable them to make their investigations, it must be borne in mind that nothing like a sufficiently comprehensive or careful examination has yet been made of the Sudan as a geological field which would enable a definite judgment to be passed upon its future mineral prospects. The greater portion of the country still remains to be prospected, and within the next few years the extended observations of Government officials and travellers should—as Mr. Stanley C. Dunn points out—greatly increase our knowledge in this respect.

That further British capital will nevertheless find its way into the Anglo-Egyptian Sudan in the very near future cannot be doubted, since it is the avowed policy of the Government to encourage and support private enterprise of a legitimate nature. To succeed in attracting not alone foreign capital, but capitalists who would by their co-operation in the development of the Sudan lend distinction to this country, the Government will be called upon not alone to offer inviting terms, but to safeguard investors against any kind of injurious or unfair competition or hurtful taxation. As the adminstered portions of the country expand and the population increases in material welfare, there will be many opportunities for the co-operation of private enterprise, such as additional transportation in the form of tramways and light railways, electric lighting and power, financial trusts, insurance, irrigation canals and waterworks, shipping and land investment.

THE POSITION IN THE CITY.

When Will the Stock Exchange Re-open?

The action of the Government in backing up the Bank of England will do much to relieve the tension. The complete stoppage of the bill-broking business rendered a continuance of foreign trade impossible. We are now told that not only are most of the trade routes open but that the Bank of England will discount bills. Business in produce and manufactured goods may, therefore, resume its normal course.

But the Stock Exchange remains closed. To be quite frank, the majority of the members do not wish it to re-open. They are afraid of being hammered. But as the Committee has absolute power, this fear seems fantastic. Hundreds of limited companies have lent their cash balances to the Stock Exchange, and they cannot carry on their businesses or pay dividends until the House re-opens and that money is released. The most important firms in the Stock Exchange are involved, and these it is who are urging the Committee to continue to keep out of business.

The provincial Exchanges would gladly re-open, but they dare not move without London. Wall Street must remain closed till London gives the signal. Thus no business is possible in the hundreds of millions of securities which represent the capital of the civilized world. The Stock Exchange is a private body and is not under the control of the Government. Its action is unpatriotic and will have far-reaching results.

The Egyptian Banks.

With war going on all over Europe, with the Balkan States either at war or preparing for war, no one was surprised to hear that Egypt had declared a moratorium. The decision was inevitable. The Deutsche Orient Bank closed its doors. This was expected. The position had long been very weak, and from the day that Austria sent the ultimatum to Servia a steady withdrawal of deposits set in.

The Bank came to Egypt late. It had to face severe competition, and it was well known in banking circles that in order to build up a connection it took on a great deal of extremely doubtful business. It did a great deal of speculative trade that none of the other banks would touch, and at the first rumour of war the depositors began to withdraw their credit balances. We understand that, a moratorium being in force, the Bank has resumed business in a tentative manner. But its days are numbered, and it need no longer be regarded as a banking power in the Near East.

The greatest possible credit is due to the National Bank. Not only has it refused to avail itself of the moratorium, but it has done everything possible to help traders and customers over a difficult crisis. It showed the greatest foresight in providing itself with an ample supply of gold. It is well known that it secured about one million in gold coin the week before the trouble began. That cash is now safe in the vaults in Cairo, and will be used as security for the note issue.

Financing the Next Cotton Crop.

Egypt will be placed upon a paper currency, and in that way will be able to finance the moving of the cotton crop without calling upon London for any gold. This usually takes six to eight millions each autumn. This year she will be unable to withdraw any gold at all, and the foresight and energy displayed by the National Bank have saved the fellaheen from a disaster.

Now that good trade bills secured upon merchandise can be dealt with at the Bank of England, Egyptian commerce should be able to carry on. There will be many difficulties, for France is *hors de combat* in a financial sense, but with the National Bank and the Anglo-Egyptian doing business in an almost normal manner traders in cotton and food produce will get along all right. There may be a drop in the price of cotton, there may be a falling away in the demand. But this will be more than counterbalanced by the high price of all foodstuffs, especially beans and onions. Therefore we think that, as far as Egypt is concerned, the outlook is distinctly good.

SUEZ CANAL DUES.

On Thursday of last week in the House of Commons Sir Clifford Cory asked a question as to the possibility of paying Suez Canal dues in London. We are informed that the following letter has been received at the Foreign Office from the Suez Canal Company's office in London :—

"Sir,—With reference to the statement which was made in the House of Commons yesterday, I beg to hand you herewith a circular issued by the Suez Canal Company, according to which payments on account of transit dues can be made at Messrs. N. M. Rothschild and Sons in London.

"This arrangement has been working since 1884, and Messrs. Rothschild have been receiving regularly since, and are receiving now, payments for account of the company.—Yours faithfully, L. F. Ozanne."

Enclosure.

"Paris, August 29, 1884.

"Shipowners will please take note that Messrs. N. M. Rothschild and Sons, New Court, St. Swithin's Lane, London, E.C., are authorised to receive payments on account of transit dues, under reserve of final settlement at Port Said or Suez. Against such payments Messrs. N. M. Rothschild and Sons will deliver receipts stating the amount in francs, at the exchange of the day. These receipts must be given up by the captains or consignees when the ships are about to pass through the Canal. Payments will be received by Messrs. N. M. Rothschild and Sons every week-day, from 11 to 3, Saturdays and holidays excepted, and must be in cash, bankers' sight drafts, or approved cheques.

"If payment not made in time for Messrs. Rothschild writing out to advise Port Said office, they will advise by wire at owner's cost."

ROUMANIAN TREASURY.

The financial and economic well-being of Roumania is well illustrated by the publication of the Treasury returns for the month of June last, which we take from *L'Indépendance Roumaine*, of Bucharest. The June receipts amounted to 47,835,000 frs., which shows an increase of 13,403,000 frs. upon June, 1913, and the total receipts for the first three months of the current financial year 1914-15, which commenced on April 1 last, show an increase of 24,500,000 frs. over the corresponding period of 1913-14. A portion of the 6,826,000 frs., was on account of the year 1913-14, which we imagine should now be pretty well closed. At any rate, the revenue collected by the Treasury up to June 30 last on account of 1913-14 amounts to 567,160,000 frs., and, as the revenue estimated for in the Budget only amounted to 536,307,000 frs. (£21,452,080), there is a surplus now booked of 30,500,000 frs. Payments actually booked by the Treasury on account of 1913-14 up to June 30 last amounted to 456,880,000 frs. (£18,275,200), so that the year 1913-14, so far as now ascertained, seems to close with a realised surplus of £3,176,880.

ROUMANIAN OIL PRODUCTION.

According to a report issued by the German Consulate in Bucharest, the total production of crude oil in Roumania during the period May 15 to June 15 was 146,938 tons, as against 161,240 tons in the corresponding period of 1913. The various districts contributed as follows:—Prahova, 125,580 tons; Dambocitza, 2,887 tons; Buzou, 14,243 tons; Bacau, 4,228 tons. The outputs of the three largest companies were:—Astra Romana, 44,576 tons; Romana-Americana, 33,085 tons; Steaua Romana, 30,714 tons. The exports totalled 93,938 tons (as compared with 111,647 tons in the corresponding period), including 13,696 tons to Italy, 13,601 to France, 12,168 to Germany, 11,447 to Egypt, 8,848 to England, 8,340 to Austria-Hungary, 8,164 to Algiers, 7,264 to Turkey, 7,229 to Belgium, 1,037 to Bulgaria, 908 to Holland, 616 to Greece, 449 to Servia, 125 to Switzerland, 31 to Russia, 15 to Denmark. There was a downward movement in the prices for crude oil towards the end of the month; the price for Bushtenari crude fell from Lei7.60 to 7.50, for Tzintea from Lei6.50 to 6.30, for Moreni from Lei7.25 to 7, for Bordeni from Lei9.25 to 8.50.

NEW COMPANY.

B. Muratti (Foreign) Tobacco Trading Co., Ltd.

A "private" company with the above title has been registered with a capital of £25,000, in £4 shares, to carry on the business of leaf tobacco merchants, tobacco planters, importers and exporters, owners of sailing vessels, ships, barges, wharves and piers, etc., in England, Greece, Turkey, or elsewhere. The subscribers are:—Demosthenes B. Muratti, 69, Palatine Road, Manchester; Sophocles B. Muratti, 94, Kurfurstendamm, Berlin; Lewis F. Mizzi, 40, Rue de Brouse-Pera, Constantinople; Hedwig L. Mizzi, 40, Rue de Brouse-Pera, Constantinople; Constantine Marramatti, 23-5, St. Pierre Han (Galata). The number of directors is not to be less than four nor more than six; the first are Demosthenes B. Muratti, Sophocles B. Muratti, Lewis F. Mizzi, and Constantine Marramatti (each of whom may retain office for four years).

COMPANY RESULTS, &c.

Anglo-Egyptian Oil Fields.—Gemsah production for week ended 9th inst., 1,195 tons (last week, 1,834 tons), of which Hurgada, seventy-five tons (last week, eighty-two tons).

British Tobacco of Turkey.—An extraordinary general meeting will be held at No. 319, Winchester House, Old Broad Street, E.C., on August 19th for confirmation of a resolution that the company be wound up voluntarily.

Egyptian Delta Light Railways.—Receipts for ten days ended July 20 amounted to £E5,950, an increase of £E94 over the corresponding period of last year.

Egyptian Markets.—Receipts for the week ended August 6 amounted to £611, an increase of £36 over the corresponding period of last year. The aggregate receipts amounted to £31,670, a decrease of £1,514.

Ottoman Gas.—The directors of the Ottoman Gas Company, Limited, recommend a dividend at the rate of 10 per cent. per annum, free of income-tax, on the ordinary shares for the half-year, carrying £8,647 forward.

Ottoman Railway from Smyrna to Aidin.—The receipts for the week ended August 8 amounted to £8,545, against £9,460 during the corresponding period of last year. The half-yearly ordinary general meeting will be held at Winchester House, Old Broad Street, on September 29.

ANGLO-PERSIAN OIL COMPANY.

Copies were issued on July 30 of the Bill introduced by the Government "to provide money for the purpose of the acquisition of share or loan capital of the Anglo-Persian Oil Company, Limited." For convenience of reference we give below the text of the Bill :—

Clause 1.—(1) The Treasury shall, as and when they think fit, issue out of the Consolidated Fund or the growing produce thereof such sums, not exceeding in the whole the sum of £2,200,000, as may be required for the purpose of acquiring share or loan capital of the Anglo-Persian Oil Company, Limited.

(2) The balance of the money required for the purposes of this Act, after applying to those purposes the sum of £1,545,186 7s. 5d., being that part of the old sinking fund for the year ended March 31, 1912, which, in pursuance of Section 12 of the Finance Act, 1912, has not been issued to the National Debt Commissioners, shall be provided by the application to those purposes of the old sinking fund for the financial year ended March 31, 1914, to the extent of £654,813 12s. 7d., and to that extent the obligation to issue the old sinking fund to the National Debt Commissioners under Section 5 of the Sinking Fund Act, 1875, shall not apply.

Clause 2. This Act may be cited as the Anglo-Persian Oil Company (Acquisition of Capital) Act, 1914.

COMPANY MEETING.

EUROPEAN OILFIELDS CORPORATION, LIMITED.

Mr. Herbert Allen, presiding at the annual general meeting of this company, held yesterday, said the question which would have been uppermost in their minds had the meeting been held a few weeks earlier would have been the labour situation at Baku and its influence upon the dividend policy of the company. But in these few weeks events had arisen beneath which the question of strikes and dividends sank into oblivion. Although the gross production of oil for the year fell off by 526,000 poods, partly owing to the strike in September last, the quantity available for sale, owing to savings effected in the oil used for fuel, was down only 166,000 poods, whilst the sum realised was £174,574, against £169,170, an increase of £5,104, which was due to the better average price obtained. The oil fuel consumed on the company's properties had fallen during the last three years from 1,054,013 poods to 336,987 poods, and when their plans in this connection were completed the consumption would probably not exceed 200,000 poods per annum. The balance-sheet showed the company to be in a comfortable financial position with cash liabilities of less than £50,000 and liquid assets of nearly £70,000 apart from oil and other stocks. The profit and loss account showed an income from all sources of £69,410, of which general charges absorbed £4,696, leaving a gross profit of £64,714. After providing £12,382 for the debenture service, there remained a net profit of £52,331, of which £35,000 had been added to reserve, bringing the total up to £85,000. This left £17,331 for disposal, of which £13,865 was carried forward to the credit of the shareholders, making a total to their credit of £27,988, or nearly 9 per cent. on the issued share capital. The remaining £3,466 would be applied to the redemption of profit-sharing notes. In view of the international situation and of the possible requirements of their Baku office, the Board did not feel justified in recommending the payment of a dividend. As to the immediate labour situation there was reason to suppose that the strike in the Balakhany district, where this company's properties were situated, terminated about the end of July; at all events, they had received a cable giving the production for the week ending August 9, which was quite up to the normal average. There was no definite news yet with regard to the strike situation at Bibi Eibat, where the other English companies operated. As to the future, the British Vice Consul at Baku, in his recently issued report to the Foreign Office, mentioned a greatly increasing demand for oil fuel, which present sources are unable to meet, the inability of coal to compete with oil unless new sources of supply came into being, and the improbability of competition from imported oil. The company had just concluded a very favourable contract for the sale of its entire production for two years from November next at ¼ kopeck per pood above the official average Bourse price, with a minimum of 35 kopecks per pood. Had this contract been in force for the past year the Company would have received 42¼ kopecks per pood instead of 36 kopecks, and their profit would have been nearly £95,000 instead of £69,000. One probable effect of the war would be to paralyse the coal industry in Russia, and it was not unreasonable to suppose that oil would benefit in consequence. The majority of the workmen employed on the Baku oilfields were of nationalities not liable to military service, so there might be no great shortage of labour. The great highway of the Baku oil industry was the Caspian Sea, and nothing but nature could close the Caspian. Their greatest trouble might be in obtaining iron casing and other material for boring wells. On the whole, it seemed as though they might look for high prices, and with anything like a normal output the current year would be a prosperous one for Baku. But in times like the present they must make a liberal allowance for contingencies.

Mr. Richard Barnett seconded the motion, which was carried unanimously.

NOTES OF THE WEEK.

During the past week there has been no fresh declaration of war, and it is apparent that a number of Cabinets are in doubt as to their future policy. A severe defeat of the Allies in Belgium will probably be interpreted by these observers as being far more important than will actually be the case. The victories of Pyrrhus led to his ultimate defeat. The Germans may advance for a week or so to come, but inevitably they will have to return to defend their own soil, and the effects of their victory, should they gain one, will have largely evaporated even before its details can be known in the countries of the Near East. A German victory in Belgium can at best only prolong the war; its effect upon the outcome of the war will be negligible. A defeat of the Germans, on the other hand, is likely to increase the numbers of those in arms against Teutonic aggression. Popular opinion in at least two countries would welcome war with Austria, although in both cases the Governments are bound in a contrary sense by diplomatic instruments. Democracies are, however, apt to be impatient with Treaties if their terms run counter to the ambitions of the moment, and we anticipate but little hesitation on the part of Rome and Bucharest should opportunity offer and occasion arise.

The position in the Balkans up to a few days ago was a curious equilibrium of suspicion and mistrust. Rumours had been rife that the Teutonic Powers had endeavoured to weld Bulgaria into a link between them and Turkey, and many diplomatists professed to believe in the existence of an agreement between the Porte and Sofia based upon an understanding with the Dual Alliance. This agreement was supposed to be hostile to the Triple Entente, and both Greece and Roumania felt themselves menaced by the possibility of such a combination. So much was this the case that the Government of King Carol saw fit to reiterate its intention to maintain the Treaty of Bucharest, and is believed to have detailed 400,000 men to act as an Army of Observation against Bulgaria, whilst Greece took every precaution for the protection of her north-eastern provinces.

The pre-occupation of Roumania on the Danube entirely prevented her from taking that offensive into Transylvania which is dictated by her national aspirations, and for the time hopes of future aggrandizement had to be sacrificed to the necessity of upholding the tottering fabric of the sordid Treaty signed in her capital but twelve months before. The situation was further complicated by the uncertainty of the Porte as to the possible attitude of Bulgaria, with whom the Ottoman statesmen knew full well that they had no secret agreement. In view of this general uneasiness every declaration of neutrality on the part of Mr. Radoslavoff, and every precaution taken for the defence of Bulgarian territory, was interpreted as a Machiavellian move of the most menacing import. The beneficiaries of the Treaties of Bucharest and Constantinople so fully realized how slender were their claims upon the forbearance of Bulgaria that the waiting policy of King Ferdinand's Government effectively paralyzed their movements until the Powers of the Triple Entente had intimated their intention ultimately to revise the Treaty of Bucharest at the time of the general European settlement.

Bulgaria, in declining to trust to the voice of Austria, who lured her on to her ruin in 1913, and in following the dictates of her national conscience, which revolts at the idea of a war against Russia, however ready she may be to embark upon an anti-Russian policy in time of peace, appears to have improved her prospects very considerably. Her action has also materially simplified the difficulties of the Ægean question. Now that the Porte realizes that it can rely neither upon the support nor the complaisance of Sofia in a military move against Greece, it is possible that those in power in Stamboul may realize that it is a far cry to Salonika, and that it is very unwise to embark upon a reckless adventure for reconquest in a damaged "Goeben"—even though it be renamed "Sultan Yawuz Selim." On the other hand, the fact that Bulgaria has allowed it to be known that her protestations of neutrality are really genuine, and that nothing will induce her to attack the Tsar or his friends, will enable Roumania to turn her attention to Transylvania, and if necessary join her forces to those of the Triple Entente without having to guard her Dobruja frontier. The self-imposed duty of standing sentry over the Treaty of Bucharest has now become a sinecure because the fate of that document now no longer depends upon the sword of King Carol. Thus there is ground to hope that the studied inaction of Bulgaria will now permit Roumania to aspire to a legitimate expansion in one direction, while the Porte may be persuaded to further its own best interests by maintaining the peace in another.

Meanwhile, Talaat Bey and the President of the Ottoman Chamber, Halil Bey, have left Constantinople in order to confer with Mr. Zaimis, a former High

Digitized by Google

Commissioner of Crete and Prime Minister of Hellas. It is to be hoped that on this neutral ground they may agree to settle the difficulties which at present so widely separate their respective countries. The inquiries made by Greece as to the intentions of the Porte were courteously though firmly phrased, and were justified by the reports that Ottoman troops had actually moved into Bulgarian territory in the direction of the Greek frontier. This, occurring at the moment when unexpected reinforcements had reached the Sultan's navy, gave rise to very natural uneasiness in Athens, where for some days past the situation has been regarded with grave misgiving. So serious, indeed, has been the outlook that Mr. Venizelos called a number of former Prime Ministers to assist the King with their united counsels.

The episode of the "Goeben" is apparently at an end. We are told that Turkey has at last succeeded in placing her own crews upon her latest purchases, and has converted formidable and ill-behaved guests into units of her navy. For a few days, it is true, the Germans behaved with a total disregard for Turkish neutrality, and preyed upon enemy ships as though they had been upon the high seas and not in the territorial waters to which they owed their own safety. They committed acts unpardonable in a refugee, and did their best to implicate the Porte by their behaviour. We do not yet know that the crews of the two warships have been expelled from Turkey, and the whole affair has been unsatisfactory. In fairness to the Turks, however, it should be remembered that the Cabinet was divided on the question whether the Germans were to be treated as allies or as alien refugees, and that at times it may be difficult to treat a truculent and well-armed fugitive exactly as the obligations of neutrality require. In any case it is to be hoped that we have seen the last of the "Goeben" and her consort either as units or as allies of the German navy, the reputation of which this remarkable episode has so deeply stained.

As far as is at present known the only naval fighting in Near Eastern waters has occurred off the Dalmatian coast. The Montenegrin artillery fire from Mount Lovtchen has rendered Cattaro useless as a naval station, and the Austrian fleet has withdrawn its southern units further up the Adriatic. The retreat appears to have been delayed too long, as Admiral Boué de Lapeyrère, in command of the Allied Fleet, was able to sink the "Zenta," a small cruiser of a somewhat antiquated type. The correspondent of *The Times* in Constantinople states that the "Goeben" and the "Breslau" bore traces of having been in action, but for the moment the locality of the engagement is unknown. Suffice it that for the present the hostile flags have been swept from the greater part of the Mediterranean, which, with the exception of the Adriatic, is now clear for commerce.

Within the next few days it is highly probable that the Army of Occupation in Egypt will be considerably reinforced by troops from overseas. If our enemies are now unable to land an expedition at the mouth of the Nile, as did Napoleon, we must still be fully ware of insidious attempts on their part to raise up trouble from within. German agents are known to be numerous, and until recently were well supplied with money, which is far more efficacious for the fostering of discontent among certain classes than the most cherished grievance. The Administration is fully prepared to cope with any of the results which may arise from this malicious sowing of tares, and appears to have armed itself with an admirable weapon in the "State of War." For the sake of Egypt we trust that its provisions are far-reaching, and that while it is in force the Capitulations, which so grievously retard the development of the country, will remain suspended.

The fortune of war on the Austro-Servian frontier is somewhat hard to follow. Both sides claim substantial victories, yet neither army seems to make any noticeable progress. The Austrians appear definitely to have entered Servia at Shabatz and Lozhnitza, and it is asserted that they have been subsequently repulsed. The troops of the two Serb kingdoms have effected a junction and invaded Herzegovina, and the troops of King Nicholas claim to be in the vicinity of Ragusa, where once for many years the Serbs maintained a republican independence long after the collapse of their national monarchy. As far as can be gathered—from sources hostile to the Hapsburgs—the Austrians are taking drastic measures to repress the Slav races of the Dual Monarchy, and a number of incidents are recorded which tend to show that the methods of 1914 in Dalmatia are strangely like those of 1849 in Lombardy and Hungary. Neither of the Teutonic Empires at present has a "good Press," and in fairness to our enemies we must discount a certain percentage of the statements of foreign Press bureaux, which are, as a rule, far less scrupulous than our own.

Albania still exists, and according to the rare telegrams which emanate from what was once the diplomatic storm centre of Europe, the insurgents are still in rebellion against the Mpret. That unhappy Prince has seen the Austrian and Roumanian Volunteers who had come to his assistance withdrawn for the service of their own Sovereigns, and now it is stated that the French force at Skutari has marched up into Montenegro in order to fight the Kaiserlichs on the Bosnian border. The Government of Podgoritza denies that Montenegrin troops have occupied Skutari, or that it has any intention of invading Albania, and we trust that this be true. In any case we must reiterate our belief in the necessity for maintaining the independence of Albania when the time comes for the general European settlement, and in the meantime we sincerely hope that the little State will be left in peace by its neighbours. It is quite possible that the Shkipetars may "find themselves" amid the obscurity and diplomatic neglect which will be their lot during the present strife in Europe. In any case, while such vast interests are at stake elsewhere, no European statesmen will trouble his head about the partition or mutilation of Albania—consequently the *status quo* will only be disturbed from within, nor is it likely that the disturbances will last very long if the external influence which fomented them be removed.

Since the outbreak of the war we have consistently urged the necessity of drawing all possible benefit from the temporary incapacity of our chief commercial rivals in the Near East. Our Navy has deprived them of access to valuable markets, and it is for our merchants to supplant them so thoroughly throughout the Levant and beyond as to uproot all traces of their commercial influence in those areas. We are delighted to see that a determined and organized effort is being made to give effect to this policy, not the least significant move of which is the offer to restore to Turkey all those concessions wrung from her by the Germans in the days of their political arrogance and commercial aggression. The Treasury of the Porte can very well be spared the expense of paying for schemes of German aggrandisement, and trade will flow more freely if Berlin be compelled to abandon the practice of treating the finances and the fortunes of Turkey as mere pawns in the great game of diplomacy.

In these days news from Persia is somewhat scanty, as those whose business it is to send information are fully aware that there is but small demand in Great Britain at present for records of events so far away from the main centres of interest. Still, we must remember that our old friends still exist, even if they be in the cold shades of popular neglect. The Shah has begun to taste the sweets of constitutionalism, and has had to face and surmount the first Cabinet crisis of his maturity. The political truce which was arranged for the Coronation came to an end, and the resumption of the old state of things has led to a reconstruction of the Cabinet. The new Grand Vizier is the Mustaufi-el-Mamalek, while the Ala-es-Sultaneh is responsible for Foreign Affairs.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, July 31.

Turkey, Islam and Great Britain.

The shadow of the Austro-Servian conflict and of a probable European war hangs over the Turkish Empire. It is said in some quarters that a number of prominent members of an Islamic association recently met here to discuss the results for Turkey and the world of Islam of a general European war. A few orators urged that Turkey, relying on the support of the Moslems of Egypt, India, and North Africa, should take the side of the Triple Alliance. A Young Turk speaker is said to have replied: "The mass of the Indian Moslems are loyal to Great Britain. Those who are not would look very foolish after a fortnight's insurrection in which the Hindu fighting elements, Sikhs, Gurkhas, and the like, would be hurled upon them. In Egypt we stand to gain nothing at present. North Africa has never been capable of united action against anybody. Islam has all to fear and nothing to gain from a European war—and least of all from Turkey's participation in such a conflict." The meeting is said to have adopted a resolution in the sense of the speaker's declarations.

However this may be—and it is impossible to verify the report given as to this meeting—the fact remains that the Turkish Government seems for the present inclined to remain neutral. Its action will depend on that of various Balkan Powers, and especially of Greece and Bulgaria. Both these States have declared their neutrality. Albania does not count at present, and Roumania cannot come into direct conflict with the Turk. Till now, therefore, the War Minister has confined himself to ordering the railway companies to be ready for all emergencies, and to the despatch of some infantry battalions and a few batteries from the Asiatic to the European side of the Sea of Marmora. These measures cannot be described as in any way uncalled for, given the general situation.

Meanwhile, the outbreak of war has caused a general rise of prices throughout the Constantinople district. The price of bread, soap, petroleum, and sugar has risen, in the latter case by 100 per cent. The Ministry of Finance is naturally perturbed by the general financial situation. Thus far less than half of the first instalment of the French loan has actually been received, and it is generally believed that Djavid Bey will have to leave almost directly for Paris to arrange matters with the French Government and French finance. Failing this, officials are likely to have to go on half-pay again, owing to the lack of ready money.

Greco-Turkish Relations.

Greco-Turkish relations are happily none the worse. Some believe that they have improved. The Grand Vizier's meeting with Mr. Venizelos has been postponed owing to the situation in the Near East; but the Greek Minister here, Mr. Panas, is in good spirits, and on the whole optimistic. In some quarters it is thought that Greece and Turkey may "contract out" of any general war for the present. The former Power is very short of money, and must watch her new frontiers with the utmost wariness. Turkey is unlikely to obtain her Dreadnoughts for months to come—for it is inconceivable that the British Admiralty will permit any foreign warships now being constructed in England to leave the country—while her financial situation is little better than that of the Hellenes. Without Dreadnoughts she cannot come into contact with the Greek army, which is less likely than ever to be used in Anatolia at this juncture. Nor is Bulgaria at present likely to take the risk of serious complications, which might prove fatal to her existence, by permitting Turks or Greeks to pass through Western Thrace.

The Turkish Press is, naturally enough, decidedly pro-Austrian. This does not, however, mean that there is any violently anti-Servian enthusiasm. When one's unpopular neighbour's house is on fire satisfaction is inevitably tinctured with nervousness.

The Attempt on the Khedive.

On Saturday Constantinople was alarmed by rumours that the Khedive had been assassinated. These were soon denied, and his Highness, though he received a painful wound in the face and two bullets in the arm, is little the worse for his injuries. His would-be murderer—who was expeditiously shot, sabred, and generally "desthroyed" by the troopers of the escort, all members of the Imperial Guard squadron, and by the gendarmes who rushed from the Porte—was an Egyptian "student," Mahmud Mazhar by name, a crack-brained youth, who had shown strong suicidal tendencies, was in the habit of writing impassioned love letters in his own blood to Moslem and Israelite ladies who would have none of him, and was generally one of those hysterical creatures, found in all countries, on whom political propaganda has the effect of a torch applied to a powder-barrel. His speedy elimination has made it impossible to say whether he was or was not the tool of the extremist Egyptian nationalists, or whether there was any sort of conspiracy against the Khedive. The Turkish police think there was not. In any case, it is extremely unlikely that any such conspiracy will be discovered. H.H. Abbas Hilmi showed great calm and presence of mind. By throwing his arm across his face he probably saved his life; for the criminal used a pocket Browning with, apparently, old cartridges, which gave little penetrating power to the bullets he fired. The theory that the cartridges were old and probably spoiled is confirmed by the fact that the bullet which struck the Khedive in the face and pierced his cheek did not pass through the other cheek, but was spat out, with a dislodged tooth, by his Highness, whose only comment was, "I think some of my teeth are lost." The Khedive's son-in-law, Jelall-ed-Din, was hit in the feet and legs, but his injuries were not at all serious. It is to be hoped that the Porte will in future take more thorough steps to watch Egyptian and other agitators and fanatics, who have too often been harboured here in the past, and if the attempt on the Khedive has this result, then all may be said to have ended well.

The Hintchakists.

The police have raided the Hintchakist Club, and made about thirty arrests of prominent members of this party. Their reasons for so doing are not known. A quantity of papers have been seized. The Hintchakists are an extreme Socialist party, which has in the past been identified with "physical force" methods, but has kept very quiet of late years.

The Inspectors-General have not yet left for Armenia, certain divergences of opinion having arisen between them and the Porte as to the composition of their staffs.

NEW PERSIAN CABINET.

Under Tuesday's date the Teheran correspondent of *The Manchester Guardian* reports:—The Cabinet has been reconstructed under Mustanfi-el-Mamalek as Grand Vizier and Minister of the Interior and the Ala-es-Sultaneh as Minister for Foreign Affairs.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, August 3.

On the Eve of the War.

As is naturally to be expected, the situation in Europe is the one absorbing topic in all circles in this country, the cosmopolitan population and the peculiar international position of which combine to lend the question a special and personal interest. The foreign residents of the belligerent Powers—and in some cases of the neutral Powers also—have all been either recalled to the colours or warned that their services will be required. Austria was, of course, the first in the field, and most of her nationals have left by the Austrian-Lloyd steamers, the sailing of which for ordinary and mail purposes is now uncertain. The latest to be called up are the Swiss and the Germans, the latter of whom are leaving by the N.D.L. s.s. "Derfflinger," which was stopped for the purpose on her way westward through Port Said and emptied of her passengers, and which is to be escorted to Trieste by the German cruiser "Goeben." The safe arrival of either vessel at its destination is somewhat doubtful. Since Italy has declared her neutrality, and the Mediterranean is held by the British and French Fleets, communication between Egypt and Europe will henceforward, it is to be presumed, be kept up by British steamers and those belonging to neutral States, such as Holland and Japan; the mail service will, however, be highly irregular, and very possibly may have to be a long sea one, since the Italian and French overland routes traverse what may at any moment become a war area.

It is interesting to note that native opinion generally is exceedingly hostile to the Triple Alliance. For once in a way the people seem to realize on which side their bread is buttered, and in words—and it is to be hoped in thoughts—are decidedly friendly to England, in whose attitude towards the war they affect to see repose the future of Egypt. If England maintains her neutrality, then, according to them, they have nothing to fear. But if she has to take her share in the hostilities after all, then they firmly believe that Egypt's status at the end of the war will be changed. Their idea is that a victory for the Triple Alliance, resulting from a British naval defeat, would mean the evacuation of Egypt by England, whose place would be taken by Germany, while with the Triple Entente victorious, England would definitely annex the country—and be it marked as a tribute to British rule, they devoutly hope that the *Dreibund* will be vanquished. Whether the same Anglophile spirit would prevail in the event of a Turkish demonstration of force on the eastern frontier is, of course, another question, but it is worthy of note that the Egyptians as a nation show a decided preference for the *status quo* in so far as the nationality of the occupying Power is concerned.

Italy's declaration of neutrality is welcomed, as, in the event of Great Britain being drawn into the fray, it removes the much-talked-of menace on the western frontier. But even if that declaration has, owing to subsequent events, to be cancelled, it is admitted that the oft-expressed threat of the Triple Alliance to invade the country in order to stop England's food supply will be impossible of realization, for the simple reason that, apart from the fact that the sea route for the transport of troops is barred by the French and British warships, the predominant members of the *Dreibund* have their hands more than full near at home, and their junior partner could not afford to detach an invading force from her army in Cyrenaica, for any diminution in the strength of her troops stationed there would certainly be followed by a determined forward movement on the part of the Arabs, and the lines of communication of the invading force would at once be cut. In other words, the Egyptians firmly believe that their country will only be affected by the war if Great Britain suffers a naval defeat and loses command of the sea, but they appear to have implicit confidence in the result of the conflict in so far as Great Britain is concerned. Great satisfaction is expressed at the news that Lord Kitchener and Sir Reginald Wingate will be back at the end of the week. Meanwhile precautionary measures have been taken, and a company of redcoats has been sent to Suez. It is rumoured that Disraeli's innovation is to be adopted once more, and that one or two native regiments will be brought from India, but no confirmation is available.

The European developments caused a slight panic at the outset, but confidence has set in again. To prevent a crisis the Stock Exchanges in Cairo and Alexandria have been shut; the Cotton Bourse will, however, remain open as long as those of New York and Liverpool do so. Prices are beginning to rise fast; flour and coal have started the ball, and no credit is now allowed anywhere. Irresponsible people have talked of famine, but that is out of the question. Egypt's geographical position *vis-à-vis* the seat of war precludes that. She has abundant supplies for several weeks, and meanwhile can replenish her stocks from India, Australia, and the Sudan without difficulty. But that will not prevent the unscrupulous speculator and trader from playing on the credulous fears of the ordinary inhabitants and running up the prices without reason. Indeed, it is said that one man in Alexandria made a substantial profit on flour on the day after war was declared.

The Attempt on the Khedive.

The war has somewhat put into the shade the attempt on the life of the Khedive and the inquiry which has been carried on. The latest official bulletins state that the wounds are practically healed, that the bandages have been removed, and that his Highness has been able to walk about and receive visitors. In view of the European crisis, it is understood that his Highness intends returning to Egypt as soon as possible. The inquiry in Egypt has thrown no further light on the matter; several suspicious houses have been raided, and some students have been subjected to an interrogation, but it appears more than certain now that for any elucidation we must rely on the Turkish inquiry, about which nothing further has been heard.

In commenting on the attempt the local Press has almost unanimously drawn attention to the fact that whilst every effort has been made to control the private and other Egyptian students studying at Geneva, Paris, and London, absolutely nothing has been done at Constantinople, whither no small number go every year in order to complete their studies at the local colleges and academies. It is pointed out, and with justice, that in the Turkish capital young Egyptians are subject to even more pernicious influences than in the above-mentioned European cities, and that, whatever difficulties may in the past have lain in the way of obtaining some control over them, the same cannot hold good to-day, when proof has been forthcoming of the dangers of the liberty of action accorded these young Egyptians. Indeed, whilst the Egyptian Government now has a very strong case, the Turkish authorities owe it to the honoured guest who has been so maltreated within their gates to introduce of their own initiative some effective control over the Egyptian students, and to stop the Egyptian Nationalists who have sought sanctuary in Constantinople from continuing their nefarious campaign. Of course, now that Europe is at war little can be done in this direction, and we shall have to await the cessation of hostilities. Meanwhile, it is up to the parents whose sons are at present at, or are about to go to, Stamboul, and to whom it is to be hoped the gravity of the situation has been brought home, to exercise their authority over their offspring.

EGYPT AND THE WAR.

(From Our Correspondent.)

Cairo, August 10.

The sudden change which the European situation has undergone during the past week has not been without its effect on Egypt. On the very day on which England sent her ultimatum to Germany the Egyptian Government declared its neutrality, and issued—as in the case of the Tripoli and Balkan Wars—explicit instructions as to the manner in which shipping in the ports and the Suez Canal was to be treated. The outbreak of war between England and Germany has, however, owing to the British occupation of Egypt, materially altered the latter's attitude. The matter was brought to a head by an inquiry on the subject addressed by the German Agent to the Regent, and, as the latter explained to a meeting of newspaper editors which he summoned on Thursday, there was only one reply to make, viz., that Egypt considered herself to be in a state of war. After all, this is but the logical sequence of the occupation of Egypt by British troops, the presence of which could quite possibly lay the country open to an attack by the enemies of the British Empire, whose object would be to deprive it of the important and strategic position which the Occupation confers on it.

Accordingly, on Thursday evening a Khedivial Decree was promulgated declaring Egypt to be in a state of war with Germany, forbidding anyone resident in Egypt to enter into contracts of any nature, directly or indirectly, with the German Government or its agents, or with anyone resident in Germany; laying down certain articles as contraband of war and forbidding their export; giving to the British naval and military forces the power to exercise all the rights of war on Egyptian territory and in Egyptian waters (as interpreted by the Suez Canal Convention of 1888), and making all captures made on Egyptian territory and in Egyptian waters subject to the British prize courts, calling upon all concerned to render all assistance required to the British naval forces, and laying down the neutrality of the Suez Canal.

It has all along been patent to everyone that Egypt's anomalous political position could not permit her to remain neutral in the event of Great Britain being involved in war, and this decision, which formally places Egypt under the protection of Great Britain, has been well received. To those who object that this declaration is not legal, as the consent of the Suzerain, Turkey, has not been obtained, and the latter has declared its neutrality, it may be answered that the principle that Egypt must follow its *de facto* and not its *de jure* master was already admitted three years ago, when she declared her neutrality notwithstanding the fact that her Suzerain was at war, and that, without Turkey making any protest, she maintained that attitude throughout the Balkan Wars.

The internal situation is, comparatively speaking, satisfactory. Politically, everything is quite quiet, and there is little fear of any trouble; for the military and Government authorities have made their arrangements in a manner that reflects the greatest credit on them. Financially and economically matters are not so good, though during the past few days a decided improvement has set in. On Monday last, in view of the panic-stricken manner in which depositors were withdrawing their deposits, and of the impossibility of their obtaining sufficient gold, the Government issued a decree making bank notes legal tender. At the same time the exportation of foodstuffs was forbidden, and the issue of foreign money orders by the Post Office was stopped. The rush on the banks was aggravated by the closing of the doors of the D.O.B. and the Banco di Roma; an alleviation was given by the decreeing by the Government that the four days from August 5 to 8 should be considered as Bank Holidays. The action of the National, Ottoman, Anglo-Egyptian, and the French banks in continuing, notwithstanding that no obligation lay on them, to pay depositors, has had a most beneficial effect on the state of the public mind, which was increased by the arrival of £500,000 on board the P. and O. "Persian." The rush has almost entirely stopped, and the assistance of the police to regulate the crowds has been dispensed with. In addition, a moratorium to November 1 has been declared, and the National Bank has been authorised to increase its note issue. Prices still continue to rise, and since this is quite uncalled for in view of the existing stock and the accessibility of further supplies, the Government, which has already issued a proclamation that there is no need for alarm, is about to promulgate a decree giving the price of foodstuffs and other necessaries.

As an instance of how merchants are taking advantage of the terrorised state of mind of the people, I must cite a soda-water manufacturer who has raised his prices 25 per cent., although his goods are made locally, so that no shortage in supplies can be feared.

An exceedingly close censorship is being exercised over outgoing and incoming telegrams. The authorities have learnt a lesson from the Boer War and the Japanese War, and are determined to allow no detail of their plans for the defence of Egypt to leak out, nor any unreliable or exciting news to come in. Their decision is a most laudable one, and no one ought to complain, even though it means that news from the seat of war is scanty and what does come in is delayed. The greatest interest is taken in the slightest news that comes to hand, even by the native, and the vernacular Press, whose newsboys make the air hideous far into the night with their cries of special editions, and are doing a roaring trade.

THE ATTEMPT ON THE KHEDIVE.

(From Our Own Correspondent.)

Cairo, July 30.

The news that the Khedive's life had been attempted at Constantinople came as a great shock and surprise to all out here, especially as it had just been preceded by tidings of the warm welcome accorded to his Highness on his arrival in the Turkish capital. The versions that have reached here thence differ somewhat from those telegraphed from London. It appears that as the Khedive was driving away from the Sublime Porte the assailant fired a shot, which went wide. Immediately his carriage stopped, and the would-be assassin having approached, his Highness seized him by the arm in order to deter him from shooting further. He, however, contrived to fire four more shots, all of which took effect, one in the Khedive's cheek, knocking out some teeth, and three in his left fore-arm. Frequent bulletins have been issued to the local Press insisting on the mildness of the wounds and the rapidity of the Khedive's recovery, but persistent rumours have been prevalent since Tuesday that his Highness's condition is by no means so satisfactory as the authorities try to make out, and the source of these rumours and divers incidents tend to confirm their accuracy. It is to be noted that H.H. the Khedivah, accompanied by her two sons, Princes Abdul Moneim and Abdul Kader, has left for Constantinople, whither deputations from the Khedivial Family, the Legislative Assembly, and other public bodies have proceeded, or are about to proceed, in order to convey their congratulations to his Highness on the fortunate failure of the attempt made upon his life.

The Assailant's Record.

The would-be assassin, Mahmud Mazhar, comes of a well-known Egyptian family. His father was for many years president of the Beni-Suef Native Court, but after his death, some four years ago, his widow left Chebin-el-Kom, where the family resided, for Constantinople, whence she returned about three weeks ago. Mahmud Mazhar has a brother who is a moawen at Chebin-el-Kom and another who is employed as accountant by the

liquidators of the Bank of Egypt, Limited. Both are eminently respectable men. As for the assassin, he studied at the Mesai Mashkura School, which is well-known for the reactionary tendencies of its graduates, and afterwards proceeded to Constantinople. As far as is known here, he never displayed a revolutionary temperament, although many stories, which are impossible of verification, are now being told to prove his bad character as a boy. Whatever tendencies he evinced when in Egypt, the fact remains that at Constantinople he showed a predilection for the society of the Nationalists resident there. It is a positive fact that he was an intimate acquaintance and associate of Sheikh Abdel Aziz Shawish and of Dr. Ahmed Fuad Effendi, a man who had in Egypt a most unsavoury reputation as a reactionary and a plotter, and who in Constantinople acted as go between between Sheikh Shawish and the Egyptian Nationalists. As an instance of Dr. Fuad's friendship with Mahmud Mazhar and of the latter's devotion to the cause, it is only necessary to mention that when, two years ago, the Turkish police, at the request of the Egyptian authorities, arrested prominent Nationalists and searched their houses, Mazhar gave Dr. Fuad sanctuary in his own house. It is, moreover, alleged that he was such a keen adherent that he possessed many tokens testifying to the regard which the party leaders had for him.

As soon as the news of the attempt reached here an inquiry was opened. The houses of the Mazhar family at Chebin-el-Kom were searched, but without result. The residence of the father of Dr. Ahmed Fuad was also visited, and there several letters from him were found, one containing allusions to a great stroke which was contemplated, and before the execution of which he declined to return to Egypt. Further inquiries are still being made here, as it appears that Mazhar was in Cairo last summer, and information as to his movements may be instructive.

However, the most important inquiry is the one being conducted at Constantinople, and Blattner Bey, who brought Sheikh Shawish over to Egypt two years ago, and Badr-ed-Din Bey, Inspector in the Ministry of the Interior, have proceeded thither in order to assist the authorities. Little success is, however, expected to result from this inquiry. It is considered as highly regrettable that Mazhar should have been killed, for with him disappeared the main means of ascertaining what lay at the back of his attempt; and, in addition, it is conceded that the Turkish authorities are scarcely likely to work whole-heartedly in the matter, since any successful result to the inquiry would very probably cast reflections on their efficiency and watchfulness.

Efforts are being made to show that the attempt was the isolated act of an irresponsible individual, and that it was not the outcome of a plot. General opinion out here inclines—for reasons whereon there is no need to dwell—towards the theory of a plot, wherein it is alleged the Nationalist agitators domiciled in Constantinople were not the sole participants. Whether any proofs supporting this theory will be forthcoming is doubtful in the extreme, for reasons already touched upon. The fact, however, that Mazhar was a neurasthenic, a drug-taker, and a young man afflicted with homicidal mania does not set a limit to the responsibility for his act. No one expected to learn that the Khedive's assailant was a person in full possession of his senses, and the details given of his temperament add force to the conviction that lies uppermost in the minds of all those who have any intimate knowledge of the history of Egyptian Nationalism of the past five years.

On the very showing of those who seek to assign to him alone the responsibility for his crime, Mahmoud Mazhar possessed a mental and physical disposition similar to that of Ibrahim El Wardani, of Mahmoud Taher El Arabi, and of the many others whose exploits have brought discredit on the Nationalist cause, and must have made the great Mustapha Pasha Kamel turn in his grave with disgust at the misconception of his ideals that these exploits displayed. Just as these unfortunate men by their very temperament fell an easy prey to, and were spurred on to acts of violence by, the incitative and insinuating talk and writings of such arch plotters as Sheikh Shawish and his clique, so there is little doubt that, albeit quite possibly there existed no actual plot in the sense that Mazhar was a participant therein, he was the unconscious instrument of those who calculated to bring him by suggestions cunningly conveyed to act as he did. In other words, it is regarded as indisputable that whereas those who from various parts of Europe have scattered broadcast inflammatory Nationalist literature have borne a contributory part in this attempt on the Khedive's life, the main responsibility rests, in the light of antecedent history and Mazhar's associations whilst in Constantinople, upon Sheikh Shawish and his avid assistants, who for the past three years have carried on within the very domain of the Suzerain a violent revolutionary propaganda directed against all those set in authority over the vassal State.

A HARBOUR OF REFUGE.

(From Our Special Correspondent.)

Gibraltar, August 9.

I do not remember ever seeing a more beautiful sight than Gibraltar as we steamed slowly in on Wednesday morning. It was just beginning to grow light. Far away over the Sierra Nevada the sky was turning to copper. A searchlight picked us out, quavered a minute, and then settled down to glare at us steadily. A few minutes afterwards the port authorities were alongside. "Take down your wireless, captain, and disconnect your receiver," shouted the officer in charge, "and haul down all your flags except your ensign." And that was our first taste of Gibraltar under war conditions.

At first when we came in we all rushed to the bulwarks at the sight of an incoming vessel. Was it a British man-of-war? Had she got a German cruiser in tow—the spoils of a cruiser action off Las Palmas—or was it only another vessel seeking sanctuary? It is curious how soon we have all lapsed into a state almost bordering on coma. That nerves are still on the stretch, however, was clear the other night. A covey of inoffensive casks bobbed by a neighbouring ship. Germans, thought the officer of the watch, either with their clothes in a bundle on their heads trying to swim ashore, or pushing mines in front of them to sink our ship. A volley of revolver shots rang out, and the casks unscathed bobbed on their inoffensive way.

Occasionally a distant shot booms from the Rock, a warning to a merchantman to heave to. Sometimes a host of hurried shots ring out together, something supposed to be lurking in the shadow. Otherwise throughout the night no sound save for the ships' bells all around and perhaps the pant of a launch. The great searchlighths on the Rock sweep the horizon incessantly, crossing and recrossing. The glare is so brilliant that if you gaze steadily into it something seems to detach itself from your eye or from the light and float away like a dark rag.

Underneath Europa Point lie anchored five German merchantmen, seized two hours after war had broken out. Two of these vessels at least—the one trading with the Dutch East Indies and the other belonging to the Hansa line—are very valuable. Here in the twentieth century, on the threshold of the celebration of the Centenary of Peace, it seems barbaric to be talking of prize money, and yet I understand that these merchantment are worth close on £250,000, which will be duly distributed among the naval forces at this base on the close of hostilities. Two nights ago a German merchantman tried to run the gauntlet. A blank shot produced no effect, three live shots across her bows were unheeded, and then a minute torpedo boat shot out to bring her in. It is the picture of "Dignity and Impudence" over again to see one of these spider craft shepherding into port one of these steamers. Based on Gibraltar are a variety of naval craft, and to them the patrolling of the Straits is entrusted. Each craft has its regular beat on the eight or nine mile stretch of sea across to the African coast; and woe betide any hostile vessel which, having dared to run the gauntlet of the guns on the Rock, tries to break through the thin grey line of sentinels.

BULGARIAN LETTER.

(From Our Own Correspondent.)

Sofia, July 30.

The Servian Conflict.

The Prime Minister has informed the representatives of the Great Powers that Bulgaria is firmly resolved to maintain strict neutrality in the conflict between Austria-Hungary and Servia. After the official notification of the war by the Austro-Hungarian and Servian Ministers here the leader of the Democratic party, Mr. Malinoff, called on Dr. Radoslavoff and asked for information as to Bulgaria's position and the Government's views upon the fateful events that seem likely to develop in the Balkans. He was particularly anxious to know what are the relations of Bulgaria with Roumania and Greece. Dr. Radoslavoff declared that Bulgaria's relations with her neighbours, Roumania and Greece, are correct, and repeated that for the present the Government would avoid any action and maintain strict neutrality. If the situation became further complicated the Government intended to consult the Opposition leaders and invite their co-operation in settling any questions that might arise in the Balkans.

Mr. Malinoff communicated the Premier's declarations to the other leaders of the Opposition, who declared their readiness to lend their strong support to the Government in its present foreign policy.

Yesterday the archives of the Russian Legation at Belgrade arrived here from Nish, whither they had previously been transferred for safety. They are at present stored in the Russian Legation here.

Owing to the interruption of the Servian communications through Turnu-Severin, the Servian Government is now transmitting its cypher telegrams through this country, with the Government's consent, of course.

On the Frontiers.

According to information from Varna, a concentration of Roumanian troops in the Dobruja towards our frontiers is going forward steadily. The forces are gathering at Silistria. Apart from this the frontier is now quite calm, and the Bulgarian and Roumanian officers are making their tours of inspection together. There are, however, persistent rumours that Roumania is secretly mobilizing in agreement with Russia.

The frontier towards Turkey is quite calm, and no movements of any kind are reported. The Greek frontier also is quiet. But on the Servian frontier there is considerable excitement amongst the population, and the frontier is officially closed.

Servian Deserters.

Since Servia started to mobilize a stream of deserters has been trickling across the border. Up to yesterday, it is reported, 200 had crossed the frontier at Kustendil and surrendered their arms to the Bulgarian authorities. They are mostly Bulgarians from Macedonia, who have made their escape by night. Yesterday it was officially announced from Koula that 160 Servian deserters had surrendered their arms to the Bulgarian frontier authorities. In connection with these desertions, the Servian Minister here yesterday requested the Bulgarian Government to instruct the frontier authorities to refuse to admit the deserters.

The Roumano-Bulgarian Frontier Commission.

The mixed Roumano-Bulgarian Frontier Commission completed its task after three days' prolonged sittings. Its findings are that the Bulgarian blockhouse has been greatly damaged by the Roumanian bullets, and that the Roumanians fired at a distance of only three or four yards. The guiltiness of Roumania is acknowledged, and the latter offers to pay a money indemnity to the families of the soldiers who were killed.

NOTES FROM ROUMANIA.

(From Our Own Correspondent.)

Bucharest, August 1.

[*The first portion of our Correspondent's letter appears to have been suppressed by a censor—of what nationality we have no indication.*]

. . . This is, however, the opinion of a decided minority, sympathy with Servia and dislike (not to use a stronger word) of Hungary being shown by the great mass of the people. Indeed, a meeting to demonstrate sympathy towards Servia was held in Bucharest a few days ago; but the attempt to demonstrate before the Servian Legation was prevented by the police, who feared that it might be followed by another—of a different character—at the expense of Austria-Hungary.

A particularly hearty reception was accorded to Prince Peter of Montenegro, and also to a large party of Servian officers on their passage through this country.

All the Roumanian families who were visiting the various Hungarian summer and health resorts were hurried home a few days ago by the Hungarian authorities, as communication by rail with this country was likely to be cut off. Indeed, the frontier is now only open at Predeal. To the East it has been closed at all points since yesterday, but this is probably only a temporary measure whilst mobilisation is in progress.

Bucharest, August 2.

Since yesterday various rumours of mobilisation have been in circulation, and even the most serious papers report that in face of the very serious international situation and the mobilisation of nearly all the armies of Europe the adoption of military measures by Roumania is imminent. All hangs upon the Crown Council which is to take place to-morrow in the afternoon, at which the chiefs of parties will also be present, besides the members of the Cabinet, who will meet together either earlier in the day or else to-day. Rumour has it that the real question under discussion is whether Roumania will throw in her lot with Russia or with Austria-Hungary. A tale (I give it for what it is worth) is going round that at a recent meeting of the King and a part of the Cabinet under M. Bratiano, his Majesty practically refused to go against Germany (which means Austria-Hungary), that the discussion became quite heated, and that it only ended when the King declared that he would abdicate rather than throw over his old friends to the West. It is interesting reading as a sample of what Roumanian gossip can do, if nothing else.

That the situation in this quarter is extremely grave is shown by the fact that M. Derussi, the Roumanian Minister at Sofia, who had come to fill a post at the Ministry for Foreign Affairs, has been hurriedly sent back to his post, and that yesterday M. Radeff, the Bulgarian Minister, went from Sinaia to Ploesti, where he occupied the telegraph and telephone office with a secretary from 3 p.m. till 6.30, being in continual communication with Sofia.

BALKAN INTERESTS AND THE WAR.

CONDITIONS ELOQUENT FOR PEACE.

Whatever may be the result of the present Armageddon, it will have driven home to all nations with telling force the wisdom of not embarking upon war without reckoning very carefully beforehand the cost. From Serajevo to Kiaochau is a long cry, and it may be doubted whether, even if her preliminary optimism remains unimpaired, Germany at this moment sees how victories in Europe are to win back for her in the Far East the position which she built up at the expense of much toil and treasure. Counting the cost in Germany's case entailed the consideration of such widely divergent matters as the possible resistance of Belgium, the attitude of Great Britain, the neutrality of Italy, the fate of seaborne commerce, and the action of Japan. With what degree of statesmanship these questions were considered in Berlin history will show; but while the fortunes of war have not yet been revealed the list is sufficiently formidable to suggest extreme caution to any Power tempted to embark upon hostilities either now or hereafter.

No State in the south-east of Europe has the world-wide commitments which Germany had. Their interests, however, are no less vital to themselves, and are equally important whether centred a few hundred miles from the capital town or on the other side of the earth. There is good reason, therefore, why the various Governments of the Near East should make the situation in Europe and their own position the subject of very earnest deliberation, and the news that representatives of Turkey and Greece are to meet in Bucharest for friendly discussion of the points at issue between the two countries is to be welcomed. In the meantime it is to be hoped that the statesmen of Constantinople, whether in the Cabinet or only members of the Committee of Union and Progress, will debate the question of Turkey's interests from a wider point of view than the prestige of their party or their personal predilections. Even the questions at issue with Greece do not constitute the sum total of Ottoman interests; but in the face of unthinking Chauvinism and racial hatred there is always a danger that these questions may exercise upon Turkish policy the same obsession as France has exercised upon German minds.

The outstanding feature in the situation as far as the Balkans are concerned is that, except for the Servian and Montenegrin quarrel with Austria-Hungary, a state of peace obtains. Before this peace is broken the questions to be decided are whether it is in the real interests of any single State to break it, and whether the present moment is opportune for taking such action. The latter question is, perhaps, the easier to decide. Any act of war must, either immediately or very soon, range the belligerent on the side of one or other of the hostile camps in Europe. No Government in the Near East will have been left in ignorance of the fact that the Powers of the Triple Entente wish and expect it to maintain peace. Hostilities on its part, therefore, will be undertaken in opposition to this desire, and will almost certainly cause the country to be ranged on the side of the enemies of the Triple Entente. In these circumstances can any Government in the Near East feel so confident of the issue of the tremendous struggle now pending in Central Europe that it could lightly throw down the gauntlet to the Powers who control the Mediterranean and the Black Sea? Even if that Government has convinced itself that the Powers of the Triple Entente will ultimately be beaten, is it likely to lose much by staying its hand for the present? The answer to that question turns on the nature of Germany's representations to it and the measure of credence which they command. If any Near Eastern Government is uneasy on this subject it may derive some comfort from Italy's attitude. Any justification which Italy has found for remaining neutral exists a hundredfold for every Balkan State, and the fear of subsequent reprisals will be dissipated when it is realized that in this matter Italy and all the Balkans, including Roumania, will be in the same boat. It will be time enough in its own interests for a Balkan State to take sides in the war when German and Austrian armies have entered Paris and have driven back the Russians beyond the Volga.

The question whether it is in the real interests of any single State in the Near East to break the present peace has already been answered in the negative by three countries. In Roumania and Greece conditions are eloquent for the maintenance of the *status quo*, and the two Governments have agreed to support one another to attain this end. Bulgaria also, although she can never be content with things as they were left by the Treaty of Bucharest, is pledged to peace, having probably satisfied herself that she has more to gain by masterly diplomacy than by any rash policy of adventure at the bidding of a few headstrong members of the Committee of Union and Progress. There remains Turkey. It is in keeping with Ottoman diplomacy that the Porte's intentions should be obscured for as long a time as possible, and that feelings of anxiety among its neighbours should be zealously fostered. But often, even when the official intentions were originally good, a false step has been taken, and Turkey has suffered materially or in prestige. In the present instance, it is to be hoped, wise counsels will prevail. The Porte should have little difficulty in narrowing down the scope of its deliberations. Its immediate ambitious seem to be restricted to the acquisition of some or all of the Ægean Islands and the recovery of Salonika with the northern littoral of the Ægean Sea. Let us suppose that Germany has promised these things to Turkey with the same good faith with which she encouraged Belgium to violate her neutrality against France and Great Britain, what power has she to grant them? None, so long as the war lasts; for she and Austria-Hungary are powerless in the Mediterranean. And after the war Turkey's ambitions can only be realized at the expense of Greece, whose cause in this matter will be that of the other Balkan States, of the Powers of the Triple Entente, and of every country in the world that will be inclined to object to the principle that for the future the independence of each nation is to depend on German sufferance. While, therefore, Turkey stands but a poor chance of attaining her desires if Germany and Austria-Hungary are victorious, what is the risk she runs in the event of her champions being defeated? Here let it be stated that the dangers which Great Britain, France, and Russia are facing together are too grave to allow any misunderstanding if the spoils of victory have to be shared. The British and Russian Governments may have different views regarding the ultimate reversion of Constantinople in the event of the Turks quitting European territory; but a solution of that problem is not far to seek. If Turkey were to enter the arena at this stage on the side of Germany and Austria-Hungary there would be little need for either the naval or the land forces of the Triple Entente to move against her. The Balkan States with Roumania could be relied upon to look after their own interests, and the fiat would go forth that the Ottoman power for interference in European affairs must be removed for ever.

In the light of the risks attending an appeal to war at this time, it is almost impossible to believe that the level-headed and moderate men who constitute at least a substantial minority in the council chamber of the Committee of Union and Progress will allow themselves to be overborne by the extremists. Great Britain has no wish to see Ottoman power curtailed, but she has drawn the sword against the most formidable opponent the world contains in defence of treaties and for justice among the nations, and she is not likely, when sheathing it, to countenance aggression in humbler quarters.

TANGIER TO TEHERAN.

Naval people must have remarkable memories, or else they must correct their "World's Fighting Ships" very often. Only a fortnight or so past we had to disremember a whole tribe of warship names, South American, North American, and Ottoman, and learn new English and Greek appellations. Now we must discard some German titles and adopt the new ones prescribed by the Turkish Bahrieh. We are told that the ex-Goeben is to be the "Sultan Yawuz Selim," and the former "Breslau" the "Medellu" in future. This is all very well, but the man in the street begins to wonder a bit whether after all the German crews of these great ships may not themselves clap on fezzes and figure in the Ottoman navy list as a formidable array of Pashas, Beys and Effendis.

***

Sultan Yawuz Selim, the conqueror of Syria, who overthrew the Mamluk Sultanate of Egypt, did much to impress his fellow Moslems with his pre-eminent military fitness to be Commander of the Faithful, although in establishing that sacred office in his own person and family he violated the tradition of nearly nine centuries, which had always demanded a Kaliph of Arab blood and Arab speech. It is unfair to confuse Yawuz with his namesake, Selim the Sot, who also was a conqueror—not so much for the glory of seizing the sovereignty of Cyprus as for the forbidden delight of owning its vineyards. As for the "Medellu"—it is a name to keep a recent memory green—and territorial memories, as a rule, are vigorous enough without visible reminders, whether they be the wreaths on the statue of Strasbourg or the name of a battleship. By the way, I cannot help thinking that it was a trifle tactless to name a British ship the "Agincourt" at a moment when our troops are actually marching across that battlefield as allies of our ancient foe. I suggest that "Navarino" would have recalled the only occasion in history which has seen the flags of the Triple Entente flying together on a line of battle in action against a common enemy.

***

I notice that a report of the arrival of the "Goeben" and the "Breslau" in the Dardanelles, sent by Reuter, says that Turkish officers visited the two warships and that the correspondent saw them fraternising with the Germans. This seems to me to be another proof of the kindly disposition of the Turk, of his claim to be one of Nature's true gentlemen. He knew that the two warships had not cut a very glorious figure, and he knew, doubtless, that their officers must be feeling particularly unhappy about it. So off he (as represented at the Dardanelles) went to cheer his visitors up. And I can just imagine him saying to them, as he exchanged salutes: "Bismillah. Congratulations on your—ah—record trip. Wallahi, gentlemen, but you have shown those English drolls how to run!" And never a word about the disappointed heirs who were named in those famous wills. No wonder that the gallant "Goeben" and the breathless "Breslau" quickly cheered up sufficiently to bully unprotected French and British vessels in Turkish waters.

***

Hitherto Mr. Redford has been our only representative of the genus Censor, and people in this country have been rather inclined to scoff at the activities of his *confrères* abroad. Now, however, all Europe seems to have been eaten up by hungry hordes of censors who batten on news which is not good for editors or readers of the Press. These people are almost omnivorous and ubiquitous—and some of them seem to be over-cautious. For example, one young enthusiast used his censorial powers to prevent the King's Message to the Fleet from being telegraphed to Australia, on the ground that the mention of the word "Fleet" might indicate to the Germans that there was a British Navy, and enable them to deduce that as the King had to *send* a message to it obviously the Fleet was not, at the moment, stationed in the pond in St. James's Park, and therefore might be elsewhere. It is alleged, however, that he was prepared to pass for transmission the following cryptic formula: "His —— the —— has been graciously pleased to —— a message to the ——."

***

I have always wondered why the cat was sacred in Egypt—of course there is an excellent and authoritative mythological reason, but there must have been something behind it all, just to start the mythology going. Now, however, there appears to be an explanation. The Egyptians must have venerated not just a common cat, but that vastly important animal of the "Great Jumping" variety. At the present moment numerous sovereigns, prime ministers, and general staff officers are straining their eyes and ears from Eastern and Southern Europe towards the thick of the fighting in Belgium. The Great Jumping Cat is in the act of springing. The very moment that there is any certainty as to the direction in which the influential beast has leapt there will be a helter-skelter tumbling off the political fence which is now so uncomfortably crowded by anxious politicians. Then, of course, there will be a race to the telegraph office to dispatch telegrams—carefully ante-dated—to assure the victors of the undeviating support of the senders. A learned scholar tells me that the proper word for this is aelurolatry, but that is not easy to pronounce, and the man in the street has a shorter—if less polite—word to describe it.

***

During the Balkan wars we often heard of veritable veterans fighting for their country, but the Balkans do not enjoy a monopoly of this fighting spirit. Many men far over the regulation age have been anxious to enlist in our own Army since the war broke out. To my own knowledge, a retired colonel who passed the "three-score years and ten" of the Psalmist two years ago offered his services to the Government on the very day that war was declared—and was accepted as an interpreter.

***

And the same desire to serve the country is being shown in hundreds of ways by men and women alike. I heard the other day of a married couple with a young family, living in one of our seaports, upon whom several officers were billeted. During the embarkation of troops that was going on at the time the host and hostess referred to changed their guests frequently, and, as the housewife said, she not only did not know all their names, but could hardly recognise their faces, so frequently did they come and go. Apparently the authorities responsible for the billeting arrangements thought that they had perhaps been overdoing things in this particular case, for an officer actually called to offer a kind of apology. But he was cut short at once. "We are only sorry we can't do more, please don't say another word," he was told. And since then the lady of the house has actually been cooking extra food for any stray soldier she can catch—no difficult task, my informant adds—because she thinks "the poor dears really don't get enough to eat." Of course, that idea is sheer nonsense. But the mothering instinct will out, and if in this instance it gives some of our Tommies an extra "bit of grub" it does no harm at least.

***

It is reported that Essad Pasha Toptan has informed an Italian newspaper-man that he intends to raise a body of Albanian volunteers and raid—or invade, I am not sure which!—Austria. On what grounds? As the friend of Italy? Hardly, for Italy is not (at the moment of writing) at war with Austria. As a good Albanian? Surely not; for it will hardly be denied that Austria, whatever her motives, was one of the most active Powers in bringing about the recognition of Albana as an autonomous State. As an ally of Servia? Or Montenegro? I hardly think so; though, to be sure, Montenegro has, after all, announced that she has no intention of endeavouring to capture Scodra just at present, and Servia has not been invading Albanian territory of late. So I conclude that Essad must wish to show his good will to the Triple Entente. But I am left wondering *how* he will carry out his invasion of Austrian territory. By sea?

***

The Greek proprietor of a rather well-known hotel in Cairo has this week had an experience which has caused no little amusement to his friends, though he himself has found it hard to see its funny side. Being in London on a visit, he took the opportunity to buy a very fine pair of prismatic field-glasses, and on his return to his hotel, in the Strand, being naturally anxious to test their powers, he went up on the roof for that purpose. Unfortunately for him, his concentrated study of the chimneys of London aroused the suspicions of the lift boy who had taken him up to his observatory. This youth promptly set the rumour rolling that there was a "German spy" at work, and the natural result followed. The police were telephoned for, and in a very few minutes a couple of plain clothes officers arrived in a taxi, and almost before he knew what had happened the luckless Greek *lokandajii* found himself endeavouring to establish his identity and bona-fides. Happily he was able to do so very quickly, and he declares that the police officers treated him with the greatest courtesy and consideration. But his travelling companions, who are not inclined to let him forget the incident in a hurry, are telling the tale—with sundry additions that do credit to their powers of invention. I fear the *hôtelier* feels distinctly sore against the lift boy who was the cause of his trouble.

ADRIATIC RIVALRIES.

The Albanian question has naturally slipped into the background, being overshadowed by the Titanic struggle in Western and Central Europe, but it should not be entirely overlooked even now, in view of its bearing on the policies of two members of the Triple Alliance. A very interesting article contributed by Sig. G. A. di Cesarò to *La Vita Italiana all' Estero* for July 25, deals with the rivalry of Austria-Hungary and Italy in the Adriatic and Albania from the Italian point of view. We give below a *résumé* of the article, the title of which is "Greece and Austria versus Italy in the Albanian Question":—

The news from Albania grows worse every day. The position of the Prince of Wied becomes more and more critical. Sooner or later he may be obliged to leave the country, and the question of finding another solution will confront the Powers. This will be a light matter for the other Governments, but not so for Italy, for whom the situation will be gravely compromised.

Italy and Austria had long been bound by agreements not to seek territories in this region, but the matter did not seem urgent until the recent Balkan wars. Then the two countries decided to take joint action.

It was here, however, that Italy made a serious mistake. In her anxiety to act in concert with Austria she lost sight of the divergence of interests between herself and that Power; and the result of the joint action was that the aims of Austria were upheld, and those of Italy sacrificed.

Austrian interests lay in saving the North of Albania with its Catholic population from Slav influence, and in keeping the growing power and commerce of Servia from the sea.

Italy, on the other hand, had no quarrel with the national aspirations of Servia. Servia on the Adriatic would not be a rival of Italy, but a natural ally. The views of Italy refer rather to the southern portion of Albania. From the military point of view the Bay of Valona sheltered by the island of Sasseno opposite to her unprotected Adriatic coast would be a very serious peril if in the hands of any other Power. Similarly, the Channel of Corfu might become a naval base most dangerous to Italy if, in addition to the island, the other side of the strait also were to pass into the control of the Greeks.

Far from its being an Italian interest to oppose the natural tendency of the Serbs towards the Adriatic, it is of the greatest importance to her that the commerce of the Balkan Peninsula should flow East and West in order to feed Italian industries and Italian transport by supplying Italian products.

That Austrian action is opposed to the aspirations of the Serbs is evident from the strained state of Austro-Servian relations, while the coldness of the feeling between Italy and Greece makes it equally clear that Italian action is directed against the ambition of the Government of Athens.

The outcome of the alliance with Austria has been that the Italians by defending Austrian interests have lost the sympathy of the Serbs, whereas the Austrians and the Germans, who stand in the background, have drawn closer the bonds of friendship which unite them to Greece. That this friendship is sincere is testified by the fact that although Italy has upheld the claims of Austria against Servia, Austria has not supported the claim of Italy against Greece.

This is perfectly clear from the course of events. The expulsion of the Serbs from Durazzo and of the Montenegrins from Scutari, the delimitation of the northern frontier of Albania—in a word, all the demands of Austria were loyally backed by Italy even before the Conference of Ambassadors in London. On the other hand, the demarcation of the southern frontier, a question of vital interest to Italy, was left entirely to the Conference, of which the members were allowed to give their own decision, and were not called on to ratify a prearranged agreement. The Italian point of view found no supporters. Austria having obtained her own ends was now interested in thwarting the aims of Italy; Germany was bound to uphold Austria; the Powers of the Triple Entente were delighted to see the internal dissensions among the members of the Triple Alliance. The hopes of Italy were thus frustrated at the Conference. What course will she now take?

Greece is at present in a very enviable situation, protected by France, courted by the Triple Entente, and at the same time caressed by Germany and Austria, who are anxious to draw this rising young Power within the orbit of the Triple Alliance. She finds protectors and supporters on every side, whereas Italy is driven into complete isolation and can look for help neither to friendly Powers nor to her allies.

The Triple Alliance in truth hides within its bosom the eternal rivalry between Austria and Italy, and Germany, in the nature of things, leans, and must lean, to the side of Austria. This rivalry has for its present theatre the Adriatic and the Balkan coasts, and Italy will be able to hold her position in the Alliance with some show of dignity only so long as she maintains her naval superiority over Austria. Greece, as the force of logic shows and the course of events confirms, has interests not diverse from those of Austria, but in Albania and on the sea she is both politically and economically the rival of Italy. Were she to enter the Triple Alliance she would increase the Austro-German preponderance over the Italian minority; her naval forces united to those of Austria would destroy the slight superiority at present enjoyed by Italy; her action in the south of Albania, in concert with that of Austria in the north, would preclude Italy from all hope of influence beyond the Adriatic.

When one considers all this, and when one notes the successive moves of Austria to shake the position of Italy in Albania, there arises a very grave suspicion indeed—the suspicion whether there are not, behind the scenes, other forces than the mere territorial aspirations of Athens, which push Greece along the path of armed intervention to uphold her claims in Epirus and Southern Albania.

THE PRESS ON THE NEAR EAST.

Turkey and the German Warships.

The reported transfer of the "Goeben" and "Breslau" to the Turkish flag and the dubious attitude of the Turkish Government naturally evoked indignant protests. We quote below some Press opinions:—

The only point with which the public need seriously concern themselves in regard to the "Goeben" and "Breslau" is that their German crews should be taken out. What happens to them after that is of very little consequence, and it would be foolish to make it a subject of international controversy at this moment. If the German crews are taken out, all idea of their being used by the Turks in an attack upon Greece may be dismissed. If the German crews are left in, we have no security that those ships may not reappear as belligerents in either the Black Sea or the Mediterranean. The willingness of the Turks to conform in this matter to the rule of international law which would be binding on all other neutrals is, therefore, a point of high importance to Great Britain, France, and Russia; and we do not doubt that this will be recognised at Constantinople.—*The Westminster Gazette* (August 14).

Through all the recent caprices of her destiny the Ottoman Empire has had no more honest friend than Great Britain; and so long as she repays sincerity with sincerity our friendship for her is assured. Nor need she look far to-day to discover that the hand of Britain is a pretty strong one in war as in peace. But if she has allowed herself to be browbeaten or cajoled into accommodating our enemy, and the enemy of nearly all Europe, then we tell her plainly that our good will is at an end—and she has only to remember the names of our allies in this war to realise what the withdrawal of that good will must mean. German diplomacy in its desperation is intriguing in every neutral Chancellerie to drag States into the war which the Potsdam party has let loose upon the world. There are signs that Germany has failed in every one of these endeavours; and the explanation of that failure is too obvious to need stating. While, therefore, the opportunity still remains, we would counsel Turkey, in her own interests, to recollect the fallacies of German counsels in the first Balkan War, and to resist a more ruinous temptation now. It is the one plain way open to her. Without the support of a preponderating sea-power in the Mediterranean the existence of the Ottoman Empire is impossible.—*The Pall Mall Gazette* (August 13).

The Paris correspondent of *The Morning Post*, under date of August 13, refers to the "great indignation here over the alleged sale of the 'Goeben' and 'Breslau,'" and gives a brief summary of an article in *The Echo de Paris* by M. Herbette, as follows:—

In *The Echo de Paris* M. Herbette recalls the attitude of England to Russia in the Russo-Japanese war with reference to the Russian auxiliary cruisers. On that occasion England insisted that as the warships had entered the Bosphorus as merchant vessels they must remain merchant vessels on leaving the Dardanelles. Similarly to-day England, France, and Russia could not allow these two vessels to enter the straits as German ships and leave them as Turkish ships. M. Herbette ends his article by saying: "As long as there are Frenchmen worthy of the name in the Mediterranean the place of these ships is at the bottom of the sea. If the Turks return to their senses they will accept the inevitable. A little more imprudence and they will attract a storm such as they have never experienced, a storm which would effect the miracle of bringing Bulgaria back to the Slav fold and King Ferdinand to Adrianople."

The Interests of Turkey.

The tendencies of Turkish policy are being watched with anxiety by all true friends of Turkey. We quote below two comments:—

The whole of this situation is at the moment confused and dangerous, but Turkey will, we hope, count the inevitable consequences before she plunges in. . . . The Turkish Government is at the moment in the hands of adventurous people, who naturally desire to profit by the occasion to retrieve their recent losses. But . . . we hope Turkey will take time to survey this situation and decide to act prudently; but the course of events needs careful watching on our part, for, if she decides

Digitized by Google

to come in, it will be probably part of her scheme to stir up trouble for us in Egypt.—*The Westminster Gazette* (August 18).

The recommendations which we and our Allies may make to the Balkan States, other than Servia, must chiefly depend on the action of Turkey. We shall exhort them to keep the peace so long as Turkey keeps it. But should Turkey fling prudence to the winds and hazard the vital interests of her empire in Asia as well as in Europe, on the chance of reconquering Salonika, and of being allowed to keep it when the European war is done, England, France, and Russia will undoubtedly counsel them to revive the Balkan Alliance, and will give it, at the least, their moral and diplomatic support.—*The Times* (August 19).

The Near East and the War.

An article in *The Globe* (August 14), under the title of "The Diplomatic Balance," gives a lucid summary of the motives and interests which would probably govern the policies of the Balkan States and Turkey in relation to the War. We quote below:—

German influence is powerful at the Porte, and the chance of retrieving the disasters of the Balkan war may be tempting. An alliance with Bulgaria for an attack on Servia and Greece is, at least, the subject of anxious consideration at the present moment; and a decisive victory won by Germany would probably precipitate that movement. The most serious restraint upon it is the attitude of Roumania, who has much to lose and nothing to gain by a disturbance of the settlement arrived at under the Treaty of Bucharest—a treaty of which the terms were almost dictated by Roumania herself. Roumania, moreover, cannot afford to incur the hostility of Russia, and she knows that the victory of Austria means death to her hopes of bringing under the Roumanian Crown the millions of the Roumanian race who inhabit Transylvania. Another fact that may now restrain Turkey from departing from neutrality is that her object of wresting Salonica and the Ægean Islands from Greece could so easily be frustrated. If Greece were to join the Triple Entente she would immediately be relieved from all fear of attack by sea, and the purchase of the German cruisers, if it be effected, would be rendered vain. Besides, Turkey must know that to range herself on the side of Germany and Austria is to run the risk of losing much that she at present holds, and to stand to gain very little even if Germany and Austria prevail. In the latter event it is not Turkey but Germany and Austria that will occupy Salonica and establish themselves in the Balkan Peninsula. As for Bulgaria, she would, in the most favourable case, become a vassal State of her all-powerful neighbour. Small nationalities of all others have no reason to wish for the victory of the gospel of Potsdam. They would exist, if at all, on sufferance, and their situation would be like that of the rabbit in the boa-constrictor's cage, waiting till the devourer was ready for his next meal.

The Coronation of the Shah.

We quote below from a note in *The Pioneer Mail* (July 24) which will appeal to all those who care for the future of the young Shah, and the ancient empire over which he reigns:—

The elevation of Sultan Ahmed Shah to the Takht-i-Taous (the peacock throne made for Fath Ali Shah when he married an Isfahani bride known as the Peacock Lady) was doubtless a splendid ceremony, but the element of pathos must everywhere have been apparent beneath the pomp. Hitherto, the life of this young boy of sixteen must have been dismal enough, for he was but eleven when his father was driven into exile and he was made nominal ruler of a "constitutional" Persia. Reports from Teheran told how he missed his parent and spent much time in tears. One wonders what the young Shah's feelings were when Mahomed Ali returned to Persia as an invader and was declared a rebel against his son. Even in the midst of the pomp of coronation it must have been galling for a Kajar Prince to take the oath before the Mejliss, that incompetent debating society which apes the ways of a Parliament. But gloomy as the past has been, and humiliating as the present is, fears for the future must have been uppermost in the minds of many who witnessed the ceremonial in Teheran. Will the boy end his life in peace or in exile or in blood? All the omens make the first of these lots seem the least likely. Yet if it should so happen that Ahmed Shah develops into a man of character his reign may be one of credit and glory. Above all things Persia needs a man, and if that man were found in the person of the Shah, the future of the unhappy country might once more brighten.

The cry for "a man," a deliverer, is as old as history, and it is still heard, and not only in Persia.

The Maltese and the War.

The Malta Daily Chronicle (August 6) contains an interesting account of the scenes in Malta on August 6, when the news was received that Great Britain had declared war on Germany. We quote below:—

The first intimation to be given to the public was the hoisting from our office balcony of the Union Jack and our own Maltese Flag, side by side on the same flag-staff. Simultaneously with this we posted on our notice board outside a poster printed in red and announcing in bold letters that England had declared war. The people on the Square and in Strada Teatro commenced to gather in front of our office and eagerly devoured the contents of the poster. A spontaneous scene of enthusiasm ensued. The crowd which by this time had greatly increased broke out in rapturous applause and gave loud and resonant cheers for the Union Jack, for our own Maltese Flag, and for the declaration. The cheers were renewed with the same vigour when the French and Russian flags were hoisted at each end of our balcony.

The demonstrators increased in numbers and enthusiasm towards evening when:—

At 6 o'clock the "King's Own" and "La Vallette" Civic Bands, preceded by the flags of the Triple Entente, and by our own National bi-colour, and followed by immense crowds, left their respective seats and proceeded to the Palace Square, to the strains of inspiriting music. On arrival on the Square, the bands, amid deafening cheers, played and the crowd sang "Rule Britannia," "God Save the King," the "Marseillaise," and the Russian National Anthem. Just then his Excellency the Governor was leaving the Palace Courtyard in his motor. The bands struck up the National Anthem, the crowds cheered, waved their hats and clapped their hands as the Governor motored along saluting his acknowledgments. Loud cheers for the Governor were raised, after which the demonstrators proceeded along Strada Reale, the bands again playing patriotic airs. A halt was made in front of the Union Club, where a similar demonstration took place amidst lusty cheers for the Army and Navy and the Triple Entente. Enthusiasm was at its highest. The whole of Strada Reale, from Porta Reale to the Palace Square, was thronged by a dense mass of humanity. Amidst frantic cheering, lustily joined in from every window and balcony, the demonstrators moved off from the Union Club to the strains of "Rule Britannia" and by way of Strada Mezzodi proceeded to Strada Genio, halting in front of the French Consulate. The appearance of the Consul, Chevalier Milon de Peillon, and his family at the balconies was the signal for an outburst of tremendous cheering, which was renewed as the bands struck up the stirring notes of the "Marseillaise," which the crowd lustily sung, particularly emphasising the "Marchons, battaillons." "God Save the King" was then played and sung amidst the wildest enthusiasm, the assembled crowd laying particular stress on the significant words of the Anthem "Send him victorious." A similar ovation followed the rendering of the Russian Anthem. For over a quarter of an hour the enthusiasm continued unabated. The air was rent by lusty cries of "Vive l'Entente!" etc., hats were waved, hands were clapped, whilst a considerable number of ladies, who had gained coigns of vantage, and others from roofs and balconies waved their dainty handkerchiefs.

The Warlike Servians.

In *The Daily Telegraph* (August 15) Mr. E. Ashmead Bartlett gives a description of the scenes which he witnessed while travelling through Austria-Hungary and Servia during the earliest stages of the war between the two countries. On the Servian side of the border, he writes:—

On my way up in the train I was much struck by the attitude of the Servian troops. They were clamouring to be led against the Austrians, and, although they were being mobilised for the third time in two years, there was no grumbling and no air of sadness at the hardness of their lot. The recruits and reservists turned up at the station, accompanied by their wives and families in the best of spirits. Each man had a bunch of flowers stuck in the muzzle of his rifle, and all were singing their national songs. As a matter of fact, these hardy, patriotic peasants have become so used to war that they now regard a call to arms in much the same spirit as the average man regards an invitation to a hunt. These men were leaving their homes and their ripening crops on which the Servian nation depends for its existence at the most critical period of the year, and yet they took the field without a murmur, rejoicing at again having to defend their homes against the invader and leaving their womenfolk to do the field work for the third time in three years. I was told that when war was first declared there was a good deal of depression and misgiving, but this quickly passed away, and all the old confidence returned. Nevertheless, when it became known that Germany had declared war, the enthusiasm of the army and the nation knew no limits. An enormous load of anxiety was at once lifted from their minds. No longer was it a question of defending their firesides against the invader, it now became a war of aggression and revenge. The scene in Nish on this eventful Sunday afternoon will not quickly be forgotten. The whole of the population of Nish and the emigrés from Belgrade and the innumerable soldiers and officers turned out and paraded the streets as if celebrating some great national fête. The River Save passes through the town, and there is a shady promenade along its banks. Here this mass of delighted Slavs concentrated in that same light-hearted atmosphere which one associates with Hampstead Heath on a Bank Holiday. On all sides one heard of the war of revenge and of the anticipated march into Bosnia and Herzegovina to reclaim these provinces for the Slav family.

ENGLISH HIGH SCHOOL FOR GIRLS,
PERA, CONSTANTINOPLE.

An English Education on the lines of the best High Schools in England. Girls are received from the age of 5 to 17 years:—Kindergarten, age 5 to 7; Junior School, age 8 to 12; Senior School, age 13 to 17; and are prepared for an English Examination which admits them direct from this School to the University.

For Prospectus and particulars apply to the School, No. 1, Rue de Pologne, Pera, Constantinople.

The New School Year will begin in September, 1914. An Entrance Examination will be held on the first day of term.

Applications for admission, particularly as Boarders, should be made early, as the number of places is strictly limited.

G. E. CHARTERS, B.A., London, *Directress.*

DEATH OF THE POPE.

It is with the deepest regret that we have to chronicle the almost sudden death of His Holiness Pope Pius X. To have sat in St. Peter's Throne during these past ten years must have been a grievous trial to so gentle a man, and the saintly Venetian's last words are reported to have been thanks to God that imminent death would spare him from witnessing any more of the present war. His late Holiness in St. Malachy's prophecy was referred to as Ignis Ardens, and indeed, at the moment of his death, the blazing fire of Teutonic aggression threatens to burn up the civilisation of a continent.

To-day is the birthday of H.I.R.H. the Archduke Franz Salvator of Austria-Tuscany, son-in-law of the Emperor Franz Josef.

To-morrow is the birthday of Her Majesty the Queen of the Bulgarians.

To-morrow is the birthday of H.H. the Princess Xenia of Russia, whose mother is sister to the King of the Hellenes.

To-morrow is the birthday of H.S.H. the Prince of Schönburg, brother of H.H. the Mpreteresha of Albania.

Sunday is the birthday of H.I.H. the Grand Duke Constantine Constantinovitch of Russia, father-in-law to Princess Helena of Servia.

Monday is the birthday of H.I.H. the Grand Duke George Michailovitch of Russia, brother-in-law to the King of the Hellenes.

Monday is the birthday of H.I.R.H. the Dowager Archduchess Karl Ludwig of Austria, step-mother of the lately-murdered Archduke Franz Ferdinand.

Thursday is the birthday of H.R.H. Prince Frederick Leopold of Prussia, brother to H.R.H. the Duchess of Connaught.

Our latest information concerning the condition of the Khedive is to the effect that his Highness in making good progress on the way to recovery. His Highness has, we understand, not yet left Constantinople.

The Egyptian Mail reports that Rushdi Pasha, the Regent, has received the following telegram from Osman Pasha Mortada, Chief of the Khedivial Cabinet:—"The Khedive recommends to those of his subjects who were intending to go to Constantinople to visit him, not to do so under the present circumstances. At the same time he thanks them for their sentiments. His Highness has been informed of the prudent and economical measures taken by the Khedivial Government, and is entirely satisfied with them."

Lady Lowther, whose splendid work in Constantinople for sufferers by the late Balkan War will be remembered by our readers, is now acting as one of the joint honorary secretaries of the Committee of American ladies who are presenting this country with a fully equipped military hospital, which they will support till the war is over.

Sir Reginald Wingate, the Sirdar, arrived at Port Said on Thursday of last week. A Reuter's message from Cairo states that he arrived in that city on Tuesday.

Sir Paul Harvey has been appointed director of the Prisoners of War Information Bureau, which is located at 49, Wellington Street, Strand.

Mme. Take Jonescu, whose husband has left England for Roumania, has been staying at Brighton, but is now in town again.

On July 21 Mr. Mirza Ali Akbar Khan, Consul for Persia in Bombay, held a reception and garden party at the bungalow of Mr. M. H. Pehdashti Walkespwar, in honour of the Shah's Coronation. Persian subjects and others attended. At the beginning of the proceedings the poet Mirza Khurram read a Kasideh (eulogy) in honour of the Shah. A telegram was received from the Private Secretary to Lord Willingdon, which stated: "Please convey to his Majesty the Shah on his Coronation their excellencies much regret inability to attend your garden party to-day." The assembly was addressed in Persian by the Persian Consul, who also proposed the toast of H.M. the King Emperor. The Hon. Mr. Justice Beaman proposed the toast of the Shah-in-Shah.

Sir Murdoch Macdonald, Under-Secretary of State for Public Works in Egypt, is now in Scotland on leave.

Mme. Mishu, the wife of the Roumanian Minister, accompanied by her daughters, returned to London last week.

Zewar Pasha, the Governor of Alexandria, who was to have gone on leave on August 1, postponed his departure at the last moment in compliance with a request from the Regent.

H.H. the Khedive has conferred the 3rd class of the Order of the Mejidieh upon El Kaimakam H. W. Channer Bey, Sudan Government, who is struck off the strength of the Egyptian Army.

On Saturday evening, July 22, H.E. the American Ambassador at Constantinople, and Mrs. Morgenthau, gave a fancy dress masked ball at the Embassy at Yeni-Keuy on the Bosphorus. Among the guests invited were H.H. the Grand Vizier, members of the Cabinet, the diplomatic corps, and other officials and friends. Persian, Russian, Indian, Arab, and native costumes predominated, with the usual assemblage of Pierrot and Pierrette, cowboy, Gainsborough, Louis XIV., and pink coat creations. At midnight supper was served in the Embassy Gardens, which were illuminated for the occasion. A bugle call summoned the guests to a spirited cotillion, during which numerous beautiful favours were distributed amongst the dancers.

Mr. Nenadovitch, the newly appointed Servian Minister to Turkey, was received on July 27 by the Sultan, when his Excellency presented his suite to his Imperial Majesty.

We learn from *The Orient* that Professor Elizabeth Kendall, of Wellesley College, arrived in Constantinople on July 22, and left on July 28 by Messageries for Samsoun. After a trip to Sivas, she expects to go to Persia.

Mr. J. Carkeet James, engineer-in-charge of the Cairo drainage scheme, is leaving London on Friday on his return to Egypt.

Mr. Rizo-Rhangabé, the Secretary of the Hellenic Legation, whose health has given way under the stress of work, has received sick leave, and has temporarily been replaced by Mr. Delyannis.

On the 15th inst., at St. Peter's, Eaton Square, the Right Rev. the Bishop in Khartoum officiated at the marriage of Colonel C. S. O. Monck, Coldstream Guards, to Violet, widow of the late Henry Dawson-Greene.

We regret to announce the death by drowning of Mr. C. A. Ball, of the Sudan Civil Service, through the capsizing of a passenger steamer near Senar, on the Blue Nile. Mr. Ball was educated at Rugby and Lincoln College, Oxford, where he obtained a First Class in Modern History in 1905. A most promising career is thus terminated. Mr. Ball had taken a leading part in the Land Survey of the Sudan, and was a good Arabic scholar.

The *Cyprus Gazette* announces that Mr. W. A. Russell, King's Advocate, has been granted two months' extension of leave on half-pay from August 8, Mr. D. J. Jardine, Assistant Secretary, twenty-six days' extension of leave on half-pay from September 12.

Among the passengers who returned to Egypt by the P. and O. steamer "Nankin" last Friday were Mr. W. S. Blunt, Mr. A. R. Callender, Major Ellgood, Mr. Etherington-Smith, Mr. J. C. Radford, Mr. W. Swanson, etc.

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.
Near the lake, with splendid park.

CECIL HOTEL.
In the town and 5 minutes from the station.

Two First-class Family Hotels.
High-class Cuisine. French Chef.
J. SUMSER, Manager-Proprietor.

Sofia (Bulgaria).
GRAND HOTEL BULGARIE
(opposite the Royal Palace).
First-class Hotel. Entirely renovated and beautifully situated in the centre of the city, near Post Office, Theatre, Museums, Banks, etc. Electric Light. Central heating. Baths. Garage. Telephone. Garden. French Restaurant. Good wines. Café. Foreign newspapers. Most frequented by English and American Visitors. Interpreter meets all trains. Rooms from 4 frs.

Cyprus.
THE CYPRUS HOTEL CO.
Open all the Year round—
LIMASSOL (Olympus Hotel).
FAMAGUSTA (Savoy Hotel).
For Summer Seasons—
PLATRES (Platres Hotel). 4,600 ft. from the sea level. Opens from May till Oct.

H.M. the King of Italy has conferred upon Adly Pasha Yeghen, Egyptian Minister for Foreign Affairs, the Grand Cordon of St. Maurice and St. Lazare, in commemoration of the Duke of the Abruzzi's visit to Egypt and that of Prince Mohammed Ali to Italy.

Mr. E. Boutagy, formerly of the British Vice-Consulate at Haifa, has left that town for Marseilles as a Red Cross Volunteer.

Dr. Ehrenpreis, the former Grand Rabbi of Bulgaria, after paying a number of farewell visits and being received in audience by T.M. the King and Queen of the Bulgarians, has left Sofia for Stockholm.

H.I.M. the Sultan has conferred the decoration of the Imtiaz in gold on Damad Enver Pasha.

There will be a Memorial Service for Lieutenant-General Sir James Grierson in St. Columbia's (Church of Scotland), Pont Street, at two o'clock to-morrow.

H.H. the Agha Khan arrived at Cape Town on Monday from Mombasa, and will proceed to Europe on board the "Llanstephan Castle."

Alfred Silley Bey left London on Friday last on his return to Constantinople.

Miss Johnstone, head mistress of the elementary school for governesses at Boulac, is to be allowed an extension of five years beyond the sixty years' age limit so that she may be entrusted with the management of the normal elementary school for governesses at Alexandria.

A Reuter's message from St. Petersburg, under date of August 19, reports:—The General Staff announces that the Grand Duke Nicolas, commanding the Russian Army, has sent to the Crown Prince Alexander of Servia, through the Servian Minister in St. Petersburg, the following telegram:—"Having received the news regarding the brilliant victory of the valiant Servian Army, I send on my behalf and that of the entire Russian fraternal army cordial congratulations on the first victory which God has given it, and which is the beginning of a series of victories. In my person the Russian army shouts a vigorous 'Zivio' in honour of the victorious Serbs."

APPOINTMENTS, PROMOTIONS, ETC.

Captain C. de Bartholomé has been appointed to the battle-cruiser "Invincible," in succession to Captain Pelly, appointed Chief of Staff to Admiral Sir Henry Jackson.

The following appointments in the Egyptian Army are announced:—

Captain Alban J. Reynolds, 37th Lancers (Baluch. Horse), having reported his arrival in Egypt from India is taken on the strength of the Egyptian Army from July 1, with the rank of Bimbashi, vice El Bimbashi H. V. S. Charrington, struck off. This officer is posted to the Cavalry and Mounted Infantry.

Lieutenant Richard B. L. Bazley-White, Royal West Kent Regiment, having reported his arrival in Egypt from India, is taken on the strength of the Egyptian Army from July 1, with the rank of Bimbashi, vice El Bimbashi G. A. O'Callaghan, struck off. This officer is posted to the 1st Battalion.

Lieutenant Pierce M. J. Brett, M.B., Royal Army Medical Corps, having reported his arrival in Egypt from India, is taken on the strength of the Egyptian Army from July 1, with the rank of Bimbashi, vice El Bimbashi R. J. C. Thompson, struck off. This officer is posted to the Medical Corps.

Lieutenant Basil H. H. Spence, M.B., Royal Army Medical Corps, having reported his arrival in Egypt from India, is taken on the strength of the Egyptian Army from June 30, with the rank of Bimbashi. This officer is posted to the Sudan Government.

According to the *Messager d'Athènes*, Mgr. Arsenios, formerly Greek Orthodox Metropolitan of Strumitza, has been translated to the Hellenic see of Larissa and Platamona. Mgr. Athanasios, formerly Bishop of Myreon (Kavalla) has been translated to the see of Argolis, and Mgr. Ambrosios to that of Naupaktos-Eurytania from Christoupolis.

Mr. Hoff, Inspector-General for the Bitlis section of the Anatolian provinces, left for his post on July 24, going by Russian steamer to Trebizond.

An Imperial iradeh has been issued permitting Bekir Sami Bey, Vali of Beyrout, to wear the decoration of the Legion of Honour conferred on him by the French Government.

Houloussy Bey, Director-General of the Hejaz Railway, formerly Ottoman Minister of Public Works, has been appointed Vali of Syria.

Dr. Reshid Bey, Mutessarif of Karassi, has been appointed Secretary-General to Hoff Bey, Inspector-General of Reforms.

Hagop Boyadjian Effendi, formerly deputy for Rodosto, has been appointed Inspector-General of the three vilayets of Erzerum, Trebizonde and Siras.

The appointment is gazetted (June 15) of Mr. W. D. Woodside Matthews as H.M. Vice-Consul at Cavalla.

The following have obtained appointments in the Egyptian and Sudanese Civil Services:—Egyptian.—P. C. B. Blair, R. M. Gent, R. J. L. O'Donoghue. Sudanese.—E. R. Burgess, E. G. Coryton, J. G. Monteath, J. A. Reid, C. H. Thomson.

OBITUARY.

LIEUT.-GENERAL SIR J. GRIERSON.

Lieutenant-General Sir James Grierson, commander of the Second Corps of the Expeditionary Force, who died of heart failure on Monday morning whilst travelling by train, first saw active service in Egypt under General Wolseley, being appointed on the Staff as Deputy Assistant Quartermaster-General in the Intelligence Branch of the Indian Contingent. He was present at the action of Kassassin and the battle of Tel-el-Kebir, was mentioned in despatches, and received the medal with clasp, the Khedive's bronze star, and the 5th class of the Order of the Mejidieh. When the Gladstone Government decided on the Suakin Expedition of 1885, Grierson was selected for special duty and appointed Deputy Assistant Adjutant and Quartermaster-General on the Headquarters Staff. The expedition accomplished little, but there was some desperate fighting on both sides at the battle of Hasheen, when the Sudanese charged our cavalry, "throwing themselves on the ground at the critical moment of the charge, and slashing with their swords at the horses legs." Graham went on to Tamai, but Osman Digna had retired to the waterless interior, and the advance was abortive. Grierson's services were recognised by mention in despatches, and a further clasp to the medal.

MAJOR A. HUGHES-ONSLOW.

Major A. Hughes-Onslow, late 10th Hussars, Reserve of Officers, who died on August 17 on active service with the Expeditionary Force, served with the Egyptian Expedition to the Sudan in 1884, and was present at the battles of Teb and Tamai, for which he received the medal with clasp and the bronze star. He also saw service in the South African War of 1899-1900. Major Hughes-Onslow was noted as a military steeplechase rider, and his successes in that field were remarkable.

DOMESTIC ANNOUNCEMENTS.

BIRTH.

BRETT.—On July 29, at Suez, Egypt, the wife of E. Bryan Brett—a son.

MARRIAGE.

WEDD—HEBDITCH.—On August 11, at the Parish Church, Stoke-sub-Hamden, by the Rev. G. G. Monck, M.A., vicar, Richard Wedd, of the Sudan Civil Service, to Lucy Marguerite, daughter of the late B. S. Hebditch, of Stoke-sub-Hamden, Somerset.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

UPPER EGYPT.

Luxor.
The Winter Palace. The Luxor Hotel.

THE PORTE AND PEACE.

The advisers of the Ottoman Padishah are faced with what is perhaps the gravest responsibility in all Turkish history. It lies with them to decide upon the destiny of their country; for it is within their province to advise the Sultan as to peace or war. And upon this decision rests, we believe, the fate of Turkey. Let us review the facts which lead the impartial observer to arrive at this conclusion. For several years past the Germans have been assiduously pushing themselves forward throughout the length and breadth of the Ottoman dominions. Under the skilful direction of their capable Ambassador, the late Baron Marschall von Bieberstein, they made immense commercial and political progress throughout the Empire. The adroit combination of politics and finance, the magnificent advertisements which they provided for their national enterprises in the shape of imperial peregrinations, naval visits, pompous Consular establishments, and military missions greatly appealed to the Oriental imagination, and in the admiration won for the glitter and display of mailed fists and shining armour the beholder was apt to forget that the German national motto was and is *Deutschland über alles*. When it was realized that all this overwhelming display of imperial affection had to be paid for in kilometric guarantees, loans at usurious rates, grossly unfair armament contracts and harassing commercial concessions it was found that it was too late to draw back. The Imperial Eagle, like the vulture of Prometheus, was inexorably preying upon the living body of the Ottoman body politic. Yet Germany has the ambition to figure as the friend of the Porte, and urges upon the Sultan that his interests compel him to join the Teutonic Powers in their war of aggression.

To an unbiassed observer such advice can only appear as counsels of despair. Turkey is no longer geographically continuous with the territory of those who are so anxious to convert her into an ally. Her navy lacks experience, and it is idle to suppose that the successors even of Khair-ed-Din Barbarossa could hope to strive on equal terms with the men who have swept the Teutonic flags from the high seas. One can almost consider the action of Germany in attempting to enmesh Turkey in her desperate policy as being prompted by a desire to have something to fling to the wolves which are rapidly overtaking her sleigh. She may hope that the prospect of partitioning Turkish provinces may act as surely as a solvent of the integrity of the Triple Entente, as it did upon that of the Balkan Alliance. Whatever may be her proposals, it is at least certain that Germany is anxious for the Porte to plunge into war solely for her own benefit, and is not concerned in any way for the future welfare of the Sultan or his dominions. It is even said that Germany would be willing to sacrifice Turkey *in toto* if by so doing she could fend off from her own territory the consequences of her Prussian policy. And what is Turkey to gain by war? If she relies upon Bulgarian co-operation, either active or passive, in an adventure against Salonika, she will be as gravely disillusioned as was Germany in her calculations based on the imminence of civil war in Ulster. Can she hope to attack Egypt or recover the Islands without first securing the command of the sea? How can she hope to gain what the mighty fleet of Germany has as yet not dared to challenge? The days are past when Egypt could be had for the asking by any army of horsemen from the north-east. It is ridiculous to assume that the sentimental longing of a few Free-thinking and other non-Moslem fanatics for the city of Salonika or even the more comprehensible ambition on the part of many Turks to recover the Islands can plunge the Empire of the Ottomans into a more hopeless war than any in which it has yet engaged. Yet the ridiculous may come about. And what then? There can be but one answer. If the Porte be affected by the *furor Teutonicus* and allows its German-trained officers to drag it into war, then it will have definitely proved itself completely unfit to be entrusted with the sovereign power of deciding upon peace or war. Great Britain has the oversight of too many Moslems for it to be possible for an Ottoman Prince at war with her to retain the Khaliphate. In such circumstances the sword would once more have to settle the succession to the office of Commander of the Faithful as it has so often settled it before. Can the House of Osman afford to risk both its temporal dominions and its spiritual authority at the beck and call of a faithless Teuton who is bound neither by his spoken word nor his written bond? Is Sultan Mohammed Reshad Khan to imperil all that he has because the King of Prussia has made a mistake—that King of Prussia who has treated Turkey as his milch cow and battened upon her for years?

The policy of Great Britain has in the past been consistently friendly to Turkey. If we have been less flamboyant in our protestations of affection than our theatrical competitors, we have been more honest. Our Government has taken its friendship so seriously as to give at times unpalatable advice. This journal in particular has upon occasion sharply criticized official acts when calculated to damage the reputation or the prospects of Turkey. We have deplored the wholesale expulsions of Greeks on humanitarian and economic grounds, although we have appreciated the causes which led up to this drastic action. We sympathized with Turks in the hour of defeat, and recalled the days when our troops fought side by side against Muscovite aggression. We have never sought to bind the Porte with financial fetters for our own benefit, nor have we used our political influence to inflict economic hardship upon the Ottoman peoples, nor burthened the Turkish Treasury unfairly for the benefit of our own pockets. We came as merchants into Turkey, and as merchants have we remained. We have ever realized that honesty was the best policy, and have charged a fair price for reputable goods. We have built railways and other engineering works on commercial lines, and conducted them soberly on mercantile principles. Ours has not been a meteoric career of political advertisement and prestige hunting at the expense of a bewildered population. If we have anything of which to be ashamed in our treatment of Turkey in the past it is that there were times when we allowed her to be deceived by the specious policies of an astute rival, whose cunning prompted him to use the Porte as a stepping-stone towards his ambition of world-power.

So it comes to this. There are two paths before the Cabinet of Stamboul. The one, along which certain German-trained officers desire to press, leads to war. The other leads to peace. If Turkey moves along the path of war and partakes in an ultimate Teutonic victory, she will lose her independence as surely as will all the other small peoples whose existence does not fit in with the schemes of Teutonism. She will be administered by German officials, and from being an eagerly-courted ally in the hour of need the best she can possibly hope for is the soul-less existence of a German protected State with its territories closed to all commerce excepting that of the Fatherland. We have already pointed out that a Teutonic defeat means the extinction of Turkey and the loss of the Kaliphate to her ruling House. So much for the path of war. The Powers of the Triple Entente do not ask for the armed co-operation of the Porte; they are unwilling to expose the Sultan and his dominions to the expense and drain of a third war, but in the event of their own arms proving victorious they offer to restore to Turkey all those concessions which have been wrung from her by the Germans. The Triple Entente stands for the liberties of Europe and for the right of the small States to live. German aggression is to be stopped, and that which it has already seized is to be restored where possible to the former proprietors. Turkey will benefit from this redistribution of the spoiler's booty. It will be restored to her as being hers by right, not as a pay-

Digitized by Google

ment either for armed assistance or as an inducement to remain neutral. The Oriental mind is fully capable of realizing the difference between the bribes of timorous weakness and the magnificent generosity of strength; it can also appreciate the abstract justice of such a restoration of goods. Moreover, the Moslem can realise that this is no question of a *jihad*. Mussulmans already fight on both sides in the present war; the integrity of Islam is not imperilled, neither the Holy Places nor the person of the Khaliph are endangered; there is no call to fight because certain Donmehs, Jews, and Freemasons desire to possess a city in Macedonia, or because a few officers trained in Germany sympathize with their former temporary comrades in arms.

WESTWARD BOUND.

(From a Correspondent.)

s.s. "Llandovery Castle,"

August 12, 1914.

When we went on board at Port Said on July 25 our thoughts were very far from war; rather, they were full of the hardship of having to embark at two o'clock in the morning. We felt extremely ill-used, having sat up all night, as the ship had been expected at 11 p.m. Cox's agent, cheerful despite his vigil, hurried us on board, and deposited our luggage in the cabins. "You count your luggage? It all right? Yes? Thank you very much! Hope to see you here again. Good-bye, lady!" We repaired, mournful still, to the cabin. "Better unpack to-night—it may be rough to-morrow." The result being that it was half-past four before we fell into our bunks, and the delicate rose of an Eastern dawn was flushing the sky.

The night before we got to Naples we heard that Austria and Servia were at war. To those of us who have interests and ties with Turkey in Asia the news brought grave misgivings, for who can say that a war with such big issues at stake as the Slav and German questions can be localised? It would seem that Austria prefers to fly at small game—distracted Turkey in 1908, and now Servia; it is wise, perhaps, to minimise the risks of war. The two days at Marseilles are packed with bigger interests. Everything is so uncertain; rumours of war flying around, soldiers everywhere, no one to unload our cargo. The banks are guarded by police, and crowds stand *en queue* from those unresponsive doors far into the next street. Later on, as we are being served in a shop, a man rushes in, flinging like a bomb the news, "General mobilisation!" The shop-women burst into tears. "Mon Dieu, mon Dieu! This touches us all!" "You, too, mesdames, for you are English—you go with us." A curious, spontaneous little tribute this to the Anglo-French friendship—"You, too, *for you are English*." The streets are bubbling over with excitement. True, we see women and girls tearful and distressed, but the men are wound up to the highest pitch of excitement. A stout man waves his stick over his head, shouting "Vive l'Armie!" and those around take up the cry in a frenzy of joy.

Our ship unloads all night, and gets away at 6 a.m.—just twelve hours after the time she was announced to sail.

Our fate overtook us at Gibraltar; we were not to sail without permission; also, our wireless installation was disconnected, by order; there must be no picking up of news. There could be no better place in which to be held up, on an English boat under the shadow of the Rock. Perhaps there is no other place which thrills you through and through with such a sense of England's greatness; echoes of that Titanic three years' struggle come down through the centuries to us still. "God of Battles, was ever a battle like this in the world before?" We were by no means alone in our inglorious safety; every hour ships came in, and anchored. The —— flew in early on ——, having been recalled when some 500 miles on her way home. We were all at pretty close quarters, but we were allowed no communication either with each other or with the shore. One night the ——, our nearest neighbour, flashed us news; another time, we watched the Japanese crew of a small boat pounding each other savagely; and twice, French passengers (turned back at Lyons, because the trains were all in use for military purposes) were taken off on steam launch or sailing boat, and whisked right across the Bay to Algeciras. These were our sole distractions—these, and the ever-changing beauty of our Harbour of Refuge. Not one of us can forget those days; and the scene by night was of magical beauty, hemmed in as we were by the starry lights of the Rock and the Bay, and comforted by the unsleeping searchlights from the shore. We felt so safe; but we felt so much shame, too, to be living the lazy, idle life of board-ship, while England was at war. It was not of our choosing, however.

The third officer, who was on the active list of the Navy, went off to active service; we cheered him as he left. Of course, we could not cheer when the perky little torpedoes hunted in German boats from time to time. To pass Gibraltar at any time always seems to annoy German ships and passengers (I wonder why?), so that to be prisoners in Gibraltar harbour must be quite acutely bitter for the poor things.

On the third day the captain went on shore, and returned with permission to sail. The sea was safe. British ships about. Most joyfully we started off, in our appointed order, which was third. But first we had one awful moment; we were stopped at the mouth of the harbour. It appeared that our freedom depended on the immediate production of a green ticket, which the captain wished to reserve against our arrival at Southampton. "Just as you please, of course," said the harbour master, very pleasant and polite; "but until I have that ticket I'm afraid you can't go!" Finally the green ticket was handed over, and we sped upon our way. A somewhat turbulent Bay of Biscay received us—rendered nicer by the frequent reception of news by wireless; and a pleasing touch of adventure was added by the lights in saloon and cabin being carefully shuttered every evening, so as to attract no undue attention. Off Ushant a French cruiser stopped us, and inquired our destination. "You can't go to Southampton," it said; "go to Plymouth." "But why?" was our natural query. "The reasons are private," was the reply. We, therefore, altered our course; but the night before we were to reach Plymouth (which we expected to do at 4 a.m.), a British cruiser forbade us to go there, and sent us on to London. All the night before we reached the docks we were under searchlights from ships and from the shore; and we were stopped three times. It was just a bit trying not to know where, or when, we should finally put in, but it gave one a splendid idea of England's vigilance and command of the seas. So we drew near to England, only five days late after all; but five full, exciting, restless days!

People are fond of saying, "How sad war is!" It is sad, because of the suffering it entails. But war has always been to England the call direct from God to lay by the pettiness of party strife, and the selfishness that a long peace must bring. Here and to-day she is grasping the sword that has been put into her hand, and in answer to the heaven-sent commission to defend the peace of Europe, the cry rings out through the length and breadth of the Empire,

"We come!"

LETTERS TO THE EDITOR.

The columns of The Near East *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* The Near East.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

THE POSITION OF TURKEY.

To the Editor of The Near East.

Sir,—Like the correspondent whose letter you published last week under the above title, I am a pro-Turk, but I must admit that the "purchase" of the German warships has caused me a good deal of uneasiness. It seems to me to indicate that Turkey seeing the waters of Europe so troubled is at least thinking about fishing in them; and I fear that should she do so the result will be—to put it plainly—that there may in the future be no Turkey at all!

The pity of it is that if only they were left to their own devices just now the Turks would probably keep out of trouble. But, as your correspondent observes, "tremendous pressure is being put on Turkey to throw in her lot with the Austro-German Alliance." Will she be strong enough and wise enough to resist that pressure? My own impression is that if she listens to the voice of Talaat Bey, Djemal Pasha, and Halil Bey, the President of the Chamber, she will; but if Enver Pasha gets his way, I doubt it. And the thought that Enver is *not* a Turk at all, but an Albanian (as I believe, though I have overheard it argued that he is a Pole!) does not help one to face with any patience the possibility of his breaking-up the Ottoman Empire.

As to the possibility of doing *us* any very serious harm, I, for one, am not vastly disturbed on this head. For one thing I fail to see how the most rabid Turk could start a "jehad" against us for the benefit of Germany and Austria. At all events, Egypt and India would both see through *that* pretence; and I fancy that even the "youngest" of the Young Turks (not to say the most foolish) realizes that that cock will not fight.

But suppose, for the sake of argument, that Enver and his friends got the upper hand, and, egged on by their "disinterested" German "friends," thought to invade Egypt. Would they have any ghost of a chance of success? The Hejaz Railway only goes as far as Medina; it is a badly made, single line, not suited for carrying large supplies of men or war material with any rapidity; and between it and the Egyptian frontier there is a desert march that would take some negotiating. There are at present no important Turkish forces in Arabia that could be transferred northwards; for the Yemen garrison is at low ebb. And such as there are could only be moved by sea—which means, of course, that we could easily prevent their being moved at all.

A Turkish concentration towards the Egyptian frontier would be a very slow operation, especially in view of their powerlessness to use the sea. Meanwhile if they committed themselves, the Russian Army of the Caucasus would at once invade Armenia, almost without resistance, and the coasts of Asia Minor and Syria would be open to attack from the sea by the British and French squadrons—to which, in all probability, would be added the Greek. Smyrna and Beyrout would be occupied, and the Dardanelles would be threatened, if not forced, by the combined squadrons.

Add to all this that the Arab populations of Mesopotamia and Syria are not at all well affected towards the Young Turk Government, and would probably seize the opportunity to rise, and I think we have a combination of circumstances sufficient to give pause to the biggest fire-eater going.

Personally I should be glad to see Turkey building up a moderately strong navy. But I cannot pretend to be gladdened by the reports of the purchase of the "Goeben" and the "Breslau" at the present juncture, because it looks as if the Turk was merely being used as a catspaw by the Germans. And that in turn would mean that the hotheads, at a time of extraordinary danger (*to their own country*, not ours), had succeeded in getting control of affairs. For the sake of Turkey and the true Turks we can only hope that the more sober element in the country, which, as your correspondent truly says, "is not anti-British," will make its influence felt at this critical time.—Yours, etc.,

EGYPT AND THE WAR.

To the Editor of The Near East.

Sir,—What will be the position of Egypt in the unfortunate event of Turkey being embroiled in the present war? It has been declared in the highest English Court that the Land of the Pharaohs is not merely no part of the British Empire but is still a constituent part of the Ottoman Empire. That doctrine was declared by the Judicial Committee of the Privy Council as recently as 1888, but much water has flown under Kasr-el-Nil Bridge since then. There have since been innumerable treaties entered into between this country and others to which Turkey has always been a party, but the principle laid down has remained unaltered. There was a time when the terms of treaties were honoured by all the nations which were signatories to them, but when a great Power which claims to be the most cultured of the world arrogates to itself the right to disregard its own solemn obligations when these obstruct the achievement of its objects, international law and all that it implies may be put into the melting-pot. The relations of Egypt with other countries must undergo a change. Forces are at work in regard to her economic and social life which must transform them.—Yours, etc.,

Ptolemy.

SERVIA AND AUSTRIA-HUNGARY.

To the Editor of The Near East.

Sir,—Permit me to point out that the article on this subject quoted by you contains evidence that the writer was not fully informed as to the political relations between Austria and Hungary.

As an example, I refer to the statement "But whenever Austria wants to annoy Servia or to please Hungary all she has to do is to raise the tariff rates on trans-Danubian produce."

This implies the belief that Austria makes laws for Hungary, and shows ignorance of the fact that Austria and Hungary are distinct States; that each has its own Parliament and Government, and makes its own laws. It is true that by mutual agreement, foreign affairs are carried on in common, and that there is a common Customs' boundary; but before action relative to foreign States can be taken, it is necessary that Acts of corresponding character be passed by each Parliament.

This is very different from Austria legislating for Hungary.

The article also contains evidence that the writer believes that Austria and Hungary form one State and one country, apparently unaware that Austria and Hungary have never been federated, and do not form one common territory; and that there are neither "Austro-Hungarian" subjects nor "Austro-Hungarian" laws.

Our Government officials evidently know that "Austro-Hungarian" subjects do not exist, for the slips recently attached to the public notice to aliens state that the notice now refers to Austrian subjects and to Hungarian subjects.

Had the slip been addressed to "Austro-Hungarian" subjects, all Austrians and all Hungarians in this country could have reasonably pleaded that the notice was not addressed to them.

It may seem strange, but it is true that Austrians and Hungarians are foreigners to each other, and that in many matters in their respective countries they have to comply with the rules applicable to such persons.

I should like to avail myself of the opportunity of stating my confident belief, based on extensive knowledge of the Hungarian people, that they have entered on this war with great reluctance; that they only did so to avoid an open rupture with the Austrians; and that if they had foreseen the effect upon the relations between themselves and the British nation, they would not have given their consent, without which Austria could not have taken military action, except as a breach of the Compromise.—Yours very truly,

W. H. Shrubsole.

"Dalkeith," Chelsham Road, Croydon,
August 17, 1914.

"CAPTAINS—COURAGEOUS?"

It was the "Goeben" and her mate,
From shelter in Messina's bay,
Went nobly forth to meet their fate,
Gay-decked, as for a holiday.

Stout hearts, that never more shall see
The sun on German vineyards shine!
Their pennons streaming gallantly,
While bravely peals the "Wacht am Rhein."

Te morituri! Forth they go
To death, as to a banquet! Stand,
Irreverent world, and learn to know
What heroes guard our Fatherland!

The foe lies yonder—two to one,
At least—beyond th' horizon line;
Now gaze your last upon the sun,
Drink one last cup of good Rhine wine!

* * * * *

But lo! a wonder did befall,
Which proved the wise Teutonic head,
They never sold their lives at all,
—They sold their ships instead.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

Last week I suggested that our business men could not do better than turn their attention to the openings for British enterprise abroad which would follow on the throttling of German overseas trade by Sea Power. I am glad that the Government is acting on the advice, and as a preliminary step is collecting and disseminating information. British manufacturers, I feel sure, will not hesitate to use the eyes and ears which are supplied by the agents of Government departments in our colonies and neutral countries, and will go ahead with confidence Not only will they be serving their own interests, but will also be performing a patriotic duty. Prevention is better than cure, and providing employment now is better than alleviating distress later. I have no doubt that British manufacturers can capture many of the markets hitherto exploited by the Teuton if they bestir themselves before it is too late. I have just read that urgent cable orders have been placed with the large Nottingham hosiery firm of Thomas Adams for nearly 2,000 dozens of hose to be promptly despatched owing to the inability of Teuton manufacturers to complete orders. Buyers in the Near East should note that British firms will gladly execute orders which otherwise would have gone either to Austria or Germany. But British firms must not stand and wait, for their rivals will be up and doing.

***

The fact, reported by the Constantinople correspondent of *The Times*, that after a week of waiting the firmans allowing British vessels to pass the Dardanelles and the Bosphorous had not (on the 13th inst.) been issued is not pleasant reading for one who is well disposed towards Turkey. It is made all the more unpleasant by the statement in the message that Enver Pasha had given written assurances on the subject to the British Chargé d'Affaires. *The Times* correspondent suggests that "If the Government persists in imposing such restrictions on foreign commerce, and continues to allow the military authorities to commandeer cargoes addressed to foreign consignees here without giving receipts for the same, trade with Constantinople is likely to be greatly diminished in the near future." I can only say that I am surprised by the moderation of the statement. I have heard it put very differently by more than one indignant member of the shipping world.

***

As far as this particular annoyance is concerned, it is satisfactory to learn, from later messages of *The Times* correspondent, that the grain ships have been allowed to pass the Dardanelles. This happy result has been brought about by Sir Louis Mallet, who arrived in Constantinople on Sunday evening, and lost no time in impressing on the Ottoman Government the folly of its conduct. I hope we shall hear of no more such incidents. But I cannot avoid thinking that someone ought to talk—kindly, but very, very firmly—to the military enthusiast who seems to be at the root of all the trouble. Otherwise I should not be at all surprised if that second loan with France never came off at all—which would be unpleasant for Turkey.

***

It is very satisfactory to learn that more than 75 per cent. of the large amount of specie which was sent overland to Constantinople from Paris before the War broke out has reached Constantinople. The news reached London last Friday that out of a total consignment of gold worth £180,000 despatched in two parts, a quantity valued at £140,000 had arrived at its destination. As the gold was sent across Austria to Constantza and thence by sea to Constantinople, there was some ground for apprehension, and it is not surprising that high re-insurance rates had been quoted. The news, as may well be believed, was received with great rejoicing when it was announced at Lloyd's.

***

The decision of the Egyptian Government to make the notes of the National Bank of Egypt legal tender may have consequences more far-reaching than anticipated. If they should prove thoroughly popular it would certainly be a convenience just now, as it would do away with the necessity of importing specie for the moving of the cotton crop. But I am inclined to doubt whether that necessity will disappear entirely just yet. The Fellah is a conservative soul; he likes to see, and feel, gold; and he is certain to try to get gold instead of notes, and to make a fuss if he doesn't just at first. If the authorities decide to humour his likes and dislikes, they will probably import sovereigns from India.

***

I mentioned last week that this country is taking a much smaller percentage of Egypt's export of cigarettes than it did twenty years ago. The actual figures for last year were, I find, £E59,160. It may be of interest to some of my readers to learn that the United States Consul at Alexandria reports that in 1912 cigarettes to the value of 27,758 dollars were exported from Cairo and Alexandria to America, and in 1913 the figures were 27,553 dollars. I do not know whether any considerable shipments of cigarettes to the States takes place from any other point in Egypt. But I am much surprised to find that the figures are so small for the two centres given; for the Americans are usually keen on a good thing, and surely the Egyptian cigarette is the very best thing of its kind.

***

In the same report from which I took the figures just quoted I gathered several other items that seem to be worth passing on. Thus in 1912, I note, antiquities valued at 4,974 dollars (say nearly £1,000) were shipped from Alexandria to the United States, while Cairo sent "antiquities and curios" valued at 22,805 dollars This is a considerable item, but the figures are not by any means as high as I should have expected to see them, having regard to the American traveller's passion for "old things" and "notions," and I am not surprised to find that in 1913 Cairo alone sent antiquities and curios valued at 65,068 dollars. The classification, by the way, is a little puzzling. Why "antiquities" at Alexandria, and "antiquities and curios" at Cairo? Again, why in the capital's list are not mummy cases included in the "antiquities" category? In 1913 they figure amongst the exports to the tune of £100.

***

It is with some surprise that I learn from a Consular report lately issued that the Russian Discount Bank closed its branch in Birjand when it was found to be working at a loss. It was expected that Russian trade would increase, especially in Kain, owing to the special facilities offered to Persian merchants by the bank, and it did import consignments of piece goods, glassware, and loaf sugar for certain Birjand traders. The goods, moreover, gave satisfaction. The reason why the bank closed in April last year was that the Birjandis would not accept certain conditions on which the directorate of the bank in St. Petersburg insisted, and consequently its business was unprofitable. This withdrawal seems to me to prove that the bank in Birjand was a purely financial or commercial venture, and did not cloak some deep-laid political scheme. And to this point I would call the attention of those good people who think that *all* Russian action in Persia is inspired by Government.

***

An enterprising and progressive man is the Mayor of Smyrna. I learn that he has returned home after doing a grand tour of various European cities with a scheme of reform which, if it is ever carried out, will completely westernise that famous town. He has planned many schemes for the embellishment and improvement of the town, among which may be mentioned the widening of the streets, the laying out of public parks, laying a new sewerage system, and generally revolutionising the four quarters of his municipal kingdom, the European quarter included. Where the necessary money to cover the cost of all this is to come from I have not yet ascertained, nor can I see how he will succeed in converting the Turkish Government and his own immediate colleagues to his views. Still, we are told by *The British Trade Journal*, he is "an enterprising man with European education." Inspired by all he saw that is best in European municipal government, he may succeed in the accomplishment of his plans. At least he merits encouragement for having so openly declared them.

***

I do not know whether the Cretans are big beer-drinkers, or, if so, whether they are admirers, and buyers, of British beer. If they are they will be sorry to find the price of their drink go up considerably. At least, that is what I gather is likely to happen; for one of our best-known firms of brewers is bewailing—and naturally so—the announcement that on what they paid a duty of only 2s. 3d. a short time ago they will, in all probability, in the near future, have to pay £2. This would certainly prove a severe handicap on the importation of British beer, and I am not surprised to learn that our Foreign Office has been asked to see if it can do anything in the matter. At the same time if Greece likes to clap on such a duty, for any reason whatever, I cannot see what we can hope to do about it.

Constantinople Business Letter

(From Our Own Trade Correspondent.)

Constantinople, July 31.

The Commercial Situation.

Looking at the situation from a purely local point of view I am struck with the fact that the month of July seems to be an uncommonly unlucky one for this market. On July 20, 1912, a day after the appearance of Italian torpedo craft in the Dardanelles, I wrote, "It is not within my province to touch upon the political situation; but at the present time it so entirely overshadows and dominates the commercial situation that it is impossible to ignore it." On July 12, 1913, I wrote, "This is intended to be a commercial letter, not a political one, and yet commerce being for the moment relegated to a back seat, there is little, if anything, upon which to report." Reference is then made to the irregularity of the mails, to the war between the erstwhile Allies, and to the entry on the scene of Roumania, as being a new factor, only tending to add yet another element of uncertainty to the imbroglio.

Either of the two sentences quoted above might have been written to-day, the conditions are so similar, from a widely different cause. During the last week or two the market had shown a marked tendency to improve; with the outbreak of war between Austria and Servia, and the daily growing war clouds all around, the market is dead. Orders are not being accepted, and in some cases manufacturers have been advised to hold back shipments.

Run on a Bank.

For two days there has been a run on the local branches of the Wiener Bank Verein, and the amount paid across the counter is said to have exceeded the sum of £T250,000. Whether the Austrian Government has laid an embargo on the gold reserves of this bank is not known here; anyway there can be no question of the sound position of the bank, and it will be helped over any temporary local difficulties by other concerns. At the same time cheques on the Continent are not negotiable on this market.

Treasury Returns.

The Treasury receipts during the month of March (old style), 1914, as shown by the returns just published, amounted to £T2,026,600, and were actually £T1,255,400 less than during the corresponding month of the previous year. In last year's receipts for the month of March, however, there were certain extraordinary items, which do not appear in the present returns. Amongst these were such items as the Egyptian Tribute £T750,000, the Cyprus Tribute £T102,590, the interest on bonds deposited with the bank £T180,420, and certain receipts from railways, Tombac, etc., totalling £T1,199,680, reducing the actual decrease to £T55,720. If, for sake of careful comparison, deduction is also made of sundry other items appearing in last year's returns, but not yet reported in the present returns, this deficit becomes an apparent increase for the remaining revenues of the Empire of £T9,750.

Electric Enterprises.

The traffic receipts of the Constantinople Tramway Company for the month of June, 1914, amounted to £T21,182, as compared with £T20,587 during the month of May, and £T17,657 during April. On June 30 was registered at Brussels a company under the name of "Tramways et Electricité de Constantinople," with a capital of 18,000,000 francs, subscribed by Belgian, German, French, and Swiss banks. The object of the company is to take over the "Consortium" which has obtained options on the working of the Metropolitan Railway from Galata to Pera, the Constantinople Tramways, the Electricity Supply Company of Constantinople, and the concession for an underground railway from Stamboul to Galata-Pera. The realisation of this programme will necessitate the gradual issue of shares and debentures for a sum of about 90,000,000 francs.

Tobacco Regie Company.

The sales of the Tobacco Regie during the month of April, 1914, were £T217,834, as compared with £T190,740 during the same month in 1913; £T246,000 during the month of May, 1914, as compared with £T204,672 during the same month in 1913; and to £T251,000 during June, 1914, as compared with £T206,000 during the same month in 1913.

Shipping.

With the uncertainty of the situation Austrian tramp ships are not going into the Black Sea, and are being held in Constantinople pending instructions from their owners. One of these ships in ballast, the "Baltico," anchored off Haidar Pasha, was in collision with a Greek steamer, the "Cardomilla," coming loaded from the Black Sea. The damage was insignificant.

An Athens message, dated the 16th inst., stated:—"It is officially announced that Turkey is seizing the cargoes of all steamers, independent of nationality, and consequently several steamers which ought to have set out for Constantinople have put back. Greek steamers carefully avoid approaching Turkish ports."

BUCHANAN'S SCOTCH WHISKY

"BLACK AND WHITE"

ALWAYS THE HIGHEST QUALITY

FORESTS IN TURKEY.

The Journal of the British Chamber of Commerce reports that the Union Permanente des Délégués du Commerce Etranger has published a résumé of the latest Volume of Statistics for the year ended March 13, 1910, issued by the Ottoman Ministry of Agriculture, Mines and Forests. Since the date covered by these statistics the Empire has undergone some changes in its European provinces. Before these changes took place the superficial area of forest land administered by the State amounted to 8,900,489 hectares, or 8.83 per cent. of the total superficial area of the Empire. In the order of their importance the provinces richest in forests were Salonika with 1,146,170 hectares, Aidin with 929,208 hectares, Brusa with 907,362 hectares, Castamuni with 716,000 hectares, Bolu with 600,000 hectares, Trebizond with 496,000 hectares, Carassi with 495,000 hectares, Konia with 480,368 hectares, Adrianople with 426,878 hectares, Adana with 420,655 hectares, Cossova with 379,000 hectares, Monastir with 352,800 hectares, Ismidt with 334,800 hectares, Sivas with 302,075 hectares, and Angora with 215,625 hectares. In these figures are not included the areas of forests not State administered.

Value of Forests.

The value of the produce of the State forests is thus summarised:—

	£T
Timber for building purposes	749,281
Wood for fuel	500,936
Various products.....	77,253
Worked wood	31,982
	£T1,359,452

Of this total output £T1,035,533, or over 76 per cent. of the whole, was consumed in the country, and only about 24 per cent. was exported abroad. The greatest output was in the province of Castamuni, £T154,561, Konia following closely with £T152,754, then the subprovince of Ismidt with £T149,318, and that of Bolu with £T121,301, the next in importance being the province of Adrianople with £T110,071, and that of Adana with £T108,247, the Dardanelles comes next with £T84,864, Brusa with £T71,333, and Salonika with £T52,450.

The largest item of export was timber for building purposes and amounted to £T200,601, that for fuel to £T88,650. The principal countries to which exported were Egypt with £T193,684, France with £T37,408, Greece with £T23,219. The various timber exported was elm 64,546 cubic metres, fir 56,764 cubic metres, pine 189,800 cubic metres, beech 18,377 cubic metres, oak 28,617 cubic metres, and cedar 25,006 cubic metres.

Afforestation Recommended.

Turkey-in-Asia possesses a treasure in its forests. This treasure is at present unproductive. Sylviculture has hitherto been as in India till the days of Lord Dalhousie, an unknown science. It is only the engagement of foreign experts, by a systematised method of afforestation, and by severe repressive measures against the vandals who look upon a tree as nothing but handy fuel, that the deforestation by hewing and burning that has gone on for centuries can be arrested. Bulgaria has given a fine example of what can be done, and we hope that the new rulers of Turkey will profit thereby. Afforestation is a long and tedious business, and few men live long enough to see the fruit of their labours where the culture of trees is concerned, but no time can be lost if the woodlands of the country are to become the valuable asset they have proved to be elsewhere. In Japan, under the old régime, only fifty years ago, when a man cut down a tree he had to plant another. This example is worth imitating. Could the Turkish reformers not advocate and institute an Arboricultural Society? Public opinion in the question of forest conservancy wants instructing. Unless Turkey preserves its forests the consequences will be very serious.

Since the article was written, we learn that Mr. Hermann Weit, a functionary of the Austrian Department of Forests, has entered the Ottoman Service as Director-General of Forests. Four French specialists have also been engaged and are to be attached to the Ministry of Agriculture, Mines and Forests.

GREECE AND THE WAR.

(From an Occasional Correspondent.)

Athens, August 6.

Cost of Provisions.

The Greek Government has strictly prohibited the exportation of wheat, cattle, and gold; and as the wheat supply is estimated to suffice for three or four months—and there are hopes of further supplies from America—there has been, as yet, no rise in the price of bread. Sugar, however—of which the greater part was supplied by Austria—went up 50 per cent. in five days. The police have fixed the price of this commodity at 1.20 frs. per oque retail, and of bread at 55 centimes.

Coal.

The Government has commandeered all coal, allowing such to be supplied only to railway companies and to a limited number of steamers for the sake of keeping up postal communication. Many factories are falling back on the native lignite—of which there is an unlimited supply—as a makeshift.

Banks.

A Royal Decree has been promulgated authorising the banks to refund deposits or not at their discretion. The National Bank, Ionian Bank, and "Popular" Bank have not availed themselves of this authority; all other banks have. Cheques are no longer cashed at any bank, and, as a result, quite a number of people are rendered temporarily penniless.

A fact indicative of the scarcity of wheat in Austria is that various Trieste merchants have offered Piræus merchants to buy several cargoes, but their offers have been refused.

Newspapers are reducing their pages, as the supply of paper is daily diminishing.

EFFECTS OF THE LATE WARS.

In his report on the trade of the consular district of Patras for the year 1913 Mr. Consul F. B. Wood says the second Balkan war, which broke out last July, was fraught with more serious consequences for the portion of Greece comprised within this consular district than the war against Turkey. In the latter case all the principal crops had been collected and, to a considerable extent, exported under normal conditions, whereas the second outbreak occurred before most of the fruit and cereal crops had reached maturity, so that the harvests were carried out with some difficulty and greater expense than usual owing to the scarcity of labour and means for conveying the produce to shipping ports. In order to make up the wastage of the first war, the Government was compelled to call out all classes of reserves. This practically denuded the country of all men of the labouring, industrial, and commercial classes. Banks, commercial houses, factories, shops, and farms found themselves, just at the busiest season of the year, deprived of most of their clerks, workmen, and labourers, and had the greatest difficulty in replacing even a portion of the absentees by indifferent and unskilled workmen at increased wages. A fresh requisition of draught animals and conveyances of all kinds was also necessary, so that the cost of transport increased very considerably. Luckily the women of the labouring and peasant classes in the country are hardy, strong, and industrious, and will do man's work whenever necessary. In this instance they were greatly instrumental in getting in various crops, so that in this respect nothing was lost, and the export trade was carried on without many obstacles, but at increased charges.

Import business suffered comparatively to a greater extent, as orders which had been cancelled when the war against Turkey was declared were renewed at its termination, and goods which arrived before and during the second unexpected outbreak suffered owing to the great stagnation which prevailed in local trade up to the end of the past year. It is satisfactory to report that the import trade in this district is now established on a firm and sound financial basis, so that, notwithstanding the troubles of the last eighteen months and the moratorium which has existed since the outbreak of the war with Turkey, it has been able to tide over all temporary and partial cessation of business without difficulty, and with but very few exceptions has honourably carried out its obligations.

NEW GREEK MINIST

(From an Occasional Correspon.

Athens, August 1.

A Ministry of Ways and Communications has been created which will include the Postal and Telegraphic services. The first Minister, M. Diamantides, is a man of energy and progress, and has lost no time in effecting various improvements besides elaborating plans for future development. One of his first measures was to order motor-cars for the collection of letters from the letter-boxes; others were the addition of twenty new telephone lines between Athens and Piræus and the establishment of a branch post office on the Place de la Constitution, which is to be followed by the establishment of branches in all the suburbs and distant quarters. There is at present only a G.P.O., and anyone living in the suburbs has to tramp thirty or forty minutes' distance to send a parcel, telegram, or registered letter!

FRUIT-GROWING IN GREECE.

The United States Consul-General at Athens (Mr. W. Weddell), in an interesting report on the cultivation of semi-tropical fruits in Greece, remarks that the Greek Government has established eight agricultural experiment stations, which are under the control of the Ministry of Agriculture (Interior), near Athens, Patras, Missolonghi, Corfu, etc. In each of these practical instruction is given. At Halmyrios is an agricultural school directed by the Government, known as "Cassavetios"; here there are three professors and some thirty-five pupils. There are also two model farms, conducted by the Government, one at Astros and the other at Trichonis. Correspondence with any of these institutions may be initiated by addressing, in French, Monsieur le Directeur, etc.

The following figures of the number of certain fruit trees have been supplied through an unofficial source by a Government expert:—Lemon, 178,315; citron, 28,530; orange, 131,890; mandarin, 29,570; bitter orange, 18,369; pear, 223,460; apple, 181,282; peach, 90,058; cherry, 77,569; plum, 83,485; quince, 174,250; fig, 537,909; olive, 11,944,243; mulberry, 1,458,869; walnut, 141,804; almond, 61,769. From this list statistics are missing from the important districts of Achaia, Argolis, Corinth, Arcadia, Messinia, and Laconia. It is stated that an enumeration of the trees in these districts is now being made, but no figures are yet obtainable. Nor do the above figures include data from New Greece, acquired from Turkey as a result of the recent war.

Among the varieties of citrus fruits grown in Old Greece are the Cretan orange, which is thin skinned, oval, and with few seeds. The Poros, Kalamata, and Sparta oranges are not unlike the Cretan variety. Oranges from Epirus and Corfu, as well as from the Island of Scopelo, have thick skins, and are rather spongy in texture. The lemon grown in Greece is similar to the Sicilian variety.

In general the orchards contain only three to ten acres, and, as in Sicily, are usually found along the littoral. In spite of the climatic advantages and exceedingly favourable geographical position of Greece, fruit growing, except for currants and grapes, is still carried on along primitive lines. The commercial production of oranges, lemons, table grapes, peaches, apricots, etc., for export to the surrounding European markets is still in its infancy. However, the measures being employed for destruction of insect pests, dissemination of the agricultural knowledge by practical men who make periodical tours through the country, and the formation of farmers' associations are all contributing to stimulate agricultural progress.

Private irrigation plants are found rather generally throughout Greece; the methods in vogue, however, are of the simplest character, and date back many years. Although a few windmills are beginning to be seen in the neighbourhood of Athens, the most popular method of bringing the water to the distributing tank is by a chain to which are attached small buckets, the source of power being a horse or a donkey moving in a circle. In certain of the country districts the farmers are averse to innovations, and this is given as a reason why artificial fertilizers are not more extensively used.

FROM ALL SOURCES.

nessage from Sofia states that munications between that city ntinople were restored on the

According to official bulletins the yield of olives in Greece for 1913 was over 88,000,000 lbs.

The Orient states that one suspected case of cholera was recorded in Constantinople for the week ended July 25. The patient died.

The Daily Malta Chronicle just received contains a notification prohibiting the export of fuel and grain from Malta as from August 3 till further notice.

The July shipments of British beer to Egypt amounted to 2,222 barrels, as against 1,865 barrels for the same month in 1913.

H.M. Chargé d'Affaires at Constantinople has telegraphed to the Foreign Office, under date of August 3, to the effect that the Wiener Bank Verein and the Russian Bank suspended cash payments on August 1, on account of the war, and that the Deutsche Bank did likewise on August 3. The Imperial Ottoman Bank was still making partial payments on August 3 up to a maximum of £200.

The Board of Trade are in receipt, through the Foreign Office, of telegraphic information to the effect that the exportation of all foodstuffs from Egypt is prohibited. Ships leaving the country may only take on board the stores necessary for the voyage, on application being made to the Customs.

A Consular report on the trade of Arabistan, Persia, states that in that region enamelled goods are steadily increasing in popular use. The trade, though small at present, is capable of expansion. It is entirely in the hands of foreigners, and would be worth the attention of British manufacturers of such articles.

The Greek journal, *Estia*, reports that the Opposition leaders, when they were received in audience by King Constantine, explained their views as to the situation and the attitude Greece should adopt in pursuance of her best interests. In the existing circumstances they were all prepared to support the policy of the Government.

Owing to a recent attack by Moorish robbers on Cape Spartel Signal Station, Tangier, and the possible danger at present to the life of English signalmen there, the committee of Lloyd's have decided to close the signal station temporarily.

The *Zionist Gazette* reports that two American Jews intend to found a large clothing factory "in American style" in Jerusalem.

The Rome correspondent of *The Daily Express* reports, under date of August 18:—Three Germans who were arrested in Rome on Monday, and were afterwards released, declared that they were peaceful tobacco merchants on their way to Syria. It is now stated that they are diplomatic agents going to Egypt in the interests of Germany.

Cattle disease has broken out in Aleppo. According to the *Jeune Turc*, Sadik Bey, veterinary inspector of the Ministry of Agriculture, has been sent to the spot.

The Daily Malta Chronicle (August 5) states that civilians in considerable numbers are volunteeering for any service either in Malta or abroad.

The text of the law for the regulation of "the weighing of carobs at authorized shipping places and to provide for the improvement of such places," passed by the Cyprus Legislative Council, is issued as a supplement to the *Cyprus Gazette* of July 31.

The directors of the Royal Exchange Assurance Corporation guarantee payment of full salary for six months of all their employees on service, numbering 101, sixty-one being from head office and forty from country branches.

Near East Markets.

SPECIAL REPORTS.

(From Our Own Correspondents.)

Bucharest. August 1.

In spite of the too plentiful rainfall in the months of May and June, the general agricultural state of the country is not a bad one. The harvest is not a special one, but it is satisfactory. The rain has, at the same time, cleared the wheat, barley, and oats of rust (mildew). The fine weather now experienced is allowing the harvest to go on most satisfactorily.

The political situation is, however, having its effect on the export market, especially as regards Germany. All German steamers presently in the Danube have received orders not to leave till further orders.

Sofia. July 31.

The river Maritza has overflowed all the sown areas in the district of Souflou. All the crops have perished.

In the Shoumla region also much damage has been caused by floods, and yesterday the Sobranje voted 150,000 frs. for the immediate repair of the damage. A sum of two million frs. will later be voted and granted as a loan to sufferers by the flood.

ROUMANIAN OIL NOTES.

(From Our Own Correspondent.)

Bucharest, August 1.

I am assured in well-informed quarters that the "Steaua Romana" will pay a dividend of ten per cent. for the year 1913-14, as last year. The daily average production of this company's fields amounts to 1,000 tons of oil.

A new English company has been registered in England under the name of "The Tazlan Properties, Limited," with a capital of £5,000. In Brussels a company, with the designation of "Géonafte," has been formed to work a naphtha business in this country and others. The capital is 900,000 frs. The Roumanian manager is Mr. Marcovitch, and the headquarters of the company are at Campina.

The total production of petroleum in Roumania has been very large of late. This is due chiefly to the extraordinary output of the "Astra-Romana's" boring No. 42 in Bana-Morein, and of the Consolidated Oilfields, Ltd., at Baioci. The daily production of the first is 125 trucks (1,250 tons), and of the second sixty to seventy trucks.

The Roumanian Railways have ordered 250,000 tons of residues from the local companies at 5.25 frs. per 100 kilos. The order has been distributed over the various companies interested.

TURKISH MOHAIR.

The 1913 clip of mohair in Turkey, though it exceeded the total of 1912, did not quite come up to the average output of some 60,000 bales. A fairly correct estimate of the 1913 yield would be about 56,500 bales. In point of quality the hair was well up to the average. America again operated to a considerable extent, but not as heavily as in the previous year, owing to the uncertainty experienced at the time with regard to the new Customs tariff, which was then being discussed. The United States purchases of fine hair amounted to some 4,000 to 5,000 bales, and a fair quantity of the Castambol clip was also bought up for that country. The duty on mohair has now been fixed at 15 per cent. ad valorem, and came into force on January 1, 1914.

ALBERT SINGER
KHARTOUM SUDAN

EXPORT OF GUM ARABIC AND SUDAN PRODUCE.

Agency for firms desirous of introducing their brands of goods into the Sudan.

Established 1900.

PRODUCE REPORT.

Sugar.

London, August 20.

The market generally has been very quiet this week. Cane sugar was dull, with nothing at all doing. The decision of the Government is now expected with respect to the supply of West Indian sugar, which has just been gathered in. At present exportation of the crop is entirely prohibited from any of the islands until the Government decides as to the policy to be followed regarding the fixing of the price and the destination of the commodity. English refined sugar is quiet. Tate's No. 1 cubes are quoted at 33s. 6d.; crushed, 31s.; nibs, 32s.; Lyle's granulated, No. 1, 30s. 6d.; crystals, No. 3, 30s., and yellow crystals, 27s. 9d. Foreign refined is also quiet, with only small business passing. Castor sugar on the spot has been sold to-day at 29s., and Italian crystals at 26s.

Currants.

Only small business is passing, at steady prices. Great fears, however, are entertained in Greece that, owing to the war in the countries where the fruit is sold and consumed, a great fall in prices may be expected, and the Government is taking the necessary measures that the growers may be assisted in such a case by depositing part of their fruit in the privileged company's warehouses and receiving a proportional advance for their needs.

Sultanas.

Only small transactions have taken place during the week at late rates.

Seeds.

Linseed is very quiet, London-Calcutta spot being quoted 51s. 6d. and La Plata 47s. Rapeseed is firm, and the various grades of mustard are well held. Haricot beans are in short supplies, and held for high prices. Canary seed remains firm at the recent advance for Turkish.

Oils.

Linseed is quiet; spot pipes offered (landed), 26s. 3d., and barrels 26s. 9d.; August, 26s. 9d.

Oilcakes, etc.

There has been no fluctuation in the market this week. Linseed cake, best London made, meets with a steady consumptive demand at £9 5s. to £9 10s. East India seed pures are only nominally quoted at £9. Russian is offered at £8 17s. 6d. to £9 per ton. Cotton cake is not ample in store, but sufficient to supply needy requirements. Best brands of Egyptian offered at £5 15s. ex quay, while a steamer parcel afloat is quoted at £5 12s. 6d. ex ship, with English makes unchanged at £5 17s. 6d. to £6, and Bombay £5.

Decorticated cotton cakes are offered sparingly, and quotations are fully as dear at £8 10s. to £8 15s.

Locust Beans remain scarce on spot, and £6 15s. for whole and £7 5s. for kibbled are the latest quotations.

Corn.

Wheat.—A dull tone prevails in the cargo market, and values are more or less in buyers' favour. Choice white Kurrachee on passage is offered at 41s. Australian, afloat, 42s. 6d. to 43s. is required. Maize is quiet, and in little request, 28s. asked for Danubian-Galatz-Foxanian, arrived, and 26s. for La Plata. Barley is also quiet, 28s. 6d. is wanted for Taganroc, and 28s. for Novorossisk arrived. Oats are quiet, and unchanged.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ending July 31:—Very little business has been done this week in opium; nevertheless, notwithstanding this fact and the want of ready money on the market brought about by the Austro-Servian conflict, prices for our various qualities are well maintained, and for the five cases of old and new goods which changed hands buyers had to pay full figures—viz., 16s. to 19s. per lb., as to quality. Should we add, however, the very heavy drop in the exchange which has taken place this week, the figures we quote should read fully 3d. per lb. higher. The arrivals are 923 cases, against 1,769 at same date last year.

WAR ON GERMAN AND AUSTRIAN TRADE.

It may be difficult at first, says *The Times*, to realise the fact—though fact it is—that, in spite of the country being at war with two Great Powers, British manufacturers and merchants may not only look with confidence for an early revival of the larger part of their overseas commerce, but may also confidently undertake the extension of their operations and the conquest, or re-conquest, of foreign and colonial markets lost to them in time of peace.

With reference to the vast world commerce which Germany and, to some extent, Austria have painfully and laboriously built up in recent years, it is pointed out that, with their industries stopped, their shipping held up, and their credit impaired, the enemy can by no conceivable means continue to hold any but an infinitesimal share of the export trade to foreign and colonial markets during the continuation of the war. How much they will be able to regain after war is over no one can predict. To capture as large a portion as possible of this world trade is the work of the immediate present. Other alert rivals are in the field, and in commerce, as in war, it is in the highest degree dangerous to adopt dilatory tactics. If British trade takes no prompt action it is certain that other countries will. The prize is too rich to be long left unappropriated.

Not many years ago at such a crisis British manufacturers would have found themselves without any guidance whatever. Just as the Boer War found us unprepared in the military sense, so, had the present trouble arisen then, we should have found ourselves unprepared with any definite plans or organisation in the commercial world. To-day we are infinitely better equipped. Although still in many ways less efficient than could be wished, the Intelligence Department of the Board of Trade is, to a much greater extent than the general public imagine, ready for the present crisis, and it has with commendable promptitude taken steps for placing British manufacturers and merchants in possession of the information that they urgently need if the present opportunity is to be seized.

For some years the Commercial Intelligence Department of the Board of Trade has made a practice not only of publishing official commercial information in the *Board of Trade Journal* and elsewhere, but also of sending direct to interested British firms whose names were filed other information, the publication of which in papers where it was available to our foreign competitors was not desirable. The department is taking active measures to assist and guide British merchants and manufacturers in the trade campaign. Taking the principal articles of commerce in turn, it is issuing to manufacturers and merchants whose names are on their list particulars of conditions concerning them in markets now held by German and Austrian trade. The first of these documents, dealing with enamelled hollow-ware, etc., was issued on Monday of this week, and it is intended to issue, if possible, three similar pamphlets every day.

Our readers are well aware of the extent to which German and Austrian trade has been pushed in Near Eastern markets. With reference to the particular articles mentioned above, it appears that in Egypt enamelware is pressing out trade in earthenware owing to cost of transport and the liability of breakage. The rapidly growing trade is largely German and Austrian. Even in Syria the trade is reported as rapidly growing. French and Belgian makers here share with Germans and Austrians in supplying the market, the objection to the British goods being their heaviness and costliness. Further, in British India the opportunity to secure the trade of Austria and Germany in enamelled ironware seems particularly favourable. Use by the natives has recently shown a tendency to increase considerably.

ROUMANIAN BILLS.

No information has been received in England as to whether a moratorium has been proclaimed in Roumania. The Roumanian Minister in London is communicating with his Government to ascertain by what means bills due to Roumania or in England can be satisfactorily settled.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, August 19.

Compared with a week ago things are no worse in the market, and here and there advices have been a little more encouraging. For all intents and purposes, however, fresh business continues quite at a standstill. The prospects are altogether too uncertain for transactions to be attempted. The Liverpool futures market continues closed; and so far as spot business is concerned prices are on a very artificial basis, and spinners are shy of operating with any freedom. Recent news relating to supplies in the raw material are favourable, and undoubtedly the American crop during the last few weeks has made good progress. Such matters, however, are completely overshadowed by the effects of the European war upon trade. Some attempts have been made to send out goods to the Near East and Egypt, but difficulty has been experienced in getting sufficient goods together to fill a boat. Manufacturers here seem to have done rather better as to the payment of accounts than expected. Some India shippers are now taking deliveries against old contracts on a freer scale, and a certain amount of relief is being met with. Exporters are hampered by the high cost of freight and insurance. No particular fresh news has come through from China. Some makers of fancies are delivering fair quantities. In all weaving districts short time is being worked on a considerable scale. It would not be far wrong to say that the production is being restricted to the extent of one-half. Certain sections in the home trade are busy on goods required for the war, but the crisis has had a very adverse effect upon matters generally in this section. Scarcely any inquiry has been met with in American and Egyptian yarns. Numerous mills are closed, and salesmen are not in a position to quote. It is hoped that something will be done to maintain our yarn trade with the eastern and far eastern outlets. So far as the Continental markets are concerned business is at a standstill.

EGYPTIAN COTTON AND THE WAR.

The Egyptian Gazette of the 6th inst. contains the following:—

"The Commission de la Bourse des Marchandises, at their meeting on Thursday morning last, decided that all contracts now open must be closed forthwith at the price of 15⅜ dollars per cantar for November contracts, 15 9-16 for January and 15 13-16 for March. That is to say, if a buyer has bought cotton at a certain price, for delivery in November, he will have to sell it out *now* at 15⅜; or, if a seller has sold at a certain price for the same delivery he must buy it in now at the above rate. In ordinary circumstances he would complete his operation in November, or sooner if he chose, but now he is compelled to close it at once and at the price fixed. There is considerable opposition to this measure, which was not carried unanimously, but by five votes to three.

"The Liverpool Cotton Association, it is understood, has sent a formal telegram of protest against this arbitrary method of dissolving the contracts of its members, and a protest has also been lodged with the Egyptian Government. Messrs. Pilavachi and Company, Limited, have also, we hear, protested by legal means both to the Commission and to the Government delegate, M. Michel Sinadino, for not vetoing the decision. M. P. Augustino, the head of the well-known firm of brokers, has retired from the Commission, of which he was a member, in consequence of this decision.

"Further developments may be expected shortly. The question seems to be one of vital importance, not only to private interests, but to the country in general, reflecting as it does on its credit and general business standing."

No fewer than 200 Egyptian officials and notables are stranded in Marseilles owing to the suspension of the steamship services to Egypt. The Messageries Maritimes Company are, however, now arranging for the dispatch of a vessel to Alexandria in a few days' time. Yehia Pasha Ibrahim sent a telegram bearing a number of signatures to the Regent last week asking for the dispatch of a neutral steamer to take the Egyptians home. Among the signatories was Brewster Bey, private secretary to the Khedive.

FOOD SUPPLY OF GERMANY.

The Balkan Trade Route.

In *The Daily Telegraph* of August 18, under the heading of "Food Supplies for Germany and Austria," it is pointed out that it is of vital importance to Germany to keep open the Balkan trade route in the event of sea and other land routes for her supply of food and raw materials being cut off. Especially interesting is an extract which is given from an article in the *Frankfürter Zeitung* of January 7 last, "obviously inspired, and showing clearly enough why the Teutonic Powers were paying so much attention to the Balkans." The extract is as follows:—"The countries comprising the Triple Alliance are changing daily from agricultural to industrial States, and they are more and more compelled to depend upon the uninterrupted importation of their raw materials. A war with England, France, and Russia at the same time appears, fortunately, to be ever more improbable; but the possibility of such a conflict cannot be excluded, and far-seeing statesmen must reckon with it. The Triple Alliance countries, which are compelled to have recourse to large armies, cannot hope to compete successfully with England and France on the high seas. In the event of a struggle, therefore, our oversea imports would, in a short time, be done away with, and our industries would languish for want of raw material. As things stand to-day, it is not merely the lack of wheat and meat that would drive the country to destruction. Coal and iron and heaven knows what else have also become essential to us. Where, then, shall the Triple Alliance countries look for their raw material if the sea routes are cut off? There is only one means of land communication, and it leads through Roumania, Bulgaria, and Turkey into Asia Minor. It follows that the Triple Alliance can never see this route barricaded by hostile States; the Triplice must keep this route open at all costs. The German military mission in Constantinople is not merely helping to reorganize the Turkish army out of pure joy; it must, at the same time, serve both Turkey and the German Empire."

WILTON CARPETS IN TURKEY.

Since Wilton carpets have been known at Broussa—some half a century ago—their vogue has not diminished in the least. Their use is now very extensive throughout this region, says the French Chamber of Commerce at Constantinople. This success proceeds from the ancient custom, established throughout all classes in the population, to provide themselves with carpets. The prices of these carpets are high, and they can only grace the residences of rich families—not numerous—who can afford this luxury. The remainder of the population has to content itself with "moquettes." The qualities equal, "moquette" carpets are sold more advantageously at Broussa than at Constantinople. This is the result of the brisk competition amongst the Broussa merchants. They are contented with a small profit, because, generally speaking, they receive these carpets direct from Europe, in transit viâ Constantinople, or by representatives established at the Turkish capital, or through the intermediary of their branches. Some of the principal merchants at Broussa are in direct touch with their correspondents in Europe—for the most part Ottoman-Armenian subjects.

GENOA AND THE BALKAN WAR.

There has been a very marked decline in British shipping at the port of Genoa within the last two years, says Mr. Kohan in his annual consular report. Although British vessels find, in the general carrying trade, a strong and growing competition with Italian, Greek, and Spanish ships, the special circumstances of the Balkan War contributed to a considerable extent to this diminution. Tramp steamers are for the greater part employed in the coal trade, and after discharging their cargoes at Genoa generally clear in ballast for the Black Sea. The scarcity of Black Sea freights, which resulted from the hostilities in the Balkans and the risks involved, deflected from Genoa a great portion of the traffic which would, in ordinary circumstances, have reached it.

ROUMANIAN OILFIELDS.

The position of Roumania in regard to her oilfields is as yet undefined. Roumania has carried out a mobilization which will have a considerable effect upon the production of the oilfields. At the time of the Balkan war, when the Roumanian army was partially mobilized, we had an experience of this. Until we know if and how far Roumania will take an active part in the present struggle it will be impossible to estimate the loss in production from this cause.

In regard to Galicia (North-Eastern Austria), it may be stated that the production of the first six months of this year was somewhat in excess of that for the like period in 1913. The current production of Galicia and the large stocks of crude oil have already been requisitioned by the Austrian Government. The production in these fields is bound to suffer by the mobilization; but, on the other hand, since the Austrian Government desires a continual supply of crude oil, the fields will not be unduly deprived of their staff, and in this way production for Government purposes may be kept up.

An important point about the Galician fields is that they lie within a comparatively short distance of the Russian frontier, but the country between the Carpathians and the Russian frontier in this district is particularly well fortified. It is, therefore, a matter for the military expert rather than for one experienced in the petroleum industry to say how far these fields are subject to the risk of Russian invasion.

COAL IN THE NEAR EAST.

When a country without mineral resources of its own increases its import of coal, you have there a fairly sure indication that its own particular industries have an improving tendency. Taking this as an index of Egypt's industrial prosperity, present prospects are very reassuring. Thus we find that her imports of black diamonds during the first half-year of this year totalled 921,343 tons, valued at £E1,072,877 as against 814,146 tons valued at £E960,434 for the corresponding six months of 1913. There has thus been an increase of quantity as well as of value. For the same period there has been an increase of her imports of coal destined for other countries. She had landed 935,398 tons of coal in transit for other countries, as against 907,468 tons in the first half-year of 1913.

In this connection it is not inopportune to refer briefly to Germany's export of coal, coke and briquettes to the Near East. The War, of course, has put a stop to this, but it is obvious from figures that hitherto the enemy has had no inconsiderable outlet in the Near East for these mineral products. The Westphalian Coal Syndicate was responsible for the highest percentage of these exports, and the following figures must therefore be taken as entirely relating to that gigantic concern. Among its best customers for the manufactured form of fuel known as briquettes was Italy, but large quantities have been forwarded to African ports in the Mediterranean. Taking coal, coke and briquettes together the Syndicate in 1913 exported to Greece, Roumania, Bulgaria, Servia and Turkey 314,837 tons as against 261,799 tons for the previous year, and to Asia Minor, Egypt, Algeria, Tunis, Morocco and Madeira 359,222 tons, compared with 324,431 tons in 1912. We have in England no such great mining octopus as the one that exists in Germany, but it is worthy of note that despite opposition from that quarter our exports to foreign countries increased from 44 million tons in 1900 to nearly 73½ million tons last year, or by about 68 per cent. With a close season for Germany, English mine owners have now a wide field almost exclusively their own. It is worthy of note that the prohibition of the Customs authorities now in force regarding the export of large coal abroad does not apply to Egypt.

Engineering Notes.

ENGINEERING TRADE AND THE WAR.

Opportunity for British Manufacturers.

The present war offers to British engineer-manufacturers unique opportunities for the recovery of lost trade in the Near East, where the systematic and concentrated efforts of German manufacturers, during the last two decades, had secured a position for German products in those markets, to the detriment of British trade. The effect was more noticeable in the engineering trade. The special facilities and cheap through rates on German and Austro-Hungarian railways for overland exports afforded further advantages to German manufacturers in competing with British engineering products, especially in Roumania, Servia, Bulgaria, and the north-western districts of Asia Minor. But now that the war has paralysed the engineering as well as other trades of Germany and Austria-Hungary, and all overland and oversea routes are entirely closed for them, a unique opportunity is afforded to British manufacturers to regain their former predominant position in the markets of those and other countries of the Near East. But they must act with energy, and quickly, for there are also other competitors in the field equally active and eager to avail themselves of this same opportunity—for example, the American engineer-manufacturer, whose products are well known in the Near East, and who will try to fill the gap before others appear. Now is the time that land-owners and agriculturists realize the value of their crops, and other autumn products, and decide upon the purchase of machinery and implements needed for this and following seasons. Indeed, autumn is the money-season, and the best time in the Near East for booking orders for machinery of all kinds.

Trade which May be Captured.

Of the trade in steam, oil and gas engines, the Germans had a very good share, likewise Austria-Hungary in ploughs, light agricultural machinery, and flour mills. Water wheels, turbines, pumping and irrigation machinery, oil-mill plant and olive oil presses, textile machinery, aerated water machinery and accessories, steam and oil tractors, electric motors, brick and tile machinery, and a great number of other machines for industrial, agricultural, or domestic use, are needed and purchased in almost every district in the Near East, and most of them have been supplied from Germany and Austria-Hungary. Other lines in which those two countries were doing excellent business were the supply of iron joists and girders, roller-shutters, iron (merchant) bars, angles, tees, hoop-iron, black and galvanized sheets, corrugated iron, zinc and tin plates, wires, cast-iron water pipes, electric and gas fittings, etc. But we reiterate, manufacturers of the above must act with energy—and at once.

The Best Method.

Since writing the above we have heard that the Board of Trade has issued a circular in which it is pointed out, to British manufacturers, that they have a great opportunity of recapturing the foreign and colonial markets of German bounty-fed firms; various schemes are suggested which are, undoubtedly, excellent, but with regard to the Near East far better results may be secured by advertising; and as for engineering products, the writer, having a long local experience of those markets, believes that Chamber of Commerce and Consular efforts have not the same influence in the Near East as elsewhere. An advertisement which enables the buyer to communicate directly with the maker of any machine or implement appeals to a would-be buyer in the Near East, inspires him with confidence, and is more effective than any persuasive chat of a local representative or agent. Better terms can also be arranged by a direct communication than through agents; and once terms have been arranged the agent or local bank should be entrusted with carrying them out.

Grain Elevators in the Balkans.

A report by the U.S. Minister in Bucharest, Mr. Charles J. Vopilka, recently published in the Washington *Daily Consular and Trade Reports*, states:—"A new grain elevator will shortly be opened for public use in Constanza, Roumania. This will make the third elevator in that port which will be operated and owned by the Government. The capacity of the Constanza elevators is 441,320 hectolitres (1,252,352 bushels) each, divided among 250 silos of different sizes. The other elevators in the country are in Braila and Galatz, the two Roumanian ports on the Danube. The elevator in Braila contains 334 silos, which have a capacity of 377,560 hectolitres (1,071,418 bushels). The elevator in Galatz contains 334 silos, which have a capacity of 346,080 hectolitres (982,086 bushels). There are no other elevators in Roumania owned by the Government nor by private parties, as the Government owns all harbour lands, and no individual or concern can build elevators on the Danube River or on the Black Sea without first obtaining concession from the Roumanian Government. In Bulgaria there is a great opportunity for American capital to be invested in grain elevators, which could be erected either on the Danube River or on the Black Sea at Varna or Bourgas, or on the Ægean Sea at Porto Lagos. Bulgaria would greatly benefit by the erection of such elevators, and the Government would grant concessions for that purpose. During my last visit in Sofia I spoke of this matter with Government officials and prominent citizens, and the general opinion was that such elevators would not only be good for the country, but for the grain trade in general."

Athens Water Supply.

Writing under date of August 1, an occasional correspondent in Athens informs us that "tenders for the construction of the aqueduct and other works in connection with the Athens water supply will be received up to March 30, 1915. A preliminary guarantee of 500,000 francs is required with each tender, and a further guarantee of 2,000,000 francs must be deposited on adjudication. The scheme, as already announced in THE NEAR EAST, is to bring water to Athens from Lake Stymphalia or the River Melas; and we understand that the contract will include the provision and laying of a complete system of supply pipes.

Piræus-Salonika Railway.

Considerable progress (writes a correspondent) has been effected in the construction of the Piræus-Salonika Railway, and the first rails will be laid before the end of this month.

TENDERS INVITED.

EGYPT.

[*The London agent of the Egyptian Government is Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Westminster, S.W., at whose office particulars of tenders marked (L) are to be obtained.*]

Drugs.—The Egyptian War Office, Cairo, invite tenders for the supply of drugs and material required by the Medical Department, for the period of one year, beginning from April 1, 1915.—October 3.

Blankets.—Tenders are invited at the Prisons Department, Cairo, for the supply of 6,800 brown blankets.—August 27. (L.)

With reference to the above, it is notified that the period stipulated in the conditions of tender has been extended to three months in lieu of two months.

Locomotives.—*The Egyptian Gazette* states that the Egyptian State Railways will shortly be inviting tenders for fifteen main line locomotives.

Lubricating Oil.—The Egyptian Railway and Telegraphs Administration, Cairo, invite tenders for the supply of either 1,410 metric tons or 2,956 metric tons of mineral lubricating oil, to be delivered in one or two years respectively at the option of the Administration.—October 15. (L.)

RECENT ADJUDICATIONS.

We notice the following names in the list of successful tenderers for the supply of various kinds of papers and envelopes required by the Egyptian State Departments for the years 1915, 1916 and 1917:—A. Beer, A. Cowan and Sons, J. Dickenson and Co., L. C. Harding, Lepard and Smiths, The Remington Typewriter Co., The Shannon, The Swallow Manufacturing Co.

Messrs. John M. Hamilton and Co., of Hull, England (agents: Messrs. Lambert and Ralli, Alexandria), are the successful tenderers for the supply of the increased quantity of yellow infrisible grease, 132 metric tons, required by the Egyptian State Railways for delivery over two years.

SULZER BROTHERS, WINTERTHUR, SWITZERLAND

Steam Engines of all sizes, especially Uniflow Engines, Boilers and Superheaters. Sulzer Diesel Oil Engines from 20 to 6,000 B.H.P. Pumps of various systems, particularly Sulzer's high and low lift Centrifugal Pumps. Fans of all kinds. Steam and hot water heating. Ice and Refrigerating Machinery (Linde system)

The Times HISTORY of the WAR

ILLUSTRATED

The Times is compiling an illustrated History of the Great War now in progress, the greatest armed conflict of all time, to be published in weekly parts at a price of sevenpence per part.

The Times illustrated History of the War will contain information of an authentic and exclusive character gained by **The Times's** own Staff of Special Correspondents, partly from their own observations and partly from the narratives of eye-witnesses, together with many important documents and original photographs. As all this matter is the copyright of **The Times** it cannot be obtained elsewhere.

This History will not be simply a *resume* of matter that has already appeared in **The Times**. It will include much new information other than that which has been already published.

The splendid War Maps appearing day by day in **The Times** and prepared under the direct supervision of **The Times** Military Correspondent will be incorporated in the forthcoming History. Other Maps will also be prepared where necessary to illustrate particular points.

The importance of such maps cannot be overstated. Without their guidance it is impossible to follow intelligently the movements of the opposing armies.

At once instruct your newsagent to deliver this work as the parts appear to ensure regular delivery.

The First Part, dealing with the critical events which preceded the actual outbreak of hostilities, will appear on

TUESDAY, Aug. 25th,

PRICE 7d. per Part.

THE FINANCIAL PANIC IN CONSTANTINOPLE.

The Run on the Banks.

A very interesting letter from Constantinople, dated August 3, by Mr. J. B. Brandreth, the special correspondent of *The Financial Times* in the Balkans, is published in the issue of that journal of August 19. A lively description is given of the scenes in Constantinople arising out of the financial panic produced by the rumours of war. The panic, Mr. Brandreth states, began by a heavy run on the Constantinople branch of the Wienerbankverein, which was ultimately obliged to suspend payment. When, on the night of August 2, the Turkish Government issued a proclamation declaring a moratorium of one month on all bills and debts falling due, and prohibiting the export of gold, the utmost consternation began to prevail, and the succession of pessimistic telegrams from Europe added to the universal anxiety. This condition of things reached a climax the next morning, when the banks were literally taken by storm. Angry and panic-stricken crowds of Turks, Levantines, and Europeans rushed the doors of the Imperial Ottoman Bank, the Deutsche Orientbank, the Crédit Lyonnais, the Bank of Salonika, the National Bank of Turkey, and other institutions as soon as they were opened. Police and gendarmes endeavoured to keep order. The Oriental Deutscherbank soon closed its doors and suspended payment owing to lack of gold to meet the rush. The Crédit Lyonnais, while refusing to pay letters of credit, to cash cheques or to exchange French or Turkish notes for gold, paid out its gold to its depositors. People pale with apprehension and excitement, the perspiration running down their faces, carried away bags of gold, easy victims for thieves had there been many about. Most of the other leading banks, both Turkish and foreign, quickly gave up the hopeless attempt to stem the current, and shielding themselves behind the moratorium, temporarily suspended payment and closed their doors.

The Imperial Ottoman Bank.

The Imperial Ottoman Bank, the writer adds, was a noteworthy exception to the general rule. Despite the panic, and regardless of the moratorium, this institution, under the direction of its English management, threw open its doors and its counters as widely as possible, and having with the aid of the police methodically established a "queue," proceeded to pay all comers in gold. It cashed its own notes, which were presented in hundreds, paid out its deposits in gold, and, up to the limit of £100, cashed in gold travellers' letters of credit. There may have been other foreign banks which stood the brunt in the same way, but, if so, they did not come within the writer's knowledge. For two hours he watched the scene, and began to feel something of the indescribable emotions that filled everybody, including the bank officials. It was a scene to be remembered, this general rush on all the banks of a city of two million souls, and nowhere was the emotion so palpitating nor the strain so tremendous as at the Imperial Ottoman Bank. Mr. Brandreth speaks with praise of the way the staff handled the panic, and the comparative coolness with which the officials dealt with the terrific rush.

EGYPTIAN FINANCIAL SITUATION.

Results of a Run on the Banks.

The Cairo correspondent of the Central News wrote on the 10th inst.:—

The financial situation here is easing somewhat. Last Monday there was something of a panic, especially among the natives, who all rushed to their banks and demanded to withdraw their deposits. Gold consequently became scarce, and a Ministerial decree was passed making bank notes of the National Bank of Egypt legal tender. Even this was not understood by the natives, and several of them stood outside the doors of the banks offering £5 bank notes for £4 in gold.

The local branches of the Deutsche Orientbank and Banco di Roma have temporarily closed down. It was the former bank which shut its doors last Monday, and about which ugly rumours had been current for several days previously that in no small degree contributed to the panic. Nearly all the local religious institutions bank with the Banco di Roma, and when there were rumours of monetary scarcity they all withdrew their deposits. The Bank of Italy, however, has guaranteed all its deposits, so there is no cause for uneasiness.

Much apprehension is felt concerning the future of the cotton crop. It is feared that there may not be enough money to move it, while, if the war be not over by the time it is ready for transport—say, about November—it will be a serious problem how to get it to Europe. The Cotton Bourse at Alexandria has temporarily closed. Cotton (first pickings) is now being sold in the interior for 12 dols. (about £2 8s. a kantar), an exceedingly low price.

EGYPTIAN STATE ACCOUNTS.

(From Our Own Correspondent.)

Cairo, July 29.

The last number of the *Journal Officiel* contains details of the State Accounts for the first two months of the financial year, viz., up to the end of May. The revenue amounted to £E2,560,420, as against £E2,489,040 during the same period of 1913, that is to say, there is an increase of £E71,380. On the other hand the expenditure for the two months has decreased by £E40,158, from £E4,005,196 to £E3,965,038.

Under receipts, Land Tax fell off by £E91,759, Tribunal Receipts by £E14,903 (Mixed) and £E9,426 (Native), Rent of Government Land by £E16,275, and Divers Receipts by £E14,777, but satisfactory increases are noticed in Customs Dues (£E27,528), Tobacco Duties (£E47,417)—due to the raising of the tariff—Port Dues (£E7,068), Sale of Government Land (£E11,253)—which would account somewhat for the decrease noted in the receipts from the renting of Government land—and Extraordinary Receipts (£E94,128). Both of these latter items formerly went to Reserve, but under the new system they figure in the general Revenue Account.

On the expenditure side, there are increases in the Ministry of Finance Central Administration (£E93,187), Public Health (£E8,495), Mixed Courts (£E15,781), Public Works (£E58,033), Railways (£E151,278), and War Office (£E45,041), whilst Cairo Drainage, which formerly came from the special Credits, figures on the ordinary account for £E45,637. Slight decreases are noticeable in all the other items.

EGYPTIAN ECHOES OF THE WAR.

The state of war in Egypt with Germany, says Reuter, now applies also to Austria.

Two hundred Greeks volunteered at the British Consulate, Cairo, one day last week, to serve with the British Army. They were informed that much as the offer was appreciated there was for the time being no need for their services.

According to the *Egyptian Mail*, the German reservists of Cairo, who are now unable to proceed to their country, are reported to have placed their services at the disposal of the local military authorities for police work if necessary.

A large number of cigarette factories in Egypt, including the Laurens, Gianaclis, Dimitrino, Chelmis, and others, have either closed down altogether or dismissed a large part of their staffs as a result of the war.

Two German steamers belonging to the Deutsche-Levante Linie were captured by the British military authorities in Alexandria harbour on the 5th inst. Their cargoes consisted of a large consignment of cigarettes and some grain.

A detachment of Gordon Highlanders are now on guard at Port Said, where they are encamped near the Government Hospital.

The wireless apparatus of all German and Austrian boats in Port Said harbour was confiscated on the 5th inst. The confiscation was carried out by force, the police being accompanied on board by several armed Highlanders, whilst a detachment of Highlanders was drawn up on the quay in case of emergency. Part of the machinery of the German mail steamer "Derfflinger" was also removed, as this boat was considered as an auxiliary cruiser.

A military censorship has been established at the Eastern Telegraph Company's offices in Egypt.

According to an Alexandria paper, the Austrian Lloyd s.s. "Dalmatia," carrying a number of conscripts from Egypt, has been captured and taken to Malta.

EGYPT'S FOOD SUPPLY.

The Press Bureau in Cairo has issued the following notice:—

"There is no reason why people should dread the imaginary idea that Egypt will run short of foodstuffs in consequence of the outbreak of war in Europe. In spite of the fact that the Government has already given orders to prevent the exportation of food materials to foreign countries, the country is in a position to receive such stuffs from neutral kingdoms. Moreover, the quantity of alimentary imports is, as a matter of fact, so small that it can hardly suffice Egypt for one month. As regards the distress which it is feared may result from the insufficiency of cereals, this can only occur if the war should continue for at least one year, which is quite improbable. But even if it were to last so long, Egypt could safely import plenty of cereals from neutral countries."

THE POSITION IN THE CITY.

(By Our City Editor.)

The extraordinary rush to sell bills to the Bank of England "without recourse" has been the event of the past week. At the moment of writing the figures have not been published. They will prove astounding, and would have been doubled or perhaps trebled had not the Bank staff proved physically incapable of handling the business. The City now sees that the step taken by the Government was ill advised. The bill market still remains moribund. The taxpayer will have to shoulder the burden of the loss the Bank may make, and the City has not benefited in any way.

A great many people are proposing that the Stock Exchange should be reopened upon some sort of vague Government guarantee. Here again the taxpayer would be called upon to pay up losses incurred by Anglo-German firms dealing with alien enemies. No more preposterous idea was ever submitted to serious business people. The plain truth is that about one-third of the largest firms in the House are hopelessly insolvent. Those who did business abroad cannot get their money. Those who have done business for Army or Navy clients cannot get paid, and many firms who trusted doubtful clients now find the moratorium flung in their faces when they ask for differences.

There is very little chance of the Stock Exchange reopening unless the Government realise the position. The banks, the brokers, the moneylenders cannot any longer finance dealings in stocks and shares. The whole stock of gold now in the country is needed for food and war supplies. If the Government would adopt the suggestion of *The New Witness* and issue a paper currency not convertible into gold, but secured upon Trustee stocks up to 50 per cent. of their value we should at once have enough legal tender to pay our way.

The notion is not sound finance. But anything is better than the complete paralysis of banking, money broking and share dealing, which now exists. After all, the Government has recognised the special gilt-edged value of Trustee stocks. Surely it might lend, say, 50 per cent. of their value and thus mobilise some of the wealth of Great Britain.

This scheme would assist the great insurance companies who will find the shoe pinch if any great rush for claims occurs through losses in war. These companies have two sources of income—one from premiums, the other from interest on loans and investments. Both will fall away whilst claims will certainly increase. They would be greatly helped if they could pay claims in paper obtained by pawning their Trustee stocks with the Government.

The small issue of Exchequer Bills made this week was a great success, for the average works out at £3 13s. 1d., as compared with £3 18s. 3d. in the Boer war. No one thinks that very much more will be lent at the low rate, but it was felt that for the honour of England her first borrowing should show the world that her credit was unimpaired.

The National Bank of Egypt will finance the cotton crop in paper. That is now definitely announced, and the fellaheen will soon become accustomed to the notes. It is a pity that they have not been earlier educated to the advantages of a paper currency.

Some important reports have been issued during the past week. The great Dublin brewers, Messrs. Guinness, show about £150,000 increase, but the board content themselves with the usual 14 per cent. dividend and refrain from paying a bonus. Guest, Keen and Nettlefolds have not done quite as well as last year. The figures show a falling away of over £50,000, but the usual 15 per cent. is paid. The balance-sheet is the strongest in the industrial world. Hawthorn, Leslie, the big Tyneside engineering firm, have had a good year, but reduce the dividend. The Worthington Iron and Steel Co. have succeeded in holding up the profits to practically the same high level as last year, but here also the dividend is reduced.

Holders of Spies shares will hear with pleasure of the very big increase in the output. Last week's production has increased by almost 12,000 tons. The company announces that the Russian Government refuse to allow any export of oil. But as the internal demand is large this will not seriously hurt the Spies. The new wells in the South Baskakoff land are turning out splendidly. The water has been kept out, and at their present low prices the shares are worth buying.

DELICIOUS COFFEE.

RED WHITE & BLUE

For Breakfast & after Dinner.

Wholesale, of Hanson's, London, England.

MAILS FOR THE NEAR EAST.

There is still a measure of uncertainty at the General Post Office in guaranteeing the regularity of future mails for the East, including countries on the sea route. "We can say nothing definite regarding the arrangements for next week, but those for this week-end are complete so far as we can make them," our representative was informed on calling at the Foreign Department in King William Street yesterday (Thursday) morning. "We are dispatching mails for India to-morrow (Friday) by the P. and O. 'Moldavia,' including those for Egypt, the Levant, Cyprus, and Beyrout. Mails for Constantinople, Salonika, and Smyrna we are sending by France according to the best opportunity afforded."

"As regards inward mails from Constantinople and countries round about no information can be given. They come in very irregularly. We had one in on the 18th—the only one we had for some time previous—but when to expect the next we cannot say." We are also informed that various mails from the Continent due on July 29 onward are still delayed.

As regards telegraphic communication, the notice given last week that telegrams for India, Straits Settlements, etc., can only be accepted viâ the Eastern Telegraph Company, and can only be accepted at sender's risk as to delay, is still operative. The normal route to Bulgaria, Roumania, and Montenegro is interrupted, and there is serious delay in transmission. Telegrams for Greece, Turkey, and the Balkans are only accepted at sender's risk.

COMPANY RESULTS, &c.

Anglo-Roumanian.—Telegram from Bucharest, dated August 15:—Production for weeks ended August 1 and 8, 407 and 376 tons respectively. On account of shortage of labour drilling work suspended.

Egyptian Markets.—Receipts for the week ended August 13 amounted to £583, this being a decrease of £18 as compared with the corresponding period of last year. The total from the beginning of the year is £32,253, a decrease of £1,496.

Ottoman Railway from Smyrna to Aidin.—The receipts for the week ended August 15 amounted to £7,609, compared with £8,496 in the corresponding week of last year—a decrease of £887. The aggregate receipts from July 1 amounted to £47,945, a decrease of £5,246.

Traian Roumanian. — Telegram from Bucharest, dated 15th inst.:Production for weeks ended August 1 and 8, 292 and 262 tons respectively. On account of shortage of labour we have had to suspend drilling work. Production reduced, as pipelines refused to accept oil for transport.

REOPENING OF MALTA BANKS.

A Malta telegram states that the banks there were reopened on Monday, and paid 10 per cent., the minimum limit being £2 on current 5 per cent. deposits, but the moratorium has been extended to the 31st inst.

COMPANY NOTES.

Egyptian Agricultural Company.

A meeting of the first debenture-holders of the Egyptian Agricultural Company, Limited, was held on Monday to consider a resolution to alter the trust deed in order to give the company power to issue prior lien bonds with interest at the rate of 7 per cent., instead of 5 per cent., as mentioned in the deed. Mr. H. J. Wenham, who presided, said the estates were progressing favourably, and should eventually become valuable and profitable. Time and money were the requisites to their successful development. Whether the present crisis might to any extent hinder or delay the carrying through of the arrangements made with the Mortgage Company of Egypt it was impossible to say, but he hoped it would not. The board thought it essential they should have the powers now asked for. What they had met for was to substitute in the trust deed 7 per cent. for 5 per cent., and to add authority to borrow on mortgage as well as on prior lien bonds. The London Trust Company, who were the trustees for the debenture-holders, had assented to the change. Shareholders might depend upon it that the greatest care would be taken in spending the funds that might be obtained in the most judicious way possible, and the company would have the benefit of the wide experience of the Mortgage Company in controlling and checking the expenditure. The resolution was carried.

Ottoman Gas.

The ordinary general meeting of the Ottoman Gas Company, Limited, was held on Tuesday at the office of the company, 59, Gracechurch Street, E.C., Colonel J. L. Daniell, chairman of the company, presiding. The Chairman, in moving the adoption of the report and accounts, said that, while they were meeting in very awkward and difficult circumstances, that did not apply to the actual position of the company. As a fact, their undertaking had never been in a sounder position. The accounts showed a reduction in the cost of coal of something like £2,000. There was an increase of £3,268 in depreciation and renewals, but they had had to do a great deal on capital account. Their gas rentals showed an increase of £4,245, and though by-products were down £2,500, everyone would realise the difficulties that had had to be faced in the market—to a certain extent they had shared therein. Shareholders might have noted the absence, at the end of the report, of any intimation as to when the dividend would be paid: they would be glad to learn that the board had arranged for its payment at the usual date—namely, that day week. If they were a day later that would be because matters were not quite prepared, but he did not think that would be the case. The report was adopted.

Cyprus Copper Development Syndicate, Limited.

A company with the above title was registered on August 1 by Milward, Jones, and Cameron, 6, Dawson Street, Dublin, with a capital of £10,000 in £1 shares. The objects are to acquire from Jas. H. Polloch all his estate, interest, and goodwill in certain licences or permits; to prospect for minerals (including copper and iron) in the State lands of the Stavrovouna Forest, in the Island of Cyprus; and to buy, sell, and deal in minerals, plant, vehicles, machinery, timber, etc. The first directors (to number not less than two nor more than five) are S. Geoghegan, J. H. Polloch, R. H. Geoghegan, and S. Young. Qualification, 50 shares. Remuneration, as fixed by the company.

Dr. Watkins-Pitchford, Director of the new South African Institute for Medical Research, who is visiting Europe, will, before his return to Natal, inspect the leading laboratories in England and the United States, and will probably extend his tour to Algiers, Cairo, and Khartoum.

NOTES OF THE WEEK.

The news from Servia during the past week has been more definite and more satisfactory than any we have received from that quarter since the outbreak of the war. Not only has the Austrian advance in force in the Shabatz-Loznitza area been checked, but the invaders have been severely defeated and driven back over the Drina. According to the latest reports Servian soil is now rid of the Kaiserlichs, and King Peter's forces are to be congratulated upon a highly creditable feat of arms. So successful has been the Servian defensive that the Government of Vienna has been obliged to issue a statement to the effect that the Servian campaign is no longer of any importance, and is to be regarded purely in the light of a "punitive expedition." The Viennese authorities, however, omit to state that the "punitive expedition" is likely, at no great distance of time, to be fully occupied in defending Bosnia against a determined Servian attack.

Our sources of information are at present inadequate or one-sided, but so far as can be gathered it appears that the Austrians have been putting Slav troops into the field against the Servians as well as soldiers drawn from the two dominant races in the Dual Monarchy, and that these Slavs were accorded the place of Uriah in the line of battle, and suffered accordingly. It is also stated that sternly repressive measures have been taken in those parts of the Dual Monarchy where the loyalty of individuals of populations is suspect to the authorities; and it must be remembered that the Austrian tradition in this respect is odiously brutal, and has at times been positively inhuman. We must, however, remember that a Press campaign is in some quarters accepted as a legitimate adjunct of warfare, and decline to accept stories of atrocities unsubstantiated by trustworthy witnesses at their full face value in any part of the area of hostilities. Episodes of this nature of undoubted authenticity are only too frequent as it is.

The progress of the war throughout the week has been rapid. The wave of Teutonic invasion has swept over the greater part of Belgium, and is now beating—fruitlessly, we are told—against the Allied lines in Northern France. To the timid the appearance of Uhlans upon the sands of Ostend or even on the beach at Boulogne may appear alarming. Save to the unfortunate inhabitants, whose lives and property are exposed to the ferocity of this fierce soldiery, the apparition of Uhlans is of no moment. They cannot cross the sea, they cannot harm the shipping. German armies may for a moment swarm even as far as Dieppe or Havre. They cannot stop Great Britain from sending men and money, ammunition and supplies through every French port on the Mediterranean or the Atlantic. The Teutonic hordes may stamp Belgium flat and devastate the French marches for a few days, but they cannot affect the command of the sea, and it is upon the command of the sea that victory in this war will turn.

The advance of the Germans has enabled them to issue innumerable bulletins of victory, but it has brought them no nearer to success. Their enormous losses of men will soon begin to tell upon them, and the mines which they have themselves sown so freely in the North Sea are frightening away the commerce from the Dutch ports upon which Germany must soon depend for food. Time is against the Teutons, and the battle din in Belgium will soon be unable to drown the devastating thunder from the east, where Russia has five-and-twenty army corps in line composed of men who are, as the recent fighting has shown, fully prepared to die themselves if in dying they can bear down one of the hated *Nemetski*. The immediate past has been lost to the Germans by reason of the unexpected and heroic Belgian resistance. The present is all too short for the execution of their schemes, and it is difficult to imagine a more ominous and gloomy future than that which advances upon Berlin. The disaster, starvation, and defeat which may be expected to assail the Prussian Monarchy and its subject States during the month of September will not be in any way mitigated by the memory of victories in August.

In the North Sea silence seems to connote safety, and with one exception there has barely been any mention of naval movements in those waters. In the Adriatic, on the other hand, the French Fleet under Admiral Boué de Lapeyrère, in which some British units are incorporated, may be expected shortly to engage the Austrians. It will naturally be of the highest importance to us and to our Allies to rid the Mediterranean entirely of all hostile flags. Meanwhile the Montenegrins have so battered Cattaro that that celebrated port is completely useless to the Austrians, and it may be that the Schwartzgelb has by now departed for good from the Bocche and Le Catene di Cattaro. The loss of so splendid a harbour must be a grievous blow for the Kaiserlichs, and goes far to explain the anxiety of Vienna to secure, first by diplomacy and then by arms, possession of Lovtchen Mountain, which dominates the situation.

Digitized by Google

The Concert of Europe having dissolved itself in war, it is not surprising that the International Army of Occupation should have been withdrawn piecemeal from Scutari. The French have gone to help the Montenegrins, and Germans to aid the Austrians against their former comrades on the banks of the Boyana. The British have departed, and the Italians, unwilling to pose as "Europe," have retired oversea. The Russians had no contingent in Albania. Stories are current that the Mpret himself has abandoned Durazzo and that the insurgents have occupied Valona and hoisted the Turkish flag. Neither of these events, if true, would be surprising, but as yet they have not been confirmed. In any case the Mpret has sent his children away from his capital, which appears to be the only part of his nominal dominions to recognise his sway, for, as in the case of the Emperors of Constantinople and the Kings of Jerusalem in the past, his realm has been reduced to a single city.

Those who happened to be present in the camp of the Indian detachments in England when the news came of the sudden illness of King Edward and of the postponement of the Coronation which they had come to attend will remember the effect of that intelligence. Every native officer and trooper in the camp immediately prayed according to the fashion of his race and creed that his Padishah, the stricken Kaisar-i-Hind, might be spared for many years of rule. Now it appears that a similar spirit has taken possession of the King-Emperor's peoples in India itself. Not only are prayers addressed to Heaven for the victory of His Majesty's arms, but substantial offers of men, money and service have been made to the Crown. Consequently it is only our enemies who will be surprised to learn that the Moslems of India have formally expressed their hope that nothing will occur in Constantinople to make them choose between temporal allegiance to their Padishah and the spiritual respect due to their Kaliph. We never doubted the loyalty of the King-Emperor's Mussalman lieges; it is only the Germans who eagerly deceived themselves in this, as in so many other directions.

During the past week another combatant has entered the International lists. Just as Great Britain assumed her treaty obligations towards Belgium and stood by her spoken word to France, so has Japan taken up her duties as an ally of Great Britain. Once more the world hears the clash and rattle of the armour of Japan as a Mikado girds on his two swords for war. An ultimatum, carefully prepared upon an historical precedent, has opened the path for Tokyo to avenge the long-past humiliation at Port Arthur in Kiao-Chau. Germany is now to gather the fruits of her unconscionable aggression in Shantung, and there is hope that what she extorted from China by the menace of the mailed fist on its first appearance in modern diplomacy may be restored, even as it is suggested that the ruinous concessions wrung from Turkey are to be cancelled by the Allies, if victorious, in favour of the Porte. The appearance of the banner of the Rising Sun once more in line of battle introduces active warfare into a third continent and places a formidable fleet at the disposal of the forces of civilization for the policing of the seas. Kiao-Chau, or, rather, the fortress of Tsing-tau, is to be attacked by a joint Anglo-Japanese expedition, which will be resisted by the German garrison and China squadron, aided by an Austrian cruiser, for at the dictation of Berlin Vienna has declared war upon Japan.

As yet Italy has preserved the neutrality which is so grievous a disappointment to her nominal allies. She has, however, taken ample precautionary measures, and it is understood that these are of such a nature that when the moment for mobilization arrives it will be found that little or nothing remains to be done. That she should remain neutral throughout the war seems highly improbable. It might be to her immediate interest to do so, but her statesmen are not likely to forget that if she should continue to consult only her own immediate interests she must in the future inevitably suffer for so doing. Only those who have borne a part in the conflict can hope to have a voice in the settlement that will follow the conflict. And Italy will certainly desire to make her voice heard. Moreover, it is evident that her people, who have never been accused of being lacking in generous instincts, are chafing at her inaction already. They desire to see her taking her part without further delay. And as to which side they wish her to range herself on there can be no doubt at all.

Up to the time of writing there has been no movement in the Near East. The blandishments of Teutonic diplomacy and its lavish promises of future payment for present services have as yet produced no result. For the moment the memory of the arrival in the Dardanelles of German ships as refugees which had been hunted and hit, and had had to fly for their existence, is vivid, and the performance was but a poor advertisement of German naval might. The absence of the familiar Austrian-Lloyd steamers from the ports of the Levant also has a blighting effect upon the pro-German propaganda—for it is hard to persuade the Oriental that those who dare not sail upon the seas can possibly be masters of the world, and the Oriental has no particular desire to take up arms for absent friends—the more so when those friends were so self-seeking in their friendship. The Servian victory upon the Drina is far more impressive in the eyes of the Near East than any number of German successes in distant Belgium. Namur is but a name, and the Servian army is a reality. The warships of the Allies may be seen with the naked eye, those of the Germans have had to be sold in the second-hand bazaar. It becomes daily more and more apparent that the Teutonic Powers are no longer in a position to "invite the tribes down to the loot of Delhi," but rather are on the look-out for some one foolish enough to help them out of the hole into which they have fallen.

Affairs in Persia are not entirely satisfactory, but Sultan Ahmed Shah may be congratulated upon having definitely formed a new Cabinet. In addition to the Sadr Azam, Mustaufi Mamalik, whose acceptance of office we were able to announce last week, Ala-es-Sultaneh is now at the Foreign Office in Teheran, while Moleshan-es-Sultaneh is at the Treasury, and Mukbir-es-Sultaneh, who has been recalled for the purpose from Shiraz, is Minister of Justice. It is to be hoped that the new Cabinet will be able to devise some means for tiding the country over its present difficulties, as for the moment the two interested Powers are too busy elsewhere to be able to devote that attention to Persia which is necessary before the country can properly be rehabilitated.

THE NEAR EAST.

THE NEAR EAST is on sale at all Bookstalls and Newsagents in the United Kingdom. Should any difficulty be experienced in obtaining the paper, readers will oblige by notifying the Manager. Abroad THE NEAR EAST may be obtained in:

PARIS. Librairie Hachette, 79, Boulevard Saint-Germain; Librairie Galignani, 224, Rue de Rivoli, and at Railway Bookstalls.

CONSTANTINOPLE. Economic Co-operative Society, Pera; Benjamin Rawe, British Oriental Bazaar; D. Marianopoulo, 280, Grande Rue de Pera; and The Nautical Bazaar, Galata.

SMYRNA. Dem. Tzanneu, Petite Rue de Rose, and F. S. McVittie.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, August 8.

Early Effects of the War.

When this letter will reach The Near East I know not! Our communications here are so delayed and interrupted that we might be living in a besieged city. Provisions are rising in price in a manner that bears out the parallel. Potatoes cost 40 per cent. more, Austrian beet sugar has risen by 200 per cent., and the price of bread and petroleum would have doubled had not the local authorities stepped in and by threats of pains and penalties prevented local merchants from making a profit at the expense of the consumer. The regulation of prices is a pre-economic measure it may be, but it has its uses in war time.

Meanwhile, the mobilization is in full swing, and it is an extensive mobilizaton, too. The total number of men called out must be enormous, the age-limit being forty-five, and few exemptions being permitted. How many army corps have been mobilized is not clear. There are rumours of concentrations on the Russian and Egyptian borders, but these must be taken with a grain or two of salt. The national distrust of Russia is still so great, despite the efforts of the Russian Embassy, that it would not surprise the writer very much if the Turks, after completing their mobilization, did throw in their lot with the Triple Alliance, or rather with the Central Powers. Moreover, the laying by the British Government of an embargo on the battleship "Sultan Osman" has caused very lively indignation here, especially among the members of the Ottoman Navy League. The facts that this vessel was paid for in part out of public subscriptions, that the Press and the Government had lost no chance of "booming" this important addition to the Turkish Navy, and that her non-arrival may have postponed the carrying out of certain schemes explain the natural annoyance of the Turks. As in past days the Ottoman Press threatens England with Moslem as well as with Turkish displeasure; though one may well doubt whether the loyal Moslem subjects of the King of England and Emperor of India would for a moment doubt England's right to take no risks of losing the chance of acquiring this proud ship at a most critical moment of the history of our Empire. Nor when the *Tasvir-i-Efkiar* heads an anti-English leader with "bin laanet"—*i.e.*, a thousand curses—are the Moslems of the Empire likely to be converted to a sudden espousal of Turkey's cause in this matter by such petulance.

Till three or four days ago the chances that Turkey would join the German and Austrian alliance seemed considerable. Since then the publication of the news that Italy would remain neutral and that England had declared war on the Germans has had a calming effect, while Djemal Pasha is believed to advocate armed support of the Triple Entente, and some say Djavid Bey does likewise. Enver is the champion of German interests, while Talaat Bey is all for complete neutrality. Much as we should like to see the Ottoman flag beside the standards of the Entente in the present campaign, it cannot be denied that, pending some decisive encounter, Turkey would do well to keep aloof from Armageddon.

Reservists Leave for Servia.

On August 5 and 6 over 2,000 French reservists left Constantinople for France. They were accompanied by several British volunteers and reservists, and had a magnificent send off. The crowd at the quays was to be numbered in thousands, and though much has been talked of the "sentimentality" of the Celtic and Latin races one saw no evidence worth mentioning of excessive emotion or of the braggart spirit that was so marked in 1870. There were no cries of "à Berlin!" Instead, when the "Saghalien" left one only heard "Vive la France! Vive la patrie!" and the stirring strains of the "Marseillaise," broken every now and again by shouts of "Vive la Russie!" "Vive la Belgique!" and still more often "Vive l'Angleterre!" while a French priest, returning to France to fight for the Republic which has annulled the laws against the congregations, played "God Save the King" upon a cornet. The demeanour of the reservists was delightful. There was none of that rigidity that has marked the departure of Austrian and German reservists and volunteers, of that somewhat theatrical enthusiasm which suggests the barrack square and finds vent in jerky movements and military attitudes. Everybody was enthusiastic, but natural; gay, despite the seriousness of the occasion; ready to fight, but in no wise inclined to despise the enemy. The usual playboys who pretended to fall head first from the rigging and performed gymnastic feats at the masthead were in great form, and kept the saddest smiling, and when Djemal Pasha, accompanied by Dr. Nazim, who had gone on board to say good-bye to some of his friends, left the ship amid loud and repeated shouts of "Vive la Turquie, Vive Djemal Pasha!" a wag shouted "Venez avec nous Pasha, si vous aimez les batailles il y en aura de trés chic chez nous!" Then the ship steamed out the tricolour floating amidships, the White Ensign on her foremast, and aft the Russian Saltire, while a great Belgian flag hung with flowers waved on her bows.

News"—Made in Germany.

The censorship is extremely strict. One is not allowed to telegraph anything that matters! No references may be made to the economic condition of the country, to the movements of foreign Consuls, Ambassadors, or merchantmen, to the Ottoman fleet and Army, or to fires, shipwrecks, or railway collisions. Consequently it is difficult for the foreign newspaper correspondent to give the outer world any speedy account of what is happening here. Telegrams from England and France take a couple of days to arrive here, and meanwhile the Agence Wolff and other German and Austrian agencies bombard us with accounts of German successes great and small, prophesy revolutions in Russia as *The Pesther Lloyd* prophesied a revotion in Paris after the murder of M. Jaurés, and do their best to support Baron Wangenheim's efforts to convince Turkey that Germany is the winning horse. If only we had a British telegraphic agency here!

Financial Measures.

Runs on the banks have been frequent, but so far most of them have "held up their end," especially the Imperial Ottoman Bank, though large cheques are not met in full—not nearly in full!—and cheques on London are not met at all. An issue of £T1 and £T1-2 banknotes will shortly be made, these notes taking the place of the £T50 and £T100 notes that have been called in.

The prelude to the present struggle is dealt with in a comprehensive study of the Balkan Wars of 1912-13 by Mr. W. H. Crawford Price, entitled "In the Cockpit of Nations: A Story of Macedonian Strife," which Mr. Werner Laurie has in preparation.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, August 11.

Greece and the War.

The effects of the financial panic caused by the outbreak of war were felt in Athens as they were throughout Europe. There was at once a run on the banks, great and small, and speculators lost not a moment in forcing up the price of provisions. The Government, however, took prompt action, and was able to avert economic disaster for the country. By Royal decree the banks were authorized to refuse the withdrawal of deposits, and the maximum prices that may be charged for foodstuffs has been fixed in similar fashion.

Greece has decided to maintain the strictest possible neutrality in regard to the fighting between the Great Powers, and to refrain from any action in the Balkans so long as her interests are not threatened. At the same time, she has pushed forward her military preparations so as to be ready for instant mobilization, if that should be necessary.

The German Overtures.

Count Quadt, the German Minister in Athens, had a long audience of the King as soon as he returned from leave of absence, and this fact naturally gave rise to various rumours. It is reported, even in diplomatic circles, that the Count was the bearer of secret proposals which were intended to win Greece over to the side of the two allied Empires. One journal, which has close relations with the Minister of Marine, is responsible for the statement that the German Minister, discouraged by the poor reception accorded to his overtures, finally limited his requests to asking for the assistance of the Greek mercantile marine in revictualling the German Army. But his representations were useless. Both the King and Mr. Venizelos replied that Greece could not abandon her attitude of neutrality unless events in the Balkans should appear to threaten the territorial dispositions of the Treaty of Bucharest.

Count Quadt asked impossibilities, and no other answer could have been given to him. Indeed, it shows but small respect for this people and their Government to ask them to forget all that Greece owes to France, Great Britain, and Russia, who have been her protectors ever since her liberation and the creation of the kingdom, and to whom she owes her territorial and economic development. The feeling of gratitude towards these Powers, especially France and England, is so deeply rooted in the hearts of the people that no government, even though it was presided over by a statesman of Mr. Venizelos' popularity and prestige, or even its present King, whom it almost idolizes, would be obeyed if it sought to take hostile action, either directly or indirectly, against its benefactors. Besides the question of sentiment, there are also vital material interests which impose reserve upon Greece. It is not forgotten that it has always been to France that Greece has gone for money, and that neither to Berlin nor to Vienna could she look for help in this direction. Thus neither the King nor Mr. Venizelos, however much they might personally wish to be agreeable to Germany, could do anything in that way without seriously compromising the interests of their country.

There is only one of Greece's statesmen who is in favour of Germany, and that is Mr. Theotokis, who, formerly a convinced supporter of the Triple Entente, during his last tenure of office veered round and became a supporter of the Triple Alliance, seeing, as he said quite openly, that he could obtain nothing for his country from the other group. Mr. Venizelos—who maintains his attitude of strict neutrality, though his sympathies are rather with the Triple Entente, as opposed to the (perfectly natural) tendencies of the King—proposed that His Majesty should consult the leaders of the other parties as to the policy Greece ought to follow, and especially recommended him to learn the views of Mr. Theotokis. This meant, of course, that Mr. Venizelos would be quite ready to give up office if the King should find himself of the same opinion as Mr. Theotokis. His Majesty having accepted this advice, all the former principal ministers will be invited to the Palace in turn to give their views on the situation.

Sympathy with France and Belgium.

Such, then, being the feeling in Greece, the Press, despite the reserve imposed upon it, finds it difficult to avoid making itself the vehicle of expression of the popular satisfaction at the first French successes, and the heroic resistance offered by the Belgians to the invasion of their country.

Turkish Mobilization.

In spite of the manifestations of friendly feeling for Greece on the part of Turkey, especially since the two Dreadnoughts under construction have been taken over by Great Britain, and in spite of the reiterated assurances of Ghalib Bey that the mobilization has no aggressive object, but is merely to ensure Turkey's neutrality, this measure is regarded with strong suspicion in Athens. The Government is watching every movement in Turkey with the greatest vigilance, and is waiting to see what developments will follow on this mobilization—which seems to have been imposed on Turkey by General Limann von Sanders. Whatever it may be, it is thought in Athens that Turkey would make a grave mistake if she failed to remain neutral; for should Great Britain and Russia declare war upon her the question of Asia Minor would at once be on the *tapis*, and would probably be solved at Turkey's expense by the division of her Asiatic territories amongst the Great Powers.

Bulgaria and Roumania.

Bulgaria, it is thought, is waiting in the hope that the course of the war may allow her to throw in her lot with the Austro-German alliance, but above all things she is interested in the attitude of Roumania, which is still ambiguous. In well-informed circles here it is considered very unlikely that Roumania will fall in with the suggestions of the Austro-German alliance, which seem to amount to the proposal of an entente with Bulgaria and Turkey and the promise (to Roumania) of Bessarabia. For even if the two Powers should be victorious, Roumania would have created a most dangerous enemy for herself in the future, in Russia; while, on the other hand, in the event of a defeat of the two Powers—which seems highly probable—and the partition of Austria, which in all likelihood would result therefrom, Roumania would be the only country that could put forward any good claim to Transylvania. On the other side, the aggrandizement of Bulgaria would not be without risk for Roumania. For all these reasons it is thought in Athens that if Roumania should abandon her neutrality she would join the Triple Entente, in spite of the personal disinclination of King Carol to put himself in opposition to his native country.

Austrian Minister Interviewed.

A telegram received here the day before yesterday from London stated that the Blue Book just published by the British Government contains a note from the British Embassy in Constantinople, which shows that Austria has not entirely abandoned her designs on Salonika. This revelation caused painful surprise here, and the semi-official Press, recalling the reiterated assurances of disinterestedness given by the Vienna Cabinet, taxed it with disloyalty. The Austro-Hungarian Minister in Athens, therefore, granted an interview to the *Hestia* for the purpose of denying that the Dual Monarchy had any designs upon Salonika, and of affirming that his instructions are to develop friendly relations with Greece. These declarations have not, however, been able to remove the impression created by Mr. Beaumont's note.

ALBANIAN LETTER.

(From Our Own Correspondent.)

Durazzo, August 14.

The Vanished Gendarmerie.

Albania seems to have been entirely forgotten by the big world during the past two weeks. Since the outbreak of the general war no one has had time to give a thought to this country. Yet the situation is even more serious than before; insurrection is rampant throughout Central Albania; and it may be said that only two towns are left to the Government—Durazzo, the capital, and Valona, to the south.

Three weeks ago it was still hoped that a foreign nation would send troops to Albania for the purpose of introducing a little order while awaiting the organisation of the Gendarmerie. It is a fact that at the present time Albania has no armed force at all. It had, as your readers know, a small force of Gendarmerie, but this had to be employed against the Greeks in the South, and it has now become disorganised and reduced to nothing.

The journey of the Prime Minister, Turkhan Pasha, was undertaken solely with the view of enlisting the help of the Great Powers for this country. It was hoped that Roumania would receive the mandate of the six Great Powers and send a small contingent of troops here. The Albanian Government cited the case of Greece, pacified by 17,000 Bavarians of King Otho, and of Bulgaria, which was helped by the Russian army. But now that war has broken out there seems to be no hope at all.

Albania, therefore, finds herself compelled to rely upon her own resources. Here, at Durazzo, for instance, there are only 200 volunteers from Roumania, amongst whom, moreover, there are many members of the Albanian colonies at Bucharest and Constantza. The rest of the Albanian forces consist of irregulars, of men enrolled at hazard and without any military training. And the insurgents are at the door. Five hundred metres from Durazzo the Albanian trenches finish, and those of the enemy begin! Durazzo has been besieged for two months and a-half, and only on the sea front is there any way open. Every night there are small skirmishes, and explosions are to be heard throughout the day.

The Insurgent's Attitude.

All attempts to arrive at an understanding with the insurgents are unavailing for the immediate future. The insurgents are extraordinarily obstinate and infatuated, and it appears to be certain that Servian, Greek, and Young Turk agents are egging them on. There are only two courses open: to take the plunge and attacks the rebels, or to remain on the defensive and see what time will do. As for Durazzo, it has definitely decided to adopt the latter course, and rest strictly on the defensive; but Valona is animated by a different spirit.

It must be borne in mind that the people of South Albania are very faithful in their allegiance to the Mpret; and the districts now in the occupation of the insurgents only suffer that occupation of necessity, not from choice. Thus columns of irregulars have set out from Valona, and already Fier and a part of the plain of Muzeche have been cleared of the insurgents, and the town of Berat also has been retaken by the Government party, though stoutly defended by the insurgents. Should this enthusiasm not fade away, it may be hoped that peace and order may yet be established in Albania.

Italy's Attitude.

I have said that Albania seems to have been forgotten; she has also been abandoned. One of the Powers which appears to be most directly interested in Albania's existence, namely, Austria, is engaged in the great war. The only other Power is Italy, who, only a short time ago, seemed to harbour anything but sympathy towards Albania; at present her Press is circumspect, and frankly states that in Italian diplomatic circles greater sympathy is being felt for the Prince of Wied. Evidently the tension created as a result of Essad's exile is dying a natural death.

But what is Italy doing? She is taking advantage of the present situation to clamour for concessions, all of them burdensome to the country. They include fishery and forest rights, as well as the right to erect and exploit telegraph systems.

The Minister of Finance is in Rome, accompanied by the Italian Minister in Albania. The object is to raise the advance of one million francs promised to Albania by Italy and Austria. If they are not successful in their negotiations, this country will be in a sorry plight indeed, as it has absolutely no revenues whatsoever to fall back on.

The Refugees.

To the above evils must be added the refugees, at least 100,000 men, women and children, who escaped from the Greek atrocities at Kortcha, Tepelen, Permeti, and Kurveleshi, leaving their burning villages behind them. In view of the financial situation, and given the rebellion in Central Albania, the problem of these refugees becomes very serious, the more so considering that the Epirus question is a long way from being settled.

GERMANY AND TURKEY.

The Constantinople correspondent of *The Daily Telegraph* writes in that paper:—Just before my departure from Constantinople on August 4 the Germans there spread all kinds of wild rumours which were given the imprint of their Embassy. Such, for example, that M. Poincaré had been assassinated, that civil war had broken out in France, that the Germans had entered Belgium triumphantly, and that their arrival in Paris was imminent. Moreover, the German and Austrian diplomatists told Turkey confidently that the German and Austrian armies would very soon be both in Paris and Warsaw. They held out to the Turks various alluring propositions, such as the suppression of the capitulations, the crushing of the Russian "Colossus," and so on, in order to induce the Turks not to proclaim their neutrality, but rather to adopt a hostile attitude towards Russia and consequently to the Triple Entente. . . . However, the Grand Vizier, Djavid Bey, Talaat Bey, and Djemal Pasha, but not Enver Pasha, struggled to secure in the Council of Ministers the triumph of the policy of strictest neutrality, persuaded that for Turkey it was preferable to maintain an attitude of prudent expectation and not to enter into any engagement. Experience has shown them that their Balkan enemies, for the moment divided amongst themselves, would probably end by reconstituting their alliance and falling on the Turks, and agreeing among themselves as to the partition of Turkey in Europe. These considerations prevailed, and the Ottoman Government proclaimed strict neutrality, while taking all military and naval precautions which events dictated. This was solemnly declared by Talaat Bey and Djavid Bey in Parliament on Sunday, August 2.

THE ROLE OF ITALY.

While we have no doubt as to the direction in which the true interests of Italy lie, it is evidently for Italy herself to decide upon her own course of action. The temper of the Italian people being what it is, she cannot, without the gravest risk of internal trouble, join her allies in their desperate policy. She, as a democratic State, cannot side with two anti-democratic Empires in waging war upon Republican France and Liberal England. She, whose national unity was achieved in the teeth of Austrian oppression, cannot intervene to crush the gallant stand of Servia and Montenegro against the present attempt to extend Austrian oppression to them also. Her Queen is a daughter of Montenegro. Italy, moreover, well knows that the success of Austrian arms would destroy, perhaps for ever, her hopes of maintaining the freedom of the Adriatic; and that neither Austria-Hungary nor Germany will ever forget or forgive her present neutrality. Neutrality may for the moment seem a right and sufficient policy; but the memories of the Congress of Berlin, from which Italy returned with "clean" but empty hands, while Austria-Hungary greatly extended her hold upon the Balkans, may well suggest to Italian statesmen the expediency of not standing aloof from the present struggle until too late.—*The Times.*

THE PERSIAN CORONATION.

(From a Correspondent.)

Teheran, July 23.

Amid great rejoicing the Coronation of his Imperial Majesty Sultan Ahmed Shah took place on Tuesday, July 21 (Shaban 27). For several days previously doubts had been freely expressed among the inhabitants of Teheran as to whether it would really come off, or be indefinitely postponed on account of the hard times through which the country is now passing. However, the people took heart on seeing the triumphal arches along the route of the procession rapidly take shape as imposing blocks of solid-looking masonry, and all Teheran brought out carpets to hang on the walls, from which were suspended countless chandeliers and lustres.

The ceremonial began on Monday morning, when the Shah drove down from his summer palace in the hills to the north of the city, accompanied by an escort of Persian Cossacks and gendarmes. On his arrival at the gate of the city he was welcomed by the Mayor of Teheran on behalf of the people, after which the procession re-formed, with the carriage of the Heir-Apparent, or Vali Ahd, following behind and Ministers of the Court riding in attendance on his Majesty, and passed through the streets to the private entrance of the palace, where the cortège was received by the Prime Minister, Ala es Sultaneh, and his colleagues in the Cabinet.

The deputies of the Mejliss and the religious notables were entertained to luncheon, and were afterwards received in audience by the Shah, and in the afternoon a garden party was given by the Minister of the Court to the Government officials, Princes, and notables who had been invited to the Coronation. Early next day the streets along the route of the procession were lined by the police and the gendarmerie from the Gateway of the Shems el Imareh to the Baharistan, where is the building of the Mejliss, in which were to assemble the deputies to witness the swearing of the Oath of the Constitution by the young Shah.

At the head of the procession came companies of the mounted police, the Bakhtiari Horse, and the gendarmerie. Immediately preceding the state coach rode a detachment of Cossacks, looking most striking in their briliant scarlet uniforms. The gorgeous state coach was drawn by eight greys, and the personal escort of his Majesty was formed by Major Klingberg, Swedish Chief Instructor to the Gendarmerie, and Colonel Vadbolski, of the Cossack Brigade, behind whom rode the Bakhtiari Chieftains, Sardar Zafar and Amir el Mufakham, with Sardar Kol and the Amir Topkhaneh on either side of the coach.

The second carriage was that of the Heir-Apparent, after whom came the Royal Princes and the Ministers of the Cabinet.

A salute fired at half-past nine o'clock in the morning announced the departure of the procession from the Palace, and on reaching the Gun Square (Maidan-Topkhaneh) a second salute of ten guns was given. A third salute of ten guns was fired on reaching the entrance to the grounds of the Mejliss. His Majesty was welcomed by the leaders of the National Assembly at the head of the staircase and conducted to his retiring room, where the Regent, Nasr-el-Mulk, was awaiting him.

In the meanwhile the deputies (of the Second National Assembly) had taken their places in the Chamber. The Chief Mullahs and Ulemas were grouped round the throne on the dais, whilst the Corps Diplomatique and Persian notables had boxes allotted to them in the centre at the back of the building. As the deputies returned at the recent elections had not yet reached the capital, the swearing of the Oath of the Constitution was witnessed by members of the old Parliament to the number of sixty-eight, seven more than was necessary to form a quorum.

The entrance of the President of the Assembly, Mutamin el Mulk, with the two Vice-Presidents, was followed quickly by the Ministers of the Cabinet, who grouped themselves at the foot of the throne, whilst the Royal Princes took up positions on the left of the throne on the dais. As the approach of his Majesty was announced the assembly rose in silence.

The Shah, in uniform, entered from behind the throne with the Regent and the Heir-Apparent. Amid profound silence his Majesty came down from the dais to the desk, whereon were placed the Koran and an illuminated manuscript from which the Oath was to be read. After several formal bows to the assembled company his Majesty took up the manuscript and, in a low and nervous voice, swore the Oath of the Constitution:—

> "I, Sultan Ahmed Shah, Emperor of Persia, swear on the Holy Word of God that unto my life's end I shall be true to the terms of the Constitution and the People, and shall maintain the independence of my country; and this I shall do with all my strength."

Closing the book, the Shah at once withdrew without further ceremony, to be followed by the Regent after he had bowed politely to the assembly. After a brief period of repose in the retiring room his Majesty, with the Regent, the Princes, and the Turkish Ambassador, proceeded through the garden of the Baharistan to the Sipahsalar Mosque, where brief prayers of thanksgiving were offered. From the door of the Mosque the procession once more formed up in the previous order, and returned to the palace by way of the streets of Shahabad and Ala ed Dowleh. The crowd in the Maidan-Topkhaneh was very great and largely composed of women, who, on the approach of the Royal coach, loyally cheered the young Shah, clapping their hands and "lulu-ing" (crying) in the manner peculiar to the women of the East.

The Coronation Ceremony.

Shortly before four o'clock the same afternoon the representatives from the provinces, the Corps Diplomatique, and other guests arrived at the Palace, and after waiting a little while in an ante-room went into the Great Hall or Museum Chamber, along the sides of which were lined many Persians and notables. Here they took up a position on the right-hand of the famous jewelled Peacock Throne. At a quarter to five o'clock the Master of the Ceremonies proclaimed the approach of the Emperor of the Persians. Following behind his Majesty came the Regent and the Royal Princes, who stood on either side of the throne, with the Regent, Nasr-el-Mulk, immediately on his Majesty's right hand.

Mounting the steps of the throne, the Shah took his seat very gravely, and removing the aigretted-plumed cap stooped down to receive from the hands of the Regent the high-domed Crown, blazing with pearls, diamonds and emeralds. Deeply stirred with emotion, he placed the crown with both hands on his head, whilst one of the Chief Ulemas chanted the opening Surah of the Koran.

Hardly had his Majesty placed the crown upon his head when a flourish of trumpets without announced the glad news to the people, and a salute of one hundred and twenty-three guns was fired, the number corresponding to the number of years that the Kajar dynasty has ruled over the Persian Empire. At the conclusion of the reading of the prayers his Majesty returned the crown to the hands of the Regent, and, wearing the cap adorned with the coronet of Nadir Shah, slowly descended the steps of the throne, followed by the Princes and Ministers. The proceedings then concluded with a short reception of the Ministers and members of the Foreign Legations by his Majesty in a room adjoining the throne room.

Departure from Teheran.

A public Salaam (audience) was given the next morning (July 22) by his Majesty, seated on the Takht-Marmor (Marble Throne) in the Palace, the grounds of which were lined with a guard furnished by the gendarmes, Cossacks, and police. After the salutation of the people, his Majesty left the city for his summer residence of Sahib Keranieh, driving in state through the streets, which were kept by the police and gendarmerie.

To the minds of Europeans accustomed to a greater display of pageantry, the ceremonials they had witnessed conveyed an impression of haste and absence of formality. Thus, in the Mejliss we would have expected to hear a loyal address presented by the Deputies and a speech from the Nasr-el-Mulk on the occasion of his handing over the Regency to the young Emperor. Similarly, at the Coronation itself much more might have been made of the presentation of the various emblems of State to his Majesty by the Royal Princes. For whereas it was laid down in the "Order of Ceremonial to be Observed on the Auspicious Occasion of His Majesty's Coronation" that the Princes severally were to deliver to the Shah the Sword, Shield, Sceptre and the Imperial Bow and Arrow on his entry into the throne room, these ceremonies were performed in a most inconspicuous and unimpressive manner before his Majesty had mounted the steps of the throne. Here again we were disappointed in not hearing a few graceful words from the Regent on handing over the reins of government. The Shah throughout the proceedings both in the Mejliss and in the throne room was the sole actor. He performed his part with credit, in spite of the intense heat and profound emotion with which he was evidently overcome.

The city of Teheran was gaily decorated and illuminated on both nights, the streets being a blaze of light. Conspicuous among them all were the fine illuminations of the Imperial Bank of Persia, which was outlined with electric lamps. Very large crowds assembled in the Maiden-Topkhaneh (Gun Square) to see the display of fireworks that inevitably accompanies rejoicings in Persia.

Much credit is due to the Commissioner of Police, Monsieur Westdal, for the admirable manner in which the several processions were conducted without the slightest hitch, and for the remarkable efficiency with which the police and the troops controlled the loyal crowds.

TANGIER TO TEHERAN.

Glancing through the "News from All Sources" in last week's NEAR EAST I came across the news, culled from the *Zionist Gazette*, that two American Jews intend to establish a clothing factory, "in American style," in Jerusalem. This statement, I must admit, horrified me, and I am sure that most of my readers who know the East and care for it will share my feelings. As far as its outward appearance and the appearance of its inhabitants are concerned, Jerusalem is probably one of the least attractive spots in the Near East. As a matter of fact, the so-called "Mosque of Omar" is about the only thing in the city that has any outstanding artistic merit. But even so, I cannot without a qualm picture to myself the effect upon the Holy City of a wholesale donning of reach-me-downs, such as seems to be threatened according to the *Zionist Gazette's* announcement. Unless my memory plays me false, Sir Mark Sykes, in *Dar-ul-Islam*, drew a lively picture of the effect upon London (and Henley, I think) of all the Jews in our midst reverting to Oriental garb. Personally I should prefer even that to the sight (or thought) of all Jerusalem and Palestine dressed in the "very latest," or thereabouts, from New York. Western clothes may be comfortable, practical, all sorts of things that the Oriental clothes are not (to us), but they certainly lack the charm of colour. Compare the Arab's *kefiyeh* with the City man's silk hat, the Cairo donkey boy's blue *galabiyeh* with the unlovely tubular garments of the London street urchin, the flowing robes, dignified turban, and picturesque shoes of the average Oriental merchant with the formal, sad-hued suits, hard hats, and hideous footwear of the average Occidental, and decide for yourself which is the more artistic!

***

This war is breaking quite a number of records. Not only are we at war with Austria, "a thing we have never done before," but the Montenegrins have a number of naval prisoners under their charge. Unlike those armchair politicians who were in the habit of thinking that the British Navy was capable of being used with effect to settle any disagreement we might have with Timbuctoo, Tibet, or Abyssinia, Sultan Abdul Hamid and his predecessors realised the limitations of their own fleet, and never used it in attacks upon Cettinje. Hence captive admirals are rare birds in Tsrnagora, which until 1909 was not even allowed to own an armed ship of her own, and never embarked on naval warfare. I remember receiving, during the first Balkan War, a picture postcard commemorative of the occupation of Durazzo by the Servians. It bore the legend, "The first Servian port," and had a picture of two soldiers and a destroyer flying the Servian flag. Perhaps we shall be seeing such a destroyer "in being" before so very long.

***

Old memories are being wonderfully revived nowadays, and the historians have to work overtime in order to keep pace with the repetitions of history which daily occur. We meet with long-familiar names and fight once more on ancient battlefields; "the Allies" and "the enemy" figure once more on the fields of Flanders—the Allies are different but the enemy is the same—the Great Aggressor, whether he be Bourbon, or Bonaparte, or Hohenzollern. Nay more, we have to hark back to the Huns for similes. As, long ago, the outer barbarians tried to overwhelm civilization under a self-styled Scourge of God, so in this year of grace are the hordes in motion from beyond the Rhine. From all accounts civilization in Belgium and France is as much imperilled by the onrush of Germans as it was by Huns, or Tartars, or Turks in the past. The days are over, as the French War Office reminds us, when a bewigged and very gallant French officer could say to bewigged and gallant British soldiers drawn up in close formation a few score yards in front of him, "Messieurs les Anglais, tirez les premiers"

***

Heraldically minded folk are somewhat exercised over the number of Eagles engaged in this war. A whole tribe of these fearful fowl has been let loose over the carcase of Europe and dispute the prey with sundry Lions. Russia, Servia, Montenegro, and Austria support double-headed eagles, black or white, according to taste, Prussia has a single-headed bird—black—and Poland, which hopes to be revived, has another single-headed eagle—white. Kaiser Wilhelm, in his subordinate Electoral, Grand Ducal, Princely and Comital capacities, possess countless eagles, and as King of Bohemia the Kaiser Franz Josef owns a lion. The British lion has a brother in Belgium, and unhappy Luxemburg has the same lion of Nassau which figured on our Royal coat of arms when "Dutch William" was our King and fought in Flanders. The splendid beast of St. Mark, the only lion which has wings to flap upon occasion, is well known to those of us who have been to Candia or Famagusta, or Chalkis in the old days, but he has not as yet taken part in the fray. If he does come into line he will be accompanied by yet another eagle, one bearing the Cross of Savoy upon his breast. Amid all these Imperial and Royal birds the Gallic cock is the sole representative of the domestic as opposed to the predatory, but the Emperor Franz Josef, as a Lorrainer, bears three little birds which should be more or less harmless, as they have no claws. Perhaps that may account for his House having lost not only the Duchy of Lorraine but so many other provinces as well.

***

I have received from a Jaffa correspondent a letter giving some account of a visit paid to that port by four of his Majesty's ships of war—the "Warrior," "Black Prince," "Weymouth," and "Chatham." The letter has been much delayed, but it interested me in view of the recent doings of some of the vessels mentioned, which have been making German and Austrian shipping in the Mediterranean very unhappy indeed. Our sailors quite won the hearts of the good people of Jaffa, as they win the hearts of most people wherever they go; and what especially delighted the townspeople was that the bands of two of the ships were allowed to give a concert at the grounds of the International Tennis Club. "Before this," writes my correspondent, "very few of the Europeans, and practically none of the natives, had had the pleasure of hearing such good music on shore here, for when German warships come to Jaffa they generally land their bands to play at their distant colony, Sarona, where only Germans benefit by the music. On this occasion, however, Europeans and natives alike enjoyed the music rendered by the bands of the 'Warrior' and the 'Black Prince.'"

***

The "Black Prince" put in an appearance at Port Said on the 13th of this month, a day before the German steamers lying there were liable to capture. There were ten of these unhappy vessels in the harbour at the time, and I learn from a Port Said correspondent that they all dipped their flags to the cruiser, and that she returned the salute. *Toujours la politesse!* Two days later the "Chatham," being between Port Said and Alexandria, met the big Austrian Lloyd s.s. "Marienbad," and, with great politeness, escorted her to Alexandria. Hard luck on the "Marienbad," no doubt, but she is by no means alone in her misery.

***

I take the following paragraph from the *Egyptian Morning News* of August 14. It is printed under the heading "General News," and is entitled "Nothing to Fear at Alexandria":—

> H.E. the Regent has requested H. E. Fakry Pasha, Deputy-Governor of Alexandria, who went to meet him at Sidi Gaber Station on Tuesday evening, to assure the population of Alexandria that there is absolutely no cause for fear, the situation in Egypt being as satisfactory as could be desired. In any case *no immediate dinner is anticipated*, and the proof is the return of T.E. the Ministers to Bulkeley, where they will reside the rest of the summer.

The italics (I need hardly say) are mine. The sentence seems to me unkind. Surely the Ministers do not leave Bulkeley only when some big "feed" lures them out?

***

A curious lack of a sense of proportion is to be noted in a communication which has reached us entitled "British Women's Anti-Militarist Appeal," which contains a plea for the withdrawal of Great Britain from the European struggle. Incidentally, the phraseology of the leaflet leaves something to be desired, and I am in doubt as to the wisdom of issuing a leaflet which contains so many—shall we say printer's errors, which might give rise to unkind deductions at this juncture. Anyway, it is rather late in the day to publish an appeal of this nature. Besides, the authors leave us in the dark on points on which we are, perhaps, unduly inquisitive. What is their explanation of Germany's policy towards Great Britain for the past fourteen years? It may be they have forgotten or never heard of Agadir, and remain in blissful ignorance of the pleasant maxims of von Bernhardi. The best reply we can make to their leaflet is to suggest that they should spend an hour in the British Museum studying his very dull but unmistakable outline of the purpose of German armaments.

CORSAIR.

W. N. WILLIS'S GREAT BOOK,

ANTI-CHRIST IN EGYPT

It is a vehement appeal to Christian England to save the children of Egypt from the open vortex of degradation and shame permitted—indeed, encouraged—by the Capitulation Laws which govern that country.

The chapter descriptive of Lord Kitchener as a civil administrator will be a revelation to even the most enthusiastic of that great General's friends and admirers.

Every voice that denounces the rampant riot of vice in Egypt will assist **LORD KITCHENER** in his GREAT IMPERIAL EFFORTS.

The Book may be ordered of all Booksellers, or direct from the Publishers, 2/4 post free, any address in the world.

THE ANGLO-EASTERN PUBLISHING Co., 48-50, Waterloo Rd., London.

THE LOG OF THE S.S. "MARDINIAN."

War Realities in the Mediterranean.

(From Our Special Correspondent in the Balkans.)

I.

Constantinople, August 5.

The run on the Wiener Laenderbank last week has had the expected result: the moratorium was declared on Friday night and has been in operation ever since. There has been a rush on all stores, and the little available money has been spent on foodstuffs. There is no cash, and the half million in specie expected from London and Paris has not come. . . . Tourists caught napping are hastening away; British officers eager to join their regiments have dashed off across Roumania (will they get through?); officers of the Naval Mission, obliged to remain, are cursing their luck; and there is one great query in the minds of all—"Will there be a general war?" We know nothing; the only telegraphic agencies are Italian or German and Austrian. What is happening? If only we had news! . . The Messageries boat put out for Marseilles, full to the prow with passengers eager to escape before the realities of war broke out. She was stopped at the Dardanelles, and had to return, commandeered by the French Consul for transporting Frenchmen bound for their regiments. The Germans have already left, except the Military Mission, which is riding the high horse. As for the passengers on the Marseilles boat, some have rushed to the "Khedivial," which leaves for Alexandria, where they hope to get connection with the P. and O. for Marseilles (the King's Messenger is among these); others are going to tempt fate across Roumania; others have berthed on an Italian or Greek boat. It is those who can't go who are cursing loudest. . . . At last, at one o'clock to-day, the news, the great news, was flashed out into the streets by one-page special editions of the local Press. England had stood by France! In less than ten minutes all Pera, Stamboul, and Galata knew it. In the clubs where the English gather there were frank expressions of satisfaction, tears of—was it joy or pride?—in the eyes of men, and not a fragment of doubt as to the ultimate issue. Our "day" it will be!

Six hours later the Marseilles boat, beflagged and cheered by an immense crowd, put off from the Galata quay and sailed with her boatload of soldiers round Seraglio Point. She had not been gone two hours when, from the Stamboul side of the Horn, a small cargo boat flying the Union Jack, the good ship "Mardinian," of the Ellerman line, Captain Port in command, steamed slowly into the Bosphorus, homeward bound for Liverpool. Behind her the lights of Constantinople glittered, and Ramazan diadems lit up mosques and minarets; ahead of her the "Goeben" and "Breslau" at large, and—war!

II.

London, August 25.

At Chanak, the northern extremity of the Dardanelles, we had our first taste of the altered situation on the following morning. The captain was ordered ashore to receive final instructions from our Consul and permission to proceed, if it was deemed safe. We dropped anchor at ten in the morning, one of the hottest days I have ever known, the Messageries boat, likewise detained, on our starboard, and about six other boats on the port. At eleven many of the passengers had climbed over the ship's side into the bluest of water, when suddenly a tremendous submarine detonation was heard and felt (a peculiar sensation when you are swimming). Somewhere a mine had exploded. We were soon out of the water. At one there was a military examination of passengers, crew, passports, and cargo by Turkish authorities. It did not lack humour. Poor Mr. "Jones," in spite of his swarthy countenance, paled. At five a torpedo boat signalled, the anchor was raised, and we sailed out, twelve good ships and true, in Indian file behind our leader, down through the mined Straits into the open sea. One of the ships, in its eagerness to pass ahead of a rival, approached too close to the shore; she was quickly warned by cannon shots from the fort.

Sunset found us out in the open sea, some of our companions running away from us, others lagging behind. By midnight—a glorious moon, almost full, was shining—we were to all appearances alone in the Eastern Mediterranean, lights out, the captain pacing the quarter-deck, and navigating to the east of the usual course, among the Greek islands. The night was oppressive, and the lifeboat canvas a regal bed.

We were steaming without wireless, no boats within hailing or signalling distance. Consequently we were yearning for news. Great happenings whispered dumbly around us—perhaps victories and disasters, or the coming and going of friends and foes. But we knew nothing; though living a page of modern history we were buried in a past that knew neither wireless nor other means of communication. We were completely lost at sea, attempting to dodge enemies and possible enemies. For three days the captain never left his beat, and we sailed slily and warily on to Malta.

The excitement of the third day out was a stowaway, nipped early in the morning in the steward's hold. Unfortunately he was only a Russian, and not a German. He was landed with twenty-five biscuits on the island of Tinos, on a shore that looked deserted, but the last we saw of him was that he had been approached by two shepherds, and that the three of them walked slowly up the hillside.

On Monday evening we sighted Malta. In a region of no twilights, it was dark before we came up to the island, and searchlights were already illuminating the entrance to Valetta Harbour in a path of light, or flashing restlessly out into the night, now falling on some suspicious object and resting there, now boldly sweeping the horizon line. Patrol ships, submarines, and torpedo craft were keeping a watchful eye, and we were quickly signalled and questioned, one of the first questions, to be repeated many a time before the Mersey was reached, being the "Have you seen any Germans?" No, we had not. We were ordered to lie three miles off the entrance and to wait for the examination on the following morning, August 11. It was over by nine, and we were sailing into Valetta Harbour.

The impression of the harbour was that of a ship cleared for action; it was perfect, as impressive for its staggering exhibition of man's handiwork as "Gib." is for its natural strength. Wonderful! . . . A destroyer was in, the aft gun and a funnel shot away—how?—where? We were not informed. Twelve hours later she had been patched up with a canvas funnel, and out she had gone again. A German prize of the Levant Line was in, her crew arrested, her engines dismounted. The Germans resident on the island had all been arrested, but the most prominent citizens were let out on parole, which they misused, with the result that they had been clapped back into prison; one had been found harbouring evil intentions against the Governor's residence; he was, the captain told us, immediately and summarily shot that very day. Another interesting vessel in the harbour was a cargo boat loading 5.000 tons of coal in twenty-four hours (quick work) for the French fleet.

News at last, and what news! The German fleet smashed in the North Sea (hurrah!), four boats bottled up in Vigo, two prize Dreadnoughts in Hull, the German cruisers in the Atlantic destroyed, Togoland French, Italy on our side, Turkey still neutral, and the "Goeben" and "Breslau" bottled up with the Austrian fleet in the Adriatic. Better still, Lord Kitchener at the War Office (hurrah!), and the Bank rate down to 5 per cent. We cradled all this news and discussed it over and over again until Liverpool was reached.

We went ashore, the captain to the naval authorities, we in quest of more news. So many questions were as yet unanswered! The islanders were enthusiastic, and their great joy was that Italy was on our side. Patriotic proclamations were posted up at different corners of the principal streets, and news of the naval battle was loudly acclaimed. Incidentally, the price of everything had gone up 20 per cent., and all tobacco had been commandeered by the authorities. As for the Fleet, it was out—somewhere in the Mediterranean, and there had been fighting. We had won. Hurrah!

The following day we left that marvel called Malta and steered for the African coast—past Bona and Philippeville in Tunis, which had both been bombarded by the "Goeben" and "Breslau"—and then in a west-north-westerly direction to the nearest point on the Spanish coast. We sighted

FRENCH NATURAL SPARKLING TABLE WATER.

Digitized by Google

it on Friday night to the north-east of Cartagena, where, years ago, King Edward had his celebrated interview with King Alfonso. Then past the southern coast of Spain to Gibraltar, with Trafalgar hard by in the offing of Tarifa.

"Gib." is always a marvel, but never so wonderful as when we are at war. That is when the old rock of Tarik must be seen. It was night when we approached it, and the sight will be unforgettable. The rock, seen from the east, stood out grim and sombre, excepting for searchlights to the north and south. Magdalena Bay, the neutral ground and the Straits themselves were swept by a thin stream of light, and from over on Africa's shore, somewhere between Ceuta and Gebel Musa, an answering light linked up with that emanating from Europa Point. As we came nearer to the rock, signal lights grew visible, and we were soon giving the password and stating our business. We passed on, through bands of lights playing on our decks and hull, past Europa Point and into full view of the harbour and town, and the Bay of Algeciras and Algeciras beyond—nothing but a silent, quivering riot of light with the Rock looming up, a gigantic signal-station. Not a ship or a boat of our fleet was in sight—yet they were everywhere. Black out of the darkness invisible torpedo craft sped up to our sides; for an instant they flashed their lights full on our prow or stern; then, satisfied, they melted away into the darkness and we plodded on.

Still ten days to go, hugging the Portuguese and Spanish shores before the Mersey would be reached, before news was to be had! In the meantime cargo boats crossed our path, passed us or were passed by us. A solitary British cruiser would now and again be outlined against the sky, showing how effectively our fleet was patrolling and policing the trade routes. We could not help feeling proud.

An uneventful trip, shorn of excitement, followed. The blue waters of the Mediterranean were behind us, and once again we were skimming over the green waters of the Atlantic. We were nearing home, confident in the victory of our battle fleet in the North Sea. How the pilot when he boarded us with his papers and budget of news in the Mersey disillusioned us! There had been no engagement in the North Sea, and the "Goeben" and "Breslau" had finished an ignominious career by being sold to the Turks. By how many miles we escaped the two German ships no one knows, but according to the captain's calculations we must have sailed past them one night in the darkness, with only the island of Milos between us. A narrow shave, and a lucky one! In connection with these two ships, I will refer to a rumour which was current in Constantinople before the war broke out, namely, that General Liman von Sanders had tried to induce the Ottoman Government to purchase the "Goeben." This would seem to indicate that the sale had been long premeditated. As for the ship herself, I have it from the best authority that she is too low in the water, has a list to the starboard, and cannot fire her big guns without risk to herself. The Germans have evidently "befriended" their friends again with their customary honest chivalry.

THE PRESS ON THE WAR.

The Cause of Human Progress.

Since the outbreak of the war we have for the benefit of our readers abroad given many extracts from the Home Press upon the situation. We quote now the concluding passages from an article entitled "What Will the Great Navies Do?" contributed by "A Naval Officer" to *The Independent* (New York). They will be read with feelings of sincere pleasure, we are sure, by all our countrymen both here and in the Near East, and the hope with which the writer concludes his article will warm the hearts of not a few of us:—

Whatever be the results of the first clash of arms the ultimate outcome cannot be doubted. The perseverance and grim determination of the British nation, forced against its will into the most unholy war of which we have any knowledge, will in the end prevail, leaving the Kaiser to mourn over the ruin of the vast and noble structure of his seemingly miraculous development of Germany's commerce and industries. To exchange this splendid record for the doubtful chance of being known as a second Napoleon or Frederick the Great evidences either poor judgment or a disordered mind.

Of one thing we may be certain, that while all Christendom will have to share the burden of distress, it is upon Germany that the larger part will fall in useful lives extinguished in financial misery, idle shipping, closed factories.

That this is all due to the insane growth of armies and navies, stimulated, yes, necessitated by Germany's practice, no one can deny. This war is not a bolt out of the blue. It has long been recognised as unavoidable, and it bears the earmarks of deliberate planning. Nothing was lacking but a good excuse. And this excuse has been found, or manufactured, as you please. It is right that Germany should pay heaviest.

Let us hope the plea for bloated armaments as essential to national safety may never again be heard. We now perceive what they lead to. And let us hope that victory may rest with the British who, as a hundred years ago, are fighting in the cause of human progress and world-wide peace against the tyranny of personal, arbitrary government.

Looking Ahead.

In an article published on August 21, *The Globe* shows how Germany and Austria—but especially Germany—are seeking desperately to find friends by means of most lavish promises, but how the various countries approached display no great readiness to accept those promises at their face value. It would be wise, *The Globe* thinks, to let it be known what the Entente Powers would wish to do when the time comes to redraw the map of Europe, what are the principles by which we shall be guided, and what are the restraints that we shall observe.

The jealousies and rivalries that have convulsed the Balkans, for instance, as well as those that have so long converted Europe into an armed camp, are as largely the product of false and artificial adjustments as of overweening ambition. The legitimate ambitions of the nations are not really incompatible, and the declared object of the Allies should be to adjust and satisfy them. Not only Servia, but Bulgaria, Roumania, Greece, and Italy, and even Turkey, can count on being stronger and freer if the insatiable dominance of Germany is broken. The purpose of the Allies should be proclaimed in terms that cannot be misunderstood or distrusted. That will be the most effective answer to German machinations, and the best assurance that when the war ends a state of things will not be created from which the old dissensions and antagonisms will simply grow again.

1814 and 1914.

A characteristic article by Mr. G. K. Chesterton appears in *The New Witness* for August 13, the title being "1914." The writer makes a comparison between 1814 and 1914, showing how the antagonists of a century ago have become reconciled and why. He says:—

Is there anyone still asking why these extremes meet? Why those who set fire to Moscow to save Russia may yet set fire to Russia and save Paris? The reason, of course, is simple enough. This heavy and puzzled hundred years has given us time to locate an evil that is worse than the worst of either; worse than the worst tyranny of the Czars, worse than the worst massacres of the Jacobins. Nietzsche stated it with suicidal precision: it is the Will to Power. It has none of the scandalous inconsistencies that deface the divine and human ideals of the duellists of "1812." It has a dreary consistency without fruition. The Russians did their unholy things for the sake of Holy Russia. The French Revolution did its inhuman acts for the sake of the human race. But the Prussian is like a murderer who knifes a man neither for his blood nor his gold, but only to steal a knife with which to murder others. He is like a burglar who steals gold, and does not spend it in beer, but in buying another burgling kit. This eternal and sterile success, these enormous and endless avenues of unrewarded energy; this is the huge and naked insanity of the North, against which the lucid Latin and the devout Slav instinctively and instantly combine. A man uses power because he has a will to love or hate or laughter; but if he has a will to power, he must be locked up. There is something wrong with his head; he is worshipping the means and not the end. Men differ very much about how large or small is this area of disease: some attribute it to a nation, some to a family, some even to an individual. But assuredly it was not a state but a scar; and when it has healed it will have vanished.

NATIONAL RELIEF FUND.

For the benefit of readers abroad who may wish to subscribe to the National Relief Fund, we have much pleasure in printing a subscription form which may be detached and forwarded with the amount subscribed.

THE PRESS ON THE NEAR EAST.

A Welcome to Our Allies.

The arrival of the French fleet at Malta a fortnight ago aroused indescribable enthusiasm amongst the islanders. In an article entitled "The Union of Heart and Hand," *The Daily Malta Chronicle* says:—

We were stirred with all kinds of feelings of pride and gladness. All Malta was thrilled through and through. All persons showed their interest in the ordinary ways, and in ways not ordinary. There was a rush, of course, to the Barraccas as soon as the French Fleet was known to be approaching our shores. The reception was in a way formal and informal: our bands represented us as a people; we represented ourselves in the thousands of us who took position wherever the harbours' heights give the best view of the expanses of harbour water. Eight and ten deep the lines of watching and admiring people were on the Barraccas. Impressions thrilled from end to end of the lines, as if individuality had disappeared for the time. Indeed, all who stood side by side were but one—one in all that they thought of.

As to the work before this fleet the writer says:—

The task that they have been set is not known; but everybody knows. Although not formally communicated, it needs no telling. We shall tell proudly of accomplishment, and we should like to contribute to fulfilment. But who will say that good wishes have no effect? We wish for the triumph of France. The British Empire, solid with France, is working for the triumph of France, whose cause is the cause of the Empire. Victory will go with right and will correspond with the supreme efforts that the Empire is making in all its parts, conscious of its power, confident of itself, and of its destiny.

The Austrian "Punitive Expedition."

The announcement made by the Vienna Official Telegraph Agency, that owing to the intervention of Russia in the Servian war Austria intends to look on that war "as a punitive expedition and not as a definite war" has set a good many people thinking furiously. *The Westminster Gazette*, for instance, remarks:—

It is a punitive expedition, apparently, in which all the punishing is being done by the Servians, whose claim to have inflicted heavy losses on the Austrians in the battle of the Drina last Friday is admitted in Vienna. The official explanation is that these losses are not surprising, "seeing the great superiority in numbers of the enemy and the fact that the latter are fighting for their existence." The admission that the punitive expedition, so-called, threatened the existence of Servia is worth recording in view of the denials on this subject which were part of the pre-war diplomacy. In the circumstances in which she finds herself, we do not think it is probable that Austria will be a formidable antagonist in what she calls the principal struggle in the north-east. . . . A war of the kind in which she is engaged must drive a wedge between her different races and nationalities. Slav troops cannot be used without grave risk against either Servia or Russia, and German troops cannot be moved far from her western frontiers, while the intentions of Italy are unknown, and, according to all the signs, not friendly.

The Balkan States and the War.

In an article entitled "The Extension of the War," *The Daily Chronicle* (August 24) observes that "The number of nations at war is now nine, and one cannot ignore possibilities of its being increased." Italy, it is pointed out, has her fleet and her splendid army mobilized, and circumstances may very well induce her to descend into the arena. If she is to get all she can from the situation she will "have to give active support" to one side or other. The Balkan nations are similarly situated.

They all have an unsettled international account which they wish to have put finally right when the great settlement comes. Servia is already in the war, and according to the latest reports doing quite her share of it. Her well-known ambition is to absorb the millions of Serbs hitherto ruled by Austria-Hungary, and she can reckon on very substantial gains if Austria-Hungary is beaten. Roumania would be in the same position if she threw in her lot with the Triple Entente; she could look forward to taking over the millions of Roumans who inhabit Transylvania and Bukovina, and thus bringing the whole Rouman people for the first time under the national flag.

Similarly, Austrian jealousy—and Austrian power—being removed, Greece might attain her national aims, and the unfortunate Italo-Greek antagonism might be solved.

There remains Bulgaria. . . . Beyond question she has been hardly used, and her present situation, in which she benefits those who have injured her, by interposing her territory between them and a Turkish attack, is something of a paradox. If she maintains it, her services should be recognised by the beneficiaries and by the Triple Entente; and we scarcely see how she can be expected to maintain it unless they are. . . . These changes all taken together would so reconstitute the Balkan Peninsula as to secure a maximum of coincidence between the racial and the national divisions, at the same time increasing the area and geographical advantages of all the four principal races.

Then follows some very sound remarks upon the position of Turkey, much on the lines of what has appeared in THE NEAR EAST's leading article last week. Turkey has nothing to gain by going to war. Should she do so she

would be hurrying down the steep place. If she took part in the war, she would lose whichever side won. A German victory would tighten the last links of the chain, which has already been forged for her in the Bagdad Railway. She would succumb to Germany as completely as Tunis has succumbed to France. Abdul Hamid, pro-German as he was, would have been too acute to make such a mistake.

Mr. Kipling on Egypt.

In the August issue of *Nash's Magazine*, Mr. Kipling continues his series of articles on Egypt. Taking as his subject "Cairo, Sorceress of Cities," he passes some remarks on Cairo which will hardly please its inhabitants, and compares it with Alexandria, much to the advantage of the latter. Turning to the general situation in Egypt, he writes, with characteristic pungency of phrase:—

Here is a country which is not a country, but a longish strip of market-garden, nominally in charge of a Government which is not a Government, but the disconnected Satrapy of an Oriental Empire; controlled Pecksniffingly by a power which is not a Power but an Agency, which Agency has been tied up by years, custom, and blackmail in all sorts of intimate relations with six or seven European Powers, all with rights and perquisites, none of whose subjects seem directly amenable to any Power which at first, second, or third hand is supposed to be responsible. That is the barest outline. To fill in the details (if any living man knows them) would be as easy as to explain baseball to an Englishman or the Eton Wall game to a citizen of the United States. But it is a fascinating play. There are Frenchmen in it, whose logical mind it offends, and they seem to revenge themselves by printing the finance reports and the catalogue of the Boulak Museum in pure French. There are Germans in it whose demands must be carefully weighed—not that they can by any means be satisfied, but they serve to block other people's. There are Russians in it, who do not very much matter at present, but will be heard from later; there are Italians and Greeks in it (both rather pleased with themselves just now), full of the higher finance and the finer emotions; there are Egyptian pashas in it, who come back from Paris at intervals and ask plaintively to whom they are supposed to belong. There is His Highness the Khedive in it, and he must be considered not a little; and there are women in it, up to their eyes; and there are great English cotton and sugar interests and angry English importers clamouring to know why they cannot do business on rational lines or get into the Soudan, which they hold is ripe for development, if the administration there would only see reason. Among these conflicting interests and amusements sits and perspires the English official, whose job is irrigating or draining or reclaiming land on behalf of a trifle of ten million people, and he finds himself tripped up by skeins of intrigue and bafflement which may ramify through half a dozen harems and four consulates. All this makes for sanvity, toleration, and the blessed habit of not being surprised at anything whatever.

Enver of To-day—and of Yesterday.

Mr. F. G. Aflalo begins an interesting article ("What Will Turkey Do?") in *The Outlook* (August 22) with a comparison of the Enver of to-day with the Enver of five years ago, when they used to sit together of an evening in a restaurant, and Enver would expound his dreams of a regenerated Turkey.

We conversed in German, a language of which, thanks to having served with German regiments, Enver had some command, and he was even then more German than Turk, even training his moustache in respectful imitation of his hero. At that time Enver was content to be a simple soldier, obeying, had he known it, the motto, "Silent enim leges inter arma," and meddling little in politics. I remember him best on the day when, having marched his "Army of Deliverance" from Adrianople, he first shelled the mutinous barracks and then rode, with his friend Niazi, through the Grande Rue of Pera, cheered by frantic crowds of Greeks and other riffraff, who gazed transfigured on these demi-gods even as Ezekiel might have gazed on the Cherubim. Since then Enver is fallen from his high estate and, with ever warmer German sympathies, took to intriguing with von Bieberstein and his successor to the aggrandisement of German interests at the Porte and the corresponding undermining of British influence. Well I remember translating for him the stirring speeches in which Mr. Asquith and Sir Edward Grey hailed the Turkish Constitution, and his professions of gratitude on his country's behalf were unbounded. Time brings strange changes, and now we find this apostle of liberty ranged on the side of feudalism. It may be objected that Enver Pasha is not Turkey. Well, he is not; but those who, having lived in Constantinople through political crises, know their Turk will not feel too confident of his inability to drag his country into the net adroitly spread by German diplomatists when, at their wits' end, they engineered the flight of the "Goeben" and "Breslau" in the hope of so embroiling the Ottoman Government with the Entente as to force it into an offensive and defensive alliance with Berlin and Vienna.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

GERMANY AND TURKEY.

To the Editor of THE NEAR EAST.

SIR,—Having just returned from Constantinople, I was surprised to see in the London Press a message from the Athens correspondent of the *Temps* to the effect that, "according to information coming from Smyrna, the persecution of the English and French in that region continues. Most of the English subjects have left Smyrna to escape the vexations to which they have been subjected by the Ottoman authorities."

I do not know to what extent we can trust news about Turkey coming from a Greek source, but I do wish to point out that the possibility of an anti-English or anti-French campaign in Asiatic Turkey does exist, more particularly if General Liman von Sanders is allowed to remain as unofficial head of the whole Ottoman military organisation. I remember having been informed in the Club de Constantinople, shortly after the return of the dragomans from their visit of inspection to the Smyrna district after the so-called "massacres," that the real perpetrators of the movement were Germans. It would appear—and I have no reason to doubt the sincerity and inside knowledge of my informant—that Liman von Sanders himself impressed on Enver Pasha and Talaat Bey the necessity of clearing the Asiatic coast as far south as Smyrna, and for a distance of 50 km. landwards, of all Greek subjects. The Young Turks listened to this mad advice, and gave orders to their agents on the spot, who in many cases zealously exceeded their orders, with the result already known to the world.

Nothing, of course, is to keep General Liman von Sanders from repeating his achievement, but this time against the English and French. Should he do so he cannot be brought to book, whilst the Turks, guilty of listening to advice from Great Britain's enemies and acting on that advice, will be forced into the ranks of our foes.

There can be but one possible course to follow—now, immediately. General Liman von Sanders must go, and we must insist that he should go. As long as he is in Constantinople the Turks can at any moment be forced into a situation which is none of their making and contrary to their own interests. Besides, it is not only our duty to look after our own interests in Asia, but also to save Turkey from the snares of the enemy.

Von Sanders must go!—Yours faithfully,

London, August 27. C. K.

NATIONAL RELIEF FUND.

Unauthorised Appeals.

To the Editor of THE NEAR EAST.

DEAR SIR,—We regret to say that the Subscription Sub-Committee of the National Relief Fund has heard of a good many cases in which use has been made of its name, or of the names of those connected with it, with the object of securing support for appeals which are quite unauthorised.

We hope you will be so good as to permit the appearance of this letter, the object of which is to inform your readers that they may be assured that any extravagant or grotesque appeals emanate from persons who have neither the authorisation nor the support of this Committee.—Yours faithfully,

C. ARTHUR PEARSON,
HEDLEY F. LE BAS,
FREDERICK PONSONBY,
Joint Secretaries,
Subscription Sub-Committee, National Relief Fund.

York House, St. James's Palace, S.W.,

THE CAPITULATIONS.

AN ITALIAN POINT OF VIEW.

The "Letter from Cairo" in *La Vita Italiana del' Estero* for July 25 contains some interesting reflections, from an Italian point of view, on Lord Kitchener's Report, with special reference to the Capitulations. We give below the gist of the correspondent's letter, so far as it deals with this delicate subject:—

In the days of Lord Cromer these annual statements were awaited with calm by both natives and foreigners. Now, however, partly by reason of the economic depression which followed the departure of Lord Cromer, and which still endures, partly because everyone is aware that the principal aim of Lord Kitchener is to deliver Egypt (and incidentally Great Britain) from the international bonds which in a certain measure subject the country to the control of the Great Powers, partly also because of the impulsive and autocratic character of the Proconsul himself, his report is awaited with a general feeling of unrest.

The natives, although they are by no means prepared as yet for the exercise of political power, await it with lively hopes of seeing their privileges extended in every direction. The foreigners, on the other hand, who are perfectly aware of the unprepared state of the natives, await it with sentiments of an accused man who is not allowed to speak in his own defence. They know by experience that the extension of the powers of the natives will involve an immediate and inevitable curtailment of their personal security and of the real and tangible guarantees which they now possess in favour of the countries which they represent.

In the last Report of Lord Kitchener the part which refers to the Mixed Tribunals, and the Capitulations, which are intimately connected with them, forms the conclusion of his general observations regarding the state of Egypt (introduction). Lord Kitchener expresses himself thus:—

> I am not able to foresee the possibility of effecting any radical improvement in a situation the faults of which are inherent in the existing system of the "Capitulations." The fundamental modification of this system has been urged in the annual reports emanating from this Agency for many years past, and it may be hoped that a settlement of the question will not now be much longer delayed.

We do not know to what extent the hope of Lord Kitchener is well-grounded, but it is certain that he would like to add to his present brilliant titles, and style himself "Lord Kitchener of Khartoum *and of the Capitulations.*" I cannot get it out of my head that Lord Kitchener's dislike for the Capitulations is due not to any conviction of their uselessness, but to his feeling that he would like to see them "capitulate"—like the Mahdi and the Transvaal.

Be that as it may, it is beyond doubt that negotiations are on foot between the British Government and the Great Powers with the object of obtaining the suppression of the Capitulations, which, in spite of their ill-omened name, have for many years withstood all attacks of the English and of the Mohammedans of Egypt and other countries.

An account of these negotiations was involuntarily divulged by our diplomatic Mission which had been sent by the Italian Government to consult the Italian colony here with respect to this question. It would appear that our Agent did not take all the necessary precautions to avoid indiscretion, and his very reserved confidence was betrayed by one of his Alexandrian friends. His remarks went the rounds of the local Press, causing the greatest commotion among the public and in our Agency. The latter, seconded in this by the English Press, published one denial after another, and at length succeeded somehow in silencing the indiscreet journals. The secret is now, however, everybody's secret, and the denials only served to confirm the rumour.

No one doubts that the Capitulations constitute a serious obstacle to the development of the work of organisation undertaken with appreciable success by the British Government, but its agents exaggerate the importance of this obstacle, and the exaggeration very often helps to conceal the unfitness of the great majority of their national and Egyptian colleagues.

INDIAN MOSLEMS AND TURKISH NEUTRALITY.

Reuter's Calcutta correspondent reports, under date of the 26th inst., that the following telegram has been sent to the Grand Vizier at Constantinople:—

Representative Bengal Moslems offer to his Imperial Majesty their respectful congratulations on the occasion of the Feast of Bairam, and express gratification at Turkey's neutrality and the British assurance of Turkey's integrity.

The Indian Moslems, who consider loyalty to the British Crown their paramount duty, would greatly deplore any estrangement between England and Turkey.

3	21	Thursday	12	12

To-day, Shawal 6, is the birthday of H.I.H. Omar Faruk Effendi, nephew of the Ottoman Heir Apparent and son of H.I.H. Abdul Mejid Effendi.

Sunday is the birthday of H.S.H. Prince Frederick Victor, the eldest son of the Prince of Hohenzollern, and of his twin brother Prince Franz Josef. They are nephews to the Crown Prince of Roumania and brothers to her Majesty Queen Augusta Victoria.

Sunday is the birthday of H.S.H. Prince Günther of Schönburg-Waldenburg, brother of H.H. the Mpreteresha of Albania.

Monday, Shawal 9, is the birthday of the Valiahd, Prince Mohammed Hassan Mirza, brother and next heir to His Majesty Sultan Ahmed Shah.

Monday is the birthday of the eldest son of H.H. the Khedive, Prince Mohammed Abdul Mouneim.

Tuesday is the birthday of H.S.H. Prince Karl Anton, of Hohenzollern, brother of the Crown Prince of Roumania. He is married to the sister of the King of the Belgians.

Tuesday, Shawal 10, is the anniversary of the wedding day of H.I.H. Jemile Sultana, sister of His Imperial Majesty Mohamed Reshad Khan, to the late Damad Mahmud Jellal-ed-Din Pasha.

King Carol of Roumania, who has been indisposed, is now restored to health. On Tuesday he received the Turkish and Greek delegates.

Telegrams received in London at the beginning of the week stated that Mohammed Ali, ex-Shah of Persia, had returned to Odessa.

A correspondent writes:—"Though Egypt may suffer, in company with the greater part of Europe, from being declared in a state of war, the country may congratulate itself on the fact that its military control is vested in Major-General the Hon. Julian H. G. Byng. Scarcely yet turned fifty, General Byng has achieved an extraordinarily fine record of service since he joined the 10th Royal Hussars in 1883, and his energetic personality, no less than his ripe experience, has made him a true leader of men. Never sparing of himself, he possesses the true respect and confidence of his troops, who are all prepared to follow him to certain death should occasion warrant the sacrifice. No carpet knight nor society entertainer, Major-General Byng represents the very best type of our British military officer, an officer endowed with a fine intelligence and mental acquirements in keeping with his military instinct and the natural qualities which make the born leader. Various are the stirring stories told of him during his service in South Africa in the troublous years of 1899-1902, and the later incidents connected with his command in Egypt, if lacking, perhaps, in picturesque detail, acclaim him the General *par excellence* to carry through the duties entrusted to him during the present anxious time."

The Crown Prince of Albania and his sister have left Durazzo and proceeded to Brindisi.

Prince Mohammed Aly Pasha, brother of the Khedive, arrived at Alexandria on the 12th inst. by the Italian steamer "Siracusa" on his return from Europe.

According to *The Times*, Prince Friederich Leopold of Prussia, brother to H.R.H. the Duchess of Connaught, has been killed in action.

One of the sons of H.H. the Bey of Tunis has volunteered for the French Army.

Judge Sanderson, of Cairo, has left Edinburgh on his return to Egypt.

Mrs. Carkeet James is leaving London to rejoin her husband in Cairo on the 12th prox.

The death has occurred at Constantinople of Rifaat Pasha, a retired general and a former member of the Commission of Military Inspection. The deceased officer, who was ninety years of age, took part in two Turco-Russian wars, and was present at the historic defence of Plevna, where he was wounded by the bursting of a shell.

Mirza Mohammed Ali Khan, the Ala es Sultaneh, the new Persian Foreign Minister, entered the public service soon after the Anglo-Persian War in 1856, and after holding consular appointments at Bombay and Tiflis became Persian Minister in London under Nasr-ed-Din Shah, and retained that post for many years. Married to the sister of the Sadr Azam, Mirza Ali Khan Amin-ed-Dowleh, he has himself been Chief Minister, and, indeed, was Sadr Azam at the time of the Coronation. His great age naturally militates against any great administrative activity on his part.

On August 3, at Moda, Constantinople, a daughter was born to Mr. and Mrs. Philip Graves.

On August 20, at 5, Highbury Quadrant, N., the wife (*née* "Joycie" Watters) of Mr. Arthur P. Bolland, Sudan Agency, Cairo, and Maison Maghraby, Meadi, gave birth to a son.

Last Saturday, August 22, at Wollaton Rectory, Nottingham, the wife of Mr. T. W. Russell, Assistant Commandant of the Cairo City Police, gave birth to a son.

A son was born to Mr. and Mrs. J. W. Maloney on Tuesday. Mr. Maloney, who had been acting as Reuter's correspondent in Constantinople during the absence of Mr. Werndel, only arrived in England on Tuesday morning, and has since had to hurry off to Paris. Before her marriage, it will be remembered, Mrs. Maloney was a Miss Elliot, being the daughter of Sir Francis Elliot, G.C.V.O., the British Ambassador at Athens.

The marriage arranged to take place to-day between Lieutenant H. G. Evans-Jones, 1st Battalion Welsh Regiment, and Miss Nancy Bolton, of Troödos, Cyprus, is indefinitely postponed, as the war prevents the bridegroom leaving India.

Sir Normand Maclaurin, Chancellor of the University of Sydney, whose death is announced from Melbourne, formerly served in the Royal Navy as a surgeon. Serving in the "Marlborough" in the Mediterranean, he was present in Athens when King Otto was deposed (1862). He settled in Australia some twenty years later, was made Chancellor of the University of Sydney in 1896, and was knighted in 1902.

The death occurred on August 17 of Major Arthur Hughes-Onslow, at the age of fifty-two. Major Hughes-Onslow served in the Egyptian Expedition of 1884 at the battles of Teb and Tamai, receiving the medal with claps and Khedive's star. He also saw service in the South African War, for which he received the Queen's medal and three clasps. Promoted to major in 1898, he retired in 1903, and was placed on the reserve of officers.

Miss Katherine Wheatley, who had been asked by the Turkish Government to conduct a nurses' training organization, left Constantinople on August 5 for Liverpool, the scheme having had to be temporarily abandoned owing to financial difficulties. On her arrival in the Mersey Nurse Wheatley, who is a Reserve nurse, received instructions to proceed immediately to the front.

The death is announced of General Francis William Hastings, C.B., Colonel-Commandant Royal Artillery. He entered the Army in 1843, and served through the Crimean Campaign, when he was present at the siege and fall of Sebastopol, receiving the medal with clasp and promotion, the Fifth Class of the Mejidieh Order, and the Turkish medal. He became Colonel in 1870, and Lieut.-General in 1886, retiring in the following year with the honorary rank of General.

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.
Near the lake, with splendid park.

CECIL HOTEL.
In the town and 5 minutes from the station.

Two First-class Family Hotels.
High-class Cuisine. French Chef.
J. SUMSER, Manager-Proprietor.

Sofia (Bulgaria).

GRAND HOTEL BULGARIE
(opposite the Royal Palace).
First-class Hotel. Entirely renovated and beautifully situated in the centre of the city, near Post Office, Theatre, Museums, Banks, etc. Electric Light. Central heating. Baths. Garage. Telephone. Garden. French Restaurant. Good wines. Café. Foreign newspapers. Most frequented by English and American Visitors. Interpreter meets all trains. Rooms from 4 frs.

Cyprus.

THE CYPRUS HOTEL CO.

Open all the Year round—
LIMASSOL (Olympus Hotel).
FAMAGUSTA (Savoy Hotel).
For Summer Seasons—
PLATRES (Platres Hotel). 4,000 ft. from the sea level. Opens from May till Oct.
TROODOS (Olympus Hotel). 6,000 ft. from the level of the sea. Opens from May till Oct.
Perfect Situation. French and English Cuisine. Moderate Terms. Also Excursion to Mount Troodos.
For Tickets and further particulars apply to—
NAJEM HOURY, Limassol, Cyprus
(*Proprietor of the Army and Navy Stores*).
Head Office: Najem Houry Stores, Limassol, Cyprus.
Branches: Polymedia, Troodos, Nicosia, Famagusta, Larnaca, and Platres.
All arrangements for Transport by Carriages, etc. are made by the above Firm.

Bucharest, Roumania.

GRAND HOTEL DU BOULEVARD.
The Rendezvous Hotel of the Diplomatic World and Distinguished Visitors to Roumania.
Entirely renovated, with all Modern Comfort.
Unrivalled Cuisine.
FAMOUS ROUMANIAN BAND.
Admirably situated in the very centre of the Town.
LUCIAN BERTOLA, Proprietor.

We regret to announce the death, which occurred recently in Switzerland, of Mr. Van Heller, who was very well known in Cairo. His two sons, Messrs. G. and E. Van Heller, have taken a prominent part in polo at the Khedivial Sporting Club every winter.

Lieut.-General W. P. Campbell, C.B., who has been appointed to succeed General Sir H. L. Smith-Dorrien in the Southern Command, took part in the Sudan Expedition of 1884-85 with the Mounted Infantry, when he was present at the battle of Abu Klea, and for which he was awarded the medal, with two clasps, and the bronze star.

Captain Charles Ernest Wynell-Mayow died on August 13 at Brighton, aged fifty-seven. Captain Wynell-Mayow saw active service in the Egyptian Expedition of 1882 at the battle of Tel-el-Kebir, receiving the medal with clasp and the Khedive's star. In 1894 he was promoted to captain in the 2nd Battalion Border Regiment, and became Adjutant of the 4th (Militia) Battalion in 1899, retiring three years later.

Among the passengers for Egypt by the P. and O. steamer "Moldavia," which left London on Saturday last, were Mr. and Mrs. Blagden, Mr. P. W. Carver, Mr. R. Carver, Mr. N. W. de Courcy, Mr. and Mrs. Huri, Sir Malcolm McIlwraith, Mr. and Mrs. W. Peel, Mr. W. Snow, Mr. W. B. Trelawny, Captain Westropp, etc

Among the passengers on board the s.s. "Mardinian," of the Ellerman line, which arrived in Liverpool from Constantinople last Friday, were Miss Katherine Wheatley, Miss B. D. Ellis, and Messrs. T. Bolton, H. Green, L. Frost, R. S. Woods, H. Toulouk, and A. Pavlantes.

In a letter received this week, but dated July 28, our Jaffa Correspondent writes:—

Dr. J. Melville Keith, physician in charge of the English hospital at Jaffa, left us yesterday, by the Khedivial steamer, on his way home to Scotland. His departure was greatly regretted by all Jaffa and this district. As soon as the news of his resignation was known here, a long telegram, signed on behalf of Jaffa Christians, Moslems, and Jews, was addressed to the Church Missionary Society's headquarters, earnestly requesting, for the sake of the society and humanity, that every effort should be made to persuade Dr. Keith to remain here. Finding, however, that he had decided definitely to leave Jaffa, his friends, acquaintances, and admirers at once began to arrange and collect for a presentation to him. This was most heartily supported, and in the evening of the 14th instant a large gathering assembled at the late Miss Walker-Arnott's Tabeetha School for the purpose of the presentation. Eloquent speeches were delivered by the Rev. John E. C. Ross and the Rev. Butros Moussa, both of the C.M.S. here, also by Mr. N. H. Fiani, the British Acting-Vice-Consul, Mr. Joseph El-Issa, editor of the *Palestine*, Emin Effendi Nasif, and Mr. Shukri Moussa. The presentation was then made. It consisted of a massive Georgian silver tea tray, with the following inscription: "Presented to Dr. and Mrs. J. Melville Keith by their friends in Jaffa as a token of respect and affection, and in grateful appreciation of their invaluable labours during sixteen years of medical mission work.—Jaffa, Palestine, July 14, 1914." The presentation also included a very handsome silver tea service.

Colonel R. A. Nugent, retired pay, who has been appointed Assistant Director of Military Transport at the Royal Arsenal, Woolwich, formerly belonged to the Army Service Corps, and saw service in the Egyptian Campaign of '82. He was present at the battle of Tel-el-Kebir, and he also took part in the actions at Teb, Tamai, and Abu Klea. He had previously seen service in the Ashanti War (1873-74).

Major-General E. D'H. Fairtlough, who entered his eighty-fourth year on Monday, served in the Crimean Campaign, when he was present at the siege and fall of Sebastopol.

The death is announced from Geneva of Mr. Robert Stabile, a leading member of the Maltese community of Alexandria.

Chevalier Aquilina is leaving Liverpool by a Henderson liner on the 10th prox., on his return to Alexandria.

Mr. W. H. G. Werndel, Reuter's correspondent in Constantinople, who went for a holiday to Austria, has had to return to Constantinople.

Reuter's correspondent reports that an intercession service commemorative of the Crimean War was held at the Anglican Church in Constantinople, in the presence of Sir Louis Mallet, the British Ambassador, and the members of the British Colony.

The Bairam feast at the end of Ramadan (the Moslem Lent) was celebrated in the Sudan on Saturday last. The Government offices were closed for four days. Colonel Crawford, the acting Sirdar and Governor-General, held a parade of the Egyptian troops in the morning, and there was a levee at the palace which was attended by the officers, officials, and the principal residents. The Order of the Osmanieh (4th Class) has been conferred upon Kaimakam Kenney Bey, and the Imperial Order of Mejidieh (4th Class) upon Kaimakam C. M. Drow Bey.

A Reuter's message from Paris says:—The keenness of Frenchmen of all classes all over the world to join the colours is instanced by the priests in Palestine. Numbers of those in Jerusalem, hearing of the mobilisation order, left by the first boat for France, among them the Dominican Father Vincent, who was engaged at the time in writing an archæological work on ancient Jerusalem.

APPOINTMENTS, PROMOTIONS, ETC.

The appointment of Lieut-General Sir Alfred E. Codrington, K.C.V.O., C.B., to be Military Secretary to the Secretary of State for War and Secretary of the Selection Board, vice Lieut.-General Sir W. E. Franklyn, K.C.B., is gazetted, to date August 9, 1914.

Lieut.-Colonel H. Picot, who was formerly British Military Attaché in Teheran, has been appointed Military Attaché in Berne.

It is announced that Field Marshal Von der Goltz Pasha has been appointed German Military Governor of the conquered districts of Belgium.

The following appointment in the Egyptian Army is gazetted:—

Brevet Major Alexander W. F. Baird, D.S.O., Gordon Highlanders, having reported his arrival in Egypt from England, is taken on the strength of the Egyptian Army from 15-7-14, with the rank of Bimbashi, vice El Miralai J. L. J. Conry Bey, D.S.O., killed in action. This officer is posted in the Upper Nile District.

According to the *Jeune Turc*, Suleiman Hikmet Bey, Kaimakam of Uzun Kupru, has been promoted Mutessarif of Lazistan on the Black Sea.

Kemal Bey, Mutessarif of the Sanjak of Sinope, has been transferred to the Sanjak of Adalia.

Lieutenant W. L. Clinton, of the King's Royal Rifles, has been selected for service with the Egyptian Army.

DOMESTIC ANNOUNCEMENTS.

BIRTH.

GRAVES.—On August 3, to Mr. and Mrs. Philip Graves, at Moda, Constantinople, a daughter.

DEATHS.

BIRD.—On August 15, Mary Rebecca Stewart Bird, C.M.S. missionary, at Kerman, Persia (typhoid).

SMAIL.—On the 20th inst., at Atbara, the Sudan, Gervase Husey Smail, the eldest and dearly beloved son of the late Commander Smail, R.N., and of Mrs. Smail, 2, Sussex Terrace, Southsea.

PRIOR.—On the 10th inst., at the Deaconesses' Hospital, Alexandria, after a short illness, Edward J. Prior, aged 34 years, only and dearly loved son of Mrs. M. F. Prior and the late Captain Prior.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

FRIDAY, AUGUST 28, 1914.

THE BLUFFING OF THE BALLPLATZ.

It is difficult in time of peace to fathom depths of diplomatic duplicity in which the deep-laid policies of certain Powers have moved. In time of war the task is even harder, news is scanty, often untrustworthy, frequently deliberately misleading, sources of information available in peace are dried up, and the inquirer can make at best but slow progress. Consequently it is only now that it is becoming possible to collate the various events which led up to the outbreak of war, and estimate the value of protestations and assertions made by, or on behalf of, the Teutonic Powers. Berlin at the present moment, by means of wireless messages to the world at large and of special missions to the United States in particular, gives daily assurances that war was forced upon Germany by insidious foes. The Emperor William himself wishes people to believe that the sword was thrust into his hand, and his armies were told that they were entering Belgium solely in order to rid that kingdom of French and British invaders. The dramatically minded Prussian Monarch endeavours to pose as the protector of pacific Teutonic culture (so admirably portrayed in this week's *Punch*) against an unjust and malignant conspiracy engineered by vindictive Frenchmen, barbarous Russians, and envious Britons. This may be possible in the eyes of the German public, but it does not deceive the West, and this eagerness to assume a profitable pose suggests that there may be something more than mere disaster to conceal. We hear very little of Germany's ally in these statements—that ally on behalf of whom the Prussians claim to have drawn the sword. One might almost gather from the official utterances of Berlin that "Deutschland über Alles" means that Austria is among the "Alles" and does not partake of the dominant character of "Deutschland."

If we come to examine the various State documents that have been published in this country in connection with the efforts of Sir Edward Grey to keep the peace of Europe, we perceive that the five Powers did not drift into war fortuitously, as some have been led to suppose, but were driven into it by the evil genius which pervades Potsdam. We do not say that that genius is the Emperor William, but we must confess that the Prussian King appears to have yielded with no great reluctance to its destructive inspiration. Those of us who have followed the course of Austro-Servian relations from the day when the Obrenovitchs became a sovereign dynasty to the day when the Karageorgevitchs became too strong to be the vassals of Vienna, realised some time ago that the antipathies of the two States would probably lead to bloodshed. Indeed, neither party seemed at any time to be taking any real precautions to prevent an outburst. Servia, was at times deliberately provocative; Austria-Hungary was often directly menacing. Servia upon occasion crossed Austria's path; Austria was known to be impatient of the very existence of Servia. Consequently when an opportunity arose for attacking Servia with some show of justice, Austria, relying upon the unfortunate association of Belgrade with flagrant regicide in the past, decided to strike. It is very curious, however, that the moment for action should have been timed not so much in accordance with what had occurred in Serajevo, but with what was occurring in Ulster, in St. Petersburg, and in Paris. It is known that multitudes of Germans pervaded Ireland during the few weeks just before the war, and it would be more than surprising if none of them had reported confidentially to Berlin. We know also that overtures had been made in Constantinople and in Sofia, and it is now obvious that Berlin made use of the Austrian grievance in order to attempt a *coup de théâtre* in the Balkans. An immense humiliation was to be put upon Servia, and Belgrade was to be made to sign away its independence. Russia, supposedly distracted by strikes, was to be frightened off from any attempt at interference, and the Teutonic Powers were to manifest to the Balkans, the Turks, and the rest of the world that diplomacy in shining armour was the only kind that was of any avail, and that Berlin was really the arbiter of the destinies of the East. The allusion to Salonika in the White Book shows that prestige and a protectorate over Servia were not the only objects in view. The master-strokes of the annexation of Bosnia and of Agadir were to be repeated, and a third and more brilliant move on the diplomatic chessboard was to place armed Teutonism on the Ægean, while an obsequious action of an allied or dependent Porte was to assure to Berlin the veiled dominion of the Dardanelles. This appears to have been the scheme. And the pawn put forward by the master-mind in Berlin, not necessarily, we repeat, an Imperial mind, was the pathetic figure of the Austrian Emperor. The hands that delivered the ultimatum were the hands of Austria, but the words were those of Germany. Thus Austria was put forward to spring the grand diplomatic mine which was to blow up the last obstacle, since the dissolution of the Balkan Alliance, between Teutonism and the Asia Minor which held its highest hopes. Austria was to bear the blame for bullying a small if somewhat unruly State, Austria was to browbeat, "protect," and if necessary fight the Servians, while Germany reserved to herself the heroic pose of defending her ally's back against the attacks of Russia, France, and England, no one of whom—so Berlin was fully persuaded—was in any condition to move against her. Consequently the Kaiser Franz Josef was impelled along the path of aggression on the strict understanding that Berlin would take care that Russia did not move.

Then madness came upon those who dictated German policy. The fact that Russia was willing to permit Servia to suffer to a limited extent, and consonant with the preservation of her sovereignty, was taken as indicative of hopeless weakness. The anxiety of Sir Edward Grey to keep the peace was interpreted as a sign of fear, British magnanimity being once again mistaken for pusillanimity. Berlin proceeded to bluff. The Ballplatz had been bluffed into embarking upon the Servian War for the benefit of Germany under the assurance that Russia would remain quiescent; now that St. Petersburg began to stipulate for the preservation of the independence of Servia steps must be taken to frighten the Tsar. Berlin appears to have believed that its bluff would be successful. A diplomatic document was drawn up congratulating the Russian Government on abandoning its support of Servia, and this, by inadvertence, was left at the Russian Foreign Office when, events having taken a contrary course, the German Ambassador called for the purpose of declaring war. The bluff had to be called, for the dominion of Europe was not to be had for the asking. German diplomacy had, in demanding everything for itself, gone too far, and in the prosecution of its own selfish ends it had landed its only ally in an impossible position. The Austrian Emperor, in the evening of his days, was first thrust forward into the battle line, and when he had taken up a position which was tenable only if Russia kept the peace, was suddenly exposed by the ambitious folly of Berlin to the attacks of all those who sought to check the savage aggression of the Germans. We have no quarrel with the aged Hapsburg, least of all with his Hungarian or Dalmatian subjects. France has no quarrel with him, yet he is at war with her and with Japan as well, in addition to the Slavonic peoples, who regard his rule as oppressive for their kin. The Ballplatz has been as greatly deceived by Berlin as the Wilhelmstrasse has been by its own diplomatic agents, who gave assurances that neither Russia, France, nor Great Britain could move. It is a tragic end for a long reign. The Kaiser Franz Josef might

Digitized by Google

well have been allowed to die in peace. War he never wanted to see again, having seen it twice in his life. Yet his life, perhaps his crown, must now be sacrificed, because the self-assertive Junkers of Prussia seek to push forward the shoddy Hohenzollern Monarchy as the symbol of Teutonism in the future, regardless of the fate of the pathetic head of the time-honoured dynasty of Hapsburg-Lorraine. Prussia schemed against Franz Josef from the very beginning of his reign. In 1866 she actually struck him down, and now at the end of his reign—for the Austrian Emperor is believed to be a dying man—she has forced him into a false position and abandoned him to his fate at the hands of those she has raised up against him. The humiliation of being defeated by Prussia in 1866 is as nothing compared with that felt by the Emperor of Austria in the realisation that he has been made the catspaw and dupe of the Hohenzollern Kaiser in 1914. It may well have crushed the spirit of a Hapsburg.

SERVIA'S SHARE IN THE WAR.

The great struggle is barely a month old and it may still experience many vicissitudes before the last shot has been fired. But both Servia and Belgium have played their parts so well that it is possible to sum up at this stage their respective contributions to the cause of the Triple Entente without running any risk of the estimate of their earlier services being affected by subsequent developments. If Germany counted upon being able to deliver a crushing blow upon France before she was called upon to pay any serious attention to the Russian danger, Austria-Hungary, we may be sure, had not contemplated any serious preoccupation in the south which would distract her attention from the main task on her Eastern border. Thanks to the gallant defence of the Servians, things have gone thoroughly unsatisfactorily, if not disastrously, for the Austrians on their Servian frontier. Very little light has been thrown on the general situation in the Dual Monarchy. The campaign against Servia has not been undertaken in a manner at all commensurate with Austria-Hungary's full strength; but we have not sufficient information to go upon to decide whether the paucity of the numbers sent to the Danube and Save was due to a studied contempt of the Servians or whether the Austro-Hungarian plan of campaign had to be modified owing to the unexpectedly rapid mobilization effected by Russia. A third reason has been vaguely hinted at—that Austria-Hungary's plans have been thrown out of gear by disaffection among her Slav subjects. Rumour has spoken of actual mutinies among her troops, of reservists not joining the colours, and of the loyalty of certain districts only being assured by the taking of hostages. There are no means of verifying these reports, and for the present we must disbelieve them. The fact, however, remains that the forces with which Austria-Hungary moved against Servia were wholly inadequate for the task allotted to them. Belgrade, it is true, has been subjected off and on to a ruinous bombardment, which has destroyed a considerable portion of the city without advancing the Austrian cause one whit; but in the light of the ostensible reason for the outbreak of the European War Austria-Hungary's achievements in regard to the punishment of Servia have so far merely covered her with disgrace.

The declaration of war from Vienna was followed by a rapid movement of troops to the Save and Danube. Belgrade, the first objective, was evacuated by the Servian Government, but troops were left to delay the Austrian advance. But neither opposite Semendria, lower down the Danube, nor on the Save above Belgrade did the Austrians display any persistence in their attempts to reach Servian territory. The ill-success of these half-hearted efforts was followed by a more vigorous turning movement farther up the Save and from the west across the Drina. No serious resistance was offered by the Servians, who appear to have lured their enemies on into difficult country. When more than three army corps had made their way into the horseshoe formed by the Drina and Save the Servian army fell upon the Austrians and completely routed them. In their flight the Austrian troops had to sacrifice some 53 guns and a miscellaneous quantity of stores and equipment. Their losses are put at from five to ten thousand, while four thousand and fifty were taken prisoners. The Servians followed up their victory by a pursuit on Bosnian territory, while farther to the south they are said to have advanced on Visegrad in the direction of Serajevo. Of the moral effect of such an encounter both upon the Servians and the Austrians there can be no doubt. The Austrian force engaged was not a large one, and in ordinary circumstances it would not be difficult to avenge the defeat. But the Servian victory coincides with the invasion of Galicia by the Russian army, and the announcement of the Vienna Government that it will henceforth confine its operations in the south to punitive expeditions indicates that the pressure from the east is engaging the whole of Austria-Hungary's attention.

If the Austrian army abandons the offensive in the south the Battle of the Drina will have played an important part on the course of the war. In the face of a refusal to try definite conclusions with Servia the Austrians are unlikely to be willing to spare many troops to help the Germans in Alsace. At the same time, the force that they must keep to watch the Servians, though less numerous than the one that would have been required for the subjugation of Servia, will still be considerable. The Servian army has behind it experience in actual warfare, and whether in generalship or in the confidence of its veteran troops seems to possess a distinct advantage over Austria's untried legions. But it is to be hoped that it will not press its good fortune to the point of rashness. A too vigorous offensive might lead to a disaster as complete as the rout of the Austrians on the Drina. On the other hand, the prestige that Servia will have gained for herself in Bosnia and Herzegovina by her victory, if carefully fostered by steady military progress and by the means which the Servians have at their disposal of rousing the sympathies of their fellow Slavs under the Hapsburg yoke, must stand her in almost as good stead as further victories, but at much less cost. Then when the Russian advance has been pressed home and the Austrian army is more fully occupied than it is at present, the time will have come for establishing Servian claims upon Bosnian territory. Time is all on the side of the Powers ranged against Germany and Austria-Hungary. The fight which these two countries have provoked must be fought to a finish, if their claim to annul at will the independence of weaker States is to be successfully challenged. Servia, therefore, will do well to merge her quarrel with Austria-Hungary into the great reckoning which is being prepared against the disturbers of the peace of Europe. Her military operations should be co-ordinated with those of Russia, so that the maximum pressure may be put upon Austria-Hungary at the psychological moment. There is no need for her to waste her strength against Bosnian fortresses or upon the Austrian army in a strongly entrenched position. She has achieved her immediate purpose by driving the Austrians from Servian soil.

NORTH BRITISH AND MERCANTILE INSURANCE CO.

FORLORN ALBANIA.

A ROMANTIC RELIC.

By the courtesy of "The Times" we are enabled to reproduce the following article from its special correspondent in Albania, which appeared only in the first edition of August 26:—

The palace windows of Durazzo look sheer upon the sea, and now across the horizon steal trails of smoke from the warships that pass in search of prey. The noise of battle rolls from Antivari, while close from the landward side is a nightly rattle of rifles, the long, spitting racket of machine-guns, and the heavy roar of shrapnel. And when I think of those palace windows and of the lonely Prince and Princess who watch within, staring over the blue sea for some fresh portent, some new vexation in their harassed world, I tell myself that there indeed is the fulfilment of the poet's vision wherein for all time he crystallised Romance. Are not these the

> Magic casements opening on the foam
> Of perilous seas, in faëry lands forlorn?

Who now shall say that Romance is dead? At Durazzo we lived and moved and had our being in it. There was every element from high tragedy to low comedy. No manager of musical comedy has ever staged anything better than the Durazzo scene. This was a sandy square with a little jetty running into the bluest of deep-blue bays, which shimmered under an unclouded sun by day and a searchlight moon by night. On one side was the Custom house, on the other the Royal Palace, with a small shady garden. The warships of the Great Powers lay at anchor in the bay, and smart pinnaces were to be seen forever dashing to and from the jetty, landing natty naval officers dressed in white uniforms and sun-helmets.

In the square all went with a swing, and for two hours before sunset every evening we met for gossip—diplomatists, Dutch officers, Roumanian officers, European Control Commissioners, admirals, Austrian volunteers, soldiers of fortune from many countries, journalists, famous lady travellers, and mysterious titled ladies of various nationalities who were said to be Young Turk, or Austrian, or Italian agents, or somebody's spies for certain. From the windows of the palace, between the green jalousies, equerries and court-marshals in "Merry Widow" uniforms conducted conversations or intrigues with members of the crowd below, and sometimes a lady-in-waiting might be seen smiling to a rosy-cheeked flag-lieutenant. The band from H.M.S. "Defence" played just the right kind of ragtime, and there was a full chorus of Albanian mountaineers. Their tunics were stiff with gold and silver, and to provide the precious metals and stones in the butts of their pistols alone would have seriously depleted the takings at the box-office of any musical comedy.

Sometimes the Prince and Princess walked through the crowd, on their way to take tea or dinner aboard a warship. The tall Prince wore the last word in gorgeous uniforms, and as he passed with glittering aides-de-camp the Albanians roared loyalty in unison and fired a *feu de joie*.

Then the sunset, and we had to know three new passwords every night. Martial law was of the strictest, and there was no getting home from a bridge party without some excited Italian or Austrian sailor sentry ramming a bayonet almost into one's face. The Albanian sentries were more polite, but there were bad men who fired from roofs by night, and more than once I heard a bullet sing mysteriously in a quiet street.

We dined, diplomatists, soldiers, and journalists, in a rough wooden hotel, a symbolic shelter, the hasty creation of Europe. And almost every night before the coffee was finished under the trees the ripple of rifle fire began from the trenches 400 yards away. Soon the ripple swelled, and presently the artillery joined in. For a space there was all the deafening noise of battle, and sometimes in the morning we found some dead. But for the most part the night attacks were negligible, and the noise was all on our side. There were two real attacks, by daylight. In one we had ten killed, including Colonel Thomson. In the other the town lost thirty-seven men and over sixty were wounded, but the enemy's losses were probably three times as great.

It was third-class war, but I suppose that in Durazzo I may have heard more bullets and seen more shells burst than all we correspondents are likely to be allowed to see or hear in the whole of the European Armageddon.

In the end of July the mutterings of greater war began to reach us. With an international squadron in the bay the Concert of Europe had a real existence in Durazzo. Before our eyes we saw Europe dissolve and disappear.

The Russian cruiser was the first to steal away—"to get the washing at Corfu," the captain told me. Corfu was the fleet's laundry, but we both smiled when he told me that he would return. Next there went the French battle cruiser, "Edgar Quinet." The same afternoon Admiral Troubridge and some officers of H.M.S. "Defence" came on shore. They breathed no hint of an early departure, but I noticed that their shore signalling station disappeared, and I drew my own conclusions. Next morning we searched the horizon in vain for the British ships. The German "Breslau," unwisely for it, remained longer, but on July 31 it also disappeared.

Friends had become enemies, for of all friendships in Durazzo the most striking *camaraderie* was between the officers of the "Defence" and of the "Breslau." The latter were specially interested in English methods of keeping the men hard and happy, and the "Defence" taught the "Breslau" to play water polo. On August 1 the Austrians left, and nought but Italians remained in the bay.

On shore it was a sad scene. Diplomatists and European Commissioners saw themselves gradually being marooned. Their ships were gone. Fate had made them the enemies of one another. Their powers depended on a united Europe, and, behold, Europe was at war. All the soldiers, the Dutch officers, the Austrian volunteers, and everybody upon whom the Prince depended, were recalled to their own countries. The Prince's equerries, his butler, his cook—all were mobilised. The cook's departure was perhaps the heaviest blow of all, for he had been a stand-by.

But the Prince and Princess hung doggedly on. There were floods of tears in the Palace, and my last memory is of a sad red-eyed Princess on the balcony above the sea.

The insurgents were still at the gates of Durazzo.

WAR MAPS.

Messrs. Sifton Praed, the Map House, 67, St. James's Street, have issued a strategic map of the countries bordering on the North Sea, on a scale of 1:2,000,000, or about 31½ miles to one inch (2s. 6d.). There might with advantage have been a few more names on this map, but great care has been taken to indicate the position of the immense areas of sand on the North Sea coast of Germany which are exposed at low tide—a point which is of importance in naval warfare. The same firm has also issued a four-sheet map (at 6s.) of the seat of war in France and Belgium. It is enlarged from the well-known French staff maps, and is on a scale of four miles to one inch. As the originals from which it was prepared are now almost unobtainable, many students of war telegrams will find these sheets a useful substitute.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The movement which is being organised at home with a view to enable our manufacturers and exporters to fight German trade successfully and to oust it, once and for all, out of markets which used to be ours exclusively, is rapidly gaining in popularity. Applied to the Near East, where German and Austrian trade have dealt us many a nasty blow, its immediate effectiveness can only be relative, as a glance at the economic situation will readily show us. Servia will not be a purchaser for some time; Bulgaria has not been able to raise her loan; in Turkey the moratorium has been declared; and as for Greece and Roumania, they are perforce playing a waiting game.

***

But these economic effects are only of a temporary nature. When matters have become normalised again the Near East will regain its position as a good market for machinery and manufactured goods, and by then we must be in a position to beat the Germans and Austrians on one of their favourite grounds. It can be done most easily, if we only go about it in the right way. What we chiefly want are: practical Consular officers, banking facilities, travellers, and capable agents. We need fear neither competitive prices nor Germany and Austria's transport facilities. All we have to fear is their superior organization, and the men who place or aid in placing German rubbish.

***

The immediate question is: What shall we do now to prepare for the eventual conquest of the Near Eastern market? As a matter of fact, like many a question, it is easier put than answered. We want to educate travellers in languages and in the nature of the markets to be covered. We want to get in touch with good agents and, having got hold of them, meet them halfway as regards samples and means of publicity. Business will then come unasked. In the past our conservative policy ruined hundreds of chances. I will cite some instances. In one of the Near Eastern States British business men prefer to deal through a German bank rather than through an English one because the latter is (or was) unenterprising. I know of several firms who, unable to get good English travellers, employed Germans. I know of a Consular officer who on his visiting card describes himself as "Britisch." I know of firms, big firms, who lost a sure business by refusing to allow their agents either samples or an advertising fund. These are follies which will have to be guarded against in future. My way of looking at the whole question is: if a firm wishes to introduce its articles on the Near East market, it must go about it in the proper way; if it only wishes to nibble, without working the market, the best thing it can do is to leave it religiously alone. There is no half-way.

***

Apart from educating our travellers and influencing the authorities to improve, when and where necessary, our Consular service, there is little to be done at present. This must be frankly admitted. Banking facilities will come later, and Servia, which is our stout little ally in this terrible war, will be deserving of special attention, and doubtless she will get it, because trade in the new Servia in the making will be excellent. Bulgaria is a much more industrial country—besides being agricultural—and will wish to create her own industries. This means machinery, and it means the erection of factories. This can be done by British firms. Roumania is in a similar position, and there are already quite a few British firms who have erected branch factories in the country. They are doing well. Turkey, on the other hand, is too vast an empire to be able to manufacture sufficiently to cover even a tithe of its wants, and will always be a tremendous purchaser from Europe. Nevertheless, and assuming that the present war will leave the Empire unscathed, there will be an industrial *essor* of considerable dimensions.

***

Thus, after all and whatever the present situation, the outlook is an excellent one, and we must be thoroughly prepared to take advantage of circumstances as they come along. Egypt will certainly be the first country in the Eastern Mediterranean to recover, and Greece, if allowed to continue its even tenor unmolested, will be an easy second. Roumania at present is the only purchaser to any extent, but who knows what to-morrow may have in store for the country. A victory on the part of the Austrians would hardly keep her people from the fray, because there is no doubt that the Roumanians hate their Western neighbours. So that, until the situation has cleared, little can be suggested as regards a British trade expansion in the Near East. The only thing to be done is to study *now* trade conditions and requirements in the Near East, and act as soon as circumstances allow.

***

Besides, and this is an important point to be remembered, the end of the war will most likely have increased the number of markets in the Near East which will be open to British trade. That is, on the natural assumption that we and our allies do not lose the war. A slice taken away from Austria-Hungary means a slice gained to foreign trade, and there seems to be little doubt that the Dual Monarchy will lose several slices. Hitherto trade in Bosnia, Herzegovina, Croatia, Slavonia, etc., has been very restricted as far as we are concerned, and if these or parts of these are incorporated in the Servian State, we shall have an excellent chance of doing good business.

***

I referred above to the Bulgarian loan. In this connection I cannot refrain from mentioning a circumstance which I first saw mentioned in the *Journal des Debats*, and which was later taken over by the *Journal des Balkans* and other Near Eastern papers. According to this report, the Austro-German group which concluded the loan expressly stated in an official clause that, if a European war broke out before the date of the issue of the loan (September), the lenders should be entirely free to revoke their contract. I see no reason to doubt this report, and regard Germany's action in this matter as another proof that she had been preparing for war throughout the spring, and knew that it was coming.

***

Now that the two ignominious German ships, the "Goeben" and the "Breslau," have evacuated the Mediterranean, the trade route to and from Egypt will have been freed from danger, unless, of course, unexpected developments should take place in the near future. As our Alexandria Correspondent points out, Egypt's only importer during the past few months has been Italy, and occasionally an Australian boat. This state of affairs, producing as it did an extraordinary increase in the cost of living, will now come to an end, and the situation should become more or less normal in a very short time. As a matter of fact, the outlook for Egypt is not so bad as many would have us believe. Speculation in cotton, etc., will have received a blow likely to last some time, but this will hardly affect the material prosperity of the country. The moving of the crop will be attended without grave inconvenience, and the enforced paper currency, though naturally not meaning so much to the fellaheen as gold currency, will enable the banks to stem the worst of the tide. As for purchasers, Egypt will have lost nothing, as there are more than enough looms to take all she can produce, without taking into account those which have been lost to her on the Continent.

***

The Roumanian Bureau of Statistics has published a resumé of last year's agricultural output for the whole country. According to these statistics, the total value of the output amounted to 1,346,256,438 frs., or a slight decrease of 4 million francs as compared with 1912. Considering that the kingdom was engaged in a war towards the latter part of 1913 just when crops were ripening, the results are excellent; and if, as seems likely, this year's output is up to or above the average, Roumania will be in an excellent economic situation and a good purchaser. Germany and Austria being hampered in their exports, an excellent chance presents itself for our manufacturers, whom I advise to keep a keen look-out for possible business towards the latter part of this year or the beginning of next.

***

I read in *La Politique* of August 6, just to hand, that the Roumanian Steamship Company has suspended its postal service between Constantza, Constantinople, Pirœus, and Alexandria. It is to be regretted. When war first broke out Constantinople would have been completely isolated, had it not been for the Constantza line, and though now, of course, this route cannot be made use of, as it crosses Germany, nevertheless Bucharest is further from us than ever—in itself a serious consideration, even if the abandonment of the service does not affect Constantinople. Mails addressed to Bucharest will in future remain in Galata until a boat sails for Constantza, or will have to take a roundabout way viâ Philippopolis and Rustchuk. This is a great disadvantage for British merchants and exporters.

Business Conditions in Salonika

(From Our Own Correspondent.)

Salonika, July 25.

If for nothing else, as is far too well known, Salonika has long been notorious by reason of its fires; but since the Greek occupation these have been much less frequent, whether from a wholesome fear of the consequences or from what cause hardly matters so long as the improvement is an actual fact.

For several years the insurance companies here undoubtedly lost money, and so were forced, some five or six years ago, to increase the rates of premium in self defence, thus adding considerably to the burdens of those who did not insure as a matter of speculation or temporary investment. A few months ago some of our local editors, possibly short of copy, or wishing to pose as public benefactors, ignoring the losses the insurance companies had borne for years, took up the subject of the increase in the rates of premium, enlarged on the hardship of it, condemned the rapacity of the companies, and appealed to the authorities to take action in the matter. In discreet silence and without comment our local papers now tell us that the syndicate of the insurance companies in Athens wrote to the syndicate of the insurance companies established here inviting the latter to impose (it is remarkable how many "invitations" of this kind now get issued for all sorts of pecuniary purposes) a surtax of 5 per cent. on the present premiums, the proceeds of the same to be paid to our municipality as in Old Greece; and that, at a recent meeting of the syndicate here, this invitation from Athens was accepted and the additional tax came into operation on the 14th inst.

The Fire Brigade.

The beautifying of our decaying town may be a very laudable object in its proper season, but at present it is going to cost the general public pretty dear, while it will not feed the thousands of homeless refugees around us. But this is not all we have to look forward to, for Article 9 of a new law imposes on every foreign or native insurance company working in Greece an annual licence duty of £60, with, in addition, an income-tax of 6 per cent. on the companies' net profits made in Greece. Likewise a tax of 2 per cent. on the premiums for the maintenance of a fire brigade which does not yet exist here; another little regulation being that when the firemen are called out and are in attendance less than six hours, each of the companies interested in the fire pay one pound for their services, and the same sum for every succeeding period of six hours. Of this 2 per cent. for the firemen the companies are to be allowed to make their customers bear a part; but it seems more than probable the latter will, in the end, have to pay the piper in full, or remain uninsured. One can only hope that under our enlightened Government there will be such security that fires will become a nightmare of the past and insurance a superfluity.

Banking Hours.

In the good old prehistoric days, when Salonika was prosperous, its commerce advancing by bounds, and its future more hopeful, our banks had no fixed closing hours, but transacted business up to quite late in the evening. Naturally, the staffs thought the more when dilatory customers straggled in late; but all that is now changed, and things are much more restful for the employees, as the banks close for the day at one p.m.—except on Fridays, when they are open until noon, and again from three to six. A facetious correspondent in a local paper suggests that our merchants would do well to imitate the banks, for then our commerce, which now limps with one foot, would do so with both feet.

Transit Trammels.

Unhappily, it seems more than probable that our merchants will, in any case, have to follow the example of the banks, as the Austrians have put a spoke in our commercial wheel in the matter of our transit export trade. The latter have now protested to the Servian Government against the present railway carriage rates on grain, etc., coming to this port, which rates they contend are preferential ones (fixed under the Turkish régime) prejudicial to them in favour of Salonika, and are contrary to the treaties now existing between the two countries. Consequently, the Servians have had to raise the rates from Nish to this port from 125 to 226 francs per wagon of ten tons, which increase will make it impossible for our merchants to buy grain in Servia for Europe, and will make them send it round by way of Belgrade and Semendria, down the Danube, to the Black Sea, so killing the trade through Salonika.

Street Naming.

Meanwhile, there is one evidence of advancement here in the naming of the streets and the numbering of the houses. No doubt something of this sort was absolutely needed, otherwise it was quite impossible for our postal authorities to deliver letters to the vast majority of the inhabitants, who had no address whatever. It is to be regretted, however, that the names of the streets and roads are not also indicated in Latin characters; for, as it is, only a very small minority can read them. As a local paper says, it now only remains to decipher the names, to understand them, and then to know where we are. All the same, it is an improvement, and an advantage, to have an address, which has not been the case hitherto.

OIL IN BUSREH.

According to a British Consular report, out of 332,670 cases of petroleum imported into the consular district of Busreh during 1913, 179,294 were the product of the Anglo-Persian Oil Company, imported from Mohammerah. Sixty-six thousand three hundred and seventy-six cases were imported by the Standard Oil Company, and the remainder from Russia. As the season 1913-14 is the first in which the Anglo-Persian Oil Company has attained its full marketing strength, the year's business may be considered satisfactory on comparing its share with those of its competitors. The prices of kerosene, petrol, and benzine imported to Busreh and Baghdad were approximately as follows:—First quality, per case, 6s. 8d.; second quality, per case, 5s. 4d.; petrol, per gallon, 1s. 8d.; benzine, per gallon, 1s. 2d. These rates are approximate only, and have necessarily varied from time to time.

At present the Anglo-Persian Oil Company are practically the sole suppliers of benzine to the local market. The quantity of benzine imported into Baghdad and Busreh in 1913 was 430 drums of four gallons each. It is remarked in regard to kerosene that the prices of the Standard Oil Company early in 1914 were reduced by 1s. 3d. per case, and then rose again to the original rate and advanced a shilling more.

It is interesting to note that while the importation of candles decreased, the use of petroleum lamps is said to be becoming more general.

The Egyptian Trade in Building Materials.

The following article, which appeared in the August issue of the *Journal* of the British Chamber of Commerce of Egypt, is of particular interest at this juncture:—

The principal building materials imported by Egypt are timber, cement, iron, steel, and metal goods of all descriptions, drain pipes, sanitary goods, paint and varnish, tiles both glazed, roofing and paving, hydraulic lime, tar, etc. As will be seen from the following table, Great Britain's share in this branch of the local import trade was £E317,129, or 15.2 per cent. in 1911, £E343,646 or 16.8 per cent. in 1912, and £E343,071 or 14.8 per cent. in 1913.

During 1913, as will be seen in the following table, Great Britain took the lead in the following lines, though sometimes but slightly. Bricks and firebricks, earthenware pipes, paint, varnish, cast-iron, cast-iron pipes, wrought iron and steel pipes, and tar.

More than 50 per cent. of the building material imported into Egypt from abroad consists of timber—there are practically no timber producing trees in Egypt—which Great Britain and her colonies are in a position to supply to a limited extent only, the freight from Newfoundland and Canada, and the lack of direct shipping facilities, rendering it impossible for these colonies to compete in the Egyptian timber trade. Great Britain's insignificant share in this branch of business is shown in the table.

The timber imports of Egypt are nearly equally divided between five countries, namely: Austria-Hungary, Roumania, Russia, Sweden, and Turkey, the value of the shipments from each country during 1913 varying between Turkey's share of £E232,581, and Roumania's share of £E301,539.

Nevertheless the United Kingdom does supply worked timber to a limited extent in the form of office furniture and high-class joinery, and it should be noted that there is a certain demand for good joinery—although, generally speaking, cheapness, not quality, is the principal recommendation to buyers in the building trade in Egypt—and a not insignificant trade might be done by English master joiners in good work, of well-seasoned timber, at reasonable prices.

During the same year lead pipes to the value of £E7,503 were imported, of which only £E26 worth came from the United Kingdom, the principal suppliers being France £E4,326, Algeria £E1,497, and Germany £E1,053.

As regards wrought iron and steel pipes, the British product is acknowledged to be superior to any other, chiefly on account of the accurate threading of the ends, which always fit when jointed, and British makers will not depart from this accuracy for the sake of cheapness. During the year 1913 Germany supplied wrought iron and steel pipes to the value of £E52,271, United States of America £E10,143, Holland £E,5,636, and Belgium £E2,949, as compared with £E86,015 from the United Kingdom. The demand for pipes for artesian wells has been extremely heavy since the latter part of 1913.

In this branch of trade the British manufacturer is supreme. A large increase in the demand should be looked for during the next few years when the new drainage scheme in Cairo will be complete. Sewage disposal works, on a considerable scale, are also being carried out in Port Said, and important extensions in the drainage system of Alexandria are contemplated in the near future. Many of the more important towns in the interior will also probably undertake similar works as soon as funds permit.

In tiles, however, Great Britain's share is practically negligible, only amounting to £E21 in 1913, nearly all the rest coming from France, at a value of £E5,544. This is explained by the word "Marseilles," where corrugated, and many kinds of roofing tiles, are made on the seaboard and shipped direct. Yet if the United Kingdom succeeds in selling earthenware pipes it is difficult to understand her inability to obtain a share in the trade in earthenware tiles.

Although England and Wales are well supplied with stone suitable for making hydraulic lime, none is shipped to Egypt. This cannot be accounted for by the heavy cost of transport, as Belgium shipped during 1913 to the value of L.E. 7,905, the balance of L.E. 37,090 coming from France.

That pre-eminently British product Portland cement is being ousted in Egypt by brands of "Portland" cement made elsewhere, and the reason given by some large local users of cement is that the genuine British brands cannot be obtained, because British manufacturers are so full of orders for other parts of the world as not to care for the smaller North Africa (Egypt) orders. This reason can hardly be accepted, and is probably offered by contractors as an excuse for supplying cheaper imitation Portland cement.

The following table gives the value of the imports of cement from the principal countries supplying Egypt with this commodity.

	1911. L.E.	1912. L.E.	1913. L.E.
Total imports....	162,751 ..	168,210 ..	107,869
United Kingdom	61,416 ..	53,683 ..	31,458
Belgium	67,823 ..	67,036 ..	42,299
Austria-Hungary	16,293 ..	28,083 ..	15,844
France	13,314 ..	14,241 ..	13,111
Germany	3,284 ..	4,668 ..	2,585
Italy	209 ..	124 ..	2,001

It will thus be seen that during the three years 1911-1913 the total value of the imports of cement has fallen by about L.E. 55,000, notwithstanding the heavy demand occasioned by the drainage schemes in Cairo and Port Said, and other large works in connection with irrigation projects. This falling off is probably to be accounted for largely, not by a diminution in the use of cement in Egypt, but by the fact that there is a successful cement factory on the Mahmoudieh Canal in Alexandria. Italian cement is rapidly gaining ground in Egypt, at the expense of the Austrian product, and we understand that since the beginning of the present year (1914) the imports from Italy have increased to a very considerable extent, as compared with the same period last year.

Belgium, it will be noted, secures the bulk of the Egyptian trade in cement, and while the imports of British cement have fallen off during the three years under review by approximately L.E. 30,000, or about 50 per cent., those from Belgium only diminished by about L.E. 25,500 or 37.6 per cent. British cement holds its own as regards quality, and the falling off in trade must be ascribed to the higher prices demanded by home manufacturers. Taking as a basis the quantities and values imported from various countries during the year 1913 as given in the Customs statistics the difference in prices would seem to be considerable, the average value per ton of British cement delivered in Alexandria being L.E. 2.291, followed by French at L.E. 1.828, Italian at L.E. 1.714, Belgian at L.E. 1.707, German at L.E. 1.653, and Austrian at L.E. 1.621. Austrian cement therefore works out at no less than 14s. per ton cheaper than British.

As with cement so with steel joists, Belgium heads the list of exporters to Egypt, followed by the United Kingdom. The appended table gives the figures for the imports from the various countries supplying Egypt with this description of building material during the years 1911, 1912 and 1913.

	1911. L.E.	1912. L.E.	1913. L.E.
Total Imports....	92,953 ..	106,193 ..	101,990
United Kingdom	8,608 ..	11,966 ..	13,974
Belgium	77,208 ..	89,794 ..	84,718
Germany	7,137 ..	4,433 ..	1,452
United States....	— ..	— ..	1,846

Unless British steel for building purposes is imported for special work, generally speaking it cannot be obtained in Egypt, while Belgian makes are stocked. Cheapness is the cause of the predominant position of Belgium, but cheap steel in construction work often does not work out to be the cheapest in reality; more of it is needed to carry the same burden, weight for weight, and sectional area for sectional area; and we know of a leading architect who, because of this, specifies that if other than British standard steel be used an extra weight of 10 per cent. must be added. Certain non-British manufacturers state in their catalogues that, if requested, they will roll steel joists to the British and American standard specifications, a sufficient proof that their ordinary standard of rolling is inferior to the British standard. Some of the Continental joists bear the standard mark "P.N." (profile normale) whereas in reality they are as much as 5 per cent. under the standard weight. This is taken advantage of by unscrupulous architects to the detriment of their clients. If, as in the case of the Belgian manufacturers mentioned above, British makers of steel joists offered greater facilities to their buyers or agents to hold stocks, it is probable that a greater share of Egypt's trade in this line might be obtained.

There is much room for improvement of British trade in shutter and window bolts of the "espagnolette" type. Scarcely an Eng-

lish bolt of this description can be seen. Notwithstanding the fact that the general demand is for the cheapest, and often the flimsiest, quality of hardware, British ironmongery, which is always of a good class, should be more in evidence, there being a fair amount of building done for which good quality fittings are specified. British hardware is universally recognised as second to none, and there is much to be said for the refusal of home firms to turn out the low quality fittings. An obstacle to British trade is that local ironmongers, in view of the fact that English fittings are usually required in connection with British enterprises, add a larger proportion of profit to their prices than in the case of the cheaper continental fittings. Unfortunately for English makers, the choice of the style of fittings is often left to the architect, who is accustomed to continental designs and systems.

The English stove, which is recognised to be of good quality, is not much in evidence. With all the facilities for manufacture in England and Scotland this state of affairs seems to point to lack of enterprise and study of the local demand on the part of home manufacturers. The stove mostly in use is of the light type, not too light, with some white enamel front work. There is also a limited but increasing demand for fire-grates.

In conclusion we would emphasize the fact that it is often complained that it is somewhat difficult to obtain British articles of hardware, more especially steel goods, for the building trade in Egypt, although this is less true of Cairo than Alexandria and the towns of the interior. A suggestion which has been made to us by a local architect, and which we consider of sufficient interest to reproduce, is that a group of British non-competitive manufacturers of the various classes of building material should combine in forming a large depôt at Alexandria; not a small office, but a warehouse where articles in general demand for the building trade might be stocked, and samples of other articles be placed on view, and where transactions could be made and orders sent home. If this were done on a comprehensive scale a considerable increase in trade might be looked for. Without lending our support to this suggestion we would lay stress on the necessity for British manufacturers, if they wish to obtain a fair share of Egypt's trade in building materials, to grant their agents as extensive facilities as possible, both as regards credit and by allowing them to maintain a fair stock, in order that they may be in a position to compete successfully with their foreign rivals. A careful study of the articles in demand in this market, which are at present, as in the case of the "espagnolette" bolts mentioned before, supplied by other countries, might lead to remunerative business.

NEWS FROM ALL SOURCES.

It is reported from Paris that General Lyautey has decided to abandon none of the advanced positions occupied by the French troops in Morocco, since even a temporary withdrawal might be construed by the natives as a sign of weakness.

In their Weekly Circular, dated August 7, Messrs. R. J. Moss and Co., Alexandria, report that the stock of coal is "decreasing rapidly, and now estimated (including quantities aboard steamers in port discharging) at 30,000 tons. Prices cannot really be quoted: Cardiff to-day selling at over 50s., and North Cambay qualities at 45s. and over per ton f.i.w.'

The same report puts the exports of cotton-seed since September 1, 1913, at 3,641,840 ardebs.

The cruiser "Helli," recently purchased by Greece from the Chinese Government before she left the American shipyard, has arrived in Greece.

A Reuter's message from Cairo, dated last Friday, says:—A decree is published here to-day regulating the prices of foodstuffs in Egypt. The maximum prices will be fixed by a commission every Friday.

Our Athens Correspondent informs us that the new Greek cruiser "Lemnos" arrived at Phaleron on the 8th inst.

The price of crude oil in Roumania has again fallen. During the ten days ending August 1 the price of best Bushtenari decreased from 7.42 frs. per 100 kilos to 7 frs. per 100 kilos. Other types of crude oil were reduced proportionately.

Many of the newsboys (says the *World*) still run through the streets crying "All the winners! Victory for Allies!" Such is habit.

The *Morning Post's* Rome correspondent reports, under date of August 24, that 160 sailors of the German warships "Goeben" and "Breslau" landed at Brindisi the previous night, having travelled via Alexandria. They left immediately for Ala.

An Athens telegram states that the "Kilkich," the second of the battleships bought by Greece from the United States, arrived at Phaleron early this week.

The Egyptian Ministry of Public Works announces that at the adjudication, held on July 20, for filling access roads to the new English bridge, the offer made by Messrs. Bondi and Co., contractors, Cairo, was accepted for the amount of £E1,050.

Two new "halts," called Gabbary Garden and Metras respectively (situated between Nuzha and Mex Junction) have been opened on the Mariout Railway for passenger service only.

The *Orient* of August 5 reports that the washouts on the Anatolian and Pandermа-Soma railroads, caused by the great rains of the first week in July, have been completely repaired, and traffic has been resumed on both lines.

The Egyptian University has suspended work on its new premises at Bulak Dakrur on the land given by Princess Zenab. This, we understand, is on account of the crisis, as the funds, amounting to £20,000, are deposited in the Deutsch Orientbank, which, availing itself of the moratorium, only give out 5 per cent. on deposits.

ENGLISH SCHOOL,
NICOSIA, CYPRUS.

Preparation for Public Schools and for Commerce. Modern Languages. Turkish and Arabic if desired

ENGLISH GAMES.

Complete charge taken. Very healthy climate. Boys remaining for the summer holidays are taken to the Mountains. Moderate Terms.

Apply REV. CANON F. D. NEWHAM, B.A.Cantab., Director.

ENGLISH HIGH SCHOOL FOR GIRLS,
PERA, CONSTANTINOPLE.

An English Education on the lines of the best High Schools in England. Girls are received from the age of 5 to 17 years:—Kindergarten, age 5 to 7; Junior School, age 8 to 12; Senior School, age 13 to 17; and are prepared for an English Examination which admits them direct from this School to the University.

For Prospectus and particulars apply to the School, No. 1, Rue de Pologne, Pera, Constantinople.

The New School Year will begin in September, 1914. An Entrance Examination will be held on the first day of term.

Applications for admission, particularly as Boarders, should be made early, as the number of places is strictly limited.

Near East Markets.

PRODUCE REPORT.

LONDON, August 26.

Sugar.

All conditions considered, it seems quite clear that the Government has largely assumed control of all sugar refineries of this country, and while fixing the retail price will also regulate the selling price. They are also taking steps to secure raw sugar for the refiners to melt, and are said to have paid up to about 20s. c.i.f. London for about 200,000 tons Javas and other sugars, sufficient to keep the refiners at full work up to the end of the year. In the meantime, the Government has notified all the colonies that for the time being all export of sugar is to be prohibited, doubtless with a view to securing that it shall eventually come to the United Kingdom. Fair sales have taken place during this past week in English refined at late rates. Foreign on the spot continues quiet, but there is no alteration in prices.

Coffee.

There is still little business passing in the spot market, but prices show no quotable change. Mocha, long berry, 83s. 6d. to 85s.; East India, fine ord. to low mid., 61s. to 70s.; Costa Rica, ord. to low mid., 56s. to 73s.; Mexican, good to fine ord., 60s. to 66s.

Currants.

Low grades, which are getting scarce, are in fair demand and dearer, but the better qualities are quiet. Pyrgos sold at 25s. to 25s. 6d., Amalias 26s. to 26s. 6d., Zante 27s. to 28s., Gulf and Panariti 28s. to 32s., Vostizzas 31s. to 35s., and Smalls 26s. to 30s. Nothing definite can be said about new crop, although there are reports that some shipments may take place in the immediate future. According to the latest information from Greece, the fears entertained there that owing to the war the export of the fruit will be considerably curtailed this year have increased, and the Government has made arrangements with the National Bank of Greece that in case of need the latter will come to the assistance of the currant growers by offering to them loans guaranteed by the Government. With regard to the retention, the growers agreed to this being increased from 35 to 50 per cent. this year, on condition that this increase of 15 per cent. should not be in favour of the Privileged Currant Company but of the State, and should be used as a guarantee for insurance against risks of war, which will be undertaken by the Government.

Sultanas.

Sales have been of fair extent at steady prices. Smyrna, rain damaged, 28s. to 30s.; ordinary to medium, 32s. to 35s.; good to fine, 38s. to 42s. The Smyrna position seems to present great difficulties in regard to future shipments.

Figs.

New Crop: No business is possible at present on account of the absence of freight. Naturals are quoted 30s. to 31s., layers 30s. to 40s.

Dates.

Old crop is dearer. New crop is not being dealt in at present. Persian, boxes, are quoted 10s. to 15s.

Seeds.

Linseed: No business doing here, and Hull market, both for Calcutta and La Plata, has been nominal. London-Calcutta spot is quoted 51s. Rapeseed: Toria, arrived, quoted 50s. 6d. London. Cotton-seed.—London: No quotations obtainable. Hull: Egyptian is lower. Business was done ex store at £10 15s., and the closing quotation is £9. Bombay spot has declined 20s.—viz., £6 15s. nearest. Canary-seed: Turkish, 125s. spot.

Oils.

Linseed oil is quiet. Spot pipes, 26s. 3d.; barrels, 26s. 9d. Cotton oil: Refined spot pipes, pale, £31; sweet, barrels, £37. Olive oil: There is an improved demand, and a fair business is passing on the spot at hardening prices.

Gums.

The market is quiet, with only moderate business passing at more or less steady prices. Arabic, Egyptian, Turkey, sorts, quoted 37s. to £2 17s. 6d.; East India, Aden, 28s. to £1 12s.; Mastic, Turkey, 2s. 7d. to 2s. 9d. per lb.; Myrrh, good to fine, cwt., 96s. to 100s.; Olibanum, drop, 35s. to 50s.; Tragacanth, 1st and 2nds, £19 to £25; medium to good, £8 to £16; low to medium, £4 10s. to £6 10s.

Various.

Valonia, per cwt.: Smyrna, £9 10s. to £11 10s.; Greek, etc., £8 10s. to £11. Almonds: Jordan, £11 5s. to £12 10s.; Barbary, sweet, £6 10s.; bitter, £5 15s. Lentils: 19s. to 21s. 100 lbs.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ending August 7:—"Owing to the general war on the Continent, all our banks have closed their doors, declaring a moratorium; consequently no business in opium (as well as in all other articles) has taken place. Our quotations are nominally the same as last week, viz., 16s. to 19s., as to quality, for eligible material. The arrivals are 1,100 cases, against 2,124 at same date last year."

MANCHESTER MARKET.

(FROM OUR OWN CORRESPONDENT.)

MANCHESTER, August 26.

It cannot be said that any marked development in the market has occurred since a week ago. During the last day or two traders have been very much depressed by the bad war news, and more favourable business conditions are not likely to occur until the Allies are meeting with greater success. All kinds of matters have been discussed on 'Change, but scarcely anyone makes an attempt at fresh business. Spinners express no satisfaction whatever with the conditions ruling in the Liverpool market. There is no probability of any further alteration in prices for some time to come. More favourable reports are now being received relating to the American crop, with the possibility of a record output. The new Egyptian growth is also believed to be doing well. According to some people, a little improvement is showing itself in Egypt in the way of a cash business in piece goods. We hear of one firm having received a remittance this week by telegraph. Arrangements are being made for the despatch of a boat during the next few days with a full cargo. Makers of cloth suitable for India continue to deliver against old orders, and goods are being sent out, as shippers do not wish to have contracts cancelled. There is no particular development with regard to China. Very little is heard of the South American outlets. The depression in weaving districts is very acute. Some sheds are closed down for an indefinite period, and others are only working alternate weeks. In American yarns for home use business has been practically at a standstill. A little more stuff is now being sent in to users chiefly in the finer numbers. Occasional instructions to deliver are mentioned in shipping descriptions. Bolton yarns remain idle, and there is considerable curtailment of production.

SUDAN CROPS AND THE WAR.

The Sudanese Government has issued a circular which says:—

The Government having learned that certain merchants had profited by the present crisis to buy up the cultivators' ripening crops at ridiculous prices, the public is informed that deeds of sale of a present or future crop will not be considered by the courts according to the terms in which they are conceived. That is to say, if a merchant sues for damages for the non-fulfilment of a deed of sale these damages shall be calculated on the basis of the price actually paid increased by 25 per cent.

We understand, says the *Egyptian Mail*, that the Ministry of Agriculture are prepared to give every facility to cultivators desirous of planting their lands with rice. It is, of course, rather late to commence sowing rice, but this is scarcely a normal year, and as there is plenty of water available a fair measure of success with the crop may be expected.

EGYPTIAN COTTON MARKET.

(FROM OUR OWN CORRESPONDENT.)

ALEXANDRIA, August 14.

The Commission de la Bourse des Marchandises has imposed the price of 15⅝ tallaris for the liquidation of all open positions. A large number of export houses and the Liverpool Cotton Exchange have protested against this rate of 15⅝ tallaris; they would have preferred to see the open positions left in abeyance until the reopening of the Bourse, and in the meantime those concerned would have come to an arrangement with regard to liquidation.

We have already received samples of the new cotton from Upper Egypt. In Lower Egypt the crop is very good, and promises to be quite abundant, although here and there the boll-worm has made its appearance to a slight extent. Towards the end of October the Lower Egypt crop will be reaching Alexandria, and it is therefore time to deal with the situation. The spot market at Minet-el-Bassal should be opened again about the beginning of September if we are to prevent a veritable calamity of an economic character for Egypt. Italy, the United States, Japan, Spain, and Switzerland are all ready to buy cotton, and transit to these countries has become normal again. The reopening of the Bourse is therefore a matter of urgent necessity. As soon as navigation in the Mediterranean is not attended with any serious danger cargo boats will be coming here again, and we shall be able to resume our usual exports of cotton to England.

Messrs. Davies, Benachi and Co., of Liverpool, have received the following figures from Alexandria per mail:—

FINANCING THE CROP.

Reuter's Cairo correspondent reports that a meeting of the leading cotton exporters, cultivators and merchants, presided over by the Regent, was held on the 19th inst. at the Ministry of Agriculture to discuss the question of financing the cotton crop. Several projects were submitted, but were regarded as unsuitable, and no decision was reached, the meeting being adjourned for the preparation of a suitable scheme.

Engineering Notes.

Haifa Harbour Works.

Under date of July 24, our Haifa Correspondent writes:—"General disgust has lately been apparent at the long delay in beginning the Haifa harbour works, which, it has been reported from time to time, were to be put in hand very soon. People here are all dependent on the realisation of this project for an improvement in the present deplorable state of business. Telegraphic news has now reached us from the capital announcing the departure of the engineers of the French syndicate which has been entrusted with the construction of the harbour. The news is, of course, received with much satisfaction, and the inhabitants are anxiously awaiting the safe arrival of the engineers." For the sake of Haifa, it is to be hoped that the outbreak of war will not again delay the works. But the hope is rather a forlorn one, we fear.

Egyptian Contractors and the War.

A deputation of contractors lately waited on the Egyptian Ministers at Bulkeley, and was received by them in Council. The deputation had been charged by a great number of contractors in the country with the duty of representing to the Government the hardships experienced by them and the critical position they were in by reason of the refusal of all credit by the banks. Nearly all building works, it is stated, had been closed, and 30,000 workmen were out of employment. H.E. Hussein Pasha Rushdi promised to investigate the matter, in order to assist the contractors to continue their works and to come to the help of the large number of labourers who were out of work.

Suez Canal Works and the War.

Owing to the departure for France of all the principal heads of the Administration of the Suez Canal Company all the work in hand has been suspended (says *The Egyptian Gazette*). There were about thirty gangs of men working on the widening and deepening of the Canal, which was decided on at the last meeting in June. The only men left are those engaged in the dredging work. On account of this suspension of work thousands of workmen are out of employment. It is probable that all these men will be employed on the fortifications which the Government has decided to put up on strategical points along the Canal.

Austro-German Motor Trade.

The Board of Trade have issued a bulletin on the Austro-German export trade in internal combustion and explosion motors, gas motors, etc., which states that the value of such exports from Germany was £2,826,000, and from Austria, £37,000. Amongst the principal German markets for stationary combustion and explosion motors and blast furnace gas motors were Russia, Roumania, Egypt, and the United Kingdom. Steam and gas turbines combined with dynamos, pumps, hammers, etc., were sent mainly to Russia, the United Kingdom, Spain, British South Africa, Italy, and France.

Mechanical Aid to Marksmen.

All soldiers who have been in battle know that the vast majority of bullets never find their billet. It has been estimated by military experts in recent wars that it required from 3,000 to 5,000 bullets to hit one of the enemy. This is due chiefly to the difficulty which soldiers have in finding their distance range in the heat of battle. The boldest and bravest man is excited, and it is a supreme test of nerves and skill to make that cool calculation which is necessary to judge the distance between himself and the enemy. With the present system of service rifles the soldier must estimate the distance, set his slide to the distance marked, and shoot. If he has judged the distance wrongly by ever so little, or made an error of as much as two or three-hundredths of an inch in fixing his slide, the bullet will either strike the ground in front or whistle over the enemy's head; and, according to statistics given by musketry schools, the usual percentage of error in judging distance is about 25 per cent. In actual battle, of course, it would be very much more. But now with a new device—the invention of a famous marksman—every soldier can be a dead shot. It is a new rifle-sight which does away altogether with the difficulty of finding the distance. The soldier simply has to judge the apparent height of the object which he desires to hit, which by experience is known to be absurdly easy, and to shoot, according to a fixed sight, at a point below the object equal to its height. If he does that he "drops" his man.

The invention is based on a simple geometrical law—very simple, like other things, when one happens to know it—the "negative angle" sighting, and this law has been used to produce a sight so that the shot, when it leaves the barrel and reaches its vortex, attains a height just double that of the target. In scientific language "the negative aim creates an angle below the ground line which automatically subtracts from the angle of elevation." The system has, therefore, been called "the negative angle" sighting. It has been tested by experts, and the results show that the percentage of hits has risen from 19 to 95. The only interesting criticism of the "negative angle" system is whether in actual fighting men could control themselves sufficiently to aim indirectly at their objective. The instinct of human nature would not be to aim 6 ft. below the enemy and so ensure his death, but to fire at his head, and hit the chimney-pot above. We do not know whether the device, as described above, has been adapted to the British service rifle, but it is well known that every British soldier is a good shot, and this has been confirmed by the German officers—whom the British took prisoners last Sunday at the battle of Mons—one of whom, referring to their firing, remarked: "We had never expected anything like it; it was staggering."

Mechanical Appliances for Office Work.

The successful conduct of business has been greatly aided by mechanical inventions, all of which tend to the economy of time. Indeed, an up-to-date office looks to-day like an intricate machine. Envelopes are opened and sealed and stamps are put on by a simple mechanical process. There are both hand-power and machine-power devices for this purpose. Thus 6,000 letters can be sealed and stamped in an hour.

For heads of business houses and Government departments who have to sign their names hundreds of times a day a machine has also been invented, called the "Signagraph." The person whose signature is to be reproduced uses what is called a "monitor pen," which is attached to mechanism which moves ten or eighteen other pens simultaneously. The sheets of paper are arranged one above the other. As soon as each set is signed a button is touched and steel fingers take them away. With an 18-pen machine 5,000 signatures can be affixed in twenty-eight minutes, although that number per hour would be considered fast enough for all ordinary purposes.

The new calculating machine is even more wonderful. This device adds, subtracts, multiplies, or divides. Some of these machines are operated by hand, numbered keys being pressed successively. In others electricity is used, a small motor supplying the power for effecting the mechanical movement. All the operator has to do is to set the keys by a simple pressure and then turn on the power. This power is stored in a coiled spring, which is automatically wound by the motor every four revolutions of the main cylinder of the machine. To solve mechanically a mathematical problem with a calculating machine is remarkably easy. There is a primary and a secondary keyboard. If two numbers are to be multiplied they are set down by the machine by pressing the proper figures in each keyboard. A touch is given to the operating lever, the computing cylinder begins to revolve, and in a few seconds the result is shown in a line of figures at the back of the machine; so that all the mental work of every calculation is done by the motions of the mechanism.

The Engineering Editor of "The Near East" will always be pleased to answer inquiries from readers respecting any machinery or appliances described in these pages.

TENDERS INVITED.

EGYPT.

[*The London agent of the Egyptian Government is Sir A. L. Webb, K.C.M.G., Queen Anne's Chambers, Westminster, S.W., at whose office particulars of tenders marked (L) are to be obtained.*]

[*Further information concerning tenders marked (B) can be obtained by United Kingdom manufacturers and merchants at the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C.*]

Steel Roofing.—Tenders are invited by the Egyptian War Office for the supply of steel roofing for Gedaref. September 30. (L.)

Tools, Pipes, and Fittings, Window Glass, Underclothing, etc.—Tenders are invited by the Alexandria Municipality for the supply and delivery of miscellaneous stores, including tools, steam and galvanized iron pipes and fittings, window glass, cotton and woollen underclothing, etc. 10 per cent. deposit. Tenders to "M. le Directeur Général de la Municipalité d'Alexandrie." September 1.

SUDAN.

Open Shed, etc.—Tenders are invited by the Egyptian War Office for the supply of an open shed for Khartoum North, and for steel roofing for Gedaref. September 30. (L.) (Note.—Enquirers should quote the reference number M.W.H.Q. 312/44.)

Instructions are said to have been received in Egypt by cable from England ordering the work on the Abu Zabal wireless station to be completed within three weeks from now. The construction of the station has barely been started yet, and the erection of such a building and its final completion is ordinarily a matter of some months. In the present circumstances, therefore, a temporary structure will have to be put up (says *The Egyptian Gazette*).

FUCHS BROS. & CO.,
BELGRADE (SERVIA).
General Commission Agents.
Open for Agencies in
COTTON YARNS IN BUNDLES.
(First-rate Manufacturer Required.)

SULZER BROTHERS, WINTERTHUR, SWITZERLAND
Steam Engines of all sizes, especially Uniflow Engines, Boilers and Superheaters. Sulzer Diesel Oil Engines from 20 to 6,000 B.H.P. Pumps of various systems, particularly Sulzer's high and low lift Centrifugal Pumps. Fans of all kinds. Steam and hot water heating. Ice and Refrigerating Machinery (Linde system)

Shipping Intelligence.

SHIPPING IN THE LEVANT.

Writing on August 12, the Port Said correspondent of *The Egyptian Gazette* gives the following interesting sketch of the state of things in Port Said Harbour at that date:—

"There are at present more than fifty ships in Port Said Harbour, and the harbour thus presents a very pretty sight, with its forest of masts and funnels. Many are, of course, tied up in the various basins beyond the Canal Company's office, whilst those in the entrance of the harbour are moored in pairs owing to lack of space. Thus we find two British boats on one side, and immediately behind them two German boats, whilst there are no fewer than five French Messageries steamers in a group. In some places the ships are even moored crosswise instead of lengthwise.

"British shipping does not seem to be much impeded by the crisis, except, of course, tramp steamers, colliers, etc. The passenger boats come and go with their usual regularity. The German sailings are at present quite suspended, and, judging from the number of Messageries boats, the French service must be also a trifle irregular, although several of their liners have passed, always crowded with passengers. The Austrian Lloyd steamship 'Marienbad' arrived this morning, and the 'Trieste' left last Monday.

"There are ten German boats in the harbour—'Derflinger,' 'Rostock,' 'Pindos,' 'Annis Rickmers,' 'Barenfels,' 'Rabentels,' 'Werdenfels,' 'Lauterfels,' 'Gutenfels,' and 'Heligoland.' The French include 'Euphrate,' 'Caledonien,' 'Chile,' 'Nera,' 'Himalaya,' and 'Djemnah.' The Austrians are 'Tatra' and 'Marienbad.' The Italians include 'Orseolo,' 'Ciampo,' and 'Nilo.' The Russian: 'Mogeleff' and 'Baron Driesen.' There are also the 'Patrician' (Henderson Line), 'Penrose,' 'Hindu,' and 'Ecclesia.' There are about ten colliers, including 'Trevethoe,' 'Lydia,' 'Westoll,' 'Bronwen,' 'Fullerton,' and 'Treveal.' The Admiralty tank steamer, 'Petroleum,' is also in the harbour."

On the following day the same correspondent reports:—"Port Said Harbour is to-day beginning to assume its usual appearance. On Tuesday night the 'Medina' left for the Mediterranean, followed at regular intervals by a large number of other boats. Last night, just at nightfall, the 'Caledonien' left, followed by the 'Ecclesiasticat' and a Henderson liner, and, evidently following some prearrangement, a whole suite of cargo boats followed at short and regular intervals. To-night probably the French ships 'Chili,' 'Djemnah,' and 'Nera' will lead off the dance, with the French reservists on board. The 'Caledonien,' taking some of the Alexandrian French reservists, will then, with the 'Lotus,' meet the 'Chili.'

"The Austrian Lloyd 'Marienbad' arrived in Port Said Harbour yesterday at about nine o'clock from China, and left, four hours after, en route for Austria."

The "Marienbad," it may be mentioned, was subsequently captured by H.M.S. "Chatham" and taken into Alexandria. The "Caledonien" is mentioned twice amongst the departures, but probably we should read "Himalaya" in one place.

GREECE'S TIMBER IMPORTS.

Practically all the lumber consumption in Greece is of foreign origin, says the *Timber News and Sawmill Engineer*.

Imports consist of fir and white pine with very small quantities of oak, walnut, and other woods. The fir and pine, in the form of both logs and sawed lumber, are at present supplied by Austria. A small part of this trade goes by way of Trieste and the Adriatic, but by far the greater part goes via Galatz by river and thence in transhipment through the Dardanelles direct to Patras in cargo lots.

It is estimated by the trade that the annual imports of fir and white pine timber into Patras amount to £48,000 worth of logs and £50,000 worth of sawn timber of various dimensions. This is used chiefly in the manufacture of cases for the export of dried currants, and, secondly, for building purposes.

OIL STEAMER SUNK AT SUEZ.

The Cairo correspondent of *The Times* telegraphs that on Monday night a steamer belonging to the Anglo-Egyptian Oilfields Refinery Company suddenly sank in Suez Harbour. Half an hour later a tank belonging to the same company containing £12,000 worth of oil exploded. The tank contained refined oil and consequently the supply of liquid fuel is not affected.

CUNARD MEDITERRANEAN SAILINGS.

The Cunard Steamship Co., Limited, Liverpool, has issued the following notice to shippers, viz:—

"We beg to notify you that, owing to the war, our ordinary steamship services to the Mediterranean have been discontinued until further notice, and that in consequence all rates of freight are suspended. In order to prevent the total stoppage of business we are prepared to put a steamer on the berth under war conditions as opportunity and inducement offers, and would send a steamer from Liverpool and Swansea to call at the above ports, closing in Liverpool about the end of August, proceeding to Swansea to complete. Shippers are hereby informed we will charge an extra 50 per cent. on all contract and tariff rates to cover the war risk premiums and other expenses. Such surcharge to be calculated on the net freight at the foot of the bill of lading."

"CITY OF WINCHESTER."

The news as to the sinking of the "Hyades" and the capture of the "City of Winchester" by the Germans (says the *Liverpool Journal of Commerce*) has made the market for war risks at Lloyds very stiff, and rates are now steady at 60s. for India. In the case of the "City of Winchester" nothing is yet definitely known as to the fate of the steamer. She was on her maiden voyage, and had on board a large consignment of tea, part of which was of a valuable character.

SHIPPING AT GIBRALTAR.

Stringent regulations governing the movements of shipping at Gibraltar, says *Syren and Shipping*, have been issued in the form of a proclamation by the Acting-Governor and Commander-in-Chief. Not only sea-going vessels, but tugs, launches, lighters, and boats of every description are included within their scope. Ships' wireless installations must be dismantled in port, and shipowners and shipping agents are told that it is desirable, in their own interests, to arrange, as far as possible, that their vessels arrive between the hours of sunrise and sunset. Other regulations concern the method of entering the port, movements within the harbour area, etc.

NEWS IN BRIEF.

The Board of Trade states that information has been received from Odessa that it has been decided that vessels navigating between Ochakov and Odessa and drawing over 15 feet must take a pilot at Ochakov, Odessa, or Nicolaieff.

A Paris telegram, dated August 22, reports:—The traffic receipts of the Suez Canal on the 20th inst. amounted to 220,000 frs.—Reuter.

It is officially announced from Constantinople that the Porte has sent circular telegrams to all foreign diplomatic representatives stating that the Dardanelles are open to all trading vessels.

The Times Cairo correspondent states that England has agreed to allow the export of coal, with the exception of Cardiff steam, to Egypt. This ensures the continuance of local industrial irrigation enterprises, especially of the cotton ginneries and sugar factories, with which the embargo on coal exports threatened to interfere seriously.

The port of Burgas is closed to navigation, and Varna is only open between the hours of sunrise and sunset.

CARGO INSURANCES UNDER WAR RISKS.

An explanatory memorandum on cargo insurances, as revised on Tuesday, has been issued by the War Risks Insurance Office. It is pointed out that cargo only is insured under King's enemy war risks. The insurance is undertaken subject more particularly to the following conditions:—

(a) That any cargo may be insured which is not enemy property, or goods the transport of which is prohibited by proclamation or otherwise restricted;

(b) That the cargo is carried on a British steamer which is entered in one of the undermentioned War Risks Associations approved by the Government, and that a war risks policy has been taken out on the vessel covering the voyage in question under the Government scheme for the re-insurance of hulls; and

(c) That the voyage is not one which is prohibited by the Admiralty.

The approved War Risks Associations are: The North of England Protecting and Indemnity Association, Collingwood Buildings, Newcastle-on-Tyne; the Liverpool and London War Risks Insurance Association, Limited, 10, Water Street, Liverpool; and the London Group of War Risks Associations, 24, St. Mary Axe.

As a general rule, cargo carried on a vessel which has already sailed cannot be insured under the Government scheme, but the War Risks Insurance Office is, notwithstanding, authorised to consider applications for the insurance of cargo on a vessel which has already sailed, or can be warranted safe at a port of call or at some point on her voyage.

The premium is charged at a flat rate irrespective of the voyage or of the character of the cargo insured. All applications for cancellation or return of premiums must be accompanied by a statement of reasons and supporting evidence, together with the stamped slip and policy. In the case of claim for partial cancellation the marine policy should be produced. Where the application for cancellation or return is consequent on war risk insurance previously effected elsewhere, the slip and policy relating to the other insurance must be produced.

Cargo insured against King's enemy war risks under the Government scheme must be covered by approved marine insurance policies as already defined.

Applicants desiring to retain at their own risk a portion of the war risk, insuring the remainder under the Government scheme, may so retain up to but not exceeding 50 per cent. of the declared value, but with the reservation that whatever be the proportion so retained at the inception of the risk it shall be retained at the risk of the assured until its termination. In such cases the total value of the interest at risk must be declared on the application slip for insertion in the policy. The foregoing does not preclude the assured from insuring with approved underwriters or insurance companies any portion of the war risk not placed with the War Risks Insurance Office, provided that such insurance be effected not later than the insurance with the War Risks Insurance Office. The value for the purpose of insurance against war risks must not exceed the value for insurance against sea risks. The premium in force at the time the insurance was effected cannot, unless in the case provided for in Clause 1 of the policy, be afterwards reduced or increased. Payment of admitted claims will be made promptly by cheque on the Bank of England.

SUEZ CANAL TRAFFIC.

Considerable congestion of traffic appears likely to ensue at either end of the Suez Canal if the Canal Company continue to enforce the system they have introduced since the commencement of hostilities of making every vessel pay its transit dues in hard cash. Formerly (says *The Egyptian Mail*) it has been the custom for captains of ships to give the Canal Company cheques on their owners in payment of the dues, and it is but seldom that a captain finds himself with enough spare cash on board to pay such a sum as that to which the transit dues amount.

Alexandria Notes.

(From Our Own Correspondent.)

Alexandria, August 7.

The Financial Situation.

Egypt has declared its neutrality, but the effects of the European war are already being felt. Both the Stock and Cotton Exchanges have been closed until further orders. There has been a run on the banks, the panic-stricken public rushing to the National Bank to have their bank-notes changed into gold. The result was a meeting of the leading bankers under the presidency of the Prime Minister, when it was decided to introduce the obligatory currency of National Bank notes. Further, it was decided to enable the National Bank to issue new notes up to £E1,000,000 and to re-issue the old £E1 and P.T. 50 notes. The total thus to be issued amounts to £E3,500,000.

Deutsche Orientbank.

In order to help the banks, the Government decided to prolong the August Bank Holiday from the 5th to the 8th of August. In spite of this, the banks remained open, with the exception of the Banco di Roma and the Deutsche Orientbank. Owing to the moratorium in Italy, the former bank has stopped all financial operations in Egypt. Regarding the Deutsche Orientbank, about £E480,000 were paid out last week, and the cash still in hand is estimated at £E90,000, which, with the £E400,000 expected from Germany but seized by the German Government, would have sufficed to meet the situation. The Egyptian banks received yesterday about £E700,000 in specie.

Private Speculation.

Certain foodstuffs and articles, such as oil, coal, etc., have increased in price up to 30 per cent., in some cases up to 100 per cent. This has met with the most decided opposition on the part of the public, and in some cases—Port Said, Mansura and Alexandria—the municipalities have decided to buy stores officially and sell them to the public. The Government, on the other hand, has decided to draw up a maximum tariff and to oblige retailers to keep within it. The Consuls at Alexandria have, moreover, held a meeting for the purpose of devising means for combating the extraordinary rise in the cost of living. On the other hand, the Government has forbidden the exportation of certain foodstuffs.

Improved Situation.

August 14.

The situation has improved. The National Bank has reduced its rate from 12 to 7 per cent., and most banks have not taken advantage of the moratorium, paying their depositors in full. The Deutsche Orientbank has re-opened and is paying its depositors; the Banco di Roma will open next week. These two banks had been unable to obtain the necessary specie from Europe in time, which accounts for their having been obliged to close their doors. Thus the panic is over and the situation is calm. The cost of foodstuffs, etc., has dropped to a more normal level.

Unfortunately, trade is at an utter standstill. Our commercial relations are restricted to Italy, which sends us foodstuffs. Australia, also, is sending us flour. The market is impatiently waiting for the time when the Mediterranean will be cleared of the enemy's ships and normal communications will have been re-established with England.

Wadi Kom Ombo.

The Société anonyme de Wadi Kom Ombo has paid a dividend of 3 per cent. on its ordinary shares. The company has a capital of £1,000,000, of which £E721,387 has been expended on the development of about 22,000 feddans and £E177,000 on the installation of pumps and agricultural implements, as well as transport. The cost price of the land is £E33 per feddan, independent of the £E177,000 referred to above, which the company proposes to write off gradually. The net profits last year amounted to £E29,693, as compared with £E17,904 in 1912. These figures are very satisfactory, and it is certain that the profits would have been higher still had not the low level of the Nile brought about an increase in the expenditure connected with pumping. Nevertheless, the results are quite up to expectations, and show steady progress. This progress is likely to be greater during the current year. The sugar cane planted on 4,568 feddans for the year 1912-13 yielded 118,157 tons, whilst in 1913-14 the area planted to sugar cane was only 4,302 feddans, and the yield exceeded 153,000 tons of cane.

Sidi Salem Company.

The Société anonyme de Héhéra has taken over the 12,000 feddans of land constituting the assets of the Sidi Salem Company. The latter company will be liquidated, but it is doubtful whether its holders will receive anything.

Salonika Cigarette Company.

The above company has built a huge factory in Alexandria, and is sub-letting that at Cairo. There is a tendency on the part of the big cigarette firms to move to Alexandria in preference to Cairo in order to reduce the cost of transport. Besides, it has been demonstratively shown that the climate of Alexandria is, for the making of cigarettes, superior to that of the capital.

Alexandria Municipality.

The Alexandria Municipality, which had the intention of issuing on the London market its new loan of £E500,000, has been obliged to postpone the operation indefinitely. The building of the breakwater by the Schneider group has been interrupted, and this delay is likely to imperil the safety of the tramlines.

Tobacco Cultivation.

The acting Diplomatic Agent for Greece in Cairo, who was entrusted with the negotiations for the renewal of the Greco-Egyptian Commercial Treaty, has stated that the Egyptian Government, after a lengthy study of the question, had decided to continue not to allow tobacco to be cultivated in Egypt. There is, therefore, no question, for the time being, of creating a monopoly, which would have a detrimental effect on the export of Egyptian cigarettes.

THE MORATORIUM IN EGYPT.

The following notice has been issued by the Egyptian Government :—

It has come to the knowledge of the Government that certain unscrupulous dealers are taking advantage of the provisions of the decree of August 9, ordering a general commercial moratorium, to refuse delivery of goods due by them in virtue of pre-existing contracts, unless the purchasers consent to an increase in the price.

By acting thus, not only do they show their deliberate intention of fraudulently breaking their contracts in order to conclude others more advantageous to themselves, but they render themselves liable, after the expiration of the moratorium, to legal proceedings on the part of the purchasers and to pay heavy damages for their dishonest failure to fulfil their engagements.

Moreover, at the present time they are equally liable to seizure of the goods, which might be ordered by the judge as a purely protective measure in favour of the purchasers.

The Government calls the attention of all whom it concerns to the consequences of such modes of action, which are manifestly opposed to the spirit and object of the decree of August 9, 1914, regarding the moratorium.

THE WHITE NILE.

We extract the following from *The Sudan Times* of August 3 :—

"The White Nile is still lower than it was during the corresponding period of last year. Steamers with cargo for Wau and the intermediate stations have not yet been able to start on their journey up, and it is expected that no more than two through departures for the above destination will take place this year owing to the state of the White Nile. The first steamer with cargo for Wau will leave Khartoum on the 9th and the second on the 20th inst.

RELIEVING THE SITUATION IN EGYPT.

The Times' Cairo correspondent, telegraphing on the 20th inst., says :—

"Efforts are being made to remedy the serious situation caused by the closing of markets and the impossibility to import gold, and assist the fellaheen cultivators to move the cotton crop, the maturity of which is imminent.

"A meeting of leading bankers, dealers, and cultivators, with the Prime Minister presiding and the chief Government officials attending, was held yesterday. No definite decision was arrived at, but various schemes are now under consideration for an advance, pending the reopening of markets, to the fellaheen against the deposit of their cotton in Government or bank warehouses of amounts sufficient to enable them to carry on agricultural occupations, pay taxes, and live. An extra good millet crop has just ripened, and an extra large acreage of maize has just been sown. The Government has arranged for special imports of wheat, flour, and live stock, by reason of which the outlook is one of hopefulness.

EGYPTIAN GOLD REQUIREMENTS.

At this time of year preparations are usually being made by the Egyptian banks to finance the cotton crop of the Delta, and if the usual programme were adhered to sovereigns should now begin to be exported from this side. Under existing conditions the dispatch of gold either from this country or France is not to be loooked for, says *The Financial Times*, and the Egyptian authorities have lately been considering other means of financing the crop movement. A commission has had under consideration the employment of the notes of the National Bank of Egypt as legal tender, and it is not unlikely that this step will be adopted.

THE CRISIS IN THE CITY.

Financing Trade.

(By Our City Editor.)

The position at the moment of writing looks clearer. It is believed that the moratorium will be abolished, and the Government is issuing certificates for the purpose of enabling trade to be more readily financed. It would seem that the joint stock banks will obtain certificates which are to be exchangeable into currency notes on demand. What these certificates are to be secured upon is not at present disclosed. Clearly Mr. Lloyd George expects the banks to make advances to traders and to generally help the country. Clearly some of the banks have refused to use the deposits of their customers for this purpose, and such banks are threatened with exposure if they continue to act as trustees for their depositors.

We are told that the old notes are to be withdrawn and better ones substituted, and from the artistic standpoint this is greatly to be desired. We are also told that some of the banks have been sending back notes to the Bank of England. This rather tends to show that the stringency of cash which rendered the issue of these notes essential is now a thing of the past, and that the world of commerce has adapted itself successfully to the new conditions.

Perhaps the matter of most vital importance to the trade and credit of the country is that the Government shall be provided with ample funds to carry on the war. Now it seems almost impossible for anyone to subscribe largely for war loans if their whole capital is locked up in securities. The country needs immense sums of money—many hundreds of millions—if it is to emerge victorious.

If we wish to see how a nation can meet its engagements and put its house in order we must turn to our foe, Germany. *The Daily Telegraph*, in Thursday's issue, gives the Reichsbank return, which shows that the German Imperial Bank now holds a record supply of gold. Also, it has issued paper money to the value of 4,425,984,000 marks, an increase on the previous week of 688,910,000 marks. It has established war banks in every large town, which will help the people by making advances. Again, it is making loans freely upon grain, metals, and stocks generally. It has faced the situation in a bold way—indeed, the only way.

Certificates of value are no use, except for bankers, and surely the Government does not wish the nation to go on under the heel of the usurer. For, remember that a bank is, after all, only a moneylending institution—nothing else. The banks must be helped—this we all admit. But the nation needs help much more, and to put the trader, the merchant, and the manufacturer deeper into debt to the bank is a wicked and reckless thing.

There seems no possible way out of the trouble except the issue of currency against Trustee stocks up to 50 per cent. of their value. This would give all solvent people cash with which to carry on their business. It would reduce their loans to the bank, and it would put the banks in funds again. Their cash is now locked up. A currency secured upon Trustee stocks may not be an ideal, but in days of extreme danger we must take extreme measures. The moratorium out of the way and an ample currency provided for all sound firms, we could reopen the Stock Exchange under a new set of rules and "carry on business as usual."

BULGARIA'S INTEREST PAYMENT.

Reuter's Sofia correspondent telegraphs that the management of the public debt has issued a statement that, in view of the European War, which has interrupted postal communication and rendered impossible all international operations, it wishes to inform holders of Bulgarian Treasury bonds payable abroad that until further orders the management holds at their disposal, at the National Bank in Sofia, the amount due, which persons concerned may acquire at any moment on forwarding their securities.

The *Aegyptische Nachrichten* has been suspended for publishing a scurrilous article upon the Tsar of Russia.

COMPANY NOTES.

Anglo-Roumanian Produce.

The accounts of the Anglo-Roumanian Produce Co., Limited, for the year ended December 31, last shows a loss of £14,480, which, added to the £37,298 brought forward, makes a total debit balance of £51,778 to be carried forward. The directors' report states that since the close of the financial year the Roumanian Government have taken possession of the farm in what the board believe to be an entirely illegal manner; this procedure is the subject of legal action in the Roumanian Courts, but the outburst of war has stopped all negotiations.

COMPANY RESULTS, &c.

Piræus-Athens-Peloponnesus Railway.—The receipts during the month of June amounted to 600,460 drs., an increase of 34,383 drs. over the corresponding period of last year. Aggregate receipts from January 1 amounted to 4,051,702 drs., an increase of 386,995 drs.

Credit Foncier Egyptien.—The numbers are published of 1,215 three and a-half per cent. bonds drawn for repayment at 515 francs on and after October 1, when payment of coupon No. 33 will also be made.

Ottoman Railway from Smyrna to Aidin.—Receipts for the week ended August 22 amounted to £6,714, a decrease of £1,037 as compared with the corresponding week of last year. Aggregate receipts from July 1 amounted to £54,659, a decrease of £6,283.

Anglo-Egyptian Oilfields.—Gemsah production for week, 1,070 tons (last week, 1,132 tons), of which Hurgada, 90 tons (last week, 72 tons).

Suez Canal.—The traffic receipts on Sunday, 23rd instant, amounted to 140,000 frs., against 230,000 frs. last year.

Egyptian Delta Light Railways.—Receipts for eleven days ended July 31 amounted to £E5,878, a decrease of £E1,152 as compared with the corresponding period of last year.

Egyptian Markets.—Receipts for week ended August 20—£569, a decrease of £52. Total to date, £38,822, a decrease of £1,548.

THE GREEK DEBT.

The Council of Foreign Bondholders has issued the following information compiled from figures published by the International Financial Commission at Athens with regard to the revenues assigned under the Law of Control for the service of the Greek Debt from January 1 to June 30, 1914 (new style: January 14 to July 15, 1914):—

—		Monopolies, Tobacco, Stamps, Stamped Paper, Naxos Emery.	Piræus Customs.
		Drachmæ.	Drachmæ.
Gross Receipts, June,	1914	2,910,001.67	2,327,552.90
Do. do do	1913	2,083,188.38	1,733,273.75
Estimated Receipts for 6 months (Law of Control)		14,450,000.00	5,350,000.00
Actual receipts for 6 months,	1914	19,331,726.47	15,111,641.05
Do. do. do.	1913	14,207,884.26	12,139,239.37
Difference between estimated and actual receipts for 6 months	1914	+ 4,881,726.47	+9,761,641.05
	1913	— 242,115.74	+6,789,239.37

Note.—Of the surplus over the estimated receipts from monopolies, tobacco, stamps, stamped paper, and Naxos emery 49 1-5 per cent. is applied towards increasing the minimum rates of interest and sinking fund of the External Gold Loans of 1881 to 1893. The receipts in gold from both Naxos emery and the Piræus Customs are converted into drachmæ at par when the average rate of exchange for the month is par or below par, but when the average rate for the month is above par the conversion is made at that average rate.

Reports from Roumanian oil centres state that a few days after Austria declared war on Servia there was an almost total suspension of oil transport. Tank wagons were pushed into sidings. The oil trade of the Danube was also brought to a standstill. Reports shows that there is no possibility of Roumanian companies getting oil into Germany.

ROUMANIAN CONSOLIDATED OILFIELDS

The directors of the Roumanian Consolidated Oilfields, Ltd., have issued a circular to the shareholders stating that owing to the state of war telegraph and postal facilities practically ceased to exist as from 27th ultimo, and it has been impossible since that date to publish the usual reports of production and drilling progress. *The Moniteur du Pétrole Roumain* of August 2 has now reached this country, contains the following information of interest to the company:—

General production.—The production of crude oil in Roumania is maintained. During the last few days we have to record the first eruption of Moreni well No. 39 of the Roumanian Consolidated Oilfields with an output of from 300 to 350 tons a day. Baicoi well No. 1, belonging to the same company, which gave about 700 tons a day before being shut down, will shortly be restarted. The prospects of a large increase in the production are good.

Roumanian Consolidated Oilfields, Ltd.—On July 29, Moreni well No. 24, which had been flowing steadily for about two months, became corked with sand and ozokerite. Cleaning operations were commenced immediately and the well began to flow again on the following day at the rate of about 200 tons a day.

Moreni well No. 39, which, as we have already stated, is in the same source as well No. 24, made a violent eruption a fortnight since, which destroyed the derrick. The damage has now been repaired and on July 29 the well again commenced to flow. For the first day it gave about 700 tons, and subsequently from 300 to 350 tons a day.

Moreni well No. 29 has been repaired and is now cleaned almost to the bottom. At Baicoi large reservoirs have been constructed in the vicinity of well No. 1 and all arrangements made for the storage of great quantities of oil. This well will be restarted to-day.

The total production of Roumanian Consolidated Oilfields, Ltd., for July, 1914, was 10,060 tons.

The July output constitutes a record and compares with 8,029 tons for June. A cablegram from the company's manager, dated a fortnight later than the newspaper extracts above, but delayed in transit, states that the drilling programme is much curtailed at present by the shortage of labour, but that the producing wells continue in operation. Roumania has mobilised for the defence of her frontiers, but at the same time has declared that she proposes to maintain an attitude of strict neutrality. In no eventuality which is likely to occur is there reason to fear any serious interference with the company's property or with its prospects. On the contrary, there can hardly fail in the near future to be an increased demand for Roumanian oil and its products.

EGYPT'S MEAT SUPPLY.

Papers and letters received from Egypt by the latest mail indicate that there was for a short time some little anxiety regarding a possible failure of the meat supply in some of the larger towns. Thus, at Alexandria there were rumours that the number of animals to be slaughtered had been reduced, but the *Bourse Egyptienne* contradicts these rumours.

As a precautionary measure, we learn, Mr. Littlewood, Chief Veterinary Surgeon of the Sanitary Department in Cairo, wrote to the Alexandria Sanitary Department asking if they were in need of any cattle, as the importation from abroad was prohibited. If that were so excellent oxen could be brought from the Sudan, provided that the animals underwent a few days' quarantine on arrival at destination.

As about 50 animals would be required from the Sudan every day to supply the town, instructions were promptly given to commence deliveries. These animals will arrive in Alexandria after about three weeks' journey, and, seeing that the importation of oxen from the Sudan has been forbidden on account of the diseases with which they were affected, bovine typhus and bovine plague, the long journey will be in lieu of quarantine.

A large market for fezzes, particularly in Turkey, India, British Africa, and Egypt, is now open to British traders, Austria-Hungary having supplied these countries with £184,800 worth of fezzes in 1913.

NOTES OF THE WEEK.

The steady advance of the invaders across Northern France right up to the gates of Paris is distressing, in that it has led to the devastation of a considerable territory and a heavy loss of life to our own troops and to those of our Allies. It is regrettable also because the appearance of a German army before the capital which our enemies have claimed as the goal of their campaign may induce certain neutral States to misinterpret the signs of the times and commit themselves under the belief that Fortune has already declared herself. It is for the benefit of these people that we take this opportunity of reminding them that what has happened so far cannot affect the outcome of this war, except that it has exasperated the Allies against the invaders.

Great Britain is a country slow to move. The public is only just beginning to realise that the country is at war, and why. But now that it understands it is arranging to see the matter through to a successful end, just as our great-grandfathers saw the war against Napoleon through to a successful end. We are proud of being a nation of shopkeepers, because our business instincts enabled us to realise that we could not afford to lose in that struggle. The same conditions apply now, only that they are even more apparent and more pressing. As merchants we know that we cannot afford to fail in the present struggle; consequently we must go on with it until we win. It may be sooner, or it may be later, but we intend to carry it through to a successful conclusion, even though it last as long as the Great War of the Nineteenth Century. Hannibal defeated the Romans again, and again, and again. He destroyed the flower of the Roman Army arrayed under both Consuls at Cannæ. But he had to live to taste defeat at Zama, Carthage was destroyed, and to Rome was given the empire of the world. Great Britain does not aspire to the empire of the world; her motto is "Live, and let live;" but ever since she found herself, her invariable policy—thrust upon her by imperative necessity—has been that no other Power should have the empire of the world. By that policy we abide now, and we earnestly hope that no neutral States will be so foolish as to take any action which might bring them across the path along which we must march in the pursuit of that policy.

The situation abroad is slowly becoming regularized, if one may use the word in such a connection. The Ballplatz is working hard to catch up with the more impetuous Wilhelmstrasse in the preparation of declarations of war. As the result of this activity Austria-Hungary has notified the unhappy Belgians that the Dual Monarchy considers their treatment of its subjects to be so intolerable as to involve instant hostilities. As this fresh outbreak cannot add anything to the woes of our gallant little Ally, one can afford to consider it in its true light.

In a moment of European crisis nearly forty years ago Disraeli provoked the keenest criticism by bringing Indian troops to Malta. Now, amid general applause, Lord Kitchener brings Indian troops to France. The ancient civilisation of Hindustan has been called in to help that of Europe in its need. India in the past has tasted the tender mercies of the White Huns and of Mongol hordes, and now at the call of the King-Emperor is sending men to help against similar barbarians on the fields of France. At first it was believed that the limit of their voyage was to have been Egypt, but now we learn that it is in Europe itself, and against the Red Huns of the North, that his Majesty's Indian Army is to be arrayed. The destruction of Louvain has stamped the German of to-day as the worthy successor of Attila or Hulagu. The outrage was an insult to the whole world, and now men from five continents flock to Flanders to impress upon the Prussians, *vi et armis*, the only argument they can understand, that they are now considered as being outside the pale of civilization.

The arrival of the Indian Expeditionary Force in Egypt has been announced by the permission of the Egyptian authorities, and we regard with pride yet another example of army transport on a large scale. In view of possible contingencies it is satisfactory to learn that so substantial a force is now available for the defence of Egypt, for even if some units be detached for service in France there will still remain a well-seasoned fighting force of professional soldiers perfectly capable of protecting the country from any attack. We understand, moreover, that the Home authorities are fully aware of the importance of Egypt, and are making arrangements to provide substitutes, when necessary, for those detachments which may be sent to France.

The very handsome defeat which the Russians have inflicted on the Kaiserlichs in Galicia has led immediately to the occupation of Lwow, which the Germans call Lemberg, by the troops of the Tsar. It will, however, very probably have ultimate results of a highly important character. So conspicuous a success

Digitized by Google

as the recovery after hard fighting of so great a city of the Slavs as Lwow will greatly encourage those members of that race who dwell along the Danube, and will tend to strengthen those who stand for racial solidarity in Bulgaria against the possible influence of Teutonic dynastic ties.

So far as it is possible to gather, the Servians have been giving their army a rest, very necessary and well deserved after its fine performance in ridding the national soil of Austrian invaders. No invasion of Bosnia on a large scale has as yet been announced, and apparently, in spite of a bombardment by the Allied Fleet, Cattaro itself is still in the hands of the Kaiserlichs, who, it seems, have again been repulsed by the Montenegrins in an assault upon the Lovtchen Mountain. It is understood that the Servians will press forward into their Promised Land so soon as they shall be in condition to undertake a considerable movement of this nature, and it is to be hoped that the pressure of the Russian armies upon Galicia will have compelled the Kaiserlichs to withdraw troops from the south.

It is to be feared that the situation in the southern Slav countries of the Dual Monarchy is very grave. The Government is known to be enforcing coercive measures. There is a rigorous censorship of disaffected journals, and the subsidized reptile Press is being extended by means of official purchases. It is stated that hostages are being taken by the Government for the good behaviour of the Slav populations in Bosnia, and that a number of executions have already taken place at Serajevo. The victims appear to have been prominent leaders among the local population, and the executions were purposely carried out in public. It is, of course, impossible to verify this information, but it must be confessed that the volume of evidence is already considerable, and that the actions with which the Kaiserlichs are charged have an unfortunate similarity with those which disfigured the later years of their domination in Lombardy and Venetia.

The position of Italy is still uncertain. We know that she is exposed to considerable and skilfully applied pressure from her Teutonic neighbours, and that offers of substantial territorial "compensation" (at the expense of France) have been made to her by those Powers. Public opinion in the peninsula is from all accounts utterly opposed to the *Tedeschi*, and will not tolerate any policy which would array Italy against the Liberal Powers on the side of Teutonic militarism. We may, however, point out that the cost of the Tripolitan War and the subsequent operations in Libya has been very heavy indeed, and that the Roman Treasury is in all probability extremely short of funds. The traditional practice of Great Britain, when arranging European coalitions against a public enemy, has always led our Government to supplement the exiguity of our military forces in the field by furnishing other States with the wherewithal to put their own troops in motion for our support. Consequently we suggest that an intimation to the Consulta that in certain circumstances the necessary money would be forthcoming would enable the Italian Government to give expression to the wishes of the nation and take the field in defence of the public law and civilization of Europe against an inrush of destructive barbarians.

The move on the part of the Sofia Government which has been announced was fully expected in London. Energetic efforts had been made for some time past to induce Bulgaria to declare herself on the side of the Entente and clear away the tissue of falsehood which had been spun round her by Teutonic newsmongers. Her action has dispelled the assertions that she had an alliance with Turkey, or an understanding with Austria-Hungary, and reveals that she is prepared to repel any attempt at Ottoman aggression upon Europe and thus defend the Triple Entente and its Allies against the assaults of the misguided Turks in the rear. It was known that Bulgaria was completely opposed to a policy of adventure, and would never take up arms against Russia, the traditional Liberator of Bulgaria, or against the Liberal Powers of the West. Her neutrality was certain, but now by the offer of her valuable services for preserving the peace in the Near East, she becomes entitled to substantial recognition at the time of the general settlement.

At the moment of writing Roumania is still poised upon the uneasy fence of neutrality. Rumour is busy with the King's health, his intentions, and the policy of his Government. We are told that the Hohenzollern blood of the dynasty is likely to be thicker than that of all the separated Roumanians of Transylvania. We are told that Bucharest longs more ardently for the Bessarabia which is lost than for the provinces beyond the Carpathians which are not yet won. So faithful has Roumania been to her self-imposed rôle as the Gendarme of Europe watching the Treaty of Bucharest that she requires time in which to reorient herself now that the Treaty of Bucharest has been buried by the action of Bulgaria in declaring herself on the side of the Powers of the Entente, and the old Europe which petted and patted her for her action in 1913 has vanished as surely as the Holy Roman Empire or the *Ancien Régime*. Bulgaria has given Bucharest a lead. The Roumanian Cabinet must be fully aware that a declaration of war against Russia will be followed within a few hours by a Bulgarian attack, and there are a good many military men who are prepared to consider King Ferdinand's army as still formidable to any single antagonist. On the other hand, the Cabinet of Sofia has undertaken not to seek vengeance for 1913 if Roumania removes her *corps d'observation* from the southern frontier and precipitates them across the Carpathians.

It is believed that the Ottoman delegates who were recently sent to Bucharest in order to negotiate with the Hellenic representatives on the outstanding features of the Ægean Question put forward curiously suggestive proposals. Apparently the Turks were not content with demanding the retrocession of Chios and Mytilene for their own benefit, but even endeavoured to extort a substantial rectification of frontier in favour of Bulgaria as the price of Ottoman friendship for Greece. It was an ingenious move to propose that Bulgaria should be compensated for her losses in the Treaty of Constantinople at the expense of Greece. It was still more ingenious to sow suspicion between two neighbours who are only just on speaking terms. It has the appearance of being a reversion to the astute diplomacy of the Hamidian era, but we cannot help thinking that the inspiration came rather from Berlin than from Yildiz Kiosk.

The Hellenic Government is to be congratulated upon the action of Great Britain in recognizing her annexation of the new territories. In consequence of this the Capitulations come to an end, and the Hellenic authority is fully established throughout the whole of the territories acquired from Turkey after the Balkan War.

According to recent information from Albania the town of Valona has definitely been occupied by the rebels, the Mpret has withdrawn from his capital, and is stated to have started for Germany in order to take part in the war. We are accustomed to the appearance of German Sovereigns in the Imperial armies, but the return of the Prince in order to take up the obligation of that nationality which he had discarded at the moment when he was recognized as a European Sovereign by the Powers undoubtedly nullifies that recognition. Prince William must be considered as being once more merely the cadet of a mediatized German family and no longer as the Mpret of Albania. It is announced that the International Commission of Control has taken over the government of the Principality, but in the circumstances we cannot expect much from that body. It will be interesting to learn the intentions of the rebels now that the Prince against whom their efforts were directed has removed himself after a nominal reign of not quite six months.

LETTER FROM CAIRO.

(From Our Correspondent.)

Cairo, August 17.

Departure of French Reservists.

After nearly a fortnight's weary waiting, due to the fact that the German cruiser "Goeben" was still roaming the Mediterranean, the French reservists, numbering about 3,000—they included contingents from Syria as well as from Egypt—have embarked on the "Lotus" and other French steamers in order to take their share in the defence of their fatherland. An enthusiastic send-off was given to them in Alexandria, but the manner of the departure from Cairo of the 600 men who formed the quota from the capital was indeed remarkable. The special train—by the by, the State railways rose to the occasion and, declining to supply the third-class carriages applied for, insisted on sending first and second-class coaches without extra charge—was timed to leave at eight o'clock, and the reservists had orders to assemble an hour earlier. As early as six o'clock there were at the station many people whom curiosity, friendship, or goodwill had impelled thither to wish God-speed to the band of plucky men and women—for there were quite a number of volunteer nurses amongst the departing band—who were breaking up their homes and abandoning their businesses at their country's call to arms.

The railway authorities expected somewhat of a crowd and so had chosen the centre platform for the departure, but their expectations, whatever they may have been, were far surpassed by what actually occurred. Indeed, the scene that unfolded itself before the eyes of a comparatively late arrival—say, at 7.15—was as unprecedented as it was inspiriting and pleasing. Not only the centre platform, but also the two adjoining ones were closely packed with a surging crowd; the carriages of the train and of others waiting in the station had been taken by assault and their tops were thronged with spectators; the intervening lines were crowded with a dense mass which stretched out of the station right down as far as the signalling boxes, whilst every available nook and cranny had been seized upon and sheltered some interested spectator. Right at the head of the train stood a gigantic Union Jack and a Tricolour, which had been carried into the station amid the acclamation of the mob; miniatures of those flags were carried on high by individual spectators or stuck out of the carriage windows; bouquets were hurled into the train by well-wishers and those who could not get near to their departing friends, and amid the sad weeping of mothers and wives and the embraces of friends there went up heartfelt cries of "Vive la France!" "Vive l'Entente!" "Vive l'Angleterre!" with which were mingled those of "Vive la Belgique!" and "Vive la Russie!"

At about 7.30 the pipers of the Gordons and the band of the Devons marched into the station and took up their position opposite the train—a delicate but none the less fitting attention on the part of the British military authorities. Patriotic tunes and marches were played by them and lent a martial air to the whole proceedings. Shortly before eight o'clock the French Consul and one or two others delivered allocutions and then, the line and the tops of the carriages having been with some difficulty disencumbered of the watching crowds by the Boy Scouts, punctually at the appointed hour the departure signal was given. Slowly, very slowly, to allow of the last handshake, the last embrace, the train drew out of the station to the tune of "La Marseillaise," played by the British bands. The spectacle of those last few moments absolutely beggars description. For nigh on two hours the general enthusiasm had been gradually working itself up, and it then reached its climax. As the train wound its way out the station became a seething mass of humanity which gesticulated wildly in its delirium and sent up a shout that must have been heard at the other end of the town. The air was white with straw hats and handkerchiefs, and the ten thousand people assembled there took up as one man the strains of the French national anthem. All nationalities were present and outvied one another in their enthusiasm. There were Frenchmen, Britons, Italians, Belgians, Russians, Greeks, Dutchmen, Scandinavians, Syrians, Egyptians—and, be it added to their credit, several Austrians and Hungarians, who did not allow the relations of their countries to stop them from wishing God-speed to the men who had in the past worked side by side with them in an alien country to uphold European traditions. The presence of these men was a most striking and most pleasing feature: an eloquent testimony to the esteem which these sons of France had won for themselves; and *en passant* it may be said that it foreshadowed an interesting international situation which will, it is expected, arise in this land of paradox *par excellence*, and to which I shall refer when the time arrives. (Be it noted that not one single word disparaging to the Triplice was uttered throughout the proceedings.)

Twice the band played "La Marseillaise," and then, the train having disappeared, they struck up "God Save the King." In a twinkling the crowds faced round towards the bands, all hats were off, and complete silence prevailed. The tune concluded, the crowd broke into shouts of "Vive l'Angleterre" and "Vive l'Entente," and insisted on the anthem being replayed. This departure scene is not likely to be forgotten by those who were present at it. To call it thrilling were to use too prosaic a word.

If good wishes count for anything, then the arms of the Entente should surely prevail, for the cosmopolitan nature of the crowd that literally held Cairo station on the morning of August 14 may be taken as an indication of the general feeling throughout the world towards the belligerent nations.

The Second Declaration of War.

England having declared war on Austria-Hungary, Egypt has followed suit, and a decree was issued this week to the effect that H.H. the Khedive considered his country to be in a state of war with the Dual Monarchy. Austro-Hungarian steamers at present in Egyptian waters will be given until the 22nd instant to leave or to conform to the conditions of the decree. It is interesting to note—and the fact merits some explanation—that, as in the case of the declaration of war between England and Germany, a notification to that effect was posted outside the British Consulate General in Alexandria at least twelve hours before it was officially notified in Cairo. The "Goeben" and "Breslau" having taken refuge in the Dardanelles, navigation in the Mediterranean, excepting the Ægean Sea, is now free, but we are still without any correspondence or papers from England and France since those bearing the date of the 1st instant.

Turkey's Attitude.

Great interest is being shown here in the attitude which Turkey may now take up. Feeling for an easily understandable reason has of late swung round very much. Whilst for the most part the fellaheen are more interested in the fate which their cotton crop will meet, the effendi class has assumed a decidedly pro-German tendency. Especially is this noticeable in Alexandria and the coast towns, where the local native population is in daily fear of being bombarded. The better class

and more moderate natives admit that Turkey is committing a serious breach of neutrality, and they consider that if she decides to enter the war arena she will be making a most grievous mistake, which will probably cost her what little remains of her Empire. Arrivals from Constantinople affirm that pan-German influences are predominant there, and that the government of the Ottoman Dominions is largely in the hands of men who are subservient in everything to the Teutons.

German Nowspaper Suspended.

On Saturday the German official organ *Die Ægyptische Nachrichten* was suspended at the request of the Government. The ostensible cause of this action was an article published by it wherein the Tsar and his family were referred to in most disparaging terms, but the real reason was that this paper has since the outbreak of the war printed "telegraphic news" that was obviously home-made, and that could not fail to have an exciting and prejudicial effect on the local population, as undoubtedly it was calculated to do.

THE GARRISON IN EGYPT.

The last issue to hand of *The Egyptian Gazette*, dated August 21, publishes the following:—

"The British military authorities having informed us that no further useful purposes will be served by our holding back the information we have regarding the troops about to arrive in Egypt from India, we are now at liberty to give the following particulars which have been confirmed by reference to indisputable authority.

"About 40,000 troops of all arms—some British and some Indian—are expected, but the exact composition of the force is not yet known here. One important corps, however, regarding which nothing has been stated in any of our contemporaries, but which is known to be coming, is the Bikanir Camel Corps, a splendid body of Imperial Service troops maintained by the State of Bikanir and put at the disposal of the King-Emperor by the Maharajah.

"The troops will all land at Alexandria. The objection to their landing either at Suez or Port Said are, firstly, there is no convenient landing places at either of these ports, and, secondly, both Suez and Port Said are involved in the international treaties regarding the Suez Canal, and questions of neutrality which might arise can be avoided by landing the troops at Alexandria.

"It is expected that about half of the force will remain at Alexandria and that the others will be quartered at Heliopolis.

"Nearly all the British troops at present in Egypt, with the exception of the Worcestershire Regiment, have been instructed to hold themselves in readiness to leave for Europe when required, but no definite orders have been given for their leaving. It is certain that they will not leave until at least an equivalent number of troops have arrived to replace them. The first troops to arrive will be the staff officers, engineers, and other advance parties, whose duties will consist of preparing camps, etc., for the remainder of the force.

"It is worthy of note that amongst recent arrivals in Egypt are Major-General H. B. B. Watkis, C.B., Colonel T. E. O'Leary, Captain R. G. Alexander, and Lieut. H. L. Watkis. Major-General Watkis is the Commander of the 3rd (Lahore) Division, while the others are staff officers serving with the same division, Colonel O'Leary being G.S.O. at Headquarters, Captain Alexander, 11th King Edward's Own Lancers (Probyn's Horse), staff captain of the Jullundur Brigade, and Lieut. Watkis, 31st Punjabis, A.D.C. to the General. It seems to point to the whole or part of the Lahore Division being comprised in the force. The British troops in the division are the 8th King's Royal Hussars, 'A' and 'B' Batteries Royal Horse Artillery, with 'C' and 'I' Ammunition Columns, 18th, 59th, 62nd, 93rd, and 94th Batteries Royal Field Artillery with No. 3 Ammunition Column, 2nd and 5th Mountain Batteries, 82nd Company and 90th Battery Royal Garrison Artillery, 'H' Company Royal Engineers, and the following battalions of infantry:—2nd Northumberland Fusiliers, 1st West Ridings, 2nd South Lancashires, 2nd Royal West Kents, 1st Manchesters, 1st Highland Light Infantry, 1st Connaught Rangers, and 4th Rifle Brigade. It is not certain, however, that all these regiments are coming nor is it known here what other troops will be comprised in the force."

Anti-Christ in Egypt. By W. N. Willis. (Anglo-Eastern Publishing Co.)

NOTES FROM SERVIA.

(From Our Own Correspondent.)

Nish, August 12.

The Bombardment of Belgrade.

I left Belgrade for Nish at six o'clock last Saturday morning. Up to that time it was the Austro-Hungarian warships on the Save that had taken the principal part in the artillery fire directed against Belgrade or its surroundings, and but little damage had been done to the town; and it was supposed that the few houses hit at that time might have been struck accidentally through being in the line of fire. The firing was directed on one side upon the Servian garrison at Banitza, in the vicinity of Belgrade, in another direction upon the troops assembled at Torloch, a village a short distance beyond the town, and, thirdly, upon the fortress. Many of the inhabitants of Belgrade had already fled from the dangers of a bombardment, but there were many still remaining, and these, though still in a nervous state, had become somewhat accustomed to the frequent cracking of rifle-shots, the rattling of machine-gun fire, and the occasional whistling of a flying cannon ball. When night came on the women and children sought refuge in the cellars of their houses and in the basements of the foreign legations and consulates. At break of day the dawning light dispelling fears, they returned to their respective homes to prepare their meals and pass the day, returning to their underground shelter on the succeeding night. The streets were almost empty, and those who did venture out avoided the dangerous zones.

After I left Belgrade there was unfortunately a change for the worse. The bombardment became more pronounced, life and property were in greater jeopardy. One day and one night there was a continuous rain of heavy shells, wrecking some of the finest edifices in Belgrade, and setting some houses in flames. The damage done is reported to be enormous.

In order to continue my duties as a Press correspondent I was compelled to leave Belgrade, whence telegraphic and postal communication with foreign parts was almost impossible. Getting away was not an easy matter, however. The railway line for some distance was bombarded the moment the enemy perceived any moving train, and therefore I had to drive a distance of two hours to reach the station from which the outgoing train started.

The Exodus.

To get a cab or cart or conveyance of any sort was a difficult matter, as nearly all vehicles had been requisitioned by the military, and nearly all the fleeing people had to walk that long distance. Some had with them small handbags containing only a change of clothes, others had nothing but the clothes they stood up in. There were only military trains, consisting of trucks and carriages for horses and cattle, and in any of those trucks that were empty people had to manage as well as they could. Very often these trains were full of soldiers or of military stores.

The journey to Nish, instead of occupying about six hours, as in ordinary times, lasted twenty-four to thirty hours. Consisting of a sleepless night and a tiresome day, it was certainly no pleasure trip. However, no one had to pay railway fare; free conveyance was open to all, and that was certainly a boon to poor people who were desirous of leaving Belgrade. Once in the train one had at least the comfort that no sounds of rifle fire or booming of cannon were heard. The atmosphere was calm and peaceful, cattle were grazing quietly, the fields were green and fruit plentiful. It almost seemed as if the war were a dream.

Nish is crowded and it was not possible to obtain a

Digitized by Google

lodging at any of the hotels. Some of the Diplomatic Corps occupy rooms at small hotels, and the Servian Cabinet Ministers and the numerous officials of various State departments transferred from Belgrade to Nish must all be provided with lodgings. The private houses are also full, but it is there only that accommodation can be found. Prices for lodgings are moderate, the Government having ordered a fixed tariff to protect visitors and strangers.

NISH, August 13.

The Austrian Attack.

It was thought that immediately on the declaration of war the Austro-Hungarian troops would succeed in crossing the Save and occupying Belgrade. The Austro-Hungarian Government placed great faith in the prowess of their troops. It was undoubtedly this inflated belief that led them to despatch the summary ultimatum to Servia which only brute force could dictate.

To-day, sixteen days have elapsed since the rupture of diplomatic relations between the two countries, and still there is no sign of Austro-Hungarian troops being able to cross the Save or other frontier and occupy Belgrade. Far from being able to do so, far from being able to set foot easily on Servian soil, the enemy, we hear in Nish, is fortifying itself on the River Save near the railway bridge. Do they fear that the aggressors may became the defenders?

At first the Austro-Hungarian monitors were used for the purpose of shelling Belgrade and the surroundings; but after patiently submitting for a long time to this barbarous treatment, the bombardment of a defenceless city, four cannon shots, well aimed from Servian artillery which had arrived at a point near Belgrade, sent the Austrian ships scampering to save their hulls, and now at a long distance—it is said to be 14 kilometres—the enemy has installed powerful artillery, whose special aim seems to be to destroy the newest and most valuable buildings in Belgrade. A noble achievement! Are they venting their wrath or do they wish to intimidate the inhabitants of Belgrade.

The Servians are not intimidated by this inhuman procedure; their army has entered South Bosnia and seized two important positions, and at the first favourable opportunity it will take the offensive in other parts.

The Nish leaflets are published every day giving the latest news, communicated to the editors of the papers by the Press Bureau, which receives constant telegraphic communications from London, Paris, Rome, Brussels, and St. Petersburg of the march of events, so that we are not entirely shut off from the outer world.

NISH, August 17.

The Bombardment of Belgrade.

Night after night and day after day the Austro-Hungarian forces continue to bombard certain sections of the city of Belgrade, and at fairly regular intervals do terrible and ever-increasing damage to the town.

The water supply is deranged again, and the evil effects of this would be appalling, but fortunately many houses have wells, and these furnish water to the neighbouring residents. In the central part of the town, however, the want of water will be sorely felt if the supply continues to be cut off. The central electric light works have also suffered in consequence of the bombardment, and at night darkness obscures the streets; and if the damage done to these works cannot be readily remedied it is possible that the lighting up of the streets with petroleum will be reverted to. Otherwise, except when the moon shines, it will be a city of darkness. As for the tram service, the cars ceased to run on the day that Austria-Hungary declared war.

One fine edifice after the other is being damaged; destruction is doing its worst, but every attempt made by the enemy to cross the river in order to enter Belgrade is met by a counter attack on the Servian side, and up to now these efforts to cross the frontier at Belgrade have only served to show what a herculean task the enemy has undertaken. The Austro-Hungarian forces on each occasion sustain immense losses, and their dead bodies in numbers are seen floating down the river.

The Enemy's Advance.

At Shabatz, a flat country on the river Save, where the Servian garrison was comparatively weak, the Austro-Hungarian troops succeeded in setting foot on Servian soil, and for a time holding the position. The retiring Servian forces cannot fire on the town without the risk of doing harm to the inhabitants.

At Loznitza, a strong Servian position, some distance to the west of Shabatz, the enemy has fought hard in the endeavour to penetrate into Servia, but is being repulsed. It is at these points now that the battle rages.

When Austria-Hungary declared war she thought it was an easy matter to land her troops at Belgrade or at any point along the frontier of the Save and the Danube, but events have proved this belief to have been a sad delusion. So certain did the enemy feel of a rapid success that the Hungarian *Pester-Lloyd* last week prematurely gave an account of the occupation of Belgrade and the advance of the Austro-Hungarian troops into the interior of Servia. Newspaper correspondents in Semlin, knowing of the intention of the Austrian troops when they set out on their march of conquest, imagined that the mere effort was an accomplished fact, and telegraphed the "news" to other papers. The public here are busy with conjectures as to the future action of Roumania and Bulgaria. Both these countries have mobilized, and in both cases their neutrality in the future is doubtful. It is difficult to judge of their intentions, and for the present it is all supposition.

Japan's Action Welcomed.

Japan's action is joyfully greeted, and the hearts of Servians beat cheerfully when they see how the foes of Germany and Austria are increasing in number, and how likely it is that Austrian dominancy over Servia will receive its quietus, enabling Servia to live peacefully and develop its resources unhindered by her big neighbour. Indeed, in many a heart hopes are entertained of the realization in the near future of aspirations which after the annexation of Bosnia and Herzegovina had become cinders in a dying fire. It is in Bosnia that the Servian forces have taken the offensive. Is it an auspicious sign?

THE MEDITERRANEAN FLEET.

The Official Press Bureau has issued the following statement regarding the Mediterranean Fleet and Admiral Sir Berkeley Milne's resignation:—"The Admiralissimo of the French Fleet, Vice Admiral Boué de Lapeyrère, has assumed command of the combined Anglo-French Fleet in the Mediterranean. As a consequence, Admiral Sir Berkeley Milne, Bart., who is senior to this officer, has given over the command of the Mediterranean Fleet and returned home. The conduct and dispositions of Admiral Sir Berkeley Milne in regard to the German vessels Goeben and Breslau have been the subject of the careful examination of the Board of Admiralty, with the result that their lordships have approved the measures taken by him in all respects."

EMIGRATION FROM JERUSALEM.

In a recently published report, the American Vice-Consul in Jerusalem reports that "many of the Arabian peasant population have recently emigrated to North and South America. Following the example of the Christian population in previous years, which emigrated chiefly from the town of Bethlehem and the neighbouring town of Bedshala, the Mohammedan population from the environs of Jerusalem is beginning to emigrate. The lack of suitable employment is the cause of this exodus, and although the influx of the Jewish element counterbalances to a great extent the emigration of the Arabian population, it must still be remembered that the former settle mostly in Jaffa and in the neighbouring Jewish colonies."

W. N. WILLIS'S GREAT BOOK.

ANTI-CHRIST IN EGYPT

It is a vehement appeal to Christian England to save the children of Egypt from the open vortex of degradation and shame permitted—indeed, encouraged—by the Capitulation Laws which govern that country.

The chapter descriptive of Lord Kitchener as a civil administrator will be a revelation to even the most enthusiastic of that great General's friends and admirers.

Every voice that denounces the rampant riot of vice in Egypt will assist **LORD KITCHENER** in his GREAT IMPERIAL EFFORTS.

The Book may be ordered of all Booksellers, or direct from the Publishers, 2/4 post free, any address in the world.

ROUMANIAN LETTER.

(From Our Own Correspondent.)

Bucharest, August 8.

The Crown Council.

Last Monday was full of excitement for everybody here. The Crown Council—the meeting of the Cabinet and political leaders under the presidency of the King—was postponed from Sunday till Monday afternoon, to enable certain statesmen to be present—notably Mr. Take Jonescu, who was hurrying home from England. He had, by the way, to stand in the corridor of a train nearly all the way across Hungary, for owing to the mobilization there rolling stock seems to have been at a premium; and there were, moreover, crowds of alarmed holiday-makers returning from the various summer and health resorts. Roumanians, Servians, and Bulgarians all had to travel by the one line over the Predeal frontier, all having received a hint—none too polite—from the Hungarian authorities to make themselves scarce.

The same scenes which attended the declaration of war and mobilization a year ago were repeated on Monday night. The streets were crowded, and the Calea Victoria, to which all roads lead, was so packed in parts that motors and carriages could barely make a way through. About Capsa's and the Café Royal the "smart" portion of the crowd congregated, and the jokes and badinage passed from one party of strollers to another showed the curious side of the Roumanian character, which could make a holiday over what might plunge them into the horrors of war. It was quite 10.30 when at last the result of the Council meeting came through from Sinaia. "A waiting policy and no mobilization," said the papers. "No mobilization!" Looks of intense disappointment were on every face.

Declaration of Policy.

The morning papers gave us the official communiqué, which ran as follows:—"At a Cabinet Council presided over by his Majesty the King, and at which there were present H.R.H. Prince Ferdinand of Roumania, the President of the Chamber of Deputies, former President of the Council, and several former Ministers, Representatives of the Opposition, the attitude to be adopted by Roumania in the present circumstances was considered. Nearly unanimous, the Council has decided that Roumania must take all measures necessary to guard her frontiers."

The meeting lasted from five o'clock till after nine, and after it was over the members of the Cabinet met again at the house of Mr. Emile Costinescu, Minister of Finance, where the wording of the communiqué was decided on. The only dissentient was Mr. P. Carp, who has ever remained firm to the friendship with Austria-Hungary, and perhaps voices the private opinion of the King.

Since then it has been decided to mobilize a small part of the army, calling up a few classes of reserves, enough to place a formal guard on the frontier, without alarming either Austria-Hungary or Russia.

Balkan Alliance Rumours.

A rumour is now current of negotiations for a reconstitution of the Balkan Alliance, but this time with Roumania and Turkey included. Various cessions of territory are spoken of, and this—to which this country is said to be agreeable—would, of course, mean a modification of the Treaty of Bucharest.

The incidents on the Roumano-Bulgarian frontier have now been satisfactorily arranged by the Commission. The agreement states that it is difficult to decide who was in the wrong or who were the aggressors in either case. Each country will give ample monetary compensation to the relations of the soldiers of the other country who were killed. The last two weeks and the moving events in Western Europe have had the effect of greatly improving the relations between this country and her southern neighbours, which may also have been influenced by the proposals, said to have emanated from Sofia, for the reconstitution of the Alliance. As to the actual settlement of the frontier incidents there is no doubt that much is due to the diplomatic talent and level-headedness of Mr. Radeff, the Bulgarian Minister here.

Francophil Demonstration.

A stirring manifestation of sympathy for France was made on Tuesday afternoon at the Gare du Nord on the departure of about 200 French reservists who have left by the Constantza-Constantinople-Marseilles route, practically the only one open at present to Western Europe. The entire French colony and thousands of Roumanians filled the station to bid good-bye to their Latin brothers and cousins. A large party of Roumanian students of both sexes came bearing a large French flag, and all wearing the French and Roumanian tricolors. Bouquets of flowers were offered to the reservists, and as the train left the station the entire concourse burst into the "Marseillaise."

Lack of News.

Bucharest, August 12.

We are in a state of splendid isolation; no news of any sort from the outside world except the few contradictory telegrams which the local newspapers receive; no English newspapers or letters since July 30. The questions which everybody puts to everybody else are: "Has Liége fallen?" "Is Belfort taken?" "Have the English really landed 100,000 men at Antwerp?"

Strict neutrality is this country's policy unless events occur that force her to take action. Meanwhile every precaution is taken, and concentration is going on quietly but completely. Though none of the stirring scenes of last year's mobilization are seen, it is computed that 400,000 men are under arms and ready to move at a moment's notice. The failings shown by last year's campaign have been rectified, and it will be a very well and completely equipped army that will move, if move it does. There is little doubt that it will be as the ally of Russia that she would act, though there are hundreds of people in Austria-Hungary who fondly hope that she is still the friend of her western neighbour.

An Austrian Invention.

In connection with the assassination of the Archduke Franz Ferdinand, an authority lately returned from Austria states that all papers publish the most sensational statement to the effect that the individual so much spoken of in connection with the crime and for whom such an active search has been made, "Ziganovich" by name, does not exist. The real name of this person is no less than Prince George of Servia! This news is spread as absolutely correct in Austria-Hungary, the publication of the actual "proofs" being promised shortly.

NATIONAL RELIEF FUND.

For the benefit of readers abroad who may wish to subscribe to the National Relief Fund, we have much pleasure in printing a subscription form which may be detached and forwarded with the amount subscribed.

To H.R.H. The Prince of Wales,
Buckingham Palace, London.

I beg to enclose £ s, d. as a donation to the National Relief Fund.

BEYROUT LETTER.

(From Our Own Correspondent.)

Beyrout, August 12.

Mobilization!

The terrible nightmare that has been haunting the armed peace of Europe has at last become a reality, but people in this country, who are not yet directly involved, talk of the events that are daily reported by the telegraphic agencies as they would of mere sensational news of the day.

So far the Turkish Government has maintained its neutrality, but the alarming rapidity with which events have developed seems to have thrown it into a state of bewilderment and perplexity. It started by ordering a general mobilization, calling up all the classes of the Redif and Reserve, and declining the exemption tax. Then further orders and counter-orders followed, and at no time could the military authorities here give definite information to anxious inquirers. Many things, however, seem to point to a bellicose attitude on the part of Turkey. The authorities here have been commandeering all available mules and horses, and the Port Company has been requested to prepare a list of all the foodstuffs lying in the Custom House depots under its management. It is even said that the transport of such stuffs outside the town into the Lebanon is being prohibited. Of course, the export of grain and foodstuffs to foreign countries is also prohibited. A state of siege is declared, and telegrams are accepted only in plain language, in Turkish and French, and with the full address of the receiver and sender. The private coal stores have been closed and sealed by the authorities, and as all of them belong to foreign protected subjects the latter have addressed protests to their respective consulates. The Messageries steamer due to leave to-morrow for Alexandria could only obtain a supply of coal with a special permission from the Vali. I have just heard that at the last moment she has given up her sailing; and it is said that she remains here at the request of the British, Russian, and French Consuls, so as to be able to communicate by her wireless with their respective Governments. The Ottoman wires, in view of the attitude of the Government, are very unreliable.

It is said that about 150,000 soldiers are concentrated at Aleppo and Jerusalem, and the trains have mostly been requisitioned lately for the transport of troops. Indeed, owing to a shortage of gendarmes and soldiers in the town, civilians of the Redif class have been recruited to do gendarme service; and these improvised protectors of public security can be seen going about the streets in their ordinary native attire, but wearing a red rag on the left arm to distinguish them from ordinary civilians, and accompanied by a gendarme in uniform. The proprietors of stores dealing in textiles of use to the army, such as blankets, etc., have been placed under contribution; and when some of them closed their shops to avoid this contribution they were placed under arrest for a short time as a punishment for their lack of patriotism! It is said that one of them, a French protected subject, was treated with such disregard of the usual formalities that his Consulate-General had to intervene.

The Absence of News.

Owing to the indefiniteness of instructions relative to military service, and the active military preparations of the authorities here, practically all the young men liable to service are still at large, scattered about in the Lebanon, and the town looks more deserted than ever. The telegrams that are being received and published by the local telegraph agencies are said to be subjected to such strict censorship that the public was looking forward with exhausted patience to the arrival of the first mail by the Italian steamer due here yesterday, and it was a bitter disappointment to learn that she has been delayed at Alexandria through an accident that caused this sailing to be cancelled, and that the other Italian steamer due to arrive here to-morrow was also twenty-four hours overdue through an accident to her engines. It is announced by the Khedivial agency that the weekly service will be resumed next week, and what with the Khedivial, Italian, and the new service of the American Coasting Line "Archipelago" to Port Said, Alexandria, and back, it is hoped that we shall not be very badly off for news, and no more cut off from the outside world than we have been of late.

On the 5th instant the German steamer "Peter Rickmers" arrived here and anchored outside the harbour flying the red flag. It was soon rumoured that part of her cargo consisted of dynamite and other explosive ammunition, and a general feeling of nervousness prevailed because the steamer was not at a safe distance from the shore. But when she was brought into the harbour and actually started discharging alongside the quay, and when it was ascertained that her explosives consisted of about 300 tons of dynamite and about 360 tons of cartridges and other war ammunition, amazement and consternation superseded the feeling of fear. Besides these explosives the steamer carries rails, iron girders, bridge accessories, and other general merchandise, making a full cargo of over 6,000 tons. It is said that this cargo was destined for Vladivostok, and that the steamer, which is provided with a wireless apparatus, happening to catch a message while nearing Port Said about the declaration of war, changed her course and came to Beyrout as a neutral port for refuge. Since then the authorities have taken over, no doubt by an agreement with the German consular authorities, the explosive part of the cargo, which has been discharged by day and by night and sent over by rail to the interior. Turkish military officials superintended the discharge. Comment is superfluous on this incident, which is deeply significant of the attitude of the Turkish Government, and the Consuls of the Entente Powers must have watched the whole business very closely.

The "Peter Rickmers" has to-day moved back from the quay, having finished the discharge of the explosives, and she will in all probability have to stay here for safety. It is said that her crew has left by way of Aleppo, and that there remain on board only the master, the chief engineer, one officer, two firemen, and one cook.

MOSLEMS AND THE EMPIRE.

According to *The Times*, a resolution has been passed recently by the British Muslims Association expressing indignation at the threats of the German Press to incite the Islamic population of the British Empire to revolt. It points out that in the past, through belief in Germany's false assurances, Turkey has lost Tripoli and Bosnia and Herzegovina, and declares the Musulmans of the world "now know Germany to be like Shaitan (the Devil), and in the words of our Holy Al-Koran, 'the evil whisperer who whispereth evil suggestions into the breasts of men.'" It proceeds:—

"Words cannot be found to express the anger we feel at Germany daring to proclaim that British Islamic subjects would prove false to their religion and cowardly enough to attempt to take a mean and contemptible advantage of the country to whom they owe allegiance, and which has accorded them civil and religious liberty and protection. We desire to affirm the unflinching loyalty of British Musulmans to His Imperial Majesty King George the Fifth, and to assure him that all his subjects of the Islamic faith are fully prepared and burning with a desire to shed their blood on behalf of England side by side with the sons of Islam, natives of Algeria, who are already fighting for France. We as Muslims recognize the seriousness of Germany having deliberately broken treaties signed by her in concert with other large Powers, and feel that such acts on the part of Germany are a distinct challenge to the civilized nations of the world, which not only justifies but impels all Muslims to offer their services to the Allies in punishing Germany for such conduct and once more re-establishing the sancitity of treaties. We therefore humbly pray that his Imperial Majesty's Britannic Government will accept us and our brother Muslims to perform active service in the British Army, and thus share the sacrifices which the British people are so nobly making in the cause of civilization generally."

SALONIKA LETTER.

(From Our Own Correspondent.)

Salonika, August 19.

The Isolation of Salonika.

When I last wrote, on July 25, the political sky was, as far as we knew here, clear; but out of it the bolt of an Austrian ultimatum to Servia had actually fallen. What has occurred since then seems a hideous nightmare; and even yet we cannot bring ourselves to believe that the long-dreaded European war is an actual, terrible fact. But of what is really happening we are in complete ignorance, the date of our latest London daily paper being the 4th inst., and our last Near East July 31. By rail we are entirely cut off from everywhere, and almost so by the sea, now that the British, Austrian, French, German, Dutch, and some other regular services are suspended. Fortunately, the Italian steamers still run, and so we are kept somewhat in touch with the rest of the world. Anchored in the bay, held up for divers reasons, are a German, Dutch, Swedish, and a so-called British coasting steamer. Our commerce is entirely paralyzed, the only article seen carted about in any quantity being flour, which has already risen over 50 per cent.; while sugar is eight piastres the oke, instead of about two, as it used to be.

The Financial Situation.

A moratorium has again been imposed until September 14. After a short run on them, our banks suspended all further payments, depositors being now only allowed to withdraw the equivalent of two pounds a month, which, in any circumstances, is but a grim mockery. Cheques and bills on anywhere are quite unnegotiable; for articles of export there are not even quotations; in fact, everything commercial and financial is altogether dead, and ruin stares thousands in the face. A few days ago we were to have had £100,000 in gold by a Messageries steamer from Constantinople—we heard it was actually shipped, but instead of calling here, as usual, she went direct to Marseilles with conscripts, and so we lost that help to our money market, which, had it come, could not have greatly relieved the situation.

Yet, with all this state of affairs, refugees still arrive in hundreds at a time; while in the town many employers of labour have to close their works owing to the utter impossibility of getting money with which to carry on. Even the large tobacco companies in Kavalla, Drama, Serres, Salonika, etc., have had to close down through being unable to procure the wherewithal to pay wages, thus throwing out of work thousands in this one branch of commerce alone. In Kavalla, a scheme of issuing a kind of promissory note by the different tobacco companies to their men for wages due, a sort of private paper currency, was suggested, and I believe tried, but fell through: probably the discount on it exacted by the trades people was too great. So the general distress is already most acute, and if this is the case at the beginning of the war—while the small Balkan States with Roumania and Turkey still remain quiet—what will it be if it still farther spreads?

"Many-Tongued Rumour."

Possibly the lack of better things to do accounts for so much time being given up to the concocting of war "news" telegrams. The most amazing stories are published in our local papers and their supplements; and although we know them to be false we, nevertheless, rush to buy them. The British fleet has sunk and captured so many German ships in the North Sea: 135 British warships have surrounded the German fleet in Sicilian waters: the "Goeben" and "Breslau" have been sunk: they have been captured: they have escaped up the Adriatic, etc., etc., *ad nauseam*. Telegrams in one column are contradicted in another, and we throw the paper or supplement aside in disgust, quite bewildered as to what is, or is not, really happening. Fortunately, we have a chief of police who must be a humorist; for he has just made an order regulating the issuing of supplements, forbidding the shouting out of their contents, etc., while Article 3 enacts that "the publishing of false news by supplements is forbidden, and especially of that calculated to trouble public tranquillity." So we may now rely upon the news given to us being strictly true; and we may take it as a fact that the "Goeben" and "Breslau" have wiped the eye of the British and French fleets, so that the officers and crews of the former are very rudely "taking a sight" at the officers and crews of the latter from the safe shelter of the Dardanelles forts, while the Turks are laughing in their sleeves. An Italian steamer, arrived from Constantinople, brings the report that, when she passed them, the "Goeben" was flying the Turkish, and the "Breslau" the German, flag. A Greek supplement has just told us that 28 German and 16 British warships have been sunk in a naval battle in the North Sea; while we also are told that Trieste has been bombarded, and the Austrian fleet at Pola practically destroyed. But what says our chief of police? He remains silent.

Although the drilling of recruits goes steadily on here, general mobilisation has not, so far, been ordered. All the same, full instructions have been issued, and everything is ready should the decree to mobilize be issued from Athens.

BULGARIAN LETTER.

(From Our Own Correspondent.)

Sofia, August 6.

The Premier on the Situation.

During the debate in the Sobranje upon the budget of the Foreign Ministry the leaders of the various Opposition groups expressed approval of the Government's policy of strict neutrality in the present crisis. Mr. N. Tzanoff, the leader of the Radicals, urged that neutrality must be observed for the present at all costs, and that upon the conclusion of the fighting Bulgaria should enter into an understanding with her neighbours. Mr. Gueshoff declared that party flags must be furled, that all parties must work together, and that his party will support the policy of strict neutrality. Then the Prime Minister announced that (1) Bulgaria will maintain strict neutrality; (2) The incidents with Roumania have been satisfactorily disposed of; (3) Relations with Turkey are friendly, and the new Turco-Roumanian commercial convention has been signed; (4) Relations with Greece are not bad, and the consular question between the two countries has been settled; (5) The policy of the Cabinet is purely Bulgarian. This statement was well received by the Chamber, and the Foreign Ministry budget was voted without modification. The bills for the credit of 150,000,000 frs. for the payment of requisitions made during the two Balkan wars and a second credit of equal amount for military purposes were also adopted.

Reported Plot Against King Ferdinand.

The secret police here are reported to have secured some documents relating to a conspiracy against the life of King Ferdinand. The plot is said to have originated abroad, and six persons are reported to have been told off to perpetrate the assassination on the day of the consecration of the new cathedral church, St. Alexander Nevsky.

Relations with Roumania.

According to trustworthy reports from Varna, there were in the New Dobruja prior to July 30 five infantry regiments, five cavalry regiments, and thirteen batteries of artillery; the police-force along the frontier had been greatly reinforced, and there had been many expulsions of citizens. But now there is an entire change. The Roumanian troops concentrated against Bulgaria have been withdrawn, and communication across the frontier, which was restricted, is now free. The Foreign Ministry here ascribes this change to the exertions of the Bulgarian Minister at Bucharest.

TANGIER TO TEHERAN.

There is an old Scots adage about the following of freits —but certainly Mme. de Thèbes last winter made some remarkable predictions about the events of this summer. Now we are assured that the Great Aggressor insisted upon maintaining the peace until 1913 was well out of the way because of the gipsy's prophecy to his equally aggressive Herr Grossvater in 1849. She predicted that he, who was then only the fugitive heir of a tottering throne, would become an Emperor in the year indicated by adding 1 plus 8 plus 4 plus 9 to 1849, and would die in the year indicated by the addition of 1 plus 8 plus 7 plus 1 to 1871. Both these predictions came true. His dynasty, however, was to suffer a grievous shock in 1888 plus 1 plus 8 plus 8 plus 8. Consequently William, the grandson, was very ware of 1913, and only embarked upon his long expected career of Napoleonism when, as he hoped, Fate had been appeased. According to *Le Matin*, I see that other freits are to be noted in this connection. A storm blew down the "Peace Poplar" at Jena, planted to commemorate the fall of Napoleon in 1815, on the very day that the Austrians set match to the train which has since blown up the European powder-magazine by sending her Note to Servia.

***

We are told that Kaiser Wilhelm, who so obligingly rid the British Navy and Army of his presence, has begun to sell his British decorations. I imagine that a "George" or the Collar of the Garter should fetch a good price, and doubtless the worthy Monarch thinks to pose patriotically in the matter before the Prussian public. It is to be hoped that the restoration of these insignia will be exacted at the end of the war, and it is obvious that a great deal of water will have to roll under the bridges of Berlin before any British Order has again to admit, even as honorary members, any "gentlemen from Germany." Doubtless those British subjects who have received the Black Eagle, or the Red, or any other German decorations will now politely return the stars and crosses whence they came viâ the American Embassy in this country, for it is difficult to see how any honour can attach to these "honours" now. Apart from the Kaiser, there are seven German Princes enrolled among the Knights of the Garter. Surely these can now be relieved of any such English connection, and at the same time the opportunity might be taken to recover the British Royal Dukedoms which are now buried in Germany.

***

In a leading article the other day *The Daily News* concluded a scathing summary of the Kaiser by remarking:—

> We now know the significance of his message to Abdul Hamid when the Great Assassin's hands were dripping with the blood of the massacred Armenians. It was the message of a kindred spirit.

I would advise the *News* to insert an apology promptly. Abdul may be forgotten, utterly forgotten by the majority, to-day. But he is not dead. And though I do not profess to know much law, I feel tolerably certain that he would have good grounds for a libel action on the strength of the passage quoted. And the damages that would be awarded him by a British jury—or a jury of any other nationality, for that matter—just now!

***

The effect of the war on political geography is already becoming apparent. The up-to-date schoolboy now has to learn that the capital of Servia is Nish, that of Montenegro Podgoritza; the Belgians look to Antwerp, on the Scheldt, and the French, as in 1870-1 to Bordeaux. on the Gironde. It must be annoying to the schoolboy to have to re-learn his lesson, but even he will be able to understand how serious a matter must be a change of capital and how grave the necessity which produces it.

***

Among certain races a place-name is a very important matter. In the Balkan Peninsula the place-name is an ensign of the dominant race. Edirneh, which we call Adrianople, was re-named Odrin during the few months that it was a Bulgarian town. Selanik of the Turks was for weeks in doubt whether its future name was to be Soloun or Thessalonika. Küprülü has become Veles, Uskub is now Skoplje, and the whole Ægean Question turns on whether a certain island is to be called Mytilene or Medellü. Now I see that the Russians have determined to be rid of the place-names in Russia which date from the period when the great Slav Empire humbly sat at the feet of Brandenburgers, Anhalters, Holsteiners, and the like, and meekly allowed itself to be drilled, bullied, and governed by these imported taskmasters. St. Petersburg with its Teutonic termination now gives way to Petrograd, which is the Russian way of saying the same thing.

***

As I write the future of the Ottoman Empire appears to depend upon the will of one man, Damad Enver Pasha. The Sultan's Minister of War enjoys a greater reputation for energy and force of character than for judgment or self-control, and it is particularly unfortunate that at such a moment an officer with his record should exercise so considerable an influence over the fortunes of an ancient Empire. It is greatly to be hoped that Turkey will not permit herself to be plunged into a policy of adventure at the nod of an impulsive and ambitious soldier. Such a policy could not fail to bring the Porte into collision with that group of Powers which hold the command of the sea. It is possible that a study of history finds an inadequate place in the education of Ottoman officers and Committeemen; if so, I hope that they will allow me to remind them that Victory has ever shown herself strangely fond of successful sailors and a fine fleet.

***

Some alarmists, I see, are suggesting that if Turkey should be unwise enough to buckle on the scimetar once more, at Germany's behest, she would not only aim at invading Egypt, but would also move on Koweit with her Baghdad troops. Of course, if she should commit the greater folly she might be infatuated enough to commit the smaller also. But for the life of me I cannot see what *Turkey* could hope to gain by a move on Koweit, though it is quite easy to see why Germany should egg her on to make one.—For in the unlikely event of Germany and Turkey triumphing there would be a fine harbour ready—for Germany to make use of. If, on the other hand, Germany emerges at the small end of the horn, as we all believe she will, the capture of Koweit (or the reverse) cannot make things any worse for her. And as to Turkey, the Kaiser and his advisers care for her not at all—But I should like to point out to the good people who think Turkey will move on the Gulf that Sheikh Mubarek is quite well able to take care of himself; that the Turks know it; and that their latest experiences in the Gulf are hardly calculated to make them eager for fresh adventures in that direction. Moreover, the Arabs of Lower Mesopotamia do not love the Turk, and if there is any fighting going they are almost sure to take a part in it. But on which side? Could the Vali of Baghdad tell us?

***

Another query that strikes me in connection with the anxiety as to Turkey's movements is this: How could Turkey declare a *jehad* and yet limit its scope to Britain, France and Russia? The game would be too dangerous. The attempt to play it would inevitably lead to a general massacre of Europeans *and Americans* in Turkey. And then——? I wonder if the Germans have considered the point. Do they really want to have the United States about them too? It almost looks like it.

***

A story which has an element of grim humour reaches me from Malta. There, as everywhere, the all-absorbing topic of conversation during the first few days of August was the war. At Casal Zebbug a young woman went to the village store to buy provisions, and, as village gossips will, tarried awhile to have a "crack" with the shopkeeper's wife. But the lapses and indiscretions of this and that neighbour, and the domestic incidents which form the warp and woof of ordinary human life during a time of peace, were overshadowed by a world-wide calamity. The conversation, which naturally turned on the chances of bombardment from aeroplanes and the like, was suddenly and rudely interrupted by a terrific explosion, which wrecked the shop and brought down the roof. The shopkeeper and his wife rushed out screaming and terror-stricken, believing that the Germans had indeed come. The unfortunate young woman was buried beneath the débris, and when she was extricated (the local paper says "after about an hour of arduous labour"), the district medical officer attended her for a broken arm and other injuries aggravated by shock. But she was a victim—not of the war, but of an explosion of gas.

***

An evening journal harrows us with stories of German aggression, and narrates:

> A Russian officer at the front states that during their occupation of the west of Russian Poland the Germans stabled their horses in churches, and covered them with priests' investments.

I have often heard of the financial dexterity of certain Athiot monks, but had no idea that the Catholic clergy in Poland were so wealthy as to possess such quantities of scrip as to provide horsecloths for any really large body of cavalry, or so careless as to leave it where Germans could get at it! Certainly the Kalogeroi of Athos give the impression of being in many cases better men of business than are their Latin *confrères* in the opinion of our contemporary.

***

In the Emperor of Austria's telegram to the Kaiser there was a sentence: "Words fail to express what moves me, and with me my army, in these days of the world's history." Mr. Punch is unkind enough to suggest that "the word 'Servia' might express what moves his army."

CORSAIR.

THE "GOEBEN" IN THE DARDANELLES.

More fortunate than some of his contemporaries, Mr. Punch has received (per wireless?) some "extracts from a diary kept at intervals by a very special correspondent in the Dardanelles," which he publishes under the heading "How Germany Came Off." We take the liberty of reproducing the "extracts," which are quite in *Punch's* best vein:—

Goeben arrives Dardanelles. Announcement of sale to Turkey and of disembarcation of German crew.

Goeben still in Dardanelles. Having been disposed of to Turkey, the ship again disembarced her crew.

Goeben continuing in Dardanelles, the disembarcation of German crew, which was completed three days ago and again yesterday, began again to-day and was carried out successfully.

The *Goeben* still being at anchor in the Dardanelles, it was decided to carry out a disembarcation of her German crew on a scale surpassing all previous efforts.

The *Goeben* continues in the Dardanelles. Owing to the remarkable expertness which her crew has acquired, it was possible to carry out three disembarcations this afternoon. The officer commanding, indeed, proposes shortly to issue a challenge to ships of all nationalities for the Open Disembarcation Championship of the World.

The *Goeben* remains in the Dardanelles. In response to a pressing request from great masses of the Turkish population, who have been unable before to witness the ceremony, it has been decided again to disembark the German crew, and, beginning to-morrow at 10 A.M., the impressive spectacle will be gone through at regular intervals of an hour throughout the day. All railways companies have announced cheap excursions, and there can be no doubt that these disembarcations will easily surpass all earlier ones.

The German crew of the *Goeben* are agitating for an eight-hour day.

Instructions having reached the crew of the *Goeben* to return to Germany, a magnificent Farewell Disembarcation took place last night. At its conclusion sympathisers presented an illuminated address bearing the following inscription: "To the crew of the *Goeben* on the occasion of their final disembarcation before leaving for the Fatherland."

Later.—Arrival of the crew of the *Goeben* at Kiel. Great popular enthusiasm. KAISER orders a Special Disembarcation to take place before entire Fleet, a duplicate cruiser (in the regrettable absence of the *Goeben*) being lent for the purpose.

GERMANY AND ISLAM.

The following are extracts from an article entitled "Turkey and the War" which appears in *The Indiaman* of to-day's date:—

't did not require the outbreak of the war to satisfy the British nation that among the Indian subjects of the King-Emperor there are none more loyal than the Indian Mohammedans. The British nation has been fully aware of the fact for many years past; hence its amusement at the quaint German conceit that the Kaiser, with the assistance of his little circle of friends at Constantinople, could set the Indian Mohammedan world in a blaze whenever he found it convenient to do so. At the present moment there are thousands of stout Mohammedan soldiers in India who are rejoicing at the prospect of meeting the Kaiser's legions in the field, and when the longed-for day arrives they are quite satisfied that they will give as good an account of themselves as their Algerian co-religionists, who by their exploits in their recent encounter with the Prussian Guard Corps have given a further proof to the world of the loyalty of the Mohammedan soldier. The Kaiser, in his self-assumed character of the champion of Pan-Islamism, will find no audience to play to outside the walls of Constantinople. . . .

Germany in her extremity is scouring the earth for allies. To all she offers bribes . . . . every one accompanied by a threat, and Turkey no doubt has been warned that like Belgium a terrible fate is in store for her if she refuses to support Germany at the present juncture. But Germany has the Old Turks to reckon with as well as the young ones, and even if these Old Turks have not exactly shone as administrators they long ago established their reputation as diplomatists. . . . They may be counted on to appreciate the motives underlying the policy of Germany in seeking to draw their country into the present conflict, and the fact that while Germany screams to Turkey for help England is content merely to ask her to remain neutral will not be lost upon them. But it remains to be seen whether their influence at Constantinople is strong enough to counteract the growth of the pro-German movement so sedulously fostered by the Young Turks. The Young Turks and their German friends control the Army, or, at any rate, the portion of it centred in the capital, and it is feared that they have the power to drag their country into the war. But that they have the power to carry the operations of the Turkish Army in this war to a successful conclusion is more than doubtful. With the mass of the Turkish people and with the bulk of the Turkish Army a war with England would be an unpopular war. They would go into it without the faintest suggestion of religious fanaticism to inspire them in the field, and haunted with the unpleasant reflection that every war undertaken by Turkey under the new régime has left her the poorer in territory, money, and military reputation.

THE PRESS ON THE NEAR EAST.

Some Causes of the War.

The following are extracts from an article, "Causes of the European War," by Dr. E. J. Dillon, in the current *Contemporary*:—

I travelled through Germany on my way from Constantinople, and during my journey a few foretokens of what was coming were brought to my cognisance. One of these was the curious circumstance that while the Central Berlin Government was in appearance taking endless pains to hold Austria back and to hinder the outbreak of war, her Ambassador in Vienna was working strenuously, and doubtless conscientiously, in the contrary direction, egging on, stirring up, widening the gulf which he was supposed to be bridging. . . . Less commonly known, but not wholly concealed, was the silent and unavowed movement of German troops towards the Western frontiers, shortly before the Austrian ultimatum had left the Ballhausplatz in Vienna. . . . But what, to my thinking, was incomparably more significant than all other indications of what was brewing, was the circumstance which came to my knowledge as a fact, not as a supposition or as an inference, that the Kaiser himself was kept informed of the various phases of the Austro-Servian quarrel, that the ultimatum was laid before him in the rough draft, and that, having read it, he made a suggestion to sharpen it, which was approved and adopted.

. . . It is now matter of common knowledge that this violation of the neutrality of the two little States was decided on long in advance, and the German plan of campaign based upon it. Yet hypocritical assurances of the contrary were repeatedly volunteered by every German personage who had to do with Belgium of late years, including the Kaiser himself. Even after it had become clear that war was inevitable with France, the respect which Germany entertained for Belgium neutrality was harped on. Thus on Sunday, August 2, the German Military Attaché in Brussels, in conversation with the Belgian War Minister, M. de Brouqueville, exclaimed: "I cannot for the life of me understand what you mean by mobilising. Have you anything to fear? Is not your neutrality guaranteed?" And a few *hours* later Belgium received the German ultimatum.

The Governance of Albania.

In the current number of *The Asiatic Review* Mr. C. Telford Erickson writes sympathetically on the unhappy condition of Albania under the heading "The Truth about Albania." The European Powers cannot now put their hands to the task of undoing the mischief for which some of them are responsible in that country, but perhaps in the future Mr. Erickson's suggestions may be acted upon. He writes:—

With the setting of Albania's Government house in order I have nothing to do. I am simply an American missionary to this people, who believes in them and who loves them, who has sacrificed for them, and is ready, if need be, to do so again. Before any Prince was appointed I strongly advised the Albanian leaders against the plan, urging instead that they ask for Commission form of government, at least for some years—a Commission chosen from some one neutral Power, having no personal interest in the country; a British, or even an American, Commission would have served admirably. The head would be a man with experience in dealing with primitive peoples; each member of the Commission would be an expert chosen for some department because of his knowledge and ability in that department, for agriculture an expert, for finance an expert, all going in without show or ceremony, and setting to work at once to better the condition of the people. I believe with all my heart that such a plan would have succeeded. I believe that were Albania neutralised by the Powers now, every nation taking its hand off from trying to order affairs there, guaranteeing only the integrity of the State with its present boundaries, giving notice to those Powers who are secretly making trouble to cease—which could very easily be done—that with this, half of her troubles would be at an end. For the other half it must be recognized that wrongs centuries old have taken root there, that thousands are homeless and starving, that the people have been bled and betrayed and deceived with false promises and fed on false hopes so long that only much patience and kindness and sympathy will heal the wound.

King Carol and the War.

In connection with reports that King Carol of Roumania is seriously ill and contemplates abdicating *The Morning Post's* Paris correspondent forwards some comments from the *Temps*, which are certainly not without interest:—

It has been an open secret that King Carol has opposed the popular feeling of his people, which is all against Germany and Austria. Public opinion in Roumania insists that when a final division comes they should not be found with their swords sheathed while the future of the Roumanian territory now held by Austria-Hungary is being decided. It is felt that intervention should be made before the fortunes of war have been so far decided that it becomes superfluous and of no value. When Roumania intervened in the second Balkan War, fomented by Austrian intrigue, King Carol offered to abdicate rather than invade Bulgaria, and his attitude now is stated to be still more decided.

Of course, the present reported retirement may really be due to motives of health, because King Carol suffers from chronic

Digitized by Google

liver trouble, and not long ago had a very severe attack. Moreover, he is seventy-five years old. He is a lifelong friend of the Emperor of Austria, and although the King of the Belgians is his nephew, his leanings are towards the Hohenzollerns. The marriage of the Crown Prince of Roumania with a Saxe-Coburg-Gotha princess rather complicates the situation, yet it cannot be forgotten that King Carol has been largely responsible for building up the present position of Roumania.

The Greek Navy.

In an interesting note upon the cosmopolitan character of some navies *The Globe* says:—

The most cosmopolitan of foreign navies is probably the Greek. It includes one Italian-built Turkish torpedo-boat, four British-built Argentine destroyers, three French-built battleships, and an Italian-built armoured cruiser. The small cruiser "Fei-Hung," which was building at New York for China, has been taken over by Greece, and there is a Dreadnought battleship, the "Salamis," under construction in Germany, which will be fitted with American guns and armour. Another battleship was recently ordered in France. Finally, the naval affairs of the country are under the direction of a British Commission, of which Rear-Admiral Mark Kerr is the head.

The Carnegie Commission: A Criticism.

Ever since the appointment of the Carnegie Commission the question of its impartiality has been debated with a good deal of heat; and in view of the warmth of feeling displayed by the partisans both of Greece and of Bulgaria one may almost suppose that the question will always remain a vexed one. A notice of the Commissioners' report (both American and French editions) appears in *The Athenæum* of August 29. The reviewer is inclined to blame the editors—not unfairly, we think—for the delay in publishing the report, and expresses the opinion that "the Greek side is treated without sympathy or knowledge." His criticisms are levelled chiefly at the "Greek Soldiers' Letters" portion of the report and the charge concerning certain events that took place, or were reported to have taken place, after the Bulgarian evacuation of Serres. Our readers have probably heard more than enough about the "letters"; but the second topic is not so familiar to them, and we quote the writer's views upon it:—

One of the charges brought against the Bulgarian army by the Greeks was that, when evacuating Serres for the first time, it had taken with it as hostages four notables of the town, whose dead bodies were afterwards found on the line of the Bulgarian retreat. One of these four men was said to be the director of the Serres branch of the Orient Bank. The attitude of the Commissioners to this charge is so naive and unscientific as to be almost incredible.

"The member of our Commission [they say] who visited Serres had the pleasure of meeting this gentleman, M. Ghiné, alive, well, and unharmed, and enjoyed his hospitality. Such discoveries as this are a warning that even official statements regarding these events must be subjected to careful scrutiny."

We can imagine that visit to Serres! Here at least was a matter which our Commissioner could get to the bottom of. He could go to the bank itself and inquire. Was there anyone at home who could give him information about the death of the director? Why! the director himself was at home, M. Ghiné. A look of intelligent triumph passed over the Commissioner's face. The director himself at home! Here was another of those Greek lies nailed to the counter, and the affable M. Ghiné smiled when the Commissioner told him that it was rumoured that he was dead. One must not believe all rumours, he said, as he passed the wine. Our simple Commissioner had forgotten that "director of the Orient Bank," like Pharaoh, is not a proper name. It never occurred to him that, if the director for the time being had been murdered, the Orient Bank was not likely to leave his place open for six weeks. In point of fact, no one had ever suggested that M. Ghiné was murdered. It was his predecessor, M. Constantine Stamoulis. M. Ghiné was at the time assistant director, and succeeded to the directorship in consequence of the murder of his chief. In the longer Greek versions of the "Bulgarian Atrocities," not only M. Stamoulis's name is given, but also his photograph, and there are allusions by name to his assistant, M. Ghiné, with no suggestion that he was anything but alive and well. In the small Greek publication which the report actually quotes for its damaging "discovery" M. Stamoulis's name is given on p. 50, although only his title occurs on p. 24, the page quoted. Could carelessness go further?

Our War Minister.

Lord Kitchener's appointment as War Minister has naturally led to the publication of a great number of articles, reminiscences, anecdotes, and so forth concerning him. The following are typical extracts from one of these articles, entitled "Lord Kitchener of Khartoum," contributed by "C. F." to *Everyman* (August 28):—

. . . . What matters is the character shown in public actions. Of this we have seen a good deal in the last few weeks. We have seen it first, indirectly, in the calmness and satisfaction that his appointment as War Minister has brought to the country. "Now, at least," men seem to be saying, "we shall have all done for us that can be done. If we are ready, we shall be pushed into the thick of this fight as swiftly and as effectively as may be; if unprepared, we have the strongest and steadiest hand in the nation to pull us into shape. We can go forward with the confidence bred of knowing that we move in the right direction." Scarce a criticism of the appointment has been heard.

. . . . The vote of one hundred millions sterling and the demand for a New Army of half a million men were the direct indications of Lord Kitchener's character. They pointed to his predominant qualities, not only energy and swiftness, but determination, for it must have cost something to Ministers who had declared England equipped for any emergency to agree to them. Doubtless they were the price of his assumption of office.

The price seems high, but we look for a great return. In this war we are fighting, firstly, for our own prestige, secondly, for the nationhood of a small people; thirdly, for the preservation of the highest civilisation that Europe has yet attained. The enemy of all three is that *barbarie scientifique* that a great French writer has declared to be the mark of modern Prussia. The man to break it if any can, perhaps because he has in him a strain of the scientific barbarian, is, we believe, Lord Kitchener of Khartoum.

Servian Hopes and Aims.

Mr. Chedo Miyatovich contributes to *The Outlook* (August 29) an article on "What the Servians Want and What They Hope to Attain," from which we quote the concluding paragraph:—

We Servians did not wish for that war at present. After two bloody wars our people wanted peace and rest to recuperate their strength and financial resources. We wanted time to organize newly annexed countries, to create and train a new army of some six hundred thousand soldiers. We were just on the point to order three hundred thousand new rifles and three hundred thousand new soldiers' uniforms in England. We wanted at least five years to organize, train, and properly equip our forces. Just to preserve peace, so necessary to us, our Government went to the utmost limits of self-humiliation in accepting nine out of ten Austrian demands. Austria and Germany were evidently determined to provoke the general war at once. We were not afraid of the war, even when the conduct of Great Britain was still doubtful. But since England has declared war on Germany and Austria, we will continue the war with enthusiasm, firmly believing that it will finish with the victory for the Allies of Russia, and that the Allies, dictating the conditions of peace, will sanction the union of Bosnia, Hertzegovina, Dalmatia, Croatia, and Slavonia, with the kingdoms of Servia and Montenegro, into a great and strong south Slavonic kingdom.

Bathing—East and West.

Mr. F. G. Aflalo contributes to *The Academy* (August 29) a light article, "Memories of the Bath," in which he gives some personal experiences of swimming in many quarters of the globe. He writes with true appreciation of the "quiet chance of a swim . . . on the edge of sunlit gulf in Asiatic Turkey," but, naturally, is not enthusiastic regarding the bathing attractions of the Dead Sea. One of the greatest surprises ever sprung on him, he says:—

. . . . was in the Brook Cherith, Elijah's brook, when the sudden apparition of a moderate-sized crab, not, as seen through the water, very different in appearance from those of our own rock pools, inspired hasty removal of my feet from the ground. In the Jordan itself I could never make up my mind to swim, for, its sacred traditions apart, it is a very dirty river, and it is not easy wholly to dissociate its uninviting hue with the very imperfect ablutioners who, that Easter week, were being dipped in its healing flood a little farther up-stream.

His prejudice seems to be shared by not a few travellers to the Holy Land. Here is his concluding paragraph, in which he contrasts the *hammam* of the East with its European copy:—

The Turkish bath is an institution for the full enjoyment of which men are unevenly qualified, some being even prevented by constitutional weakness from exposure to its extremes of temperature. Personally, when in the mood, I appreciate its restfulness and relaxation, physical and mental, and I have squandered, not without profit, many hours in the *hammam* from Jermyn Street to Damascus, the first-named being far more deliberately Oriental in its appointments than any that I know in the Ottoman dominions, though the real effect of Eastern *keyeff* is more perfectly realised without effort, in the Hamman el Malaky at Damascus, where you recline after the bath and smoke your *nargileh* in sight of shaggy camels swinging past the open gates. Physically, no doubt, with the services of a vigorous masseur, the Turkish bath is cleansing; but its sovereign virtue for those who readily enter into the spirit of its rites is complete rest for the mind, which, divorced from earthly cares, benefits immeasurably from a dreamless rest unattainable with the aid of any anodyne as harmless. It is the very converse of American surf-bathing. It was the invention of a very different race.

Articles to Note.

"The Literary Culture of the Turk," in *The Outlook* (August 29).

"In Albania," by Captain G. Moltedo, and "La Serbia e le sue relazioni economiche con l'Italia," by G. Kara, in *L'Esplorazione Commerciale* (July 27).

THE NEW POPE.

A Reuter's message from Rome announces that Cardinal della Chiesa has been elected Pope, and that he has taken the title of Benedict XV.

To-day is the birthday of her Majesty the Queen Mother of the Hellenes.

To-morrow is the birthday of H.R.H. Princess August Leopold of Saxe-Coburg and Gotha, *née* Archduchess of Austria and niece of the Tsar of the Bulgarians.

To-morrow is the birthday of H.I.H. Mehmed Selim Effendi, eldest son of the ex-Sultan.

Wednesday is the birthday of H.R.H. Prince George, elder brother of the Crown Prince of Servia.

Thursday is the birthday of H.H. Princess Maria Immaculata of Saxe-Coburg and Gotha, grand niece of the Tsar of the Bulgarians.

Thursday is the birthday of T.I.H. Nazime Sultana, sister of the Heir and Zckie Sultana, eldest daughter of the ex-Sultan and wife of Damad Nur-ed-Din Pasha, son of the celebrated Ghazi Osman Pasha.

Conflicting reports regarding the health of King Carol of Roumania have been circulating throughout the week. Upon enquiry we learn that the Roumanian Legation has no news tending to confirm the report that His Majesty is seriously ill. On the other hand it is understood that the King has quite recovered from his late illness, but he is reported to be deeply affected by the war.

Her Majesty the Queen of the Belgians has paid a short visit to this country in order to bring her children to a place of safety. Her Majesty was the guest of Earl Curzon while in England.

A correspondent writes:—"When the seven lean years of Egypt's financial crisis were overtaken by the prosperity of the tourist season of last winter hopes rose high for the return of the good old days once more. But wars and rumours of wars have suddenly dashed these hopes to the ground, and now there is but little chance of there being a social season to chronicle at all in the capital, where Egypt's residents and Egypt's visitors love to congregate during the winter months. Hotel proprietors and tourist agencies are indeed viewing the prospect with rank dismay, and even if peace were proclaimed within the next few weeks it would come too late to save the situation So far most of the Government officials are back from their leave, but the European population is almost entirely a male one, and it is quite an open question whether the gentler sex will be able to follow its lords and masters. With regard to the hotels and those who manage them so well, there is nothing to be gleaned. It is whispered that various of the palatial caravanserai will not open their doors this winter unless some enterprising hoteliers of neutral sentiments start them as convalescent homes for our wounded heroes, and certainly there will be but little doing in the way of river tourist traffic. It is a sorry prospect for Egypt generally, and her only consolation must be the fact that she is suffering in good company."

The Diadoch of Greece and his uncle, Prince Christopher, left Egypt on August 19 for Greece. Prior to their departure they attended a Te Deum at the Evangelismos Church, Alexandria.

We deeply regret to record that, according to the French papers, H.I.H. the Grand Duke Dmitri Pavlovitch of Russia, nephew of the King of the Hellenes, has been killed in battle in East Prussia.

From the same source it appears that H.H. Prince John Constantinovitch of Russia, son-in-law to the King of Servia, and his brother, Prince Olog, have both been killed in action in East Prussia.

It is reported that H.S.H. Prince Frederick of Saxe-Meiningen, brother-in-law of the Queen of the Hellenes, has been killed in action, and that his brother, Prince Ernest, has been wounded and taken prisoner.

The Tsar of Russia has conferred on the Œcumenical Patriarch the Grand Cross of St. Vladimir in brilliants.

Prince Cantacuzene left Egypt on August 19 for Greece, travelling on the s.s. "Salonica."

According to Egyptian papers just received, Sir Reginald Wingate Pasha, the Sirdar, was expected to spend ten days in Cairo, and subsequently to go on to the Sudan, where he would inspect the army, returning afterwards to Cairo.

Mr. Malcolm Wingate, son of the Sirdar, is among the English officers attached to the Expeditionary Force now in France.

Lady Raglan is slowly recovering from the accident she had some weeks ago when, through a fall, she hurt her spine, and this has kept her in London. Her two younger sons are serving in the war and her eldest son is in the Sudan.

H.H. Tewfik Pasha, the Ottoman Ambassador, returned to the Embassy on Monday from Eastbourne.

H.E. the Roumanian Minister returned to London from Eastbourne on Monday. Madame Misu, however, still remains at Eastbourne.

Captain Deedes, of the Ottoman Ministry of the Interior, left Constantinople on August 1 somewhat suddenly for London. We understand that a report has been current that Captain Deedes had been detained by the Germans, but we are happy to be able to state that such is not the case. He is, we understand, now very actively employed at the War Office.

Mr. H. N. Bowden Smith, of the Ministry of Finance, Egypt, is returning to Egypt on board the s.s. "City of Nagpur."

Mr. Olney Arnold, American Agent and Consul-General in Cairo, is reported to be detained in Germany, at Munich, where his son is at school.

Mr. Harry H. Lamb, C.M.G., and Mrs. Lamb have arrived in London from Durazzo, and intend to take a short holiday in Sidmouth, which will doubtless be very welcome after the hard work and worry through which Mr. Lamb has passed at Salonika and, latterly, in Albania as British member of the International Commission of Control.

On Thursday of last week at Staithe House, Beccles, a son was born to Mr. Noel E. Waterfield, F.R.C.S., of the Sudan Medical Service, and Mrs. Waterfield.

We regret to announce that the death occurred on Wednesday, at Portslade, Sussex, of Colonel Henry Harding Mathias, C.B., who led the Gordon Highlanders at the storming of Dargai in the Tirah campaign of 1897. Born in 1850, Colonel Mathias was educated at Marlborough and entered the 75th Regiment in 1869, and in 1879 obtained a captaincy in the Gordon Highlanders, the first battalion of which regiment he commanded from 1895 to 1899. He also saw service with the Nile Expedition of 1884-85, and the Chitral Relief Force of 1895. He commanded the 75th Regimental District from 1899 to 1904. Colonel Mathias married in 1875 Florence, daughter of the late Sir Thomas Shepstone.

Lieutenant-General Sir Charles Fergusson, Bart., C.B., M.V.O., D.S.O., who has been promoted to that rank vice the late Sir J. M. Grierson, was employed with the Egyptian Army from 1896 to 1903. He served with the Dongola Expedition in 1896, receiving the Egyptian medal with two clasps. In the following year he saw service with the Nile Expedition, including the capture of Abu Hamed and occupation of Berber, for which he received the brevet of Major and two clasps to his former medal. In 1898 he was again up the Nile under Lord Kitchener, and was present at the battles of Atbara and Khartoum and the defeat of Ahmed Fedil's army, when he was severely wounded. For his services he received the D.S.O., the brevet of Lieutenant-Colonel and three additional clasps. In 1899 he took part in the first advance against the Khalifa, gaining another clasp to his medal and the Third Class of the

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.
Near the lake, with splendid park.

CECIL HOTEL.
In the town and 5 minutes from the station.

Two First-class Family Hotels.
High-class Cuisine. French Chef.
J. SUMSER, Manager-Proprietor.

Sofia (Bulgaria).

GRAND HOTEL BULGARIE
(opposite the Royal Palace).
First-class Hotel. Entirely renovated and beautifully situated in the centre of the city, near Post Office, Theatre, Museums, Banks, etc. Electric Light. Central heating. Baths. Garage. Telephone. Garden. French Restaurant. Good wines. Café. Foreign newspapers. Most frequented by English and American Visitors. Interpreter meets all trains. Rooms from 4 frs.

Cyprus.

THE CYPRUS HOTEL CO.

Open all the Year round—
LIMASSOL (Olympus Hotel).
FAMAGUSTA (Savoy Hotel).
For Summer Seasons—
PLATRES (Platres Hotel). 4,600 ft. from the sea level. Opens from May till Oct.
TROODOS (Olympus Hotel). 6,000 ft. from the level of the sea. Opens from May till Oct.
Perfect Situation. French and English Cuisine. Moderate Terms. Also Excursion to Mount Troodos.
For Tickets and further particulars apply to—
NAJEM HOURY, Limassol, Cyprus
(Proprietor of the Army and Navy Stores).
Head Office: Najem Houry Stores, Limassol, Cyprus.
Branches: Polymedia, Troodos, Nicosia, Famagusta, Larnaca, and Platres.
All arrangements for Transport by Carriages, etc. are made by the above Firm.

Bucharest, Roumania.

GRAND HOTEL DU BOULEVARD.
The Rendezvous Hotel of the Diplomatic World and Distinguished Visitors to Roumania.
Entirely renovated, with all Modern Comfort. Unrivalled Cuisine.
FAMOUS ROUMANIAN BAND.
Admirably situated in the very centre of the Town.
LUCIAN BERTOLA, Proprietor.

Mejidieh. From 1909 to 1912 General Fergusson was Inspector of Infantry, and at the outbreak of the present war commanded the 5th Division, Irish Command.

The Orient reports that Countess Wertheim, daughter of the U.S. Ambassador Morgenthau, with three children, and Captain Macauley of U.S.S. "Scorpion," and Mrs. Macauley were among the passengers arriving in Constantinople on August 10 by the Italian steamer from Venice, which carried more than 1,100 passengers.

M. Carton de Wiart, the Belgian Minister of Justice, who has passed through this country on his way to the United States, as a member of the Belgian Special Mission, is a brother of Maitre Carton de Wiart, the well-known Cairo advocate.

Captain C. F. Nesham, who has been appointed to the H.A.C., embodied in connection with the war, is a brother of an officer who took part in the famous charge of the 21st Lancers at Omdurman.

Mr. Freeman, British Consul at Port Said, has arrived at that town with his family. Mr. Freeman was formerly Consul at Benghazi, and was appointed to Port Said last March. He had been expected in Port Said since April 1.

Owing to the exceptionally heavy work caused by the war at the British Consulate, Port Said, Mr. A. B. Geary has been temporarily transferred there from Alexandria to assist.

We regret to record the sudden death on Tuesday, July 28, in Kadi Keuy, Constantinople, of Mrs. Rhodie Tully, the wife of Mr. Arthur P. Tully, Constantinople manager of the Gresham Life Insurance Company.

We regret to report the death in Constantinople, on July 31, of Mr. John Henry Cuming, eldest son of Mr. and Mrs. J. B. Cuming, of Galata. The deceased was married five months ago in England, and towards the beginning of July he and his young bride went out on a picnic with some friends. A few days later both, suffering from typhoid, had to be removed from their residence to the British Hospital at Galata, where the wife succumbed a week before her husband.

Count Forgach de Ghymes et Gacs, whose appointment as Austro-Hungarian Ambassador in Berlin, is announced by Reuter's Geneva correspondent, was at one time Austrian Minister at Belgrade. It was during his tenure of that office that the famous Agram Trial took place, and the "evidence" given against the Croats who were on trial was shown to have been manufactured in the Belgrade Embassy of the Dual Monarchy. Count Forgach was afterwards a Chief of Section in the Austrian Foreign Office.

Several Egyptian notables are reported to have petitioned Prince Mohammed Aly, as President of the Egyptian Red Crescent League, to allow the formation of a medical staff for service with the armies of the Triple Entente during the war.

The Orient reports that on August 7 the ceremony of the Sacred Mantle was observed with all the usual pomp. The Sultan performed his noon devotions at the Dolma Baghtché Mosque, and then crossed the harbour in his yacht, the "Seuyüdlü," to Seraglio Point, where he was received by the Prefect of the City. After a brief rest at the Medjidié Kiosk, His Majesty went to the place where the *Khurka-i-Sherif*, or Sacred Mantle of the Prophet, is kept, and venerated the Mantle. He distributed to the invited guests the napkins that had been kept with the Sacred Mantle, and placed a new consignment of napkins in the *bohja*, or bundle, with the Mantle, to be there till next year. After the ceremony His Majesty spent some time at the Baghdad Kiosk, and then returned on the yacht to Dolma Baghtché and drove up to Yildiz Palace where he is for the summer.

Indian officers travelling by the "Mooltan" were stopped at Port Said when the vessel arrived.

The appeal for the Building Fund of the English Church at Bucharest is, we understand, still open. Subscriptions should be forwarded to the Rev. J. H. Adeney, Chaplain.

Wednesday was the anniversary of the battle of Omdurman and the reconquest of the Anglo-Egyptian Sudan.

By the will of the late Mrs. Maria Jesup, widow of Morris K. Jesup, the Syrian Protestant College receives 400,000 dollars, says *The Orient*.

Among the passengers for Egypt by the P. and O. steamer "Persia," which left London on Saturday last, were Mr. and Mrs. J. F. Elsworth and the Misses Elsworth, Mr. C. Q. Henriques, Dr. and Mrs. Nimr, Mr. H. F. C. Parkinson, Mr. T. R. Richmond, Sir David Semple, and Mr. H. W. Tite.

A Reuter's telegram received from Urmia states that some members of the Commission for fixing the Turco-Persian boundaries, whilst out shooting near the Pass of Khanesour, were attacked by Kurds. Mr. Herbert, the Secretary of the Commission, was slightly injured.

At the Isle of Wight County Petty Sessions on Saturday, Captain Frederick W. von Herbert, a resident of Shanklin for many years, was charged with failing to obtain an alien enemy permit to remain within a prohibited area. Defendant is the author of "The Defence of Plevna," and served as an officer in the Turkish Army during the war with Russia in 1877 and 1878, and as an officer in the 4th Battalion Cheshire Regiment in the South African War. The solicitor for the defence said that Captain von Herbert positively declined to register as an alien enemy, because he was neither an alien nor an enemy, but a British subject. His father was an Hanoverian when Hanover was a British dominion, and his mother was a Frenchwoman. He had medals presented to him for service in South Africa. The police asked for a remand for a week to complete the evidence. The Bench granted the remand and admitted defendant to bail on his own recognisances, defendant stating that he wished to appear.

APPOINTMENTS, PROMOTIONS, ETC.

The Acting Governor-General of the Sudan has appointed Lieut.-Colonel W. H. Drake, Lieut.-Colonel H. A. Bray, and B. Burnett, Esq., P.W.D., to act temporarily as additional members of the Governor-General's Council.

The *Egyptian Gazette* of August 20 states:—"Lieut. R. Granville Waddy, K.E.H., Inspector of Ophthalmic Hospitals, Department of Public Health, has been recalled by cable to rejoin his regiment, King Edward's Horse, King's Overseas Dominions Regiment, on Special Reserve. Lieut. Waddy and Mrs. Waddy left Port Said on Tuesday on the Orient s.s. 'Orama' for England."

Mr. Mavrodieff, Prefect of the Department of Sofia, has been appointed Prefect of Police in the Bulgarian capital, and is succeeded by Mr. I. Michailoff, editor of the illustrated review *Svetlina*.

It is stated that Marshal Liman von Sanders Pasha has been appointed Commander-in-Chief of the Ottoman Army.

DOMESTIC ANNOUNCEMENTS.

BIRTHS.

ILES.—On August 23, at Territet, Switzerland, the wife of George Ehret Iles, Sudan Civil Service—a son (Cyril Ehret).

THRING.—At Khartoum, on August 11, to Mr. and Mrs. C. G. Thring—a son.

MARRIAGE.

DE SMIDT—WINGFIELD.—On August 26, at St. Augustine's Church, Queen's Gate, by the Rev. Lewis Wingfield, Leonard de Smidt, Egyptian Irrigation Service, son of the late Abraham de Smidt (Surveyor-General, Cape Colony), to Violet Wingfield, daughter of the late Canon Wingfield.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

UPPER EGYPT.

Luxor.
The Winter Palace. The Luxor Hotel.
The Karnak Hotel.

Assouan.
The Cataract Hotel. The Savoy Hotel.
The Grand Hotel.
Are the Finest on the Nile.

Cairo.

HOTEL D'ANGLETERRE.
Comfortable and Quiet. Near Opera Square.

GRAND CONTINENTAL.
Central Situation. Opp. Esbekieh Gardens.

SAVOY HOTEL.
Most Fashionable Hotel in Egypt.

MENA HOUSE HOTEL.
At foot of the Great Pyramids.

GRAND HOTEL, HELOUAN.
Excellent Family Hotel, adjoining Golf Links.

HOTEL DES BAINS, HELOUAN.
Opposite Sulphur Baths Establishment.

HOTEL CASINO, SAN STEFANO.
Near Alexandria. Favourite Bathing Resort.

CAIRO.

HELIOPOLIS PALACE HOTEL.
The most luxurious and comfortable Hotel in the world.
Connected with the centre of Cairo by the Electric Metropolitan (10 minutes' journey).
Altitude, 40 metres above the Nile valley.
Splendid view over Cairo.
GOLF, POLO, CRICKET. HIPPODROME in vicinity of Hotel.
Under the same management—
HELIOPOLIS HOUSE,
A first-class Family Hotel, with moderate terms.

Alexandria.

WINDSOR HOTEL (*Facing the Sea on the New Quay*).
Most delightful and healthy situation of any Hotel in Alexandria. Electric Light throughout. Daily Concerts on Verandah. Meals served *al fresco*. French Cuisine and English Management.
Inclusive Terms from P.T. 50 (10s.) per day.
Special Terms to Government Officials, Commercial Travellers, and for long stays.
Proprietor and Manager—AUG. van MILLINGEN.

Alexandria.

CARLTON HOTEL, Bulkeley.
Just outside Alexandria. Half-way to San Stefano.
Ramleh's Fashionable Hotel.
Patronised by the Elite.
Open all the year round. Visitors from Cairo alight at Sidi Gaber Station and thence drive to Bulkeley in five minutes. Full Pension P.T. 50 per day.
C. AQUILINA, *Proprietor*.
(Late of Messrs. Thos. Cook & Son.)

Alexandria.

MAJESTIC HOTEL.
Every modern comfort and luxury. Private apartments with bath-rooms attached & combined suites.
150 ROOMS AND SALOONS.
Hot and cold water in each bedroom. Large and luxurious dining rooms. American bar and restaurant stocked with best wines and liquors. Garden terrace. Verandah.
Lift. Motor Car, Guides and Interpreters meet all trains and ships on arrival.

THE NEAR EAST.

Editorial and Publishing Offices:
DEVONSHIRE SQUARE, LONDON, E.C.
Telegrams: "EASTAPROX, LONDON." *Telephone No. 618 London Wall.*

FRIDAY, SEPTEMBER 4, 1914.

A WORD OF WARNING.

Little more than two years ago we received a letter from the Imperial Ottoman Embassy in London acknowledging that "THE NEAR EAST has strenuously and impartially defended the interests of the (Ottoman) Empire" and referring to the "loyal and friendly attitude of THE NEAR EAST towards Turkey," which, it was hoped, would "facilitate the re-establishment of more friendly relations between England and Turkey, a result which is in conformity with the interests of the two countries." We quote these sentences as showing that for years past THE NEAR EAST has laboured unceasingly to promote the traditional friendship which has so long existed between Great Britain and the Porte. At times we have spoken, as befits a friend to a friend, in reprobation of some hazardous policy or some act calculated to impair the honour or the welfare of the Guarded Realms. We have at other times sympathized with Turkey in her moments of danger or distress. And at all times the diplomacy of this country has been exerted to save her from herself and from the aggressions of her neighbours. The Porte should not have so soon forgotten that it was Lord Beaconsfield who intervened on its behalf after it had actually accepted dismemberment at San Stefano. The Porte should still remember that on the day when Bulgaria proclaimed her independence and the Dual Monarchy annexed Bosnia and Herzegovina Great Britain forbore to "regularize" her position in Cyprus and Egypt. It would have been to the financial benefit of Great Britain to have done so, and she was earnestly pressed to share in the spoils of Turkey. She declined, preferring to consider herself bound by her agreements, and being unwilling to take advantage of what she hoped was only the passing weakness of an old friend who had just made a step in the direction of constitutional development. Moreover, Great Britain in matters commercial has invariably acted with an honesty which has appealed strongly to individual Turks and compares very favourably with the one-sided bargains and astonishing financial impositions which at one time or another have been forced upon the country by foreign diplomatists in pursuit of their policy of national self-aggrandizement at the expense of Turkey. Great Britain never cozened the Porte to pay a kilometric guarantee on a railway to be built primarily for the commercial and strategic benefit of this country. In the tedious negotiations which were in progress about railways, oil, and river-navigation in Mesopotamia Great Britain laboured unceasingly to consult the interests and preserve the prestige of the Porte, while arranging at the same time for the opening up of immense areas of Turkey in Asia to international commerce.

Yet in spite of this long tradition of friendship those who are now impelling the Ottoman Empire headlong down the road to ruin have seen fit to interpret the neutrality which they declared recently in a manner highly beneficial to our enemies, and at the same time to subject British subjects and British interests under their control to harassing restrictions. They have taken refuge in the procrastination of Oriental diplomacy when an honest neutrality demanded reasonable dispatch; they have not only facilitated in every way the dissemination of garbled news emanating from interested sources, but have actually permitted the Ottoman flag to cover movements incompatible with strict neutrality. We say nothing about the criminal negligence of ordinary police precautions; we merely assert that neutrality as practised by Damad Enver Pasha and his adherents is in point of fact no neutrality at all. Certain members of the present Cabinet profess, as Ministers of the Turkish Padishah, to direct the powers vested in his person as Khalif. This ruling clique of Crypto-Jews, Donmehs, and Freemasons of a schismatic Grand Orient which is not recognized by the true Craft affects to claim the assistance of all Islam to further its schemes for the recovery of Salonika, a city which enjoys no particular sanctity in the eyes of Moslems, and for a campaign in support of a cause which has in sober fact no interest to the vast majority, exploited, misled, and deceived, of the inhabitants of the Ottoman Empire.

It is possible that the ruling classes in Constantinople are misled by inaccurate news. We know full well how efficacious a Press campaign, even when wholly dissociated from the truth, can be in the Balkan Peninsula, and how powerful are the agencies for the dissemination of false impressions in that part of the world. We should like to make it plain to the Turks as a whole that events in Western Europe are of no immediate interest to them, and that they have no call whatever to feel any obligation to participate in the present hostilities. Nor, if they are wise, will they embark upon a private war of their own. As matters stand there is no room in Europe for two separate and distinct wars. If the Sultan once more takes the field he is bound to find himself in opposition to one or other of the groups of warring Powers or of their protégés. The Powers of the Triple Entente have not only refrained from soliciting his armed assistance, but have earnestly advised him to keep the peace. Consequently action on his part can hardly fail to run contrary to the wishes of these Powers. Such being the case, we should like to emphasize two points. The Fleets of the Triple Entente enjoy the command of the sea, the British Empire has not yet begun to put forth its strength. Our Expeditionary Force which is now in France represents but a very small part of that strength; and though it is natural enough that events now in progress on the Continent should attract a great deal of attention, viewed in true perspective it is obvious that anything that can happen on the Continent can affect the Empire as a whole only to a slight extent. THE NEAR EAST, from its proved friendship to the Ottoman Empire in the past, is entitled to utter a word of warning to an old friend. The warning is: "Keep the peace."

THE NEAR EAST.

THE NEAR EAST is on sale at all Bookstalls and Newsagents in the United Kingdom. Should any difficulty be experienced in obtaining the paper, readers will oblige by notifying the Manager. Abroad THE NEAR EAST may be obtained in:

PARIS. Librairie Hachette, 79, Boulevard Saint-Germain; Librairie Galignani, 224, Rue de Rivoli, and at Railway Bookstalls.

CONSTANTINOPLE. Economic Co-operative Society, Pera; Benjamin Rawe, British Oriental Bazaar; D. Marianopoulo, 280, Grande Rue de Pera; and The Nautical Bazaar, Galata.

SMYRNA. Dem. Tzannou, Petite Rue de Rose, and F. S. McVittie.

JERUSALEM. Palestine Educational Store, Jaffa Road.

CAIRO. Diemer and Company, Shepheard's Buildings; The British Library, Sharia Kasr-el-Nil; C.M.S. Bookstall, 15, Sharia Madabegh; and at Railway Bookstalls.

ALEXANDRIA. Librairie Schuler, Rue Cherif Pasha; Nacamulli and Company, 12, Rue Sesostris; Librairie Calebotta, Rue Cherif Pasha; Librairie Cauro, Rue Cherif Pasha; The Eclectic Bookstall; F. Diemer, Cairo Station.

PORT SAID. Charles Evans, and on board vessels in the harbour.

KHARTOUM. Sudan Stationery and Bookstore, and Victoria Bookstall.

BEYROUT. Sarrafian Brothers.

CYPRUS. Cababe and Wilson, Nicosia.

SALONIKA. Librairie Francaise, Rue Sabri Pasha.

VIENNA. Goldschmiedt Brothers, Zeitungsbureau, Wollzeile, 11.

ATHENS. Eleftheroudakis and Barth, Place de la Constitution.

SOFIA. Librairie de la Cour.

BUCHAREST. Socec and Company, Calea Victoria.

BELGRADE. La Librairie Internationale, 16, Rue Prince Michel.

NEW YORK. The International Bibliopole, 118, East 28th Street.

Readers in France who desire to secure THE NEAR EAST regularly are informed that any Newsagent in that country can obtain the paper for them through Messrs. Hachette, in Paris.

ROUMANIAN SYMPATHIES AND THE WAR.

(From a Correspondent.)

From the Roumanian newspapers, which now take almost as many days as the South African mail to reach this country, it is possible to supplement our information regarding the attitude of the peoples of the Near East towards the European War. The position of Roumania has necessarily been one of considerable delicacy. King Carol not only belongs to one of the branches of the Hohenzollern family, but has long been on terms of close friendship with the Emperor Francis Joseph. Prince Ferdinand, the Heir Presumptive, is also a Hohenzollern, but is married to an English Princess, the eldest daughter of the late Duke of Edinburgh. The recent history of Roumania, however, has shown that King Carol is well able to sink his personal predilections in furtherance of the interests of his adopted country. Since the outbreak of the first Balkan War the ties binding Roumania to the Triple Alliance have been completely severed, and there has been a significant consolidation of Russo-Roumanian friendship. But while the grievances of the Roumans in Hungary have been a strong factor in the estrangement of public feeling in Roumania from the Dual Monarchy, the presence of these kinsmen in the ranks of the Austro-Hungarian army in the field is calculated to embarrass the Bucharest Government in the contemplation of actual hostilities against its north-western neighbour. To take up arms for the emancipation of their fellow-countrymen from the Magyar yoke would be, at least, a comprehensible line of action for Roumanians; but it becomes a far more awkward proceeding to engage Austro-Hungarian forces in which the Roumanian kinsmen are actually serving with no little fervour, if report be true. The Austro-Hungarian authorities, it may be noted, have taken care that the Roumanian Press should be notified of the readiness with which the Roumans in Transylvania have responded to the call to arms, and should ring with the heroism of Roumanian troops taking part in the bombardment of Belgrade.

But in spite of dynastic relationships, in spite of Austro-Hungarian blandishments and German misrepresentations, the people of Roumania have had no difficulty in making up their minds on which side their sympathies rest in the European struggle. Germany's responsibility for the war is duly appreciated, while the violation of Belgian territory by German armies has come as a grave shock to Roumanian susceptibilities. Throughout there has been a conscientious effort to respect the official attitude of neutrality adopted by the country. *Communiqués* from the different Legations and Governments are given impartially, and information from one source is not more suspect than that of any other. But in analysing the causes of this Titanic struggle Roumanian intelligence had little difficulty in sifting the true from the false. The opinions that the Press arrived at appear to have been reached without the help of any *exposé* of the British case; for it was the German apologia that reached Bucharest in full, while Sir Edward Grey's statement had to be summarized by telegram in a very few words. Contradictions in the German version are noted, and Germany's case was not assisted by a German announcement to the effect that the "conclusive evidence" which Germany possessed in regard to the alleged intention of the French to march through Belgium was a photograph of an old treaty between France and Belgium! Great Britain's request to Germany and France to respect the neutrality of Belgium is noted with approval, and the ready response of France is contrasted with Germany's action. Finally, references to Great Britain are sympathetic, and Roumanian readers were reminded before the Expeditionary Force reached France that, although the British Army is small, it has a habit of rendering a good account of itself, and has in the past been able to determine the fortunes of continental battles.

No time was lost in deciding the attitude which Roumania would adopt officially towards the belligerents. A Crown Council held at Sinaia on August 3 was attended by members of the Government and representatives of all political parties. As the result of that meeting Roumania proclaimed her neutrality, while reserving to herself the right to take the necessary steps to give effect to such a decision. It was not overlooked that geographically Roumania is situated almost as much between two of the belligerents as Belgium is; but fortunately for her the configuration of the land is less favourable for military operations. The co-operation of all parties in the Crown Council virtually secured a political truce, which was confirmed by a partial mobilization. Public opinion very quickly had occasion to be exercised over the financial and economic situation in Roumania arising out of the war. There was the usual attempt to "corner" goods and to hoard money. Indeed, the financial stringency was such that the National Bank had early to issue five-franc notes to the value of £1,000,000; but up to the present no moratorium has been proclaimed. The prices of goods were fixed by the municipal authorities, and steps were taken to circumvent attempts to depreciate the paper coinage. It was realized that with ordinary precautions Roumania's economic position need not be other than satisfactory. Her agricultural wealth is great, and if hostilities do not spread to the Balkans her export trade, though undergoing modifications, should not suffer.

Naturally, after her declaration of neutrality the situation in the Balkans occupies Roumania's chief attention. It is recognised that Roumania and Bulgaria offer the stable features in that situation. At the outbreak of the war these two countries very wisely patched up their quarrel over various frontier incidents. With a statesmanship that did both Governments credit, it was resolved to let bygones be bygones and to take steps to avoid friction on the frontier in future. Bulgaria was actually the first to proclaim her neutrality, and until events falsify the theory, it may be supposed that the correct attitude of the Sofia Government has been of assistance to Roumania in her efforts to secure the maintenance of peace in the Near East. German efforts to stir up trouble, we may be sure, have never been relaxed. How compelling they have been in Constantinople we can form a shrewd idea; but if Roumania and Bulgaria are at one in their determination to discourage Turkish attempts to disturb the peace, then with the help of Greece they can secure respect for their wishes, and all will be well.

From co-operation for this purpose it should prove but a short step to fuller co-operation between Roumania, Greece, Servia, Bulgaria, and Montenegro, with a view to dealing with the situation at the close of the European struggle. The map of Europe is going to be altered, and the Balkans can hardly be excluded from the operation. Servia stands to be dismembered or to enlarge her territories according as her Allies in the struggle are defeated or victorious. In neither case can the rest of the Near Eastern States remain indifferent, and it is surely a wiser plan to make provision

beforehand for friendly consultation than to run the risk of reviving the discreditable quarrel that followed the victorious struggle of the Balkan Alliance against Turkey. We are not suggesting that the moment has arrived for the division of the lion's skin; but there can be no doubt that the interests of the Near East will best be served by a candid understanding between the countries concerned. It would lessen the chances of hostilities breaking out in the Balkans, and would hardly fail to exercise a moral effect on the main struggle. The experience of Servia has shown what minor States may expect from the victory of German and Austrian arms. They may be offered protection while they remain humble and acknowledge dependence upon their benefactors; but their integrity is at once threatened, if they venture to aspire to greatness. On the battlefields of Central Europe is being fought out the cause of small States, the cause of justice against the oppression of brute strength. That cause will ultimately prevail. The Balkan States, therefore, which stand to benefit, should see to it that they do not disgrace the hour of triumph by exhibitions on a minor scale of the tyranny and injustice which, it is hoped, is about to be for ever overthrown.

THE WAR.

PRESS AND PUBLIC OPINION.

Staying Power.

The Military Correspondent of *The Times*, writing in yesterday's issue, points out that both Great Britain and Russia are prepared to consider time as being of no account in this war:—"The Germans have some talents which we must acknowledge, and amongst them is the happy inspiration of preparing for war before it begins, instead of after it as we do. But the defect of these Germans is that they prepare their plans with such meticulous precision that if anything at all unexpected happens the plans go all awry. Whatever befalls in the West, we and Russia are going on, if need be for twenty years, because we do not propose to be Germanized and trodden under the Prussian heel. We know what is happening in Germany. German factories are silent. The furnaces are cold. German ships by the hundred lie still alongside silent quays. German industry at home and abroad is sterilized. There are few male workers in the fields. We propose that this situation shall last, not for the six months or a year of the German anticipation, but for just so long as it takes Germany to surrender and to give up any territory she may have seized, with ample compensation for all the disturbance and losses which she has caused.

"That is not quite the German conception, but it happens to be ours, and no victories which Germany may win in France will make the slightest difference either to Russia's resolution or to ours."

The Haste of the War Lord.

An interesting article entitled "The War and After" is contributed to the *Contemporary* by the Right Hon. W. H. Dickinson, M.P. We quote the following passage, which emphasizes the extraordinary haste of Austria—acting, of course, on Germany's counsel—to plunge into war:—

Just one week passed between the delivery of Austria's demands for satisfaction from Servia and the commencement of the general European war. Within that week the principal negotiations were compressed into hardly more than three or four days. Two ordinary litigants would not have embarked on a lawsuit with so little consideration, and yet this was all the time that was allowed to Europe before she was launched on a struggle costing millions of pounds a day and destined to wreck the lives, the fortunes, and the homes of tens of millions of peace-loving and innocent men and women.

The Kaiser and His People.

The Kaiser, while blasphemously claiming God as his companion in arms, has adopted Attila the Hun as his model in warfare. He has become an outlaw of civilisation, an enemy of the human race, a criminal with whom neither now nor henceforth civilised society can hold intercourse. The German people we shall make terms with again when the horror is over, and when the land of Luther and Goethe and Beethoven is delivered from the devilish and brutish materialism of Bismarck. But the Kaiser has outlawed himself for ever. His policy of calculated barbarism, of which the destruction of Louvain—about which further ghastly details are given by one of our correspondents to-day—is the most shocking example, will not only mobilise every noble impulse in every land against him, but stamps him as a criminal that human society must never tolerate again.—*Daily News*, August 31.

Indian Loyalty.

Not only are the Moslems of India loyal, but the Hindus are not a whit behind them. A very remarkable instance of this is Mr. Tilak, a cultured man of high ideals, but formerly a most determined opponent of our rule. The murderer of Mr. Jackson at Nasik owned that he was influenced by Tilak's appeals to racial fanaticism, and even the long-forbearing Lord Morley had him summarily deported. Yet this very man, on returning from his exile, urges all his followers to support the Government in every possible way.

The flame of enthusiastic loyalty throughout India is one of the most wonderful phenomena of the war, and it is our obvious duty to gratify the general desire of the Indians to be represented on the European battlefields. We owe it to them as follow members with us of the Empire with whose prosperity their own fortunes are bound up. At present it is proposed to take 50,000 men only, but it is quite certain that if we liked we could within six weeks have at our disposal an Indian Army of 200,000 men.—*Evening Standard*, August 29.

Already the Bengal Moslems have telegraphed to the Grand Vizier of Turkey urging upon him to avoid any estrangement from England.

So far as the African territories of the Mediterranean are concerned the only person who could lead a "jehad" against British and French power with the slightest hope of success would be a holy man of Islamic sanctity like the Madhi or the Sheik-el-Senussi.

The idea that the Occidentalised leaders of the Young Turks, who have only a veneer of Mohammedanism, could rouse the wild tribesmen of Northern Africa to a religious enterprise of this sort is the sort of thing a German professor might plan, but it won't work. No doubt it was to put a stop to intrigues of this kind that the German Consul was forcibly removed from Morocco a few days ago by French troops.—*The Star*, August 29.

Turkish Intervention?

Persistent reports from South-Eastern Europe point to an intention on the part of Turkey—denied, it is true, by the Embassy in London—to reopen her quarrel with Greece and Servia. She hopes apparently for Bulgarian assistance. The meaning of this policy would be that Turkey takes sides with Germany and Austria against the Allied Powers. Such action must bring about the intervention of Rumania, and possibly that of Italy also. Thus Turkey would stake her future on the success of Germany and Austria. That has long been a part of the German design, which has aimed at a German-Austrian league controlling all the territory between Bremen and Baghdad. The Balkan States would be Germanised, Greece under German control, and Turkey would be a German protectorate and recruiting ground. It is a part of the programme prepared for the event of Germany's victory. . . . We shall continue to hope that Turkey will keep the peace with her neighbours, and that the neutral States of South Eastern Europe will balance one another.—*Morning Post*, August 31.

Turkish statesmanship should have learnt by this time the value of the advice that comes to her from Berlin. The whole intercourse of Turkey with that city has been one monotonous record of German faithlessness and deceit, and of Turkish credulity and loss. From the days when Frederick the Great, in plotting the partition of Poland, induced Austria to betray and abandon her Turkish allay, and facilitated the Russian occupation of the Black Sea fortresses, until the days of Abdul Hamid and the Baghdad Railway concession, what good has ever come to Turkey from the Germans? All the loss has been hers, all the profit has been theirs. They have been the puppets, first of Prussia's European policy and now German's world policy. Now Berlin is egging them on to a course from which it is hardly conceivable that they can gain anything, and on which they would venture at the risk of their existence.—*The Times*, August 29.

If Turkey once plunges into the big war, she stakes her all, and she may be sure that the Triple Alliance will in the long run prove a very flimsy defence against her nearer neighbour. Her appearance on the scene would also, we hope, lead to the revival of the Balkan League in its original form; for it is difficult to believe that Servains and Bulgarians would not compose their comparatively trivial quarrel in order to make common cause aganst their hereditary enemy. Turkey has one clear line of safety, the line of complete neutrality, and we are confident that when she reflects on the situation she will not allow herself to be driven out of it.—*Westminster Gazette*, August 31.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

We are publishing on another page a series of extracts from other papers, giving information of use to merchants and exporters eager to profit by the turn events are taking in the world's markets. Some of the extracts and notices are deserving of more remarks than those bestowed upon them elsewhere.

***

In the first place, H. E. P.'s letter to the Editor of THE NEAR EAST strikes a new note in the present campaign. Before discussing the vital argument of the letter, I should like to point out an error which has been general in England, namely, that the Dardanelles were closed. They were not closed, and have not been closed since the beginning of the war. There was, it is true, an attempted embargo by the Ottoman Government on grain boats from the Black Sea sailing or steaming through the Bosphorus, but Sir Louis Mallet's return to Constantinople quickly put a stop to this little move in a game for which we have to thank Liman v. Sanders and Co. As for the Dardanelles, though mined and guarded by extreme formalities bordering on red-tapism, they have been open to merchantmen (even to some warships!) in spite of all statements to the contrary. The Turks must be given their due when deserved—or does the credit belong to European diplomacy and the force of circumstances?

***

I now come to the vital argument. The Near Eastern situation is so unsettled, so undecided, that really I can hardly blame the Government—supposing it to have proffered advice—if it dissuades shipping companies from venturing through the Dardanelles. The situation in the recent war was quite different owing to diplomatic pressure; this pressure does not exist to-day because Europe is divided into two camps working against each other and the impression is gaining ground here that that camp which harbours our enemies is carrying matters with a high hand at Stamboul. This, in itself, would be sufficient reason against organising or keeping open a regular service between an English port and Constantinople. But there are other reasons. On the one hand, the war risk is too high to make the venture worth while, and as long as there are other trade routes open, showing better profits, the Near East is bound to remain in the shade. Then again, there is the question of trade. As I pointed out last week, no Near Eastern country, excepting Greece and Roumania, is in a position to purchase, and as for selling, most of them have placed an embargo on the exportation of such raw material as is in request here. The inducement, therefore, is far from being enticing.

***

I do not wish to be unduly pessimistic, however. There is no denying that, whatever the ultimate issue of the war and the changes introduced into the map of Europe, the Near East is bound to be an active purchasing market for Western goods. We must prepare now for conquering that market later, and, certainly, shipping facilities will form the most powerful agent in the great campaign. At present little can be done, and the Messageries sailings need not worry us. Later on we shall need all the Cunarders, Moss boats, and those of the Ellerman combine (by the way, I do not think that the Moss line forms part of the Ellerman combine) we can get, and it is to be hoped that many of the prize boats which have fallen to the Navy will be used to back up our expanding trade—it is bound to expand—in the Near East. What is wanted at present is not so much the realisation of a project as the thorough organisation of a plan of campaign to be put in execution as soon as the war stops, that is, when we know exactly where we are as regards Near Eastern countries.

***

Reference above to the Cunard reminds me that there are two British companies in possession of special concessions in Austria-Hungary—namely, the Cunard, which has sailings to America from Fiume, and the Canadian Pacific, which runs a service between Trieste and Canada. The Austrian Government's maltreatment of the latter company last year is still fresh in the minds of my readers, and it was only a few weeks before the war broke out that the concession which had been partially withdrawn was reinstated in the C.P.R.'s favour. What the ultimate status of the two British companies will be in Austria-Hungary it is impossible to predict; a lot will depend on the existence or non-existence of the Dual Monarchy after the war. On the other hand, it is quite safe to predict that, whichever way the war turns, Trieste and Fiume are bound by their position and by the happy disorganisation of the Hamburg-America and North German Lloyd services to reassert themselves as important ports, freed from a sorrowful subservience to Bremen and Hamburg.

***

The "War on German Trade" is going on apace, and the Board of Trade is continuing its excellent campaign already referred to in these columns. The monograms on the different trades being published under official auspices are meeting with the attention they deserve, and are in great demand. The Tariff Commission has also appeared in the lists with the first of a series of memoranda on German trade; the complete set will do a lot to open our eyes to the great possibilities for our manufacturing exporters. In the absence of immediate trade openings in the Near East, we shall in future devote considerable space in the commercial section of this journal to the above reports, and shall comment on them with reference principally to the Near Eastern market. Thus, in our own way, we hope to be of considerable use to British firms now preparing for our "day." It will come.

***

In connection with the above, we reproduce this week on our page devoted to the "War on German Trade" an opinion expressed by the City Editor of the *World*. In so many words, he praises the movement, but quite reasonably argues that without ammunition there can be no fight; that is, the banks must back the movement with funds. About this question, namely, the support of banks for commercial and industrial enterprises, a lot can be written. I attribute Germany's tremendous commercial and industrial development in the past in no small measure to the enterprise of Berlin's financiers, who were ever ready to help and aid the economic *Aufschwung*, whose funds were much more readily placed in commercial and industrial undertakings than speculatively employed elsewhere, and to whose backing is primarily due the success of such gigantic enterprises as the Baghdad Railway, the Steaua Romana, the Bavarian Lloyd, and those two huge steamship companies, the Hapag and N.D.L., which practically controlled Continental shipping. But apart from these undertakings on a big scale, German capital, in a more modest way, was at the back of German commerce and trade in all countries, and the Near East was no exception. The whole subject is such an extraordinarily complicated one, and at the same time so admirably organised down to its minor details, that I shall have to refer to it again at some length.

***

British finance, or rather the employment and investment of British capital abroad, has been run on much more haphazard methods than ever was the case in Germany. This is partly due to our greater command of wealth, which enabled us to place our funds where the more astute German hesitated to invest, chiefly because he had less to throw away. Ours was, more or less, an unorganised investment of capital; his was organised, in the interests of the Fatherland. We would do well to follow to a certain extent his methods and to increase our percentage of the whole wealth invested in business undertakings as against that invested in speculative undertakings. It is a matter which will have to be carefully considered by our leading financiers if the "War on German Trade" is to be the success it deserves to be. Not only are industries to be financed—and that is evidently what the *World* wishes more particularly to emphasise—but new, sound, British commercial banks with local participation will have to be opened in the markets where we wish to carry the war. This is a most important consideration, and one that will have to be developed in these columns at some length, with special reference to German trade methods in the Near East.

COMMENTATOR.

WAR ON GERMAN TRADE.

British Firms interested in carrying into the Near Eastern market the war against German trade, and desirous of specific information concerning the prospects there, are invited to communicate with the Commercial Editor, "THE NEAR EAST," Devonshire Square, E.C.

War on German Trade.

OPENINGS IN THE NEAR EAST

The following business openings in the Near East are mentioned in the current issue of *The Chamber of Commerce Journal*:—

PHARMACEUTICAL PRODUCTS.—In the trade in pharmaceutical products in Beirut, Asiatic Turkey, Germany has the first place, England the second, and France the third. France sends mineral waters and pharmaceutical specialities, the use of which is recognised by the French School of Medicine in the town. This institution gives France great influence in medical and pharmaceutical matters in this part of the Orient. There is no special time for travellers to visit customers, but facilities for travelling are greater in the spring. Customs duties are 11 per cent. *ad valorem*, to which port duties, cost of unloading, etc., must be added. Credit is given up to 160 days. The English, French, Russian, German and Austrian Post Offices have agents at Beirut, thus permitting of the despatch of goods by parcel post.

SECOND-HAND CLOTHING.—The *Nachrichten für Handel und Industrie*, of Berlin, states that second-hand clothing would find a good sale in the region of Trebizond, Turkey-in-Asia. The imports of these goods amount in value to about £4,600 annually, of which France sends £3,200 worth and the United States £600. The remainder comes from Germany, England, and Austria. Jackets and overcoats are much in demand, but second-hand trousers find a very limited sale.

SEWING MACHINES.—Sewing machines find a good opening in Syria as well as in the neighbouring Turkish provinces. The United States and Germany are the chief suppliers. The favourable terms of payment conceded by the Americans facilitate the extension of their trade. At normal times about 700 machines a year are imported to Syria from the United States and from 300 to 400 machines from Germany.

COTTON GOODS.—Aden continues to be an important centre for the distribution of cotton goods, notwithstanding the proximity of Jibuti and other growing ports. From 1909 to 1912 the imports of cotton yarns increased in value from Rs. 1,900,000 to Rs. 2,700,000; those of unbleached cotton tissues from Rs. 10,600,000 to Rs. 18,200,000; those of bleached tissues from Rs. 1,360,000 to Rs. 2,400,000; and those of printed tissues from Rs. 3,600,000 to Rs. 4,900,000.

THE EGYPTIAN MARKET.

The following information has been received by the Board of Trade from his Majesty's Consul at Alexandria: "If the cotton crop is successfully financed the conditions and prospects of trade will be favourable. The United Kingdom should secure a large proportion of the German Empire's very valuable trade with Egypt, in all manufactures of good quality such as machinery, especially artesian well apparatus, canvas hose, machine tools, gauges, wrought-iron pipes and tubes, files, bolts, etc., and in textiles imitating popular patterns. Successful competition is improbable in inferior 'cheap and nasty' goods, such as crockery, pewter, ironmongery, hosiery and haberdashery. Our serious difficulty is that long credit (six or twelve months) is indispensable as fellaheen pay only by instalments."

ATTITUDE OF BRITISH SHIPPERS.

(*To the Editor of* THE NEAR EAST.)

Sir,—A great deal is being talked and written about concerning the capture of German trade, and everybody is being urged to do their best with such an object. I should be glad to see the campaign carried on in Turkey, where for years now the Germans have been capturing our commerce. To carry on such a campaign against German trade, or even to continue to hold our own, it is necessary that our Liverpool shipping companies, especially the four—namely, the Cunard, Moss, Leyland, and Papayanni (the last three forming part of the "Ellerman" combine)—should not discontinue their services to Constantinople and the Near East. To my great astonishment, I learn that the "Ellerman Line" has informed one of its biggest shippers that no steamers will run to the Levant, stating that "the Admiralty has asked them not to despatch any vessels to Turkish waters owing to the closing of the Dardanelles."

Well, the Dardanelles has been open now since Sir Louis Mallet's return to Constantinople, but the Liverpool lines prefer to take it as closed, and do not propose to run boats.

On inquiry yesterday at the French Messageries Maritimes in Cannon Street, they stated, in writing, that their usual service from London viâ Marseilles for the Levant was resumed and running, and that the service from Marseilles to the Near East, instead of being weekly, was now twice a week.

We had a lamentable experience of the want of enterprise by the usual trading shipping lines to the Near East during the Italian and Balkan-Turkish war. Is it now to be repeated? If so, then the Italians will be those who will profit.

H. E. P. Constantinopolitan).

Ryde, August 28.

NEW TRADE PUBLICATION.

We have received from the Tariff Commission a monogram entitled "Trade Aspects of the War with Germany," giving statistics on (a) the home market, (b) German trade with the British Empire outside the United Kingdom, (c) German trade with foreign countries outside Europe, and a list of German goods competing with British products. The introduction to the memorandum states that in the course of its investigations the Tariff Commission has collected much detailed information as to the conditions of competition between this country and Germany in various markets; and in view of the desirability of keeping the industries of this country as fully occupied as possible during the war crisis, the Tariff Commission is anxious to place this information at the disposal of the trading public. The first memorandum sketches the general ground, and deals only with German trade outside Europe; it will be followed by other statements. It must be remembered that for many years Germany has vigorously pursued a trade policy largely directed to ousting British goods; and that policy has been steadily and successfully pursued in the teeth of British competition. In order to win back markets we have lost, and to obtain and retain after the war markets in which Germany has established her position, we must organise all our trade forces, including finance, and get to close grips with the details of the various markets concerned. Manufacturers and merchants are invited to apply to the Secretary, Tariff Commission, 7, Victoria Street, London, S.W., for any further detailed information which they may desire. The Tariff Commission will do its best to assist any trader so far as its resources permit.

COMMERCIAL TRAVELLER.

GENTLEMAN, just returned from Near East, is open for appointment as Travelling Representative of British Export House. Pushing and Energetic. Long business experience in Europe, the Near East, and Far East. Excellent References. Write, "N.S.," 31, Gordon Road, Ealing.

COMMERCIAL TRAVELLERS IN THE NEAR EAST.

The following regulations to be observed by commercial travellers are mentioned by *The Export World*:—

Cyprus.

No special regulations and no licence are required. Even if the travellers sell samples they are not subject to a licence. Commercial travellers are not subject to income tax in respect of the sales they effect, nor are they subject to any charges of a like nature. No duty is charged on samples of no commercial value.

Bulgaria.

Commercial travellers must be provided with a certificate of identity and with a special licence. The application for this licence must contain (a) a full description of the class of goods sold, (b) the name of the firm represented, (c) the period for which the licence is required. It must be accompanied by (1) the legitimation certificate above referred to, which must be duly legalised and translated into Bulgarian; (2) a power of attorney delivered by the firm represented. This power of attorney must clearly define the rights given to the commercial traveller, and must be translated into Bulgarian and duly legalised. The licences are issued by the Ministry of Commerce, and are delivered to commercial travellers by the Custom House of the first Bulgarian town entered.

Montenegro.

No special regulations exist in Montenegro regarding the operations of commercial travellers, nor are any licences required. It is, however, advisable that commercial travellers bringing samples of goods should have a certificate showing the nature of their employment. Moreover, commercial travellers who are not known in the country must produce a power of attorney or certificate authorising them to act on behalf of the firms they represent. Commercial travellers are not subject to income tax.

Morocco.

No regulations exist in Morocco in regard to commercial travellers, and no restrictions are imposed on them. Commercial travellers' samples are admitted free of duty provided they are re-exported within six months.

BANKS AND TRADE.

"Capture German trade" seems to be a popular cry, and no doubt the sentiment is sound, but what is the use of capturing a gun if you are short of ammunition? asks the *World*.

English traders who have sorely felt the effects of German competition would no doubt like to have a "cut in" and get "their own" back. But how are they going to do it? They certainly cannot do so without further funds, and how could these funds be raised? Shareholders in existing companies would not to-day subscribe for additional working capital, or even find the necessary cash on debentures.

What about the banks? Will they help?

OFFICIAL INFORMATION FOR TRADERS.

In pursuance of the Board of Trade scheme for assisting British manufacturers and traders to secure trade with British Possessions and foreign countries formerly in the hands of their German and Austrian or Hungarian competitors, bulletins on linoleum and oilcloth and on pumps and pumping machinery were issued on Tuesday. The bulletins previously issued relate to woollen and worsted piece goods, cutlery, cotton hosiery (stockings and socks), hollow ware (enamelled or tinned), iron and steel wire, electrical machinery and appliances, cotton prints, furniture, pottery, earthenware, etc., railway wheels, axles, etc., boots and shoes, leather gloves, gas and oil engines, hats and fezzes, carpets and rugs, implements and tools, men's cotton and woollen clothing, brass wares, soaps, products of the colour printing industry, toys and games, machinery belting, brooms and brushes. Inquiries should be addressed to the Director, Commercial Intelligence Branch, 73, Basinghall Street, City.

We shall, in the course of the next few weeks, analyse the majority of these reports with relation to the Near Eastern market.

Egyptian and American Cotton.

Relation Between Prices at Liverpool.

The Monthly Return (for July) of the Egyptian Ministry of Agriculture has the following article, which will be of interest to our readers :—

In the Monthly Return for May, 1914, page 10, a table and chart were published, exhibiting the spot prices of Egyptian and American cotton at Liverpool on successive Fridays from 1900 to 1913. A cursory examination of the chart shows—what is well known in the commercial world—that there exists a connection between the prices of the two kinds of cotton, and it is the purpose of this note to examine this connection more closely. The statistical method indicated for such an investigation is that known as the method of correlation, which may be briefly described as follows :—

A correlation is said to exist between two variable quantities when a variation of one entails in the other a certain amount of variation of a calculable nature. If we knew all the factors that influence the second variable, and the exact expression of the relationship, we could calculate exactly (subject to errors of observation) the variation required, but in general we know neither the whole of the factors in play nor the relationship. It is usual, however, to assume that the relationship is one of proportionality, or that a given change in one variable causes a proportional change in the other, and this assumption can be justified practically for small variations, whether or not it holds true for large ones. When this is the case it is legitimate to calculate the effect due to one factor at a time and to ignore the others for the moment. In ordinary phrase the connection is worked out "other things being equal." As the other factors become known their effects—including their mutual dependence—may be calculated, and the relationship becomes more precise, but in the absence of such knowledge the calculation of the desired variable falls short of complete success. The measure of success attained is expressed statistically by the "coefficient of correlation," which is usually denoted by the letter r. This is not the place to explain the theory of the investigation of this coefficient, but it will be sufficient to state that, when r is positive unity the connection between the variables is complete, so that a change in one entails a proportionate change in the same direction in the other; when r is negative unity the changes are proportionate, but in opposite directions; when r is zero there is no connection. A coefficient exceeding 0.3 generally means that the connection is real, but that we are far from knowing all the factors.

The existence of the correlation may be studied by means of a table of the two variables, similar to Table I., which has been constructed from the data already published in No. 9 (May) of this Return. This table exhibits the number of cases when the prices of Egyptian and American cotton fell within certain limits. Thus on twenty occasions, when the price of American lay between 5.1 and 5.5 pence per pound, the price of Egyptian fell between 7.5 and 8.0 pence per pound.

An inspection of the table shows that there is a connection, more or less close, between the two prices, so that high prices of the one accompany high prices of the other; average prices accompany average; and low prices, low. When the coefficient of correlation is evaluated, it is found to be +0.7825. The positive sign signifies that both prices vary in the same direction, as might naturally be expected; the high value of the coefficient—nearly 0.8—shows that we have accounted for by far the greater part of the variation in prices.

In itself, the coefficient of correlation gives no indication which of the variables stands to the other in the relation of cause to effect. In the case in point, however, there can be no manner of doubt that the controlling factor is the price of American, and the controlled that of Egyptian. In 1912-1913, the American crop was about ten times the size of the Egyptian and constituted over 50 per cent. of the cotton crop of the world.

From Table I. it is possible to obtain the equation giving the price of Egyptian, when that of American is known. This may be put in the form—

The deviation of the price of Egyptian from its mean is 1.3633 times the deviation of the price of American from its mean. Or, the actual price of Egyptian is 0.694 pence plus 1.3633 times the actual price of American.

It is also found that the price of Egyptian is more variable than American (even after due allowance for difference of prices) in the ratio of 21.8 to 18.4.

Using the above equation, the price of Egyptian has been calculated for each Friday of the period under examination, with the results shown in Table II. The second column in each year gives the actual price of Egyptian; the first column, the price calculated from American; and the third column the difference. In half the cases the difference is under 0.5 pence per pound, and from the nature of the calculation the sum of the errors in excess balances those in defect.

One method of regarding the coefficient of correlation is to consider the effect on the error of prediction. If no equation for the price of Egyptian cotton is known, the most likely price is the mean. If this is predicted on every occasion, half the predictions would lie within 1.315 pence of the truth. By adopting the above equation, the limit of error, that includes half the predictions, is lowered to 0.5 pence, or by 62 per cent.

Other factors that determine the price of Egyptian are the quality of the crop, the demand, the amount of the crop, and possibly others, and if these are invoked to account for variations in the price, the utmost they can effect is to lower the above limit another 38 per cent. It is thus seen how small relatively to the price of American the effect of any one of these factors separately must be.

I.—CONNECTION BETWEEN THE SPOT PRICES OF EGYPTIAN AND AMERICAN COTTON AT LIVERPOOL.

PRICE OF EGYPTIAN COTTON (pence per pound).

PRICE OF AMERICAN COTTON (pence per lb.

THE CROP AND ITS FINANCE.

(FROM OUR OWN CORRESPONDENT.)

MANCHESTER, Wednesday.

A special meeting was held in the Board Room of the Manchester Chamber of Commerce yesterday to discuss the financing of the Egyptian crop. About twenty gentlemen were present, and in addition to spinners and merchants there were representatives of two London banks which have a large business in financing cotton merchants, and also a member of the Commission which has just been appointed by the Egyptian Government to deal with the matter. A prolonged discussion took place, and various proposals were made. Different ideas prevailed as to how much Egyptian cotton Lancashire would require during the next twelve months. No decision was arrived at, but it is expected that a further meeting will be held in the course of the next few weeks.

MOVING THE CROP.

Telegraphing on August 26, *The Times* Cairo correspondent says :—

"With a view of elaborating a scheme to finance the Egyptian cotton crop the Government has approved of the appointment of a Commission to study the cotton position in England and America, to consult spinners, and to ascertain what assistance it is possible to obtain.

"The Commission consists of the Inspector-General of Finance, Mr. Dickson, sub-governor of the National Bank of Egypt, Alexandria, and Mr. Crichley, the Alexandria manager of the Imperial Ottoman Bank. Mr. Dickson left yesterday to join his colleagues in London."

The desire of the Egyptian Government to assist the native cotton growers in the realisation of this year's crop will, it is expected, result in a scheme very similar to that which has been adopted in connection with the rubber planting industry of the East, under which cultivators have been permitted to draw sufficient sums to cover their actual out of pocket expenses. This scheme was agreed to after careful consultation with experts, says the *Financial Times*, and it is difficult to see how any better arrangement can be arrived at as regards the Nile Valley cotton crop, more especially as the banks will be quite willing to make the necessary advances under Government authority. The principal factor in the problem to be faced consists of a heavy production at a time when some of the most important consuming centres are closed, and short time is being consequently worked in such districts as remain open. In these circumstances, it is essential that cultivators of the staple should be placed in a position which will absolve them from any necessity to realise their crop with undue haste. On the other hand, if their working expenses can be met, little doubt need be felt that they will be able to hold up their supplies, at any rate until next spring, and by that time the European crisis should be at least in a fair way towards settlement. Moreover, with the reopening of the Continental market for cotton, there must inevitably be a great increase in the demand for the staple, and no adequate reason exists why this year's production should not eventually be realised on satisfactory terms.

Near East Markets.

PRODUCE REPORT.

LONDON, September 3.

Sugar.

Fairly good business has been done during the week in cane sugar. At public sales several parcels changed hands. Crystallised St. Lucia sold at 27s., crystallised Demerara 27s. 6d. to 29s., and crystallised Jamaica at 26s. 6d., with Trinidad at 27s. 6d. English refined continues steady at late rates. Tate's cubes No. 1 33s. 6d., No. 2 33s., crushed 31s., nibs 32s., granulated fine 30s. 6d., and standard 30s., castor 30s. 10½d., Lyle's granulated No. 1 30s. 6d., crystals No. 3 30s. Foreign refined is steady but quiet. Low castor on the spot sold at 29s.

Coffee.

The market is very quiet but steady at late rates.

Currants.

The market has been fairly active, but firm, at late prices.

Sultanas.

This fruit has met with moderate attention at steady rates.

Seeds.

The market remains inactive, the limited offerings being confined to spot and near parcels. Linseed is quiet, London-Calcutta spot quoted 51s., La Plata ditto 49s. Rapeseed is firm at late rates. Cotton seed, London-Egyptian on passage £8 10s. per ton. Canary seed has further advanced, particularly Turkish and Magazan, for which 112s. 6d. is now asked; bold Spanish is intrinsically good value at 130s. to 140s.. Haricot beans are slow, a small stock of Danubians and Hungarians offering at 85s. to 92s.. Mustard seed has been in some request, and the limited supplies available command full rates.

Oils.

Linseed oil remains quiet, spot pipes, landed, offered 26s. 3d., barrels, ditto, 26s. 3d. Rape oil is ruling steady, English refined barrels 35s. 6d. Cotton oil is well maintained, refined pale, spot pipes, 31s.; barrels, sweet, 37s.

Oilcakes, etc.

Linseed Cakes.—Owing to a considerable quantity of foreign descriptions, originally destined for the Continent, and now coming into the English market, values are with difficulty maintained, while in some instances a reduction of 2s. 6d. to 5s. per ton is acceded to on the part of holders. Best London-made sell quietly at £8 17s. 6d. to £9.

Cotton Cakes.—There is only a very limited quantity of Egyptian in store, but, with a considerable falling off in the demand, quotations may also be termed the turn easier at £5 10s. to £5 12s. 6d. ex ship, for steamer parcels nearly due, while English makes are also on a lower basis of £5 12s. 6d. to £5 15s., and Bombay £4 15s.

Decorticated cotton cake remains scarce, and quotations are firmly held up at £8 10s. to £8 15s. per ton, ex docks, with digestive cotton meal attractively offered at £6 10s. ex dock.

Maize Germ Meal.—In sympathy with the firmness of the maize market, English makes maintain their value, £6 12s. 6d. to £6 15s. per ton, ex mill; while some landed lots of white African have changed hands at £7 per ton, ex quay.

Locust beans are offered sparingly, and needy buyers are compelled to pay full prices of £6 15s. for whole and £7 5s. for kibbled.

Corn.

Wheat.—The cargo market continues quiet this week, and in the absence of demand values remained unchanged. For steamers choice white Kurrachee afloat and September, 45s. is required. Barley is quite inactive; and no sellers. Oats are nominally unchanged.

Ivory.

The following quantities of ivory have arrived (up to last week) for the quarterly sales, October 20:—

	Tons.	Cwts.	Qrs.	Lbs.
East India	1	10	0	0
Abyssinian	2	2	0	27
Egyptian	7	11	3	15
West Coast Africa	1	0	0	0
Walrus Teeth	1	15	3	10
Tota	13	1	3	24

PERSIAN AND TURKISH PRODUCE.

The following are extracts from the monthly report issued by Messrs. F. W. Bowyer and Bartleet:—

Gum Arabic (Kordofan).—We have sold a fair quantity of ordinary f.a.q. sorts at 42s. 6d. on account of one or two consuming markets being rather short of stock. For arrival we have had no news from Egypt for some time, but we can fairly suppose that there has been little or no change. (Persian Insoluble).—This article, we fear, is likely to be a drug on the market for the next season's crop, owing to the trouble on the Continent, and our outlets are almost closed for the present.

Gum Tragacanth.—We have not much fresh to report this month. A fair business has been done here and there, and some small lots of fine Tragacanth have again been placed at extreme values. All other grades are more or less dull and inactive.

Gum Mastic.—No change. Value, 2s. 6d. per lb.

Galls.—Quite a good business has been done during this month. Blues especially having been placed, and as much as 55s. has been paid. Greens and Whites are in request, but none are offering at present.

Ivory.—See our special report. The next sale should be on October 20, but it is not yet certain if this will be held on account of the war.

Opium.—Since our last report only a few transactions have taken place, owing to the Government prohibiting the export of opium and its by-products, which restriction no doubt will shortly be removed. Merchants are anxious to make progress, but are unable to do so owing to the above-stated reason.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ended August 14:—"We have to report again a total absence of business, chiefly owing to the closing of the banks. No gold, silver, or paper is in circulation, and, therefore, no business of any sort is possible. The arrivals are 1,150 cases, against 2,337 at same date last year."

CONSULAR REPORTS.

Dardanelles.

Mr. Vice-Consul Palmer, at Dardanelles, reports that as the result of the call for tenders for the electric lighting of the town, only one applicant (an Italian firm), who had already undertaken similar work at Paderma, put in a tender. The firm's engineer has visited the town in order to draw up a scheme.

In regard to the trade of Gallipoli, it is stated that the manufactured goods are principally of German, French, Italian or British make, but the hardware, plates, etc., come from Germany.

Busreh.

A consular report on the trade of Busreh for 1913 states that the value of the imports of iron and steel material was £1,207,882, compared with £20,325 in 1912. The large increase, as well as the increase in machinery imports from £64,830 to £96,873, was due to the importation of material for the Baghdad railway. The machinery came from the United Kingdom, Germany and Belgium.

Twenty German steamers (of 55,149 tonnage) of the Hamburg-American Line called during the year, compared with 12 ships (of 30,948 tons). German returns give the value of the imports for Baghdad and Busreh by these steamers as £1,957,489 against £528,415 and of the exports as £226,212, compared with £375,760.

EGYPTIAN COTTON MARKET.

(FROM OUR OWN CORRESPONDENT.)
ALEXANDRIA, Aug. 22.

There are anticipations of a crop of 7½ million cantars this year, and with the balance of the old crop left, which amounts to about 750,000 cantars, we shall have close on 8¼ million cantars of Egyptian cotton to dispose of next season. There is therefore reason to expect a heavy fall in prices, as well as a considerable reduction in consumption. The consequence will be that a portion of the crop will be sold, and the balance stored in anticipation of better days. The Egyptian Government, in agreement with the National Bank of Egypt, proposes to advance £2 per cantar on unsold cotton, and the money advanced will be recovered administratively with the taxes.

The news with regard to the new crop is excellent, and it is hoped to reopen the cotton market about September 15 next. The exports of cotton have been held up during the last three weeks, but things ought to be fairly normal again shortly.

In consequence of the moratorium dealers have refused to liquidate their positions in futures at the compensation price of 15⅝ dollars fixed by the Commission des Courtiers en Marchandises, and in face of this opposition the question will have to be referred to the tribunals to reach a settlement.

MANCHESTER MARKET.

(FROM OUR OWN CORRESPONDENT.)
MANCHESTER, September 2.

During the past week the conditions prevailing in the market have not got any worse, but it is impossible to record any distinct improvement in the situation. The extension of the moratorium has been criticised, but, on the whole, most traders acknowledge that it would have been disastrous for the proclamation to come to an end on September 4. Shippers have much appreciated the reduction in the insurance rate from three to two guineas per cent. Raw cotton matters at the moment are overshadowed by more important things, but undoubtedly the new American crop has recently made very good progress, and as a result of the condition report published a few days ago, it is thought that there is the possibility of the output being nearly 15½ million bales. With regard to the Egyptian crop, there is some fear that difficulty will be experienced as to finance, and a meeting of various parties interested has been held in Manchester to-day (Wednesday). It is realised that it is a difficult matter to assist planters abroad in this connection. With regard to piece goods for Egypt, practically no fresh business has been done. On the whole, deliveries are being taken a little more freely. The outlets of the Levant remain under a cloud. It is said to be quite impossible to export goods to Constantinople at the moment. Advices from India are rather more encouraging. The payment of accounts is on a better scale than any time since the war began. There is no particular fresh news from China. The home trade houses continue hampered, and undoubtedly the purchasing power of the public is being seriously curtailed. Perhaps in small lots sales and deliveries in yarn have shown a slight improvement. Owing to the Oldham Wakes there has been a big stoppage of machinery this week. Ground is gradually being lost in Egyptian spinnings.

SYRIAN OLIVE CROP.

The U.S. Consul-General at Beyrout reports that the market price of olive oil is advancing. This advance is attributed to the unsatisfactory prospects of the coming crop. On account of this increase cottonseed oil is now being imported from Egypt for mixing with native olive oil. Though this process is prohibited by existing regulations, the dealers of olive oil mix their oils with imported cottonseed oil without any hindrance from local authorities, who do not seem to be disposed to take any proceedings against them.

The stock of olive oil now on hand is held by rich Lebanon landowners and by those who have returned from abroad, and who possess sufficient means to hold these large stocks. The stock above mentioned consists principally of olive oil imported from Smyrna, Mitylene, and Crete, and is sufficient to cover the present demand.

Shipping Intelligence.

DETAINED VESSELS.

The following are extracts from a circular issued by the Foreign Office :—

In order to furnish information to British and other traders who may be interested in cargoes carried on merchant vessels which have been either detained in British ports on the outbreak of war or have been captured by His Majesty's armed forces, it has been decided to publish lists of these vessels. A list is accordingly being published in *The Supplementary London Gazette* of August 29, 1914, containing such information as is at present available. This list cannot be taken as necessarily complete, and is subject to correction. Supplementary lists will be published from time to time as further particulars are received. These lists will also be communicated to Chambers of Commerce in the United Kingdom, to Shipping Associations, and to any other similar bodies who may intimate to the Foreign Office that they wish to receive them.

All persons having any claims in respect of cargoes which are the subject of proceedings in the British Prize Courts should take steps to have their interests represented in accordance with the Prize Court Rules, copies of which may be procured, either directly or through any bookseller, from Messrs. Wyman and Son, 29, Breams Buildings, Fetter Lane, London, E.C.

Due notice will be given of the institution of proceedings in cases in which vessels are in the custody of the Prize Courts in the United Kingdom. Vessels which have been detained in or brought into British ports outside the United Kingdom will be brought before the Prize Courts established in His Majesty's dominions overseas, and interested parties should take steps to have their interests represented before those Courts.

His Majesty's Government are endeavouring to obtain from the Governments of France, Russia, and Japan lists of merchant vessels which may be similarly detained or captured by the armed forces of those States. All such information as soon as received will be published in the same way.

The following is a list of the enemies' ships detained by us in Near Eastern ports :—

Name.	Nationality	Port.
Altair (3,220)	German	Port Sudan
Annaberg (1,163)	German	Suez
Anne Rickmers (4,083)	German	Port Said
Baerenfels (5,398)	German	Port Said
		Captured in
Christian X (4,956)	German	Persian Gulf
Derfflinger (9,144)	German	Port Said
Erymanthos (2,934)	German	Malta
Goslar (4,331)	German	Suez
Gutenfels (5,528)	German	Port Said
Helgoland (5,666)	German	Port Said
Istria (4,221)	German	Suez
Lautenfels (5,811)	German	Port Said
Lutzow (8,826)	German	Suez
Pindos (2,934)	German	Port Said
Rabensfels (4,629)	German	Port Said
Rostock (2,456)	German	Port Said

MEDITERRANEAN SAILINGS.

The following is the present situation of some of the lines plying in the Mediterranean: —The Ellerman is still running a direct service to Lisbon and Oporto (s.s. "Douro" closed yesterday at Liverpool), and will run a boat (s.s. "Avon," closing September 12) to Gibraltar and the south of Italy. The Papayanni Line announces the sailing of one steamer for Tangier, Malta, and Alexandria, closing October. The Prince Line will sail the s.s. "Kaffir Prince" (closing September 10) for Egypt and Syria, whereas the Moss Line announce the sailing of s.s. "Esneh" for Alexandria on September 22. The s.s. "Heathmore," of the Johnston Line is scheduled to leave Liverpool for Piraeus and Salonika to-morrow, and the Cunard s.s. "Brescia" is sailing on the same day for the south of Italy and Patras.

FREIGHT MARKETS.

The conditions of chartering on Monday gave no suggestion of any real change for the better, as the quantity of tonnage at the disposal of merchants in position to do business is still exceptionally large (says *The Times*), and there is no sign of loading positions extending beyond current month, with the result that rates all round were easy, with a tendency to further decline.

Home from the East the demand was exceptionally light, and Karachi shippers secured a September boat on the basis of 16s. 6d. For prompt loading Sulina filled an order for a berth size on the basis of 8s. United Kingdom, with 6d. extra if two ports of discharge on the same coast, but very few orders were quoted by the Mediterranean and Bay mineral trades, and late rates were no more than maintained. La Goulette repeated 8s. on full terms for Middlesbrough, Hartlepool, or Jarrow, while Bilbao was stationary at 4s. 9d. Middlesbrough, and 3s. 10½d. Cardiff.

The inquiry for grain tonnage from the States showed a further shrinkage, and 3s. was not exceeded by the Gulf for Marseilles. On the other hand, coal shippers are beginning to show some slight interest in September loadings and chartered for the lower Plate ports at 18s., and also for the Mediterranean on the basis of 16s. Alexandria. Plate shippers were inclined to take matters somewhat leisurely owing to the ample quantity of tonnage available and the very small needs, although rates were still held at about the basis of from 15s. to 15s. 6d.

SUEZ CANAL DIFFICULTY.

Correspondence from the Chamber of Shipping was read in reply to the committee's representations as to the inconvenience caused by the French authorities insisting upon a double visé of bills of health of vessels passing through the Suez Canal. It was stated that while the Chamber does not propose to take general action, it was agreed that suggestions might be made in certain special cases that a time limit from the date of leaving Port Said, or other infectious ports, should be adopted, after which clean bills of health might be issued without requiring special methods for disinfecting.

THE GRÆCO-TURKISH DANGER.

The prospects of war between Greece and Turkey, says *The Morning Post*, seem definitely to have put an end to any hopes which may have been held regarding the shipment of grain from Roumania by way of the Dardanelles. There is still a number of British steamers at various ports in the Black Sea. These have gone up to fulfil charters, and have then had those charters cancelled, or have been left unloaded by grain shippers. Up to the present there have been possibilities of obtaining fresh employment for these boats from Roumania, and a steamer was chartered on Monday at 8s. per ton freight from Sulina, at the mouth of the Danube, to this country. She had a clause in her charter that in the event of any danger of the Dardanelles becoming closed she was at liberty to leave her loading port immediately with any cargo she might already have had on board. The imminence of trouble between Greece and Turkey will almost certainly result in the closing of the Dardanelles by the latter country. So this particular steamer is, no doubt, well on her way to the danger zone by this time. Such a course on the part of Turkey, however, would almost certainly prolong indefinitely the already too lengthy stay of many British ships in the Black Sea.

[According to *La Politique* (Bucharest) the Roumanian grain crop has not come up to expectations, and it is doubtful whether the Government, in view of the political situation, will allow exports to any appreciable extent.—Ed. "N.E."]

OBITUARY.

There was a very large and representative gathering of mourners, comprising many of the leading shipping and commercial firms of Liverpool, at the funeral of Mr. Fred Swift, late manager of the Ellerman Lines, which took place on Tuesday at the Wallasey Cemetery, Liscard, Liverpool, subsequent to a service which was held at St. James's Church, New Brighton. Mr. Swift died on Saturday last at his residence, "Rothiemay," Egremont Promenade, after an illness extending over several months.

Engineering Notes.

German Locomotives in Egypt.

The Government of Egypt (says *The Financier*) have of late given what appears to have been a distinct preference to German locomotives. All through the Egyptian Railway Administration have divided their purchases of locomotives principally, if not entirely, between British, Belgian, and German firms. Some years the Belgians have supplied the greater number—or, at any rate, the greater value—but recently the Germans have had the lion's share of the orders. It is not, we understand, contended that the German engines have any unique merits, but the price is low, and the builders are willing to design and deliver quickly machines of any special type required. It is this policy which has won a market, not only in Egypt, but elsewhere. If British firms are to gain substantially by the partial elimination of German competition in this branch of engineering they will have to abandon their customary attitude with respect to design and promptitude of delivery. It is of the utmost importance that a reform in this respect should be brought about. Otherwise, it may be accepted as certain that American, Danish, and Swedish firms will take the place of the Germans as our competitors.

[Incidentally, it may be mentioned that in the Balkan States, including Roumania, most of the engines are of German make. The opportunities, therefore, for British firms will be enormous as soon as ever the situation has cleared, the more so in view of the great development to be given to railway construction in the Balkans and the Ottoman Empire.]

Motor Gunboats.

In connection with the small war craft now building for the Roumanian Navy it is interesting to remember that, as a writer in *The Times* points out, the oil-engine is making headway in other directions than in submarines. Several countries have now one or two coastal defence gunboats which are driven by oil engines—a circumstance to be noted by all the Danube States, for instance. One of the latest is a Dutch craft in which a remarkable engine installation has been carried out, consisting of an inverted V. 12-cylinder four-cycle engine of the Werkspoor type, driving twin screws, and running at about 350 r.p.m. The object of the design, which embodies many features original in Diesel engine construction, was to reduce the weight, and it is stated that by the arrangement adopted, the engines, though they work on the four-cycle principle, are less in weight than two-cycle motors of equal power built by two German firms for similar gunboats. Another type of naval vessel to which the oil engine has been applied is the destroyer. In a boat of this class now under construction on the Clyde, a Diesel engine of 600 b.h.p. will be installed for employment when cruising. It will thus in reality only serve an auxiliary purpose, but the arrangement is interesting, and might be the means of effecting pronounced economy in the operation of such vessels.

Solid Motor Fuel.

With little prospect of a fall in the price of petrol, says *The Times*, the various fuel substitutes for motor vehicles continue to absorb attention. Gasworks still seem to present the most promising solution of the problem, and successful practical experiments have lately been carried out with naphthalene, which is produced in fairly large quantities during the distillation of coal. Owing to its comparatively high boiling point this hydrocarbon is a solid at ordinary temperatures, and though this is, perhaps, a disadvantage, a change to the vaporous form is easily effected by employing a reservoir jacketed by the exhaust gases. The engine may be started up on petrol. The approximate cost of the new fuel amounts to from 0.3d. to 0.5d. per b.h.p. hour, and so far as supplies are concerned the annual production on this country is in the neighbourhood of 130,000 tons. The naphthalene engine has already made some considerable strides on the Continent, and the product is extensively employed as a fuel on the Trans-Siberian Railway. The present cost is about £4 10s. per ton.

Baghdad Railway.

The British Vice-Consul at Adana writes that on the Baghdad Railway the line between Ulu Kishla and Kara Punar was opened to traffic in 1913. Work has been progressing but slowly on the tunnels in the Taurus between Kara Punar and Dorak, owing to the lack of suitable labour and funds to carry on the work. They are, however, expected to be finished in two and a-half years' time. The line between Toprak Kale and Alexandretta was opened in November, 1913. On the Adana-Aleppo section construction trains run as far as Airan, at the westward end of the Amanus tunnel, which latter continues to check progress in this direction. It is, however, hoped to complete the Amanus tunnel in two years' time or less.

Organised Engineering.

According to *The Times*, the British Engineers' Association, which numbers among its members British firms having a capital of about £100,000,000, is issuing the second edition of its official directory, which gives a classified list of engineering manufactures with the firms that are able to supply them. The association, which is not a trading concern, claims to constitute the first attempt on the part of British engineers to organize themselves for the purpose of obtaining a fair share of foreign trade, and to be in a position to find a British manufacturer for every engineering requirement, since its members between them cover the whole range of engineering plant and accessories thereto.

Brevities.

A 45 ft. launch, fitted with an Ailsa Craig type S6 50-h.p. engine, for use in the Persian Gulf has just been completed.

Reuter's Amsterdam correspondent reports that an inofficial telegram from Baghdad states that the part of the Baghdad Railway between Sumeikeh and Istabalat was opened last Friday.

The American Vacuum Oil Company has already begun constructing a road from Hebron to their new oilfields in Southern Palestine. The company's automobiles in the city of Jerusalem attract the attention of the populace as they run through the streets.

BULGARIAN IRRIGATION SCHEMES.

(From Our Own Correspondent.)

Sofia, August 8.

The Sobranje has voted a credit of 2,430,000 frs. for canalisation and irrigation works.

Writing on June 3, our Special Correspondent in the Balkans referred to an interview he had had with M. Angeloff, in charge of the irrigation section. According to this authority, £52,000 was to be voted by the Sobranje this year for irrigation purposes, pending the realisation of a loan of about £250,000 to be operated through the Agricultural Bank. (See our Engineering Supplement, June 19.) The £97,200 referred to by our correspondent has reference, doubtless, to the extension of canalisation in the Upper Maritza section. There will be work here for British manufacturing engineers.

TENDERS INVITED.

[*Further information concerning tenders marked (B) can be obtained by United Kingdom manufacturers and merchants at the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C.*]

EGYPT.

Safes.—Tenders are invited by the Economat Central, Ministry of Finance, Cairo, for the supply of 150 safes of the approximate outside size of 63 centimetres high, 48 cm. wide, and 48 cm. deep. (B.)

GREECE.

Water-Supply Works.—The Acting British Consul at Piræus (Mr. J. Joannidis) reports that the Greek Government *Gazette* of July 21 to August 3 notifies that tenders are invited by the Ministries of the Interior, of Finances, and of Communications, for the construction, maintenance, and working of the undertakings necessary for (1) the supply of water to Athens, Piræus, and their suburbs by using the springs at Stymphalie or Medas; and (2) for the laying of a distributing system in Athens, Piræus, and North Phaleron for water supply and sanitation. The estimated value of the contract is 56,000,000 drachmae (£2,240,000). The plans, cahiers des charges, etc., may be seen at the "Bureau du service spécial pour l'alimentation d'eau et des égouts," Athens, where they may be copied at the tenderer's expense. Sealed tenders will be received by the Ministry of Communications, Athens, up to 11 a.m. on March 27 to April 9, 1915. A receipt for the payment of a provisional deposit of 500,000 drachmae (£20,000) to the "Caisse centrale d'Etat" or the National Bank of Greece must accompany each tender. (B.)

ALEXANDRIA NOTES.

Return to Normal Conditions.

(From Our Own Correspondent.)
Alexandria, August 22.

The panic which reigned towards the beginning of the war has abated. Confidence has been restored and trade has almost become normal again in spite of the suppression of all credit and the establishment of the moratorium. A noteworthy feature of the situation is that depositors who at the outbreak of hostilities withdrew their deposits from the savings and other banks are replacing them.

Our trading relations with England have been restored, and fuel, which had reached fabulous prices, is dropping again. Important cargoes of coal are on their way out, and we shall soon be in a position to restart work in our local factories, such as refineries, oil mills, foundries, rice factories, etc.

With the exception of two banks, all financial institutions have been in a position not to take advantage of the moratorium, and are paying anxious depositors in full. The Banco di Roma will begin operating again next week.

A certain amount of uneasiness will continue in the country, it is true, but nothing alarming seems likely. Even supposing the war were to continue for some months, local bankruptcies are not to be feared. The greater part of our cotton crop will doubtless be sold abroad, and as for the balance it will be stored here in anticipation of better times. Moreover, the excellent maize crop will recompense us to a certain extent for the losses caused by cotton under sales, and the forthcoming crop will place us in a position to dispense with heavy imports of maize flour. Furthermore, the high Nile flood has enabled the cultivation this year of 400,000 surplus feddans of land with onions and cereals. It will thus be seen that the European conflict will not paralyse the economic situation of the country.

In the circumstances we need not be preoccupied regarding foodstuffs during the war. The proof is that the price of certain articles and foodstuffs, including fowls, eggs, beans, rice, fish, and fruit, has fallen below that obtaining before the war.

As for the repercussion of the war on the financial market, it is practically nil. The value of all shares has dropped so low since the crisis of 1907 that it is impossible for it to fall lower.

THE HEJAZ RAILWAY.

The Egyptian Gazette's Haifa correspondent furnishes an interesting account of the Hejaz Railway, the "British enterprise in Syria that failed," from which we cull the following extracts:—

"Not many people are aware that the present Hejaz Railway was originally a British enterprise. The British Haifa-Damascus Railway, as it was formerly termed, was started in 1898 by a British group of investors. About 1900-1 this enterprise was abandoned and the line became Turkish property.

"Division of opinion exists regarding the real causes contributing to the failure of the Anglo-Syrian Railway. They may, however, be summed up in one—viz., the sudden awakening of the Turkish Government to the extreme religious importance of the line on account of its possible completion to the city of Medina. This awakening is believed by some to be a sequel to Germany's disfavour of the project. Having realised the seriousness of the situation caused by Britain's acquisition of the Haifa-Damascus line, and the considerable economic and political interests involved, Germany took steps at the Sublime Porte to prevent as far as possible the success of the enterprise. To do so was not difficult owing to the intimate friendship which then existed between the German Emperor and the Sultan Abdul Hamid.

"The attention of the Khaliphate was drawn to the importance of the line from a religious point of view and the necessity of its appropriation was impressed upon him. At the instigation of the Turkish authorities endless difficulties were therefore raised whenever an opportunity presented itself. Friction continually existed between the railway people and the Commissioner who represented the Turkish Government, and finally the enterprise was abandoned and was purchased by the private money of Abdul Hamid. It was recently formally attached to the Ministry of Wakfs, which implies that it is religious property of the State. The hope of its absorption by another foreign country is therefore remote, as this step would provoke intense anger and indignation in the Moslem world."

ROUMANIAN OIL NOTES.

(From Our Own Correspondent.)
Bucharest, August 12.

The petroleum business is suffering considerably on account of the political situation. The stopping of navigation on the Danube will prevent trade with Austria and Germany, apart from the fact that the large contracts with the Servian Government for raw and lamp oil cannot be filled. The blow is all the harder seeing that the output of raw material has been exceptionally heavy of late. For instance, the average production of the Steaua Romana Company during July was 980 tons daily, that of the Astra Romana during the last ten days was 15,557 tons (during July 40,660 tons), and that of the Romana Americana in ten days just under that of the Steaua.

Consolidated Oilfields.

The output has been heavy in the Moreni district. Well No. 9 of the Consolidated Oilfields Company has had a daily output of 30-35 wagons, and No. 1 boring of the same company, which was stopped through the filling of the vents, and which had been yielding about 700 tons a day, is now again gushing.

During the first half of this year the entire production in Roumania was as follows:—January, 68,387; February, 75,009; March, 72,950; April, 95,029; May, 93,938; June, 78,311—total, 483,624 tons.

AFFAIRS OF MR. E. T. BOXALL.

On Monday, at the London Bankruptcy Court, Mr. E. Leadam Hough, Senior Official Receiver, presided at the first meeting of creditors under the failure of Mr. Edward Thomas Boxall, merchant and company director, 64, Cornhill, E.C., trading as E. T. Boxall and Co. The chairman reported that the debtor, in addition to having traded since 1901 as a merchant, had acted as director of the following companies:—United Roumanian Oilfields, Prolongeni Tin Mines, Indolex Syndicate, Olorex, Syrian Exploration Company, Rothay Syndicate, Galician Victoria Petroleum Company, and the Premier Oil and Pipe Line Company. He was the chairman and joint managing director of the last-named company, with fees amounting to £1,750 per annum. No statement of affairs had yet been lodged, but the debtor roughly estimated his unsecured liabilities at £200,000, and assets included interests in a concession granted by the Austrian Government over a very large oil-bearing area in the Bucowina district. The assets further included book debts amounting to £150,000. The debtor did not admit insolvency. It was his desire to submit to the creditors a proposal or scheme under which securities to a large amount would be given up. Mr. Walter B. Styer, on behalf of the debtor, obtained an adjournment for three weeks.

BEYROUT AND THE WAR.

(From Our Own Correspondent.)
August 3.

The political situation, which has developed with such alarming rapidity, is affecting this town more seriously than the last three wars through which Turkey has successively gone. A moratorium was declared to-day, and business is already practically at a standstill. The Imperial Ottoman Bank kept open this afternoon, and is paying the amounts deposited by its clients.

To aggravate matters, there has been a general call of all the classes of redifs and reserves. The town has a weird, deserted aspect. French subjects are leaving to-day by the Messageries Maritimes steamer, whose agent is awaiting to receive at any moment orders to despatch her direct to Marseilles, instead of allowing her to proceed on her usual itinerary. The Austrian Lloyd steamer "Leopolis," that was to leave to-day for Port Said, Alexandria, and Trieste, has received urgent instructions to proceed in all haste to Trieste direct.

NEWS FROM ALL SOURCES

The Egyptian Ministry of Agriculture has published a circular on the fumigation of citrus trees.

A water famine is threatened in Jerusalem. A kerosene tin full of water costs two metaliks (2 cents).

Quarantine regulations will be enforced in Egyptian ports against cattle arriving from Chios and Samos; the quarantine against cattle coming from Karachi has been raised.

The adjudication held on July 28, 1914, for the supply of petroleum at the Dokmakhana railway siding, Tura, Egypt, has been adjudicated in favour of "The Asiatic Petroleum Company (Egypt), Ltd.," Cairo, at the total price of L.E. 239.400 millièmes.

A report received in London this week, but dated August 24, announces that the German gunboat "Panther," of Agadir fame, has arrived at Smyrna.

Turkish papers lately received report the arrest of several persons accused of having sold provisions at an excessive price.

The Constantinople Municipality has issued a notice that owing to the drafting as soldiers of the scavengers of the city it will employ anyone who applies, with pay in advance. "The streets," says *The Orient*, "have not for many years been in such deplorable condition as for the past week."

As the result of the liquidation of the Deutsche Palaestina Bank in Germany, the local branches in Palestine and Syria have been taken over by the Deutsche Orient Bank, says the U.S. Vice-Consul at Jerusalem. The banking interests of Germany in Turkey have been divided, the Deutsche Bank taking the north of Turkey, as well as Mesopotamia, and the Deutsche Orient Bank interesting itself in Syria and Palestine.

The new slaughter-house at Burdugeni, Roumania, has been opened, and the exportation of meat to Germany will begin at once. A second slaughter-house is shortly to be opened at Turnu Severin.

Our Sofia Correspondent writes (August 6) that Bulgaria has been practically isolated from the rest of Europe. Mails of July 25 reached Sofia, via Dedeagatch (?) on August 5.

A provisional census of population in Greece's new provinces gives the following results: Macedonia, 1,140,776 inhabitants; Epirus, 244,348; islands (including Crete), 645,595; total, 2,030,719. The figures given for Epirus are only approximate, because the frontiers are not yet definitely marked out. The Hellenic Kingdom will have an approximate population of 4,781,000.

Leicester boot manufacturers have within the last few days been approached by agents of the Greek Government with the view of placing heavy contracts for army boots. The English manufacturers, however, are busily engaged day and night on English and French army contracts, and are not able to accept orders from the Greek Government.

In consequence of recent correspondence between the Egyptian Ministry of Agriculture and certain merchants in India, the latter agreed to supply Egypt with 900 tons of wheat flour at the rate of 21 mms. per oke, delivered at Port Said. The Ministry has informed the Egyptian Chamber of Commerce of this result.

Mr. Henry Boutigny has purchased the Cairo journal, *Progrès*, and that paper and the *Echo Egyptien* will appear as one publication under the title of the *Progrès Egyptien*. Count Max di Collalto, the editor of the *Progrès*, will occupy the same post on the new journal.

THE POSITION IN THE CITY.

(By Our City Editor.)

The Stock Exchange Committee has at last done the right thing. In a few days it will have discovered exactly how much money has been borrowed by its members upon securities. It will then be able to give the Government valuable information and will be able at any rate to say, "yea or nay" to the numberless schemes that have been put forward. But to be quite frank, very few people believe that the House will be reopened until the war comes to an end. Those who advocate the formation of a trust have evidently no idea of the amount of money loaned out upon securities. Also they do not seem to realise that no one would dream of buying any securities, for they would know that the trust would always be a seller, that such vast blocks of shares would overhang the market that a rise would be impossible. Now, no buyer ever comes into a market to buy unless he is fairly confident that he will not lose money. No man could possibly make money if he purchased securities from the proposed trust. Therefore, the pretended object of the trust would fail. But, of course, the real and undisclosed object is that of every other trust, namely, to transfer an intolerable burden to the backs of others. In short, the proposed Stock Exchange Trust is an attempt to unload, and as such must fail. The idea that solvent firms would increase their subscriptions or in any other way aid by their money the insolvent firms also appears a mere chimera.

Stock Exchange Reopening.

The reopening of the Stock Exchange is imperative, but it can be reopened when all the weak and penniless firms have been hammered. The sustention of quotations at the pre-moratorium level is another impracticable idea. War destroys credit, and stocks and shares are only a species of credit. Therefore they must deteriorate in value. The sooner we all face this the less disappointment we shall have.

The Bank of England continues to wriggle out of its promise to buy all bills "without recourse." It is expected that the Government will have to pay between forty and fifty millions for their adventure in Lombard Street.

The small business which was done by members of the Stock Exchange on a cash basis when the war began has now quite ceased. It was really due to the efforts of a few bears to buy back and a few bulls who wished to close up their positions.

Position in Egypt.

In Egypt a complete moratorium exists, and no business of any kind is being transacted. Indeed many of the banks are closed. The National Bank is busy upon a scheme for financing the cotton crop, and will certainly carry one out. But the details are not yet settled. The cotton crop appears to be of good quality and average quantity. But there is still about a million cantars of last year's crop unsold, and the real trouble would seem to be in the price. It is most unlikely that present prices can be held up. A large amount of this years crop will therefore have to be stored until the war has ended. It is of urgent necessity that the fellaheen should send in all their produce quickly in order that it may be ginned and baled without any delay. Cotton will not keep. The fellah has taken kindly to the paper currency, and he will probably sell his cotton for notes without any trouble. But the Government will have to give him time to pay his taxes. Whether the Government will attempt to hold up the price of cotton is undecided. Probably it will content itself by advancing 50 per cent. of the present value and leave the price to take care of itself. Whether the advance takes the form of paper money or certificates of value is not yet settled. It is not a matter of supreme importance. The crop will be financed—that is sufficient for the cultivator.

Oil Shares.

The Spies circular should reassure the holders of these shares. It is now clear that the South Baskakoff plots are very prolific, and that the water difficulty has been completely overcome. There appears to be little or no trouble as regards labour, and the price remains satisfactory. The Cheleken report shows an increase in profit of nearly £20,000, being £78,000 as against £58,400 in the previous period. Twenty per cent. dividend was paid, and a further 10 per cent. interim was intended, but the war has made the directors cautious. As the company sells all its oil in Russia, the war does not affect revenue, only finance in London.

The news that Turkey intends to join Germany has called forth a strong note from Roumania, and it is believed that the Balkan Alliance will be reconstituted and will include Bulgaria and perhaps Italy. Roumania has not declared any moratorium, nevertheless the Roumanian Consolidated reports serious stoppage of business.

COMPANY NOTES.

Menzaleh Canal Navigation.

This company's operations were interfered with by the exceptionally low Nile and the construction of the Sudd of Faraskur in the month of November instead of February, thus stopping any attempt at developing trade with Mansurah. A large quantity of freight can be obtained from Port Said, but this is not a profitable business without a return freight to Port Said, and so far there is great difficulty in obtaining this.

Wadi Kom Ombo.

We referred last week to the results for the past year of this company. We now learn that the results of cotton cultivation during the year has encouraged the directors to increase the area under cotton this season. With regard to the cultivation of wheat, barley, and beans, this is said to be progressing satisfactorily. A sum of £E5,000 has been written down for depreciation of material, and £E2,587 has been carried forward. The company has a general reserve of £E10,000.

National Steam Navigation of Greece.

In their report for the year 1913 the directors of the National Steam Navigation Company, Limited, of Greece, state that in spite of the difficult times through which Greece has been passing the results obtained have been very satisfactory. The sailings, both of the company's passenger and cargo boats, were greatly interfered with, owing to the Græco-Turkish War, which resulted in many of the company's fleet being taken over by the authorities. During the period under review the paid-up capital of the company has been increased from 8,635,000 fr. to 13,580,000 fr. The profit and loss account shows that apart from the balance of profit of 717,170.50 fr. brought forward from the last year, there are three categories of profits, the first of which represents regular earnings resulting from the working of the cargo and passenger boats, which, added to other items, amounts to 1,969,685.15 fr.; the second represents the amount awarded to the company as remuneration for the employment of the steamers by the Government and the interests thereof, amounting to 490,444.90 fr.; while the third represents extraordinary profits resulting from the difference in value of the 45,000 new shares issued above par and the amount in excess of that mentioned in the 1912 balance-sheet, less depreciation awarded to the company as the actual value of the s.s. "Macedonia," amounting in all to 1,161,006.30 fr. After deducting from the above profits, plus the balance brought forward from last year, the sum of 957,690.45 fr., the directors propose to place 1,110,000 fr. to depreciation, while the balance is disposed of as follows: allocation to reserve (3 per cent.), 62,030.70 fr.; directors' remuneration (3 per cent.), 36,721.95 fr.; management's commission (2 per cent.), 24,481.30 frs.; income-tax, 135,658.25 fr.; duty on reserve funds, 3,101.55 fr.; contribution employés benevolent fund, 10,000 fr.; dividends (interim ordinary shares), 880.140 fr.; (final ordinary shares), 814,800 fr. (for the year, founder's shares), 92,000 fr. This leaves a balance of 8,756.70 fr. to carry forward.

Craiova Oil Company.

Our Bucharest Correspondent informs us that a new company, the Craiova Oil Company, has been registered at Bucharest with a capital of 100,000 frs.

COMPANY RESULTS, &c.

Turco-British Cigarette Syndicate, Ltd.—A meeting of the creditors will be held on September 17, at Winchester House, London.

Eastern Bank.—A call of £1 15s., making £3 paid, plus 15s. premium, has been made on the £10 shares.

Suez Canal.—The traffic receipts on Friday, 28th ultimo, amounted to 120,000 francs, against 590,000 francs last year.

Anglo-Egyptian Oilfields.—A telegram received from Gemsah yesterday gives the production for the week as 1,017 tons (last week 1,070 tons), of which Hurgada gave 104 tons (last week 90 tons).

Marconi Wireless Telegraph Company.—The directors announce that owing to the present impossibility of obtaining repayment of money lent by the company on short loan against securities prior to the moratorium, they are compelled to postpone posting the dividend warrants due to have been issued on Monday.

Ottoman Railway from Smyrna to Aidin.—The receipts for the week ended August 29 amounted to £11,742, an increase of £2,049 compared with the corresponding week of last year. Aggregate receipts from July 1 amount to £76,083, a decrease of £5,954.

Egyptian Markets.—Week ending August 27, £239 (decrease, £379); aggregate to date, £33,061 (decrease, £1,927).

RUMANIA AND THE MORATORIUM.

Reuter's Agency is authorised by the Roumanian Legation to declare to interested commercial and financial circles in England that no moratorium has been proclaimed in Roumania. The question of the non-payment of bills due in Roumania or in England on account of the impossibility of sending money will be decided upon by the judicial courts in each case on its own merits, *force majeure* being taken into account.

NATIONAL BANK OF ROUMANIA.

Total Lei	926,626,120

Bank Rate, 5½ per cent.

THE RISE OF THE NILE.

The Egyptian Gazette of August 20 stated: The Nile rise this year is the best recorded since 1892, and it excels even that one. At that date the Nilometer at Rosseires did not exist, but a comparison can be made between the levels registered at Halfa. At this Nilometer, on Monday, the level was 8m. 81cm., whereas the corresponding day last year it was 7m. 48cm.

NOTES OF THE WEEK.

In these days of war mere geographical boundaries tend to assume a secondary importance, and in the presence of great movements of the nations the confines of the Near East may well be extended. The remarkable response to the call to arms of the Overseas Dominions of the British Crown is impressive in its whole-hearted loyalty, but nowhere have the calculations of our enemy been so utterly confounded as in India. An immense array of princes and troops, both British and Indian, has been passing through the great Gate which de Lesseps opened between East and West. It is indeed fitting that a Frenchman should have prepared the sea path along which the might of India can hasten to the help of France. The shades of Dupleix and of Clive will look with amazement upon this the most astonishing of Time's revenges, and even the bitterest opponents of the Bonapartes will now allow that the Third Napoleon deserves well of this country for having made possible the construction of the Suez Canal. Little did the Empress of the French imagine that the waterway which she ceremonially opened just before the downfall of her throne would ever bear British and Indian troops on their way to fight for France.

As we write it appears that the German invasion of France has reached its limit and the Teutonic tide is upon the point of ebbing. Should this really be the case it is earnestly to be hoped that the Allies will press the retreating invaders as vigorously as they were themselves pressed during the long days of rearguard actions and continuous retirement. Hitherto, with but one exception, the difficulty of the French commanders has been to restrain the eagerness of their troops. Now perhaps the gallant soldiers of the Republic will be permitted to enjoy the long withheld pleasure of attacking. Upon French troops the effect of that pleasure is cumulative. History has numerous instances to show how Frenchmen have made light of obstacles after a few days of offensive action which at the very outset of the campaign would have appeared almost insuperable. The Gallic Cock who has been called upon to fight for his own farmyard needs but a few drops of German water to make him as formidable as the Napoleonic eagle. If he advances to the Rhine he will gather strength enough to take him in triumph to the Elbe and even to the Spree.

It is now apparent that the Russian victory at Lwow (Lemberg) last week was more considerable than was at first considered wise to believe, and its effects have been almost as wide politically as from a military point of view. In the opinion of many the cat has jumped, and signs are not wanting that the creature's action is having its inevitable effect. We could have wished that the influential animal had had cause to jump because of some great victory of the Allies in France or in the North Sea. That is a creditable vanity—for in a war such as this every member of the coalition must put forth his utmost strength for the benefit of the common cause. Suffice it, then, that the Russians have won a very handsome victory, and several States are making every preparation for a descent from the fence on the side of the Allies. They should not, however, delay their action very much longer, for it would be distressing to arrive too late for enrolment on the honourable list of the defenders of civilisation, and only qualify for participation in the spoils of an already defeated Teutondom.

It becomes daily more apparent that the drain of the Tripolitan War upon the resources of Italy was far greater than was generally supposed. We have reason to believe that the Roman Cabinet is well-disposed towards the Powers of the Triple Entente, and that its benevolence would already have been translated into active assistance had not Italy been wholly unprepared for further warfare. Money was lacking, military stores had been seriously depleted and had not been replaced. The supply of boots and ammunition had run low, and it is even asserted that the distribution of fortress artillery was wholly unsatisfactory for a war against Austria. Italy in planting her foot into Libya has rendered herself sensitive to manifestations of Moslem opinion, and the same agencies which have endeavoured to arouse Islam against Great Britain have exercised their ingenuity to excite the Mussulmans resident in what used to be Ottoman Africa against their newly established overlords. The time is now past for pointing out the advantages, territorial and other, of the adhesion of Italy to this group of Powers or to that. It is obvious that her mind is made up, and that she only awaits the moment of preparedness and an adequate occasion to range herself on the field by the side of those who fight for the Public Law of Europe against those barbarians who seek to exalt the Sword of Force above that of Justice. It is fitting that the men who have taken up part of the heritage of Old Rome in Africa should sustain in Europe that traditional reign of law which owes its origin to the Seven Hills.

Digitized by Google

For many days past the Turks have been bemused by the din of innumerable Germans announcing unlimited victory for the Prussian arms. They have been exposed to great pressure to embark upon a last adventure, nominally for the recovery of Salonika or the invasion of Egypt, but really in order to provide a distraction which might reduce the opposition which their interested advisers are encountering in Europe. The politicians of Berlin having wonderfully succeeded in making a cat's-paw of the Hapsburg Emperor, have been endeavouring to enlist the services of the Ottoman Sultan in a similar capacity, and at one moment came within an ace of success. Now, however, the Turks have heard another sound and another voice. The noise of victory is in their ears it is true, but it is not a German report, and for a moment the enthusiasm of those who clamour for war is abated. We cannot believe that the influences which during the past few weeks have sought to embroil the Porte in a quarrel wholly foreign to its own interests will be so easily abashed, and it is imperative that every effort should be made to impress upon those who control Ottoman policy the necessity for keeping the peace.

The declaration of the three Powers of the Triple Entente that no peace will be made without the consent of all three has had an excellent effect. Belgium and Japan have since announced their adhesion to this declaration, which has done much to persuade certain neutrals that there can be only one end to this war, and that it will be highly disastrous for any State to take part in the present contest except as an ally and on the invitation of the Powers who enjoy the command of the sea.

A good deal of attention was devoted by the Press during the past week to the opinions expressed in a letter which the Tsar of the Bulgarians is reported to have written to a personal friend in Hungary. The authenticity of the letter has not been established, but, supposing that it was written, the attitude taken up by the writer is entirely creditable to his sense of honour. It must be remembered that King Ferdinand is partly of Magyar blood, that, before his election to the throne of Bulgaria, he spent many years of his life in Hungary, where he owns a considerable property. Moreover, during the period when he was labouring to establish his position in Bulgaria while the greater part of Europe regarded him with a cold eye he found sympathy and support among his Magyar friends. In such circumstances it is not in any way remarkable that King Ferdinand's personal hopes are for Austro-Hungarian success, although it must be obvious to him as a statesman that he cannot justly associate the great bulk of his people in such expressions of opinion. From consanguinity and other even stronger reasons King Ferdinand has naturally inclined towards the Magyro-Teutonic combination which is now in arms against Russia. From Russia in the past King Ferdinand has benefited but little, however great may be the debt of gratitude which Bulgaria owes to her great liberator. In the present circumstances, however, we fully believe that King Ferdinand is too practised a ruler to allow his private predilections to obscure his public policy.

A certain amount of criticism has been aimed at the Bulgarian Government for its "breach of neutrality" in permitting the passage of German sailors *en route* for Constantinople. Apparently the Foreign Office asked for information about the matter, and the Bulgarian Government was able to give a highly satisfactory reply. The Germans, to the number of 600, were properly provided with passports, and travelled in an orderly manner as civilians in a special train chartered for their convenience according to the ordinary Bulgarian railway regulations by the local representative of a German commercial concern. Male subjects of belligerent Powers, even when of military age, can pass freely from one neutral State to another. The Bulgarian Government had no call to interfere with these people so long as they behaved themselves; indeed, to have done so would in itself have been questionable as a possible breach of neutrality. The behaviour of the Bulgarian Government appears to have been entirely correct in the circumstances, and it is probably due to a last dying effort on the part of the Press campaign which for so many months was directed against Sofia, that accusations were brought against Bulgaria for permitting the passage of Germans who had come out of Roumania and were directing their steps into Turkey.

The territory of the Serb States is now clear of invaders, and it appears likely that an invasion of Bosnia on a large scale may shortly be attempted. It should be remembered that the task before the Servian Army is very serious. We have become accustomed to talk of the "fortified frontier" of France which reaches from Belfort by way of Epinal and Toul to Verdun, but few of the public realise that the Kaiserlichs have prepared a more or less similar defence for their Bosnian dominions. The Servian Army, which, on the top of two wars, has had to exert its utmost strength to crush a formidable invasion, may well take time for recuperation before beginning an attack upon the Austrian positions which lie between the Drina and the coveted city of Serajevo. In view of the geographical difficulties which militate against an invasion of Bosnia by the armies of King Peter, it is possible that this ancient Serb territory may have to be recovered on other battlefields than those along the Drina.

The position in Egypt is somewhat curious. The Government of the Khedive has announced that the country is in a state of war with Germany and the Dual Monarchy, yet the German Consul-General in Cairo is permitted to remain and exercise his malevolent activities under shelter of the Capitulations and of the fact that the Porte is still at peace with the German Empire. This cannot fail to strike the observer as Gilbertian. If an enemy is permitted to be a nuisance because of the Capitulations—then let these unnecessary legal fictions be abolished in Egypt. The collapse of an obsolete survival of measures taken to counteract Ottoman maladministration in the remote past would enable the Khedive's Government to extend its authority within its own country, and the noise of that collapse would be as nothing amid the crash of the European State system. The Capitulations exist at present only as monuments of international prestige in Egypt. At least let us overthrow the two Teutonic monuments and expel those who are mischievously active in their shade. The other Capitulations can be suspended during the war and done away with by agreement at the general settlement.

The insurgents are reported to have occupied Durazzo and taken possession of the Palace in the name of "a future Moslem Prince." On the other hand, Prince William of Wied is believed still to consider himself Mpret of Albania, an opinion which can hardly be shared in this country. For the moment Albania must be considered as a State without a Sovereign. An armed majority of the population appears to be unwilling to recognise the Government set up by Europe, and at the present moment Europe is far too busy to recognise the insurgent administration in Albania. It is, however, not improbable that Italian troops may be sent to prevent Valona from becoming a stronghold of the Epirotes, as the Roman Government is generally understood to be nervous about any possible extension of Greek influence along the opposite coast of the Adriatic. It was due very largely to Italian insistence that the Albanian frontier was so drawn as to prevent both sides of the Corfu Channel from passing into Hellenic hands. In view of this, it is doubtful whether any settlement of Albanian affairs can be accepted as definite until the whole question of the Principality and its Sovereign comes up for discussion at the General Congress which will have to be assembled when the war comes to an end. The Albanians will be wise if, during the interval, they abstain from setting up any new Mpret, be he Moslem or Christian, and submit themselves to the rule of just such a Regency as that which administered Bulgaria during the long interregnum between the abdication of Prince Alexander and the election of his successor.

CONSTANTINOPLE LETTERS.

(From Our Own Correspondent.)

Constantinople, August 18.

The Porte and the European Situation.

Turkey has undoubtedly been sailing very near the wind during the last ten days, and two days ago it seemed a question of hours before the Porte threw in its lot with the Central Powers. Yesterday, however, the British Ambassador, who had just arrived here from England viâ Brindisi, laid the British Government's views very clearly before the Grand Vizier, with the result that the Porte undertook to give the necessary firmans to British merchantmen laden with cereals, etc., which had not hitherto been given permission to pass out into the Mediterranean viâ the Dardanelles. The Turkish authorities would appear to have defended the refusal of firmans on the ground that they were obliged to see first to the victualling of their own army, which has been mobilized or, rather, is still in process of mobilization. But had the Ottoman Government continued to hold up British shipping in Turkish waters the supplies of grain from South Russia, which form a not unimportant part of our food supplies, would have never reached Great Britain, and our economic condition, which has naturally suffered from the general war, would have grown worse, while Russia, her outlet to the Mediterranean closed, would have been forced sooner or later to take violent measures to free the passage of the Straits. As for the "Goeben" and "Breslau," now the "Yawuz Sultan Selim" and "Midüllü" (Mitylene), the question of the transfer during war time by a belligerent to a neutral Power does not seem likely to be raised by the Entente Powers, always provided that the Porte despatches the great majority of the officers and crews of these vessels to Germany. Some of the engineers and stokers will undoubtedly have to remain to teach the Turks, who have no experience of turbine engines, how to run these vessels.

Reception of the Warships.

According to letters from the Dardanelles, the "Goeben" and "Breslau" arrived at the Straits at 10.50 p.m. on the night of the 10th-11th instant. They promptly took advantage of their safety to send boats' crews to the French Messageries "Saghalien," where they destroyed the wireless gear, under threat of sinking the ship if any resistance were made. The "Breslau's" people boarded several Greek, French, and British merchantmen and searched them. They attempted to take some of the cargo of the British s.s. "Tremayne," but the crew threatened resistance, and after a while the Germans gave up their idea. They reached Tuzla, on the north shore of the Marmora, not far from the entrance to the Gulf of Ismid, on the 13th instant, after coaling, and on the 16th instant showed themselves off Constantinople. They seem to have been hit during a night action off Messina, but the extent of their injuries is not known.

Their reception at Constantinople was not as enthusiastic as the pro-German attitude of the military and of a section of the Press led one to expect. The day of their arrival Admiral Limpus Pasha was removed from his executive command of the Turkish active Fleet, but remained Adviser to the Ministry of Marine. This step on the part of the Turkish authorities appeared sufficient proof to many that the Porte proposed to join the Central Powers.

But at the same time Talaat Bey and Halil Bey, the President of the Chamber of Deputies, left for Bucharest viâ Sofia, and those who profess to be well informed as to Turkey's policy hint that these statesmen propose to discuss the Question of the Islands and the formation of an East Balkan *bloc*, Roumania, Bulgaria, and Turkey. Whether such a *bloc* could really be formed is more than doubtful. However, "hope springs eternal," etc., and the Turks believe in the possibility.

A Policy of Pin Pricks!

We have practically no news here, and there is reason to believe that news unfavourable to Germany is being suppressed by the Military Censors, who are desperately pro-German. A section of the Cabinet has no decided views as to the policy that Turkey should follow, and one or two Ministers are known to be friendly to the Entente Powers; but the military are Germanophile, and if afraid to strike are extremely willing to wound, often in such mean and petty ways as to make the British resident wonder what has become of the gentlemanly Turk of literature. Every sort of requisition of British goods, often of property which has no particular use for military purposes, is being pursued. Official promises are regularly broken. A British flag has been torn up and trampled on at Galata under the impassive eyes of the police; and the extremist Press, despite the censorship, is permitted to write most violent articles threatening England with the displeasure of the 400,000,000 Moslems, etc., etc., and praying for her overthrow at the hands of the Germans. "The purchase of the German cruisers," said Obeidullah Effendi, a Committee Cleric, deputy for Aidin, and once saved from Abdul Hamid's wrath by British sailors, "means that we have thrust our fist in England's face."

German Mission's Work.

There are great numbers of Turks who reprobate these proceedings, but they cannot do anything at present; nor does it seem that the Government can. Those of us—the writer included—who thought that the British Government made a mistake in protesting too strongly against the powers given to the German military mission by the Porte, were wrong. The Entente Governments were right. The mission has captured the leaders of the Turkish army, has led them to believe that England has no army worth mentioning, that Russia is unwieldy and unready, that the French are not sufficiently prepared to meet the Germans, and that it will be surprising if the latter are not at Paris in another three weeks.

A Postscript. August 19.

The ships containing cargoes which have left for the Dardanelles—there are some forty of them—have been warned that there are new orders, and that they cannot pass for the present despite the firmans! The British Ambassador will be in town to-day, but the early departure of our only mail makes it impossible for me to inform you by this post of the results of his interview with the Porte.

Constantinople, August 25.

A Risky Situation.

The situation has improved in some respects, but not in others. Owing to the vigorous representations of H.B.M.'s Ambassador the British ships carrying grain, coal, and petroleum cargoes which had not yet been requisitioned have been allowed to pass the Dardanelles, their last detention being officially ascribed to the blunders of a subordinate. At the same time the German officers and crews remain on the ex "Goeben" and ex "Breslau"—one can hardly give them their Turkish names till they have their Turkish crews on board, more mines are being laid in the Bosphorus, and the mobilisation is proceeding with vigour. All sorts of people—Greeks, Jews, Armenians, Gipsies, and what not—are being called out up to the age of forty-five. Some are released after some days' detention as untrained men, only to be again called out.

Others are urged to pay the £T43 exemption tax, the positively last day for payment of which is postponed for a week at regular intervals. Others are sent off to Thrace or elsewhere. Some of the contingents which one sees marching to the depôts to receive their uniforms are a sturdy lot, who with good leadership might do well. The quality of others seems most inferior.

Of the policy of the Government it is hard to write anything; for in the first place it is doubtful indeed whether it has a definite policy, and in the second place the military element, encouraged by real or assumed German successes, may at any time force the hand of the visible Government, and drag this luckless country into a disastrous war. Damad Enver Pasha is said to be as Germanophile as ever. He has lately been indisposed, suffering from boils on the feet. According to the local Press he will be "out and about" in a few days' time. The Press continues to magnify the German Army and to deride the Entente Powers, though British assurances that the battleships which the British Government seized will be returned, if not used in the war, to the builders and by them given to the Porte have slightly abated the "noble rage" of the *Tasvir i-Efkiar* and other extremist organs.

News" from Outside

The Panislamic drum is still being beaten. We are told that dreadful things are happening in India, in Algeria, in Morocco, and even in Egypt, that the Governor of Bombay has fled in disguise, that the Indian Army is disloyal, and much more in the way of imaginative information which would not much surprise one who knew the Turks in times of peace, but which under abnormal conditions, general mobilisation and a strict censorship of the Press, is somewhat surprising. One wonders whether the military censors use the German military mission as their guides in suppressing information or in disseminating fables.

Meanwhile news from Macedonia gives the impression that the Serbs were beaten at Visegrad, but not badly, by an Austrian force, and were completely successful against the Austrian Army of the Drin, which according to the latest official news from Nish has lost fifty-three field guns, eight howitzers, and 4,500 prisoners. Telegrams from the K.u.K. Press Agency published here admit that the Austrian invaders have had to retire with "partially important" loss after a struggle with superior numbers of Serbs fighting desperately for their existence, but left the Servian Army "quite worn out"!

A very solemn and impressive service of intercession was held at the Crimean Memorial Church yesterday. The Rev. Canon Whitehouse and the Rev. H. Wigram officiated, and the service, which commenced with the noble hymn "O God, our help in ages past," was marked by dignity and restraint. The British Ambassador and nearly all the members of the British colony who could come were present.

Financial Situation.

The financial situation of the Government inspires some anxiety. Heaven only knows when the tithes will be collected. The lack of money prevents the crop from being brought down to the ports, and the tithe farmers and others who are unable to obtain credit from the banks are in a melancholy plight. The Government has obtained about £T700,000 by means of the mobilization, but its floating debt on account of requisitions, etc., has been considerably increased. Foreign loans are, of course, absolutely out of the question for a long time to come. If the Turks pay for the "Goeben" and "Breslau," £T4,000,000 will have to be added to the £T3,000,000 or so at which the cost of recent military preparations has been estimated.

Consular and Embassy communiqués to the Press concerning the progress of the war are once again permitted by the censorship. On the other hand, persons sending telegrams are warned that any telegrams infringing the orders issued by the censor will be stopped and their senders will be unable to claim their money back! This warning seems likely to prevent the general public from telegraphing anything which the censor, a captious personage, *may* regard as suspicious, and will effectually muzzle all foreign correspondents.

LETTERS FROM CAIRO.

(From Our Correspondent.)

Cairo, August 22.

Sir Reginald Wingate's Return.

After many false alarms Sir Reginald Wingate arrived here on Tuesday. He had been expected for more than a week. When he did not arrive, it gave rise to all manner of alarming rumours, for no one had noticed that he had returned to London with Lord Kitchener when the latter was recalled. The Sirdar arrived at Port Said by the P. and O. s.s. "Mooltan." He had been expected by the "Arabia," which came into port two days earlier, and officials had actually travelled down to Port Said to greet him on that steamer. However, all our anxiety is now at an end. With Sir Reginald came his entire Sudan staff, Lord Edward Cecil, Sir George Macaulay, Mr. W. E. Brunyate, who will act as Judicial Adviser during the present crisis—which in Egypt is bound to be fraught with legal complications—Mr. Ronald Graham, Mr. R. Storrs, Lord Colum Crichton-Stuart, and—the mails, which were more than welcome, even though they only brought us letters and papers up to the 7th inst.

Whilst the high Sudan officials left the following evening for Khartoum, Sir Reginald Wingate will remain in Cairo. No statement has been made as to what official position he will actually hold, but it is understood that pending any serious developments the British Agency will remain in charge of its present officials, and Sir Reginald will merely act as an adviser, residing at his own villa at Gezira. Great satisfaction has been caused by the statement made by a high official, who returned by the "Mooltan," and who brought a message from Lord Kitchener to the effect that he intended as soon as the war would be over to return to the country which has such a high place in his affections.

The Situation in Egypt.

Things continue quiet and satisfactory out here. There is every reason to believe that the pronounced Germanophile feeling amongst the middle-class natives, which showed a decided inclination to spread, is now tending to turn in the opposite direction. That feeling was, no doubt, fostered, first, by the articles that appeared in the *Ægyptische Nachrichten* and by the campaign waged in the form of the distribution of mendacious telegrams by the infamous Wolff and Ottoman-Lloyd Agencies; secondly, by emissaries who left no stone unturned to malign the Entente at the expense of the Triplice, and who insinuated by the affirmation of fallacious facts that the latter was the true friend of Islam; and, thirdly, by *Al Shaab* and its emulators, who, in their explanatory notes to the war cables, cast doubt on their *bonâ fides*, and imparted therein the inference, if at times they did not indeed state it in so many words, that the truth of the victorious progress of German arms on land and sea was being kept back by the British Government for fear of the consequences which such news might have in regard to its authority in the Near and Far East.

The firm action of the Egyptian Government in stopping the publication of the German organ and in forbidding the local Press to print communications from the two above-mentioned telegraphic agencies has been beneficial in so far as it has eradicated one of the main sources of irritation, and its effect has been added to by the avowed intention of the authorities to take summary action against individual fomenters of trouble and disseminators of disturbing news. *Al Shaab* and its *confrères* have received a stern warning that their existence depends entirely on their conduct, and that on the slightest provocation they will be suppressed, whilst a

Digitized by Google

comparison between the cables the accuracy of which was impugned and the latest Continental (not French) newspapers to hand has shown that the former gave in every detail a true version of war happenings. The vernacular Press has given publicity to this fact, and one organ went so far as to say that this confirmation was but another instance of the frankness and fearlessness of the British character. These remarks appeared, of course, in Anglophile papers, but they have undoubtedly had their effect on the native mind.

There has, naturally, been a certain amount of sympathy expressed with Turkey, and active intervention by the latter would have met with approval. But the pro-Turkish element is gradually realising what dire consequences such an attitude might bring upon the Ottoman Empire. In the first place a deliberate bellicose action, in no matter what direction, on the part of the Porte would be followed by the declaration of Egypt's independance and by the assumption of her protection by Great Britain; secondly, if Turkey causes another Balkan conflagration, she will undoubtedly be taken in the rear by Russia, who would certainly occupy Constantinople. The pro-Turks are beginning to understand that neutrality for their Empire spells integrity, and that by the maintenance of that attitude they will be entitled, in case of need in the future, to call upon Europe for protection from aggression from the north-east. It is sincerely to be hoped that the Porte also now appreciates these facts more clearly than it appeared to do some few days ago. There is little doubt that as soon as the news of the disabled condition in which the "Goeben" and "Breslau" arrived in the Dardanelles has had time to spread in this country a further change will take place in the attitude of the local pro-Turkish element, which showed an inclination to arrogance and jingoism when the news of the purchase of those units first became known here.

The announcement made in *Al Mokattam* that about 40,000 troops are coming from India has also made an excellent impression. The troops will be partly British, partly native, and the first contingent is expected to arrive about the 27th. As soon as these reinforcements begin to arrive the present British garrison will embark for England, where it is understood they will proceed to join the Expeditionary Force in Belgium. The only battalions that according to present arrangements will remain behind in Egypt are the 1st Worcestershires and the 1st Suffolks.

The Government has very wisely again ordered the postponement of the Tanta and Dessuk Mouleds. Apart from the fact that these fairs take the fellaheen away from their fields just at the time when their presence there is most necessary, the existing political and financial situation does not justify the holding of these Mouleds in the interests of the country and of the fellaheen themselves.

British Prizes of War.

Great activity is being displayed in the Red Sea by H.M.S. "Black Prince." She has lately been in search of German merchantmen, and has just captured the "Istria" and "Suedmark," which were laden with cargo, and have been brought to Alexandria under British colours. H.M.S. "Chatham" also made a capture, the Austrian-Lloyd "Marienbad," which she brought into Alexandria. The prize has, however, had to be released, as she had left Port Said before war was declared. She has now been allowed to continue her journey.

CAIRO, August 25.

The Military Situation in Egypt.

The Indian Expeditionary Force, which will consist of some 40,000 British and Indian troops drawn from the Meerut and Lahore divisions, is now on its way here and should arrive some time this week. Already a certain number of officers returning from leave have arrived here, and a portion of the staff has come over from India. The troops, it is understood, will be quartered at Alexandria, along the Canal, and at Cairo —the bulk will be stationed at Heliopolis, where a vast camping ground has been prepared. As soon as the Indian force has taken up its quarters, the Army of Occupation, with the exception of the Worcesters and Suffolks, will move home, and it is understood that Major-General Byng will also go to England. No information can be obtained as to forthcoming movements and a very severe censorship is being quite rightly exercised.

Feeling in Egypt.

Feeling in the country continues to be Germanophile, but there is a welcome indication of a weakening, and in some cases of a distinct veering round. The Government's firm action has certainly undermined the bad influences that were at work, and it is believed that the arrival of the Indian troops may complete the rout, though this will not cause the authorities to relax their policy, for the situation will require careful watching, until the trouble in Europe is at an end

CYPRUS AND THE WAR.

(FROM A CORRESPONDENT.)

CYPRUS.

The war, needless to say, is the absorbing topic here. The Greek Press and people recognised at once that it is being waged in spite of every endeavour on the part of Great Britain to avert it. It is branded as an impious act on the part of Germany in the face of humanity, of history and civilisation.

Throughout the island there is a unanimous and strong desire among the Greeks that the victory of the Allies may be assured. The Turkish element, which has always been very loyal, may come to have mixed feelings, as sympathising with any part Turkey may play.

Although the Government took prompt measures to allay anxiety and provide against danger which might threaten the island from scarcity of food, it is but natural that the people should feel some alarm. The effect of the war has been felt at once throughout the island. The banks ceased to advance money. There is a great scarcity of ready cash. Merchants will not be able to fulfil many of their engagements. The villagers in turn cannot obtain money, and in many cases can hardly find the means for gathering crops, *e.g.*, of caroubs (locust beans). Good prices were anticipated for these, but all is now uncertain.

VALUE OF TURKEY'S NEW WARSHIPS.

Commenting on the report of our Constantinople correspondent last week that the "Goeben" and "Breslau" had actually been purchased by Turkey and renamed the "Yawuz Sultan Selim" and "Midüllü" respectively, the naval correspondent of *The Morning Post*, in its issue of September 8, remarks:—

There are various reports of the injuries received by these vessels, inflicted by the "Gloucester" and perhaps by other ships. As Turkey has acquired the German ships when she was at peace, there does not seem to be any reason for raising points of international law with regard to the transaction. The possession of so huge and complicated a vessel as the "Goeben" may embarrass her new owners even more than Turkey's potential enemies. Admiral Limpus, who has been removed from executive command, but who remains adviser to the Ministry of Marine, will probably inform the Ottoman Government that the Turkish navy has no prospect of holding its own at sea. But in default of a powerful navy, Turkey's military operations must be severely restricted. Nor can any naval Power, under modern conditions, accomplish much with one or two capital ships, which, in order to preserve their existence, must keep out of the way of fleets and squadrons. It was, indeed, this necessity that brought the "Goeben" into Turkish waters.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, August 26.

The Situation in the Balkans.

The great events now taking place in Western Europe react upon the Balkan Peninsula, and it is by no means improbable that other Balkan States besides Servia may be forced into the lists and made to play a part of some importance. Thus, it is believed here that Turkey, egged on by Germany, has mobilized in the hope of drawing Bulgaria in and pitting her against Servia and eventually against Russia; also of preventing Greece from fulfilling her obligations to Servia, in case the latter should be attacked by Bulgaria. Such, it seems, was one of the principal objects of the meeting at Bucharest proposed by the Turks. But on the other hand the Triple Entente is doing its best to prevent the Balkan countries from taking any part in the conflict, so that it may not be called upon to use any part of its military or naval forces in this direction.

Greek Uneasiness.

The uncertainty of the situation causes considerable uneasiness, especially since the Turkish mobilization. The questions that the Greeks are asking one another are, what will happen if there is an entente between Turkey and Bulgaria, and especially what Roumania's attitude will be—if she has in fact ceased to interest herself in preserving the Treaty of Bucharest, as she is reported to have done. As for Bulgaria, whose people still remain faithful to Russia, in spite of the Austrophil tendencies of Mr. Radoslavoff, and all the other ties between Sofia and Vienna, it seems to be certain that Russia's warnings have prevented her not only from falling into the German trap laid for her by Turkey, which would have necessitated her taking up, upon occasion, an attitude of hostility towards Russia herself, but also from attacking Servia or Greece. Thus, for the present at least, Turkey's endeavours on behalf of Germany seem to have failed as far as attempts to stir up the Balkans are concerned, just as Germany's attempts to influence Greece have failed; and Bulgaria is understood to have given a promise to Russia to maintain a strict neutrality. Should that promise be broken the Russian Black Sea Fleet and the Franco-British Mediterranean Fleets could make it very difficult for Bulgaria to act, the first by operating against Bourgas and Varna, and the second against Dédéagatch. On the other hand, it is stated that Bulgarian neutrality would be rewarded by Servia, if the latter should be victorious, by the cession of the Shtip-Kochana district, and it is even likely that she would regain the Dobruja if Roumania should receive Transylvania. This attitude of Bulgaria, therefore, is unlikely to encourage Turkey to risk taking action alone against Russia, which would inevitably provoke a prompt invasion of Armenia by the latter—as long as the Russian army remained undefeated. If, however, Germany and Austria-Hungary should defeat the Entente, it is thought that Turkey would find the temptation to join in the war, or to embark on hostilities against Greece, almost irresistible. The name "Mytilene" given by the Turks to one of the war vessels they have acquired from the Germans is considered as an indication of Ottoman intentions regarding the islands.

Roumania's Attitude.

The chance of Turkey's realizing her ambitions with regard to the Islands would be a better one could she and Bulgaria only be certain that Roumania had abandoned the Treaty of Bucharest to its fate, and would not intervene forcibly if it were violated. But that appears to be unlikely. Roumania's interest in the Treaty would cease only in case the Triple Entente should gain the day, when she would no longer hesitate to attack Austria-Hungary, in order to secure Transylvania. But should events fall out otherwise, and the success of the Dual Alliance encourage Turkey and, eventually, Bulgaria to attack Greece, then Roumania, as she would not dare to claim Bessarabia, would necessarily adhere to the maintenance of the Treaty. Such, then, seems to be Roumania's attitude towards the European conflict: strict neutrality, save in the case of a break-up of Austria-Hungary. And accordingly Greece is not likely to find her position threatened one way or the other, since in the event of the Triple Entente being victorious she has nothing to fear. The question remains: In the unlikely event of Bulgaria and Turkey's making an attack on the territories ceded to Servia or Greece by the Treaty of Bucharest, would Roumania still remain neutral? Though she has made no declaration on the point, it is thought here that she would probably be bound to do so, in order to avoid being drawn into a war with Austria through defending Servia.

Greece, then, who would certainly stand by her obligations to Servia, would find herself practically unsupported in defending these territories. But this prospect does not unduly alarm those responsible for the direction of this country's affairs, who believe that in such a case Russia and Great Britain would not fail to come to the assistance of Greece. Besides, if, as it is hoped here, the Russian armies advance into Austria-Hungary, the latter would have to cease operations against Servia, who would thus be set free to join her ally.

The Bucharest Negotiations.

Owing to the extraordinarily complicated situation that has been brought about in the Balkans by the European War, it is felt that in spite of Roumanian efforts to bring about an agreement, the negotiations at Bucharest have not the same chance of success that might have been expected from the Brussels meeting. The Greeks declare that there is little likelihood of any arrangement being arrived at, even with regard to the Islands, on account of the exorbitant demands of the Turks, who stand out on the question of the Customs and the presence of Ottoman troops. And, should the Dual Alliance continue to gain successes, it is thought, the Turks will show themselves more and more "intransigeant." But even if the object with which the Conference was called should not be attained, it will at least have served to clear the political horizon of the Balkans by revealing the true intentions of Turkey and Roumania.

As to the idea of reconstituting the Balkan League, it would appear to be a little difficult of realization at the present time, when all the Balkan States are in a state of indecision. And the question would be even more complicated if it is proposed that Turkey should be a member of the League, for she appears bent upon following a foreign policy radically opposed to that of Greece and Servia.

The Outlook in Albania.

The rumour that Valona may be handed over by the Triple Entente to Italy does not call forth any protestation on the part of Greece. But it is hoped that in that case Northern Epirus beyond Berat will be ceded to Greece, and that Italy, freed from Austria-Hungary's competition, will no longer object to it once she has control of the entrance to the Adriatic. Servia would probably secure Durazzo, in which case she might possibly hand over to Greece the Monastir-Doiran-Ghevgeli district. At least, that is the Greek view.

SERVIAN LETTER.

(From Our Own Correspondent.)

Nish, August 26.

It was on August 12 that the Austro-Hungarian forces, supported by machine guns, artillery, and heavy infantry fire, succeeded in crossing the Drina and the Save at five different points. The small Servian force stationed at these points was driven back by superior numbers, but fighting hard, foot by foot, kept the enemy in check and impeded its progress until the Servian force received reinforcements, outmanœuvred the Austrians, and defeated them.

The first success was at Tcher, a mountainous position, with hills running up to 600 metres. The second and more important success was in the battle lasting four days and extending along a front of 60 kilometres by Kronpagne, Mount Zavilaka, Mount Iverek, Tcher, and Shabatz, but more particularly in that part of the front situated between Jadar-Iverek-Tcher, where the enemy was crushingly defeated and fled in all directions, the majority escaping by their pontoon bridges across the Drina back into their own country.

The heaviest fighting was on the 17th, 18th, and 19th August, and after a remarkable victory, unequalled in the annals of Servian history, the Servian troops on August 22 reoccupied Leshenitza, Loznitza, and Lioubova. The route taken by the enemy when they crossed into Servia was in the direction of Valjevo, from which place there is easy access in one direction to Belgrade, and in another direction to Kragujevatz, where is the Royal Servian Arsenal and military gun and cartridge factory, but at no point did they succeed in getting beyond twenty-five kilometres on their way, and, as already stated, were finally routed. The joy in Nish when this good news arrived here was indescribable, and there was great astonishment that the mighty neighbour who had so boasted of its power should have shown itself so feeble an antagonist.

Those Austro-Hungarian troops which had crossed the Save and entered Shabatz were so pressed by the Servian forces that they could neither come out of the town nor march forward, and their only alternative was to fortify their position at Shabatz. Finding that they were being surrounded by superior Servian forces, and that their invading forces had been totally beaten and dispersed, they made a desperate sortie on August 24, fighting hand to hand, using their bayonets, and then, defeated, fled across the Save, their precipitate retreat covered by the guns of the Austrian warships lying near Shabatz on the river Save.

Over 250,000 Austro-Hungarian troops took part in this invasion, and to-day the Servian troops have reoccupied all their former positions, their cavalry scour the country, and the whole district is entirely free of the invaders.

The Austrian and Hungarian papers give a different version of the defeat, and seek to disguise the crushing nature of the Servian victory. Facts speak for themselves, however, and these show that more than 4,500 Austro-Hungarians have been taken prisoners, and that their losses in dead and wounded exceed 16,000 men. In their disastrous retreat they abandoned fifty-three field guns, eight howitzers, 104 ammunition waggons, three field hospitals, five waggons of provisions, field kitchens, a quantity of surgical and telegraph materials, horses, rifles, ammunition, etc., etc. It is reported that the defeated troops committed atrocities that seem to belong to the barbarous ages and not to the century of civilisation in which we are now living. For such barbarous atrocities even a defeated army has no excuses.

It is an ill wind that blows nobody good. Nish is crowded, mostly with Belgrade inhabitants, and the restaurants, whose receipts in ordinary times were, say, 100 francs daily, now take 1,500 francs daily.

Belgrade is comparatively a deserted town to-day. Of the 100,000 inhabitants it is said that there are scarcely 10,000 remaining.

One of the great inconveniences there now is the deficiency of bread. Flour is to be had in abundance, but there is very little water, and few bakers; whilst those who do work must provide bread for the army. Another want is that the town is no longer electrically lighted, and there never has been coal gas; it is a dark city, but as there is an order that the inhabitants of Belgrade must not be out after 8 o'clock in the evening, the lack of light in the streets is not so much felt. In the houses the people use oil.

Very heavy siege guns have been used by the enemy in the bombardment of Belgrade, 15 centimetre, 24 centimetre, and 28 centimetre shells being fired from a long distance away from the frontier. Several houses have been in flames, and many factories and the majority of the State buildings have been damaged. When the Government will return to the capital, or what may happen before its return, no one knows.

LETTER TO THE EDITOR.

The columns of The Near East *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* The Near East.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

NEWSPAPERS FOR THE FLEET.

To the Editor of The Near East.

Sir,—The appeal made by my committee for newspapers for the Fleet met with a prompt response from the public and many expressions of sympathetic approval. The generous offer of the great newspaper proprietors to supply their papers has completely changed and greatly simplified the work we are doing, and I shall therefore be greatly obliged by your inserting this letter in order that the public may know our present needs.

We no longer want any daily papers, but shall be glad to receive weekly illustrated papers and illustrated magazines of the *current issues*. These should be addressed: "Hon. Secretary, Newspapers for the Fleet, London Chamber of Commerce, Oxford Court, Cannon Street, E.C.," and sent carriage paid.

We have received so many old magazines, novels, playing cards, etc., that we must ask that no more be sent at present.

As the Chamber of Commerce has no corporate funds to carry on this work, money is needed, and contributions should be sent to Mr. L. A. Martin (hon. treasurer), at the offices of the London Chamber of Commerce, Oxford Court, Cannon Street, E.C.—Yours faithfully,

F. Southwell-Piper,
Hon. Secretary.

September 3, 1914.

THE NEAR EAST.

The Near East is on sale at all Bookstalls and Newsagents in the United Kingdom. Should any difficulty be experienced in obtaining the paper, readers will oblige by notifying the Manager. Abroad The Near East may be obtained in:

PARIS. Librairie Hachette, 79, Boulevard Saint-Germain; Librairie Galignani, 224, Rue de Rivoli, and at Railway Bookstalls.

CONSTANTINOPLE. Economic Co-operative Society, Pera; Benjamin Rawe, British Oriental Bazaar; D. Marianopoulo, 280, Grande Rue de Pera; and The Nautical Bazaar, Galata.

SMYRNA. Dem. Tzannou, Petite Rue de Rose, and F. S. McVittie.

JERUSALEM. Palestine Educational Store, Jaffa Road.

CAIRO. Diemer and Company, Shepheard's Buildings; The British Library, Sharia Kasr-el-Nil; C.M.S. Bookstall, 15, Sharia Madabegh; and at Railway Bookstalls.

ALEXANDRIA. Librairie Schuler, Rue Cherif Pasha; Nacamulli and Company, 12, Rue Sesostris; Librairie Calebotta, Rue Cherif Pasha Librairie Cauro, Rue Cherif Pasha; The Eclectic Bookstall; F. Diemer, Cairo Station.

PORT SAID. Charles Evans, and on board vessels in the harbour.

KHARTOUM. Sudan Stationery and Bookstore, and Victoria Bookstall

BEYROUT. Sarrafian Brothers.

CYPRUS. Cababe and Wilson, Nicosia.

NOTES FROM ROUMANIA.

(From Our Own Correspondent.)
Bucharest, August 20.

A Balkan Bloc.

Last night Talaat Bey and Halil Bey, the Turkish commissioners who are to discuss with Greek delegates the vexed question of the Ægean Islands, arrived here, having travelled from Constantinople by way of Sofia. They will to-day go to Sinaia, where they will be received in audience by King Carol. It is rumoured here that the Islands question is not the only one that will occupy the Turkish and Greek statesmen; but that proposals for a new Balkan *bloc* will also be under serious consideration; and the fact that Talaat Bey broke his visit at Sofia and had a lengthy audience with King Ferdinand gives strong support to the rumour.

Roumanian Policy.

As to this country's attitude towards the European struggle, it still remains purely expectant. Should Roumania actually move, there can be very little doubt which side she would take. King Carol and a few of the older statesmen still cling tenaciously to the idea of friendship with Austria-Hungary, but it is easy to see that the country, and especially the army, inclines towards Russia. "What," asked one prominent Roumanian, a few days ago, "have we gained in forty years by our friendship with Austria-Hungary?" And, answering his own question, he added: "Not even true religious and educational liberty for our cousins in Transylvania."

Meanwhile, as I have said, the expectant policy—called by hostile critics "the waiting game"—is being faithfully followed. The partial mobilisation is complete, and, though the only unusual thing that has been noticeable to the ordinary observer has been the large number of uniforms to be seen everywhere, 400,000 men are either actually under arms or waiting the order to join their regiments when the latter are within easy distance. In one way it may be argued that no mobilisation at all has taken place, for in every case the men and officers have been called up nominally for three weeks' training. No strengthening of garrisons has taken part on any frontier, and in many cases after reporting themselves at headquarters men have been sent back to their homes, particularly in the case of peasants and farm hands.

Stranded Roumanians.

In order to assist Roumanians who are stranded in the French capital owing to the difficulty of remitting money, the Government telegraphed forty thousand francs to the Minister in Paris, Mr. Al. E. Lahovary, and this being speedily exhausted, a second remittance was forwarded. Mr. C. Arion, a former Minister, his wife, and a number of other Roumanians managed to get away just before the outbreak of hostilities, but only reached Rome, where they appear to be awaiting means of reaching Constanza by way of Brindisi and Constantinople.

Some travellers who arrived here a few days ago were lucky enough to see the encounter between the "Gloucester" and the whilom German ships of war, the "Goeben" and the "Breslau." Eyewitnesses state that the British cruiser attempted to lure the two German vessels into following her, and that they showed too much discretion to accept the invitation. The "Gloucester" afterwards steamed round the Italian steamer in which these interested spectators happened to be, and was greeted with hearty cheers by the passengers and crew, amongst whom were many Russian and Roumanian reservists. An expert in such matters who has just arrived here from Constantinople reports that the "Goeben" and "Breslau" are both badly damaged by gun fire, especially about the turrets, which speaks well for our sailors' marksmanship.

MOBILIZATION IN PALESTINE.

An Occasional Correspondent of The Near East, who is now in England, has communicated the following letters from friends received from Jerusalem on September 1, and dated August 16, which give vivid accounts of the state of that city:—

. . . A few days after that the war trouble began, and Jerusalem and all the Turkish dominions have been very restless, without there being any war against Turkey. First, the Government began to collect every mule found in Jerusalem, and in the towns and villages around; then they blocked all the roads with soldiers, and gave notice that if any man from the age of 20-45 tried to escape and was caught he would be *shot* immediately. Every road leading into Jerusalem from outside was blocked, and the same thing was done to every other town up to to-day. All kinds of notices, orders, and rumours filled the town, and the people were terrified. At last the deputy for Jerusalem sent a telegram to the Mayor saying that the Parliament had decided not to take men of those ages who had never been in the army, but to let them pay one or more (as they pleased) Turkish liras, as a help. This was published and sent round by the Mayor, for it was a real and official telegram from the authorities. It was also sent to all other towns, and we are not quite sure whether it has been carried out or not at Haifa. The Commandant then in Jerusalem sent out official notices against this order, only because it was not sent direct to him, as the head of the military here, and the Mayor had published it without his consent. Yesterday every man between 20 and 45, of whatever creed, had to present himself to be registered, and without delay, and they were then told to go and to return after a few days. Many people say that the Commandant wants to show his authority. Every man who is able to pay £T30 (excluding the help to the Navy, which is of unknown amount) may do so. The majority say that the Commandant must have received orders to dismiss those who have never been in the Army, and to try and get as much money out of the people as he can. Nearly everyone, however, is unwilling to pay, especially the Jews, who swear by the Ten Commandments not to pay one penny. Besides, nobody can get any money, because all the banks have been closed since the war began, and can only give very little indeed. The trouble about the *metalliks* has begun again, and the old ones are no longer accepted. Francs were not taken either, but they have been brought up to their original value. Everything is dearer. The Government sent soldiers to Damascus and Aleppo, via Nablous and Afuleh. Horses and mules were collected, and only the weak and worthless ones were left. At least fifty sacks of flour were collected from every mill and every rich merchant for the soldiers. All ropes were taken from every shop. The soldiers and police have been going round to every shop and taking one-tenth of everything eatable they could find, such as oil, butter, rice, potatoes, biscuits, sugar, sweets, etc. Jerusalem is now in an awful state, all commerce stopped; everybody has gone mad at the treatment of the Government; and no one can find money to emigrate or pay his exemption fee. The Government is not spending one *para* on the soldiers who were collected, but they are feeding themselves, and will be provided with what has been taken. The Government also collected all the sheep they could get round Jerusalem, and meat will soon be very dear. A tin of water costs four *metalliks*. The soldiers who were taken from the villages have been sent to Lifta and Ain Karim to be able to drink, and to live there until they are called for. (Both these villages have good springs.) In the morning when they find peasants coming to Jerusalem to sell cabbages, fruits, etc., they take what is loaded on the donkey, and pay nothing for it at all.

Another letter says:—

Famine is in Jerusalem, and sooner or later the people will have to rob the shops and houses in order to live. . . . I wish I were in England; I would gladly volunteer for England, but Turkey, I will not serve. . . .

GERMAN "CULTURE" IN PALESTINE.

(From a Correspondent.)

A very serious aspect to affairs is given by the deliberate dissemination throughout Turkish dominions of carefully prepared German news. Such a campaign may fail in America for obvious reasons, but in Palestine, where the only news received now is "Germanized," the case is very different. Germany wants Palestine, and she has been preparing for years to get it. She has flattered Turkey grossly; she has made large displays of her own pomp and power—in her Imperial visits, in her showy buildings, in her aggressive and boastful politics, in her careful dissemination of news. In 1910 or 1911, for instance, a small news-sheet of telegrams was issued in Jerusalem three times a week, ostensibly by the Turkish authorities. The telegrams were printed in French and Arabic, and were said to come direct from Europe via Constantinople. It was hailed with delight as the beginning of the freedom of the Press as a result of the new Constitution. Doubts began to creep in when the news was not always confirmed by Reuter telegrams, which came by the post; and invariable Turkish successes in Tripoli, coupled with appalling disasters to Italian troops, were also somewhat surprising. German news was almost the only European news given—and it was very German! Presently it transpired that the whole thing was started and financed by Germany, that Turkey had nothing to do with it beyond foolishly lending her name, and so the subscribers dropped off with a completeness that killed this little effort of Teutonic ingenuity.

The extraordinary buildings that Germany has erected at Jerusalem offer no satisfactory explanation for their existence, though many are given. The comfortable Augusta Victoria Stiftung on the Mount of Olives is a case in point. It is a philanthropic rest-house for missionaries (so it is said), offering every advantage of the best hotel—and far exceeding anything of the kind in Palestine and Syria—at the most reasonable terms. The Kaiser sent out Prince Eitel Friedrich to open it—a truly delightful instance of the Imperial lack of humour. It is perfectly managed by Kaiserworth Deaconesses, and from the bell-tower of this philanthropic hotel a powerful searchlight dominates the countryside. Could incongruity go further? Three years ago some heavy cases, described as furniture for the Stiftung, were landed at Haifa, and brought in mule carts through the country. This surprised everyone, for, by one of the innumerable Turkish concessions, everything for the Stiftung was cleared at the Jaffa Customs duty free, as the Stiftung was a philanthropic institution; why, then, should these cases of furniture suddenly be brought from Haifa, at such cost and difficulty, during the rains, when roads between Haifa and Jerusalem practically do not exist? The cases reached Jerusalem, and were taken up to the Stiftung by night, and their extraordinary weight amazed the carters. One of the carts broke down, the cases fell heavily to the ground, and one of them breaking a little, disclosed the iron muzzle of a small cannon. The secrecy of their landing, despatch by night, and their weight were thus explained.

The feeling of Palestine, Moslem and Christian, is strongly for England and as strongly against Germany in the mass. Neither do the people willingly follow the dictates of an irresponsible and tyrannical clique at Constantinople (not even the whole Cabinet), which is sucking the very life out of them and their country. The pro-German clique may succeed, of course, in rushing Turkey into war at the instance of Germany, but it will be Turkey's last war as an Empire, and probably even as a nation. The real danger—and it is a very grave one—lies in the persevering and continuous dissemination of German, and only German, news throughout Palestine and Syria. To hear only of constant German successes, of England, France, and Russia crumpled up by Germany, may make the people think that in Germany lies their only hope; that the Great Powers will be too broken to help them, or at best too busy in withstanding Germany to look abroad: that Germany, victorious and all-conquering, may treat them better by-and-by if they follow her lead now, but that she will certainly punish most severely any opposition or half-hearted partisanship. It is not Turkey who wants to side with Germany. It is the pro-German clique at the Porte which is madly forcing Turkey to her doom.

SYRIAN NOTES.

(From Our Haifa Correspondent).

Beyrout, August 12.

I have been travelling in the various parts of Syria during the last two days with the object of studying the general state of things consequent upon the outbreak of the European War. The tendencies of public opinion in Syria seem to be divergent. The Moslems are on the German side, while the whole Christian element takes the French side. It is interesting to observe that the war news that is being circulated in the different parts of Syria differs, and is made to correspond to the public sentiment of the particular places in which it is circulated. For instance, in Damascus, repeated announcements of the imaginary victory of the German Army continue to be published. Pro-German demonstrations are being made.

The whole of the Lebanon is in a ferment. The Lebanese have strong Francophile sympathies, and are quite prepared to sacrifice their lives for the sake of France. A considerable number of young men from Lebanon have already proceeded to France in order to join the French Army. In case of necessity a still larger number of them expect to leave.

In Beyrout business is at a complete standstill, and the incalculable loss and suffering occasioned by the war is becoming more apparent hour by hour. Public announcements are incessantly made by the local authorities. A proclamation of martial law was issued on the outbreak of war, and an appeal has been made to the public by the Chief Commissioner of Police requesting the people to assist in the preservation of order.

A general mobilisation has been decreed, but its completion is apparently impossible owing to the refusal of the people to respond to the military call. They are fleeing in large numbers to the Lebanon, which is a safe refuge.

THE ROUTE OF THE MAHMAL.

The question of the route which the Mahmal caravan will follow this year is still under the Government's consideration (says *The Egyptian Mail*). A report has been submitted to the Minister of the Interior by the department studying the matter, recommending that the Mahmal should leave by sea from Suez to Jedda, thence by land to Mecca and Medina, and from the latter town to Yambo, when it will return by sea to Suez. This route, however, requires no less than seventeen days' march in the desert, and it is feared that the Bedouins, who this year have not received the usual annual donation of wheat from the Government, may attack the caravan. It is possible that the question will not be settled before the Khedive's return from Constantinople.

TANGIER TO TEHERAN.

According to some authorities "the Hungarians are stirring under the Austrian yoke." I can fully appreciate restiveness on the part of the Ruthenian, the Slovak, the Roumanian, the Croat and the Serb subjects of the Dual Monarchy, but it seems almost incredible that the Magyar should join the majority in this way. In the first place, a patriotic Hungarian denies that he is under any yoke, being the subject of his own national Crown of St. Stephen and in every way the equal (to say nothing of being the superior) of the Austrian subjects of the Apostolic King of Hungary. Moreover, I may point out to those who seek to reckon the Magyars among those who are "rightly striving to be free" that most of the racial discontent in the Dual Monarchy has been caused by the anxiety of the Magyars to induce their Ruthenian, Roumanian, Croatian, Slovak and Serb fellow citizens to abandon their racial peculiarities and languages and become like to, but subordinate to, themselves.

***

Talking of racial discontent leads me to record the quaintness of its manifestation in the streets of Italian-speaking Trieste. Apparently some ardent irridentists asserted their wholehearted dislike of the dominant Austrians by calling the local police *scarafaggi* to their faces. Very properly arrested for referring to "K und K" police as black beetles the ingenious Italians, when released, silently took vengeance upon their persecutors by symbolically crushing black-beetles on the pavement in the presence of irritated policemen.

***

This war is arraying men of very many creeds in line of battle. Latin and Orthodox, Lutheran and Reformiert, Uniat and Evangelical, Moslem and Buddhist, all these we know in arms, but if any proof be wanted of the justness of our cause it may be found in the fact that even Quakers have found it their bounden duty to take up arms—in direct but conscientious opposition to the ordinary traditions of their Society. The Germans have talked at large of raising a Jihad throughout the Dar-ul-Islam against us, but, really, I am inclined to interpret this remarkable action of members of the Society of Friends as an indication that the King of Prussia, failing in one direction, won an undesired success in another, and has started a Holy War throughout Christendom and all the world against Teutonic militarism and inhumanity.

***

The Coptic Church in Egypt has, I gather, been placed in a slightly awkward position by the outbreak of war. The principal Coptic organ reminds us that the Coptic Catholic ritual in Egypt is under the protection of Austria-Hungary, and that though this protection has never been exercised, the clergy still offer up prayers for the Emperor of Austria. It goes on to ask whether these prayers should be continued or stopped. Surely there need be no doubt at all on the subject. No Englishman, I feel sure, would wish to stop the Copts from praying for poor Franz Josef; and no Copt in Egypt would think of praying for the success of Austrian arms in the present war.

***

Next Sunday is the anniversary of two decisive victories in British military annals—Tel-el-Kebir and Quebec. A curious story is told concerning the former. It is said that Lord Wolseley (then Sir Garnet Wolseley), before he left London for the Egyptian campaign of 1882, predicted that he would defeat Arabi at Tel-el-Kebir on September 13, the anniversary of Quebec. In connection with Tel-el-Kebir the number 13 repeated itself, for Sir Garnet had with him about 11,000 infantry and 2,000 cavalry, a total of 13,000. May next Sunday be even more fortunate to British arms than September 13, 1759, and September 13, 1882.

***

The Germans' attempts to influence public opinion in their own favour by the dissemination of doctored "news" do not appear to have met with much success in the United States. They are, in fact, meeting the fate they deserve. The manufactured "news" is treated with quiet contempt: the endeavours to mislead the American public are vigorously condemned. Thus, *The New York Times*, referring to a literary effusion which, with extraordinary hardihood, was entitled "Truth About Germany," and was concocted by a former Chancellor, a Field-Marshal, and the President of the Reichstag, remarks bluntly that the enlightened States' public opinion does not take form on anybody's lies. Americans give their sympathy to those who are fighting in the cause of human liberty, says that journal, and: "We are not agreeably impressed by the blasphemous Imperial invocations of Divine favour upon bloody enterprises. These gentlemen of Germany plead in vain. We can give them no help." That energetic "embellisher" of news, Count Bernstorff, cannot have felt very happy when he read this in the intervals of editing the wonderful wireless messages he is—or says he is—receiving from the Fatherland.

However, it was not of the snubs administered to the Potsdamers by Cousin Jonathan that I set out to write. We are all of us grateful, sincerely grateful, for the friendly feeling shown to us in this hour of trial by the United States; but we recognize that it is a sympathy springing from an understanding of the justice of our cause as much as from the ties of blood. And, in any case, we should never expect such poor bluff as this German Press stuff to impose on the Americans. But with certain countries to the East it is a different matter. In the letter from our Constantinople correspondent which we published a fortnight ago he exclaimed: "If only we had a British telegraphic agency here!"; and since then we have received communications from several correspondents emphasizing the need of such an institution in Turkey. It is practically certain that if there had been such an agency in Constantinople Anglophil Turks and Turcophil Britons would have been spared a good deal of anxiety during the past month. The past cannot be undone, but I hope we shall have learnt the lesson and that the inventive Teutons who have been forcing King George to his knees before the Kaiser (on paper), wiping out our Expeditionary Force (also on paper), and destroying our Fleet (still on paper), will hereafter not have things quite their own way. They ought to have somebody on the spot to give them the lie direct, for our sake as well as for the sake of the Turks.

***

In case you may think I am exaggerating the mischief done by these precious "news" agencies, I quote a couple of sentences from a letter received from Haifa, and dated August 14:—

> The local telegrams received here, *and derived from a German source*, since the commencement of hostilities, are all stuffed with nothing but victories of Germany and her ally. If one adds up the numbers of the slaughtered it is clear that half the strength of the Entente Armies has been wiped out already.
>
> The most remarkable fact is that even in small villages in the interior the peasants are already "well informed" as to the German "victories," and prayers are offered daily for the protection of the "Defender of the Moslem Faith" (*Germany, of course!*).

***

I am afraid those "well-informed" peasants of the villages in the interior will have some nasty shocks shortly. But what I most admire is the description of Germany as the Defender of the Moslem Faith. What in the name of all that is wonderful has she ever done to deserve it? As far as I can follow the history of her dealings with Turkey, they may be summed up as a very successful following of the policy of self-seeking. She has built railroads on a kilometric guarantee system that is little short of sharp practice; she has sold rotten ships, rotten aircraft, rotten guns, and a variety of other rotten articles to Turkey at extremely remunerative prices; and she has sought to drag Turkey into a war purely for the benefit of the Prussian Junkers. And just how many Moslem subjects has she? Defender of the Moslem Faith. *Mashallah!* And likewise *Ya salaam ya nas.* Let the worthy villagers of the interior ask what our Moslem troops from India think of the idea of praying for the Kaiser and his country. They might be surprised.

***

Apropos of journalistic enterprise in Turkey, I read lately in an Egyptian paper an article on the Turkish Press. It was based on information collected by an American professor and an Armenian journalist, and it gave some interesting details regarding the subject dealt with. Thus I learned that there are published in Constantinople eleven dailies, of which the principal are the *Sabah* and the *Tanin*, with circulations of 20,000 and 15,000 respectively, the *Ikdam* (18,000), *Yeni Gazetta* (10,000), *Tasvir-i-Efkiar* (10,000), *Alemdar* (8,000), and *Hikmet* (3,000). For the benefit of the curious I may add that the names of these papers translated into English would be, in the order above, "The Morning," "The Echo," "Progress," "New Gazette," "Mirror of Truth, "Standard-Bearer," and "Wisdom." In view of the delightful titles of the journals run in Tabriz by the enterprising Shuja-ed-Dowleh, and of some others in the Orient, one can hardly avoid the conclusion that the Oriental editor and newspaper proprietor has at least a pretty taste in the matter of choosing a title. Of course, he has more practice.

***

I see that some folk are suggesting that the Prince of Wales should translate his "Ich dien" motto into English for future use. There might be something to be said for it, (although the Kings of these realms maintained "Dieu et mon droit" through many years of war with France), if one were sure that the motto be really German. I have heard it stated that the words are Welsh and should be spelt differently, perhaps "Eich deen," and that they mean "Here is the man"—a remark which might well have come from the lips of the astute King Edward at Carnarvon.

THE PRESS ON THE NEAR EAST.

Modern Turkish Literature.

A brief but very interesting article on the renaissance of Turkish letters appears in *The Outlook* for August 29, under the heading of "The Literary Culture of the Turk." Referring to the literary stock-in-trade of the Turk before he was influenced by Western culture, the writer says:—

Formerly the Turk lived in intellectual isolation. The traditions, training, and the system under which he was governed all combined to paralyse his mental growth. Books, both written and in manuscript, were obtainable by those who could read, and the streets devoted to their sale have always been among the sights of Constantinople; but they did not deal with the modern questions which were being discussed by Western peoples. The volumes on the stalls represent many departments of literature, and some of these ancient and musty tomes have exercised an influence for centuries on the mind of the Turk. Works on theology and the Holy Law of Islam; biographies of saints and heroes; animal tales and fables with moral applications; comic stories of dervishes; histories containing graphic accounts of the deeds of bygone sultans; the works of philosophers—those powerful moral teachers of old—all find a place among the dusty piles.

The writer continues:—

A great intellectual revival took place fifty years ago, which has been slowly but surely permeating all classes. This has been due to increased contact with Western peoples who are in the vanguard of progress and to the spread of education. Men, trained on modern lines and deeply imbued with modern thought, are now producing works which will in time be really valuable to the world. In the intellectual sphere Turkey owes a deep debt of gratitude to France. The more intimate relations with Western Europe resulted in a wider knowledge of French books and ideas, and also of English literature through French translations. This contact brought about the birth of a new literary school that substituted accuracy and simplicity of style for exaggeration, and this new style is now being adopted by all writers of repute. The very language is altering; foreign words are being incorporated and obsolete expressions are being discarded for others more in harmony with the new ideas. In spite of fierce opposition, which discouraged the introduction of Western learning as tending towards Socialism and anarchy, it flourished apace. Original thinkers and brilliant writers were banished, but they continued to serve their country all the same; then their works, which were introduced surreptitiously, had an enormous secret circulation; they were passed on from one reader to another; whole volumes were copied out by hand, and they had no small share in paving the way for the revolution of 1908.

Plight of the Foundling State.

In the course of an article, under the heading of "The Situation in the East," contributed to *The Evening News* of September 7 by Mr. H. Charles Woods, the significance of the recent events in Albania is pointed out. We quote below:—

The real meaning of the departure of Prince William of Wied from Durazzo last Thursday is that a government and prince set up by what used to be called the European Concert, has now been overthrown by Turkish intrigues which have been in full swing in Albania for months. If the Turkish flag is not actually flying throughout the country, there is no doubt that the Ottoman clique at Constantinople, which is endeavouring to hurl Turkey into war on the side of Austria and Germany, will spare no trouble to turn the situation in Albania to their own advantage, and to that of their false and perfidious friends in Berlin and in Vienna. That Albania has now no Government, and that chaos undoubtedly reigns from end to end of the country, may at any moment add yet another factor to the already complicated and critical European situation, by thrusting into prominence a rivalry between the two Powers who have always regarded that country as their special preserve. At the present moment it must be a serious temptation to Italy to secure and to safeguard her naval and other vital interests on the Eastern shores of the Adriatic by sending an expeditionary force to Avlona or elsewhere with the object of maintaining order in districts the conditions prevailing in which are now more than ever before of vital importance to her. According to the laws of equity it may not be justifiable to further your own cause because your rival is occupied elsewhere, but it must always be remembered that, during the Turco-Italian war, the position of Italy was seriously prejudiced owing to the attitude of Austria upon various Adriatic and Eastern Mediterranean questions.

Bulgarian Requirements.

The Manchester Guardian (September 8) has an interesting note on "Turkey and Bulgaria," from which the following is an extract:—

The Bulgarian people will never combine with Turkey to join in the war, for the simple reason that they have nothing to gain. Some might say that they could gain Macedonia. Bulgaria undoubtedly would be glad to gain the part of Macedonia that was to be hers in the original settlement, but to stake her existence again in war there must be a very great reward. Macedonia is not that. What Bulgaria urgently needs is a port. What Turkey most wants is Salonika. The end of the Balkan wars, however, left Bulgaria as a buffer State between Greece and Turkey, but without a real port. Salonika (if it fell to the Turks as a spoil of war) divided from Turkey by Bulgaria would be a political impossibility, and if Bulgaria got Kavala the situation would become worse for Turkey's future development. The position is that neither could get what she wants without injury to the other.

Islam and the Kaiser.

Referring to "the Kaiser's notion of utilising Turkey to mobilise the Islamic world against Great Britain," *The Manchester Dispatch* (September 8) remarks:—

But, as the Kaiser might have learnt from the late Professor Vambery, of Buda, the best brains of Mohammedanism are pro-British. They have prospered under British protection far more than under their own or any other rule. The keynote of this attitude is revealed in the words of a prominent holy man of Islam, which Vambery once quoted in this connection. Speaking of the British in Asia, he said, "Black is their faith, but pure and blameless is their justice."

King George of Greece.

In a review of Captain Christmass's "Life of King George of Greece" which appears in *The Nation* (September 5), the following interesting passage occurs:—

If the regeneration of Greece has been great, proportionally great must be the credit for it. To whom does that credit belong? To the Greeks themselves, of course, and, secondarily, to a Cretan, M. Venizelos, who has been to Greece what Cavour was to Italy. As for King George's share, his biographer tends to make it greater than it was. Yet it was great enough; for almost any other monarch would either have made himself an intolerable nuisance or would have found his sovereignty intolerable. King George had unfailing good temper, patience, simplicity, modesty, and, what is more to the point, enough good sense to keep from meddling. He had none of the qualities that have enabled King Ferdinand to forge a characterful nation out of a herd of ignorant peasants. It was his merit that he was not the least bit clever or ambitious, or forceful in a situation where cleverness, ambition, forcefulness were not wanted, and would have been harmful. Another Ferdinand at Athens would have made a sad mess of it.

The Policy of Roumania.

A noteworthy article, entitled "What Will Roumania Do?" is contributed by Mr. Chedo Mijatovich to *The Outlook* (September 5). After referring to the secret Military Convention concluded in the early 'nineties of last century between Roumania and Austria, the writer continues:—

The text of that secret Convention is naturally not known. It is surmised that casus fœderis is sub-conditioned to an actual attack by Russia, endangering the existence of the one or other Allies. That condition has not yet been fulfilled. The rumours were circulating last year that the Convention was to be renewed then, and was not renewed at the refusal of Roumania, which was hurt by the lukewarm support of Austria in the Dobrucha question. It was well known that, this year more especially, France and Russia made great and determined efforts to detach Roumania from Austria and the Triple Alliance. The brilliant climax of those efforts was the visit of the Tsar to King Carol in Constanza this summer, and the reports of the imminent engagement of the son of the Roumanian Crown Prince to one of the daughters of the Tsar. Apparently nothing came out of all those efforts, Russia being unable to agree to all the conditions of the Roumanian statesmen. From the very beginning of the war Roumania has retained the liberty of her action. It was from the beginning somewhat suspicious that she did not declare herself to be neutral. She mobilised and said she would watch, and her further conduct will be determined by the events and her own interests. Within the last ten days fresh efforts have been made in Bucharest, both by Austria and Germany, and by Russia and France, to obtain the co-operation of the Roumanian Army. According to my information, King Carol considers himself in honour bound to support Germany and Austria, and thinks that support would agree with the best interests of the Roumanian nation. The old arguments of the Panslavonic sea swallowing up the small Latin island have been revived. The dismemberment and annihilation of the Austro-Hungarian Empire is now represented as a danger to Roumania, and old Palacky's axiom that if Austria did not exist it would have to be invented is revived. All these arguments are certainly not convincing, and some of the leading Roumanian statesmen are still hesitating for which policy to declare themselves. But according to my information and knowledge of circumstances, there is just at present an acute crisis in Bucharest, and we ought not to be surprised if two or three weeks later we see Roumania join Austria and Germany against Russia, or hear that King Carol has abdicated in favour of his nephew Ferdinand, whose wife is a British princess, being the daughter of the Duke of Edinburgh and granddaughter of the Russian Tsar Alexander II. One thing is in my opinion absolutely certain, that Roumania cannot and will not join Russia against Germany and Austria as long as King Carol sits on the throne of Roumania.

Article to Note.

"Turkey and the European War," by Marmaduke Pickthall, in *The New Age* (Sept. 3).

To-day, Shawal 20, is the anniversary of the wedding of H.I.H. Jemile Sultana, sister of his Imperial Majesty the Sultan to the late Damad Mahmud Jelal-ed-Din Pasha in 1274 (June 3, 1858).

To-morrow is the birthday of his Imperial Majesty Sultan Mohammed Reshad Khan, Emperor of the Ottomans, who was born in 1260 (November 3, 1844).

Sunday is the birthday of H.R.H. the Duchess of Brunswick, niece of her Majesty the Queen of the Hellenes.

Monday is the birthday of H.R.H. Prince Michael, eldest son of H.R.H. Prince Mirko of Montenegro.

Wednesday is the birthday of Prince Mohammed Abdul Kader, of Egypt, the second son of his Highness the Khedive.

Mgr. Camassei, Latin Patriarch of Jerusalem and, under the late Pope, Lieutenant of the Grand Magistracy of the Order of the Holy Sepulchre, celebrates his birthday on Monday.

Mr. H. H. Lamb, C.M.G., British Member of the International Commission of Control for Albania, and formerly H.B.M. Consul-General for Salonika, celebrates his birthday on Tuesday.

Writing on August 21, our Bucharest Correspondent reported that King Carol, who had been confined to bed with a cold for a few days, was then better, and had been able to receive Talaat Bey.

Prince Ferdinand of Roumania and Prince Carol are both much interested in aviation, and in the latest letter to hand from our Bucharest correspondent he informs us that the Princes had recently motored over to the capital from Sinaia to inspect the flying school at Cotrocein. The school had been very busy, according to our Correspondent, and flights were in progress throughout each day.

Nasr-ul-Mulk arrived in Stockholm from Petrograd on Monday, September 7, on his way to London. The ex-Regent of Persia was received by the Persian Consul-General and by Colonel Hjalmarson, Chief of the Swedish Gendarmerie.

A Reuter's message from Khartoum, dated September 9, says:—"The Governor-General returned to Khartoum this afternoon, and a reception of welcome was held at the Palace."

Among the chiefs selected to accompany the Indian Expeditionary Force are the Maharajah Sir Pertab Singh, the Maharajahs of Bikanir, Patiala, Kishangarh, and Jodhpur, the Rajah of Ratlam, the Nawabs of Jaora, Sachin, and Bhopal, and also the Malik Umar Hayat. It is believed that many of these princes have passed through Egypt and will shortly be in the field in France.

The Teheran correspondent of *The Times* reports, under date of September 5, that the resignation of M. Mornard, the Persian Treasurer-General, has been accepted, and that M. Henynssens, Director-General of Customs and Treasury, has been appointed acting-director.

Our Bucharest Correspondent writes (August 19):—"Mr. Radeff, the Bulgarian Minister, who went to Sofia a few days ago, returned here, in company with Talaat Bey. Mr. Derussi, the Roumanian Minister at Sofia, has also come to Bucharest, his visit being doubtless in connection with the meeting of Turkish and Greek statesmen."

On the same date our Bucharest correspondent reported that Graf Johann Pongrasz, who had accompanied Prince Carol of Roumania from Arad on the Prince's homeward journey from Berlin by motor, was received in audience by King Carol. The King sent warm greetings to Count Tisza by Count Pongrasz.

A Reuter's message from Durazzo, under date of September 3, states that the Mpret left Durazzo on Thursday last week on board an Italian vessel for Venice.

Talaat Bey has returned to Constantinople, and his place is being taken by the Ottoman Minister in Bucharest for the negotiations proceeding there.

Sir Reginald and Lady Oakes are sailing tomorrow (12th inst.) for Egypt, where affairs in connection with the Heliopolis Oasis Company render Sir Reginald's presence very necessary. Their stay in England has been of the shortest, for the war broke out while Sir Reginald was undergoing his annual cure on the Continent, and their journey home through France took them no less than sixteen days to accomplish.

Major A. Pirie, D.S.O., late 21st Lancers and formerly Secretary of the Helouan Sporting Club and Race Club, is throwing all his energies into the work of rounding up old men of the regiment famous for its Kerreri charge.

Mr. T. A. F. Critchley, manager of the Ottoman Bank, Alexandria, and Mr. A. G. M. Dickon, sub-governor of the National Bank of Egypt, have been appointed by the Egyptian Government to serve on the Cotton Commission. Both gentlemen are now in England, and we understand that they are at present in Lancashire.

It is stated in the *Jeune Turc* that Major Bekir Bey was released by Colonel Philips just before the British forces evacuated Scutari. Major Bekir Bey was understood by the *Jeune Turc* to be on his way to Constantinople.

Stack Pasha, Sub-Governor-General of the Sudan, left Cairo on August 26 for Khartoum, accompanied by a large number of officials and officers of the Sudan Government.

A correspondent writes:—"I hear that Colonel J. J. Asser, late second in command to the Sirdar, is doing extraordinarily efficacious work (as Chief of Transport Department, I believe) under Lord Kitchener." We are unable to obtain confirmation of this report at present, but publish it for the benefit of Colonel Asser's numerous friends. In the Sudan no one was more deservedly popular and respected, and all who know him will be glad to learn that at this time his abilities and experience are recognised.

Major-General Sir C. F. N. Macready, K.C.B., the Adjutant-General of the Expeditionary Force, obtained his commission in the Gordon Highlanders in 1881, and in the following year saw service with the Egyptian Expedition and was present at the battle of Tel-el-Kebir. From 1884 to 1889 he held various appointments on the staff in Egypt.

Lieut.-General Sir Charles Fergusson, Bart., C.B., M.V.O., D.S.O., who has been promoted to that rank vice the late Sir J. M. Grierson, was employed with the Egyptian Army from 1896 to 1903. He served with the Dongola Expedition in 1896, receiving the Egyptian medal with two clasps. In the following year he saw service on the Nile, including the capture of Abu Hamed and occupation of Berber, for which he received the brevet of major and two clasps to his former medal. In 1898 he was again up the Nile under Lord Kitchener, and was present at the battles of Atbara and Khartoum and the defeat of Ahmed Fedil's Army, when he was severely wounded. For his services he received the D.S.O., the brevet of lieutenant-colonel, and three additional clasps. In 1899 he took part in the first advance against the Khalifa, gaining another clasp to his medal and the 3rd Class of the Order of the Mejidieh.

Major-General F. I. Maxse, C.V.O., C.B., D.S.O., whose promotion has been gazetted, was employed with the Egyptian Army from January, 1897, to December, 1899, and during this period was almost continuously on service up the Nile. In 1897, on the Staff of the General Officer Commanding, he was at the action at Abu Hamed, receiving the Egyptian medal with two clasps. In the following year he served as a brigade major, and

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.
Near the lake, with splendid park.

CECIL HOTEL.
In the town and 5 minutes from the station.

Two First-class Family Hotels.
High-class Cuisine. French Chef.
J. SUMSER, Manager-Proprietor.

Sofia (Bulgaria).

GRAND HOTEL BULGARIE
(opposite the Royal Palace).
First-class Hotel. Entirely renovated and beautifully situated in the centre of the city, near Post Office, Theatre, Museums, Banks, etc. Electric Light. Central heating. Baths. Garage. Telephone. Garden. French Restaurant. Good wines. Café. Foreign newspapers. Most frequented by English and American Visitors. Interpreter meets all trains. Rooms from 4 frs.

Cyprus.

THE CYPRUS HOTEL CO.

Open all the Year round—
LIMASSOL (Olympus Hotel).
FAMAGUSTA (Savoy Hotel).
For Summer Seasons—
PLATRES (Platres Hotel). 4,000 ft. from the sea level. Opens from May till Oct.
TROODOS (Olympus Hotel). 6,000 ft. from the level of the sea. Opens from May till Oct.
Perfect Situation. French and English Cuisine. Moderate Terms. Also Excursion to Mount Troodos.
For Tickets and further particulars apply to—
NAJEM HOURY, Limassol, Cyprus
(*Proprietor of the Army and Navy Stores*).
Head Office: Najem Houry Stores, Limassol, Cyprus.
Branches: Polymedia, Troodos, Nicosia, Famagusta, Larnaca, and Platres.
All arrangements for Transport by Carriages, etc. are made by the above Firm.

Bucharest, Roumania.

GRAND HOTEL DU BOULEVARD.
The Rendezvous Hotel of the Diplomatic World and Distinguished Visitors to Roumania.
Entirely renovated, with all Modern Comfort. Unrivalled Cuisine.
FAMOUS ROUMANIAN BAND.
Admirably situated in the very centre of the Town.
LUCIAN BERTOLA, Proprietor.

took part in the battles of Atbara and Khartoum, receiving the D.S.O. and two clasps to his medal. In 1899 he commanded the 13th Sudanese Battalion during the operations which resulted in the final defeat of the Khalifa, for which he was rewarded with the brevet of lieutenant-colonel, the British medal, and two additional clasps to his former medal.

It is to be regretted that the Administration of the Sudan has been deprived of the services of Baron Rudolf von Slatin Pasha, who has naturally resumed his rank in the Austrian Army.

Lieut.-Colonel R. W. Barnes, late of the Royal Army Medical Corps, who has died at Dorchester, served in the Nile Expedition of 1898, for which he was mentioned in despatches, and received two medals with clasp. He also served in the South African War of 1899-1900.

The death is announced of Rear-Admiral the Hon. Maurice Horatio Nelson, third son of the second Earl Nelson, and uncle of the present peer, at Alverstoke on Monday. Born in 1832, he was lieutenant of H.M.S. "Sampson" in the Crimean War and took part in the bombardment of Odessa and the destruction of Redoubt Kaleh.

We regret to record the death of Sir J. Henniker Heaton at Geneva. A memorial service will be held on Saturday at half-past twelve o'clock at St. Margaret's Church, Westminster.

We have it on good authority that Baron Empain is one of the three wealthy patriots who are acting as guarantors for the enormous war indemnity levied on Brussels by the Germans.

Mr. Ian Ross, son of Mr. John Ross, of Alexandria, has joined the 4th Battalion King's Liverpool Regiment as second-lieutenant. It is interesting to note that his paternal great-grandfather, who was an officer in the Sutherlandshire Highlanders, was killed at the Battle of Waterloo on June 18, 1815.

Mr. Charles Rosher's numerous friends will be interested to learn that he is acting as Adjutant-Major of the Foreign Legion which is being raised in England.

Mr. Henry de Jongh and family, of Smyrna, have arrived in London for a short stay.

M. and Mme. Max Fischer, who had been detained for some time at Vichy, left Marseilles on their return to Egypt last Friday.

The Armenian community of Manchester has contributed £451 10s. to the National Relief Fund. The community express, through the Lord Mayor, their sorrow for the loss of the British officers, soldiers, and sailors who have sacrificed their lives. They fervently hope that the British forces with the allied armies on land and sea will have a decisive victory over the enemy, and thus liberate true civilisation from the grip of despotic militarism.

A special service was held in Khartoum Cathedral on August 16 to the memory of the late Mr. C. A. Ball, of the Land Settlement Section, whose death by drowning was reported some weeks ago. Sudan papers which have come to hand by the last mail give details of the accident which was responsible for his death. It appears that while the steamboat "Lord Cromer" was on her way down from Roseires she was caught in a very strong current and turned turtle. The crew and engine-room staff, who behaved splendidly, could not save the steamer, but they managed to save the barge that was tied to the steamer. Owing to the fact that the accident took place so early, Mr. C. A. Ball, of the Land Settlement Section, and Mulazim Rachid Eff, Osman of the Arab Battalion, who were still in their cabins on board the steamer, went down with her. Their bodies could not, however, be extricated under tension of the stream.

On September 3, at 25, Cadogan Square, the wife of Captain T. G. L. Lumley Smith, of the 21st Lancers, gave birth to a son. Before her marriage Mrs. Lumley Smith was a Miss Coles, daughter of Coles Pasha, formerly Director of Prisons, Egypt.

Amongst the passengers to Port Said by the Bibby s.s. "Worcestershire," which left Liverpool on September 3, were the following:—Mr. A. Aspden, Mr. K. P. Birley, Mr. M. E. D. Blattner, Rev. Dr. T. A. Branthwaithe and Mrs. Branthwaite, Mrs. A. Carver, Mr. C. J. Choremi, Rev. W. S. Langston Day and Mrs. Langston Day, Mr. Diacono and Mrs. Diacono, Mr. C. E. Duffield, Mr. J. W. Lowe and Mrs. Lowe, Dr. F. Nimr, Mr. P. Swan, Mr. W. Tyrrell.

According to a message from Petrograd, under date of September 8, a telegram from Astrabad (Persia) states that some persons unknown have killed Mr. Dadascheff, a Persian subject and formerly Russian Consular Agent at Balfrush, on the Caspian Sea. A detachment of Cossacks has been sent from Mesched Sir in pursuit of the murderers.

The death occurred last month in Jersey of Mr. J. W. Congdon, one of the oldest members of the British community in Cairo.

According to the well-informed correspondent of *The Morning Post* in Rome, it appears likely that the Moslem insurgents now in occupation of Durazzo will shortly proclaim H.I.H. Burhan-ed-Din Effendi, a younger son of the former Sultan Abdul Hamid Khan, as Mpret of Albania.

Lord Kitchener's chaplain in Cairo was the special preacher in York Minster last Sunday.

Mr. Charles Ritchie, of Glasgow, manager of the oilfields of the Anglo-Persian Oil Company in Persia, who died on February 28 last, left £8,331 personal estate in the United Kingdom.

APPOINTMENTS, PROMOTIONS, ETC.

Major-General H. B. Watkis, C.B., has succeeded Major-General the Hon. Julian Byng as Commander-in-Chief of the Army of Occupation in Egypt, Major-General Byng having been ordered for active service.

Colonel Hoff Bey, the Inspector-General for the southern section of the so-called "Armenian vilayets" of Turkey, has recently been recalled, according to the Constantinople correspondent of *The Times*. Colonel Hoff is a Norwegian, and was quite recently appointed, as our readers may remember.

Dr. Alexander Granville, Director of the Municipality of Alexandria, and Dr. Ruffer have been appointed members of the Commission for fixing the maximum prices of provisions and prime necessaries in Alexandria.

The following are members of similar Commissions:—Mr. M. V. Nixon (Galioubia), Mr. Hartshorn (Sharkia), Mr. M. A. H. Brammal (Menufia), Mr. Sidney Bray (Minia).

Mr. J. M. Norman has been appointed H.B.M. Consul for Suez in succession to Mr. Walter Norman, who has retired.

According to the *Tanin*, Sabur Bey has been appointed Mutessarif of the Sanjak of Adalia.

DOMESTIC ANNOUNCEMENTS.

BIRTHS.

MEIKLE.—On September 3, at 9, Rothesay Terrace, Edinburgh, the wife of R. Murray Meikle, Kribba, Greece, of a son.

THE ISLES OF UNREST.

If we could be sure of the sources from which the Porte derives its information regarding the course of events in Europe, there could be little doubt that every day must entail some slight abatement of Turkey's war fever. Unfortunately, the news which reaches Constantinople is not above suspicion, and it is possible that the Porte may find it as hard to gauge the political aspect of the present struggle as to discover the real significance from day to day of the military operations in France. The Rubicon, however, has not yet been passed. Talaat Bey can hardly have failed to gain some enlightenment in Bucharest, while the ill-success of Austria-Hungary both on her southern and eastern frontiers must cause Enver Pasha and his military entourage to revise some of their original calculations. So long as the German Army was carrying out with machine-like precision its magnificent advance on Paris the subtle poison poured into Turkish ears by the German Military Mission and the bribe of several hundred German sailors smuggled into Constantinople might well have turned the heads of shrewder politicians than are to be found in Enver Pasha's coterie; but now with every day's delay in taking the fatal step the prospect of wiser counsels prevailing grows brighter. If Austria-Hungary had been able to register a few victories, Turkish military officers would have been sorely tempted to trust to the star of the Central Powers while in the ascendant, in an attempt to restore the prestige of Turkish arms. But the Austro-Hungarian *débâcle* appears to bear such a close resemblance to the experiences of the Turkish Army against the Balkan Alliance that the idea of taking the field at this stage ought to have few attractions even for the most chauvinist among the military leaders. No doubt the Turkish Army is in a better condition than it was at Kirk Kilisse and Lule Burgas; but the task it would be expected to perform now, if it is to aspire to any measure of success, would be far more formidable than when it met the Bulgarians alone. The temptation to appeal once more to the sword may have taken two forms as far as the warlike element in Constantinople is concerned. On the one hand, there will have been the belief in Germany's irresistible power and the desire to draw the sword on the winning side in the international Armageddon. On the other hand, even if later it was realised that Germany was committed to a more perilous venture than she had anticipated, there would remain the hope that, amid the general preoccupation of Europe, Turkey might be allowed to settle her account with Greece without interference from any other State. Unless we are mistaken the Porte will have realized before now that this latter expectation will not be fulfilled. If it throws down the gauntlet to-day it will be called upon to face an absolutely overwhelming combination of Powers, and these would not stay their hands until Turkey had been ejected lock, stock, and barrel out of Europe, to be left the mere shadow of an Empire in Asia Minor.

Although we are convinced that for Turkey to raise the issue of war at this juncture would be equivalent to national suicide, it is impossible not to recognize that the Porte is able to make out to its own satisfaction a case against Greece. Apart from the megalomania of a military caste which has been carefully fostered by German intrigue, political considerations may well enter to a certain extent into the Porte's attitude. The old antagonism between Turks and Greeks has not been lessened by the Balkan wars. While the attitude of the respective Governments in their official dealings may be scrupulously correct, there are many ways in which the new spirit of the Greeks may make itself felt among Turks. The Greek, even after the events of 1897, has never been at pains to hide his light under a bushel. With an eminently successul campaign to his credit he is still less likely to avoid occasions of offence to a discredited rival. Again, Greek propaganda has not been buried with the acquisition of Macedonian territory, and the Porte has doubtless decided that it is more threatening now to Turkish sovereignty than it was before, on account of its enhanced influence upon the Greek *rayah*. In any case, such propaganda will be held responsible for the alleged ill-treatment of Moslems in the new Greek territories. It is not necessary to inquire whether the Porte's fears in this connection are well founded or not. As in Crete and Thessaly, so now in Macedonia, Moslems avoid being left under Greek rule, and it may seem necessary to elaborate some justification for the fulfilment of a tradition. While, therefore, the Porte may hold that the questions which call for regulation between itself and the Greek Government are vital to Turkish interests, it would be particularly attracted by any prospect of being able to settle these questions with Greece alone. To this end its diplomacy has doubtless worked, always with the reflection that a short cut to a solution of most of its difficulties would be the unchallenged command of the Ægean Sea. But events have marched too quickly for the Turkish understanding. The Balkan States have had a surfeit of war, and are in a mood to appreciate the unwisdom of the dissolution of the Balkan Alliance. The command of the Ægean Sea is no longer a question merely of interest to Greece and Turkey; it is bound up with the larger question of the peace of the Near East, and in that five States are deeply interested, and are resolved to make it for the future their special concern.

But if Turkey has a case against Greece, the latter may with equal justice feel suspicious of the Ottoman attitude. The Ægean Islands have been allotted to her by the decision of Europe as the result of a victorious war. These islands are almost exclusively inhabited by Greeks, and their incorporation within the Hellenic Kingdom has been the cherished wish of the inhabitants. Turkey, however, has refused to acquiesce in the verdict of the Great Powers in regard to at least two of the islands, and has schemed to have their decision reversed. At the same time there has been systematic ill-treatment of Greeks resident in Asia Minor, leading to the exodus of large numbers and the threatened extinction of Greek civilisation in Anatolia. The hopes entertained of the Young Turkish régime have not been realized, and the Greeks cannot be blamed for regarding their own degree of culture as being much higher than anything which the Turks show signs of reaching in the near future. This feeling must necessarily make the Greeks intolerant of Turkish supremacy. They can, however, have no desire for a further trial of strength at this moment, knowing that wilful aggression on their part must give the Turks the advantage they seek, the opportunity of meeting the Greeks in single combat. The announcement that Greek and Turkish representatives were to meet in Bucharest with a view to adjusting their differences gave rise to the hope that the joint statesmanship of the two countries would be equal to the task before it. But the reports of that meeting have not yet confirmed this expectation. The good faith of Mr. Venizelos' Government and the Greek Prime Minister's own desire to reach a satisfactory understanding will never be doubted. So far the problem has been for Turkey to put forward a statesman of the same calibre, able to co-operate in evolving a reasonable basis of agreement for the two countries.

THE LAND OF THE KNIGHTS.

PATRIOTISM OF THE MALTESE.

(From Our Special Correspondent.)

Malta, August 23.

I left London almost exactly three weeks ago, since when my sole links with England have been one stray letter, posted the day I left, and a copy of The Near East for August 14, which, most welcome, reached me yesterday. I agree with your editor that postal arrangements have been completely dislocated, but, as he recommends, strive to take the will for the deed and to believe that an enormous budget will shortly arrive to bring me up to date.

I see that in your issue of August 14 you published a letter from me written somewhere off Gibraltar, giving an account of journeyings through France. Reports that the "Goeben" and the "Breslau," after bombarding Bona and Philippeville, were lying up off the Balearic Isles and quietly scuttling merchantmen kept us and some 150 other vessels hung up for several days at Gibraltar. When we did leave, in the P. and O. "Arabia," we laid a course close to the African coast, and at night steamed with all lights dowsed so as to avoid the possible attentions of the German bogey which had at least succeeded in striking terror into all shipping in the Mediterranean. I remember how years ago when this great war was written of as a thing to come, a kind of "ineluctabile fatum," that the German bogey of that moment was the "Von der Tann." I believe the "Von der Tann" got loose in the Atlantic, but apart from this minor detail the supposed ravages wrought by this commerce destroyer were curiously similar to the moral havoc at least wrought by the "Goeben" for one short week before she took refuge in the Dardanelles.

To the Maltese in particular the escape of the "Goeben" came as a very bitter blow. He had made sure that he was to be privileged to see the great battle-cruiser towed into the Grand Harbour. Some months ago, when the "Goeben" was here on a visit, a few German sailors had the impudence to boast that they were shortly returning to take over the island. A crowd of Maltese set on the ill-advised Teutons and generally knocked them about until rescued by the police. Since then it has been the constant prayer of every pious Maltese that he may live to see the arrogant "Goeben" towed in, if necessary for greater indignity stern first.

A Premature Declaration.

When the history of the war comes to be written one of the things to be cleared up will be the premature declaration of war between England and Austria-Hungary, which probably saved the "Goeben" and the "Breslau" from the guns of the British squadron. It is known in the Navy as the two hours' war. Several fast British cruisers—the censor particularly objected to a more exact definition—were in full cry after the "Goeben" and the "Breslau," when somewhere off Cape Matapan news was received from the British Admiralty that war had broken out with Austria-Hungary. The squadron, with visions of the Austrian Fleet steaming hot foot down the Adriatic bound either for Malta or for the transports conveying French troops from Morocco to Marseilles, immediately turned to resume its task of guarding the western Mediterranean. When the declaration was found to have been some days premature it was too late to catch the German cruisers, who were already safe behind the Turkish guns and amusing themselves by holding up and examining shipping.

But these points are purely incidental to the proud position now held by Malta. Owing in great measure to a cheese-paring policy in the past, and partially also to the agreement with France regarding the defence of the Adriatic, Malta has, during recent years, considerably lapsed from the pride of place which it has held for so many years. Just now, however, it has with one bound assumed all its old importance. It lies only about sixty miles distant from Sicily—on a clear day the heights of Etna are visible—and this in itself, whichever way the Italian cat jumps, would render it of first-class importance during the present war. Then, too, it is of enormous value for the operations in the Adriatic, which is about 360 miles away. Had the French Fleet been forced to go to Bizerta and Tunis for supplies they would have been days away from their stations. As it is, hardly a day passes without some French vessel, big or little, steaming into Valetta Harbour to take on board coal or pick up despatches.

Oleanders and Dust.

There is no doubt that Malta and the Maltese are extremely pleased with themselves. They are conscious that when called upon to do so they mobilized in record time, and they are convinced that any invading foe would have a very uncomfortable time did he try to approach the rocky shores of the island. Moreover, the Maltese rather enjoys the holiday from the spade, the cart, and the pen which war conditions imply, and, unlike the Briton, he is proof against sand-flies and mosquitoes, which bivouacking on this sun-baked, treeless island necessarily entail. He is, however, deserving of all praise for the whole-hearted way in which he has thrown himself into the defence of this small but very important outpost of the Empire.

Taken all round, there is not very much to show the new-comer that we are at war. Malta always has plenty of uniforms about, but the Grand Harbour is a good deal busier than is ordinarily the case, and nearly all the retail shops have seized the opportunity to raise prices by 20 per cent. Throughout the day and particularly late in the evening the Baraccas, which are public gardens overlooking the Grand Harbour, are crowded with people watching the coming and going of countless picket boats, while as darkness draws on searchlights sweep the entrance to the harbour and far out to sea; and on the Auberge de Castille, which is now the signalling station, three red lights hoisted in line show that the harbour is closed, and that any vessel approaching will be sunk without asking questions. Apart from these outward and visible signs, however, conditions are almost normal. I am told that it is almost cool for August, and certainly since I came that depressing wind known as the Sciroc has not been blowing for more than five or six days. Many people wear dark glasses on account of the glare, and we all wish that the rocks of which the island is composed were not productive of so much dust. But there is one great saving feature from the natural point of view, and that is the oleanders.

One often associates artists with some one particular object, and as one thinks of Landseer in connection with lions or it may be dogs, so one thinks of Reynolds as *par excellence* a painter of children, and to my mind at least Sir Lawrence Alma Tadema is inextricably bound up with oleanders. Sir Lawrence would have revelled in Malta. Oleanders bloom everywhere, great masses of red and white flowers. Their warm, faintly bitter perfume fills every garden. Avenues of them line many of the roads, and although grey with dust gamely struggle on. "Mirabile dictu" it rained yesterday afternoon, and the oleanders fresh washed are looking their best this morning.

The following is the wording of a poster issued by *The Daily Malta Chronicle* to announce the declaration of war. It bears out what our Special Correspondent writes about the loyalty of the Maltese:—

THE WAR!

England has declared War. Rule Britannia! The Empire is one. We are one in heart and hand with all in the Empire. God Save our King! Send Him Victorious. That is the song of Malta.

LONG LIVE THE TRIPLE ENTENTE!

Daily Malta Chronicle Office.

THE ACTION OF INDIA.

PATRIOTISM OF THE PRINCES.

The Secretary of State for India has received the following telegram from the Viceroy, dated September 8, 1914:—

Following is a summary of offers of service, money, etc., made in India to the Viceroy. The Rulers of the Native States in India, who number nearly seven hundred in all, have with one accord rallied to the defence of the Empire and offered their personal services and the resources of their States for the war. From among the many Princes and Nobles who have volunteered for active service the Viceroy has selected the Chiefs of Jodhpur, Bikanir, Kishangarh, Rutlam, Sachim, Patiala, Sir Pertab Singh, Regent of Jodhpur, the Heir Apparent of Bhopal, and a brother of the Maharaja of Cooch Behar, together with other cadets of noble families. The veteran Sir Pertab would not be denied his right to serve the King-Emperor in spite of his seventy years, and his nephew, the Maharaja, who is but sixteen years of age, goes with him.

All these have, with the Commander-in-Chief's approval, already joined the Expeditionary Forces. The Maharaja of Gwalior and the Chiefs of Jaora and Dholpur, together with the Heir Apparent of Palanpur, were, to their great regret, prevented from leaving their States. Twenty-seven of the larger States in India maintain Imperial Service Troops, and the services of every corps were immediately placed at the disposal of the Government of India on the outbreak of war. The Viceroy has accepted from twelve States contingents of cavalry, infantry, sappers, and transports, besides a camel corps from Bikaner, and most of them have already embarked. As particular instances of generosity and eager loyalty of the Chiefs the following may be quoted:—Various Durbars have combined together to provide a hospital ship, to be called "The Loyalty," for the use of the Expeditionary Forces. The Maharaja of Mysore has placed Rs. 50 lakhs at the disposal of the Government of India for expenditure in connection with the Expeditionary Force.

The Chief of Gwalior, in addition to sharing in the expenses of the hospital ship, the idea of which was originated with himself and the Begum of Bhopal, has offered to place large sums of money at the disposal of the Government of India and to provide thousands of horses as remounts. From Loharu in the Punjab and Las Bela and Kalat in Baluchistan come offers of camels with drivers, to be supplied and maintained by the Chiefs and Sardars. Several Chiefs have offered to raise additional troops for military service should they be required, and donations to the Indian Relief Fund have poured in from all States. The Maharaja of Rewa has offered his troops, his treasury, and even his private jewellery for the service of the King-Emperor. In addition to contributions to the Indian Fund, some Chiefs—namely, those of Kashmir, Bundi, Orchha, and Gwalior and Indore—have also given large sums to the Prince of Wales's Fund.

The Maharaja of Kashmir, not content with subscribing himself to the Indian Fund, presided at a meeting of 20,000 people held recently at Srinagar and delivered a stirring speech, in response to which large subscriptions were collected.

Maharaja Holkar offers, free of charge, all horses in his State Army which may be suitable for Government purposes. Horses also offered by Nizam's Government, by Jamnagar, and other Bombay States. Every Chief in the Bombay Presidency has placed the resources of his State at the disposal of Government, and all have made contributions to the Relief Fund.

Loyal messages and offers also received from Mehtar of Chitral and tribes of Khyber Agency as well as Khyber Rifles.

Letters have been received from the most remote States in India, all marked by deep sincerity of desire to render some assistance, however humble, to the British Government in its hour of need.

Last, but not least, from beyond the borders of India have been received generous offers of assistance from the Nepal Durbar; the military resources of the State have been placed at the disposal of the British Government, and the Prime Minister has offered a sum of Rs. 3 lakhs to the Viceroy for the purchase of machine guns or field equipment for British Gurkha Regiments proceeding over seas, in addition to large donations from his private purse to the Prince of Wales's Fund and the Imperial Indian Relief Fund.

To the 4th Gurkha Rifles, of which the Prime Minister is honorary colonel, the Prime Minister has offered Rs. 30,000 for the purchase of machine guns in the event of their going on service. The Dalai Lama of Tibet has offered 1,000 Tibetan troops for service under the British Government. His Holiness also states that Lamas innumerable throughout length and breadth of Tibet are offering prayers for success of British Army and for happiness of souls of all victims of war.

The same spirit has prevailed throughout British India. Hundreds of telegrams and letters received by Viceroy expressing loyalty and desire to serve Government either in the field or by co-operation in India. Many hundreds also received by local administrations. They come from communities and associations, religious, political, and social, of all classes and creeds, also from individuals offering their resources or asking for opportunity to prove loyalty by personal service. Following may be mentioned as typical examples:—

The All-India Moslem League, the Bengal Presidency Moslem League, the Moslem Association of Rangoon, the Trustees of the Aligarh College, the Behar Provincial Moslem League, the Central National Mohammedan Association of Calcutta, the Khoja Community and other followers of Aga Khan, the Punjab Moslem League, Mohammedans of Eastern Bengal, Citizens of Calcutta, Madras, Rangoon, and many other cities, Behar Landholders' Association, Madras Provincial Congress, Taluqdars of Oudh, Punjab Chiefs' Association, United Provinces Provincial Congress, Hindus of the Punjab Chief Khalsa Diwan, representing orthodox Sikhs, Bohra Community of Bombay, Parsee Community of Bombay.

Delhi Medical Association offer field hospital that was sent to Turkey during the Balkan War; Bengalee students offer enthusiastic services for an ambulance corps, and there were many other offers of medical aid; Zemindars of Madras have offered 500 horses; and among other practical steps taken to assist Government may be noted the holding of meetings to allay panic, keep down prices, and maintain public confidence and credit. Generous contributions have poured in from all quarters to Imperial Indian Relief Fund.

INDIAN MOSLEMS' LOYALTY.

We give below, as showing the tendencies of Indian Moslem opinion at the earliest stages of the War, two extracts from the Indian Moslem Press. They testify to the universal feeling that the destinies of the Indian people and the British Empire are bound indissolubly together:—

The whole people of India will stand by their Sovereign as one man, and, untrained though they are to take up arms, they will do everything else possible in the defence of the Empire.—*The Mussulman* (August 7).

We do not even wish to talk of "loyalty" in this connection. . . . We therefore talk not of loyalty, but call this patriotism, for even if England may not need us, we have need of her. Believing in political purity rather than in political prudery, we have entered the lists with her biggest bureaucrats in India in time of peace. But in time of war the clash of steel in civic battles must cease and the voice of controversy must be hushed, and if we cannot hastily command in others an enthusiasm for this war which we ourselves do not feel, let us once and for all assure the Government that, so far as we and those within the orbit of our influence are concerned, they can sleep in peace. Let alone provincial satraps and the still greater despots of their districts, their meanest, if not their humblest, policeman will find us at his beck and call whenever civic excitement has to be allayed. More than this we cannot proclaim. Less than this we shall not confess. This is and has always been our creed, and to that we shall adhere.—*The Comrade* (August 12).

NATIONAL RELIEF FUND.

The Prince to the People.

"Buckingham Palace.

"At such a moment we all stand by one another, and it is to the heart of the British people that I confidently make this most earnest appeal.

"EDWARD P."

THE DESERT FRONTIER.

In view of the presence of a considerable Anglo-Indian force in Egypt and the possibility, which unfortunately exists, that it may be involved in war with Turkey, it is timely to recall the interesting article upon the eastern frontier of Egypt which appeared in *The Times* of May 4, 1906, from the pen of its Military Correspondent.

The Sinai peninsula is a triangular tableland, measuring 260 miles from its Mediterranean base to its Red Sea apex at Ras Mohammed, and 150 miles across from Suez to Akabah. It rises to 7,450 ft. above the sea at Mount Sinai and to 8,530 ft. at Jebel Um Shamar, gradually falling northward across the Desert of the Wandering, and draining towards the Mediterranean by the great depression of the Wady el Arish.

Two main caravan routes lead across the peninsula to Egypt from Turkish territory, the first from Rafah by El Arish to El Kantara, 143 miles; the second by Akabah through Nakhl to Suez, 150 miles.

From Rafah to El Arish the ground is sandy, and water is found only at Sheikh el Zauieh, 22 miles from El Arish. This latter town is situated among palm groves a mile and three-quarters from the beach, and it possesses numerous wells. From El Arish to Bir el Maza the distance is 32 miles and the going usually sound. At El Maza there is only one well, 35 ft. deep, with 6 ft. of water. From Bir el Maza the distance is 31 miles over soft sandy desert to Bir el Abd, where there is a considerable supply of water from wells. Katieh is 17 miles further west, and here there is a large well with 6 ft. of water at a depth of 20 ft., while a good supply of drinkable water can be found by digging at a depth of 10 ft. to 20 ft. below the surface. From Katieh to El Kantara, 33 miles, the road traverses first a marshy plain, then a long reach of holding sand-dunes, and finally 16 miles of good hard desert. El Kantara is on the east bank of the Suez Canal, and is supplied by water from the Fresh Water Canal by means of a pipe which passes under the Suez Canal. The worst part of this route is that between El Arish and Bir el Abd, 63 miles, with a single well half way.

The Akabah-Suez route is little used since the chief pilgrim traffic became diverted to the sea, but there is believed to be water at Bir-eth-Thermed, 35 miles from Akabah, a good supply at Nakhl, 40 miles further west, and wells at Meibeluk, 14 miles from Suez. This route traverses the mountains for a distance of 20 miles in the neighbourhood of Nakhl.

The section of the Mediterranean coast which flanks the road from El Arish to El Kantara is low and dangerous, offering few facilities for a disembarkation. At the head of the Bay of Pelusium, east of the Suez Canal, the five-fathom line is six and a-half miles from the beach. Sandbanks are numerous, the shore is almost dead flat, and the only remarkable feature that can be distinguished from seaward at a distance of over three miles is the sandhill at Ras Kasrun, 270 ft. high, and rather more than half-way between the Suez Canal and El Arish.

For some 50 miles, with Ras Kasrun as a centre, a long strip of reef-like sand separates an interior lagoon, Lake Sirbon, from the sea. This lagoon is from two to six miles broad. It ends about 17 miles west of El Arish, where the shallows also end, and the five-fathom line is only half a mile from the shore. Thus Lake Sirbon and the shallows of the Bay of Pelusium partially cover the sea flank of an army traversing the desert, and it is only in the vicinity of El Arish that a naval force can effect anything serious until the Suez Canal is reached, and in the Canal only by ships with guns mounted at sufficient height to fire over the banks.

The southern caravan route is not exposed to attack from seaward save at its two extremities, Akabah and Suez. The Gulf of Akabah is the continuation of the great depression in which lie the Jordan and the Dead Sea. The head of the gulf forms a circular bay, with a low and sandy shore forming the end of the Wady el Arabah, which is flanked on each side by lofty mountains. The village of Akabah stands on the eastern shore at the head of the gulf. Ships can anchor in 11 fathoms close inshore and only two cables from the Turkish fort, with good protection in northerly winds.

Thus the two main caravan routes leading to Egypt from the eastward both start from points where sea-power can exercise important influence; both traverse some 150 miles of desert where sea-power can effect little, and each is broken by a single set of wells approximately half-way across the desert.

When Napoleon invaded Syria his troops took three and a-half days to cover the distance from Katieh to El Arish and three from El Arish to Gaza. In his time there were six wells at El Arish, and in his opinion 20,000 men could be collected there. The following extract from his Commentaries is of interest:—

"Generals who have marched from Egypt to Syria or from Syria to Egypt have in all periods of history considered this desert the greater obstacle the larger the number of horses they took with them. The ancient historians declare that when Cambyses wished to penetrate into Egypt he made an alliance with an Arab King, who caused a canal to flow with water in the desert, which evidently means that he covered it with camels bearing water. Alexander sought to please the Jews so that they might help him in the passage of the desert. This obstacle, however, was not so great in ancient times as it is to-day, since towns and villages existed, and the industry of man contended with success against the difficulties. To-day scarcely anything remains between Salihiyeh and Gaza. An army must, therefore, cross the desert successively by forming establishments and magazines at Salihiyeh, Katieh, and El Arish. If this army starts from Syria it must first of all form a large magazine at El Arish and then carry it forward to Katieh. But these operations are slow, and they give an enemy time to make his preparations for defence. . . . An army defending Egypt can either assemble at El Arish to oppose the investment of this place, or at Katieh to raise the siege of El Arish, or at Salihiyeh: all these alternatives offer advantages. Of all obstacles which may cover the frontiers of empires, a desert like this is incontestably the greatest. Mountains like the Alps take second rank, and rivers the third. If there is so much difficulty in carrying the food of an army that complete success is rarely obtained, this difficulty becomes twenty times greater when it is necessary to carry water, forage, and fuel, three things which are weighty, difficult to carry, and usually found by armies upon the ground they occupy."

Since Napoleon's time railways have more than half annulled the terrors of the desert, and if Turkey ever entertains ambitious projects against Egypt, the first steps in such policy would be to secure the two jumping off places on the caravan routes and to complete the Syrian railways to these points. When once El Arish and the head of the Gulf of Akabah are made so strong that no naval force can deal with them, the progressive railway advance upon Egypt, preferably by the northern route, enters into the category of normal operations, and the British guardians of the Delta and the Isthmus lose much of the strategical advantage they now possess.

GERMAN PRESS CAMPAIGN.

The *Jeune Turc* of August 6 gives an interesting extract from the *Tasfir-i-Efkiar*, one of the Constantinople papers which is being made use of by the Germans to influence Turkish public opinion. We quote it below as an explanation of German naval strategy from a German point of view:—

D'après nous tant que la guerre sur terre ne donnera pas de résultats importants pour une partie ou pour l'autre, il n'est pas logique de s'attendre à un combat naval, car, pour l'Allemagne, la vraie guerre se déroulera sur terre. Nous croyons que l'état major allemand ne laissera pas l'essentiel pour engager sa flotte dans un combat sur mer. Tant que la guerre durera sur le continent la flotte allemande limitera son activité à la mer Baltique et y restera à l'abri de toute attaque. Si les guerres du continent prennent une forme plus nette, il n'est pas juste de rejeter la possibilité d'un combat naval. Dans un tel combat, le but de la flotte allemande ne peut-être que celle-ci. Etre coulè, mais en couler en méme temps!

A WORLD-FAMOUS PHYSICIAN.

Lecturing recently before the Persia Society on Avicenna, the physician and philosopher, poet and statesman of the Eleventh Century, Professor Margoliouth said that his philosophy was for 400 years dominant in Islam as an intelligent presentation of the system of Aristotle, with an admixture of Plato. Avicenna was born in a village of Bokhara. The information he acquired, with the exception of his knowledge of medicine and philology, was complete when he was eighteen years old. It ripened afterwards, but did not increase. His speculative works consisted of improvisations. With the problem of predestination which occupied Moslem theologians he dealt in the language of determinism. The theory of rewards and punishments he regarded as unsatisfactory, because the memory of a benefit was blurred by the delay between the benefit and its reward. For this reason he considered the Koranic paradise as a free gift and not a reward for services rendered. As to prayer, he thought that only by freeing himself from the body could man enter the presence of his Creator, and that Islamic ceremonies had only a disciplinary value. Avicenna's treatise on love was an exposition of the doctrine contained in Plato's Symposium—that love is the quest after the perfectly good and beautiful. His treatises put Avicenna in the light of a mystic who had attained freedom from material things by the road of intellectual speculation rather than the more popular methods of asceticism. He possessed a quality which was not often appreciated in a man's lifetime—the power of making original observations, and a willingness to incur unpopularity and even infamy by following the leadings of his own mind.

Sir William Osler said that the tomb of Avicenna at Hamadan was in ruins, and it was proposed that the Persia Society should undertake its repair as a tribute to the memory of the greatest of Arabian physicians. Official permission had been received. A sum of £600 was needed. The work of Avicenna was interesting as having transmitted Greek medicine to Western Europe in the Middle Ages.

THE WAR.

PRESS AND PUBLIC OPINION.

Egyptian Views.

We have been told on many occasions that an outbreak of a war in Europe in which Great Britain was involved would be the signal for a great rising in India and another, though not on so large a scale, but perhaps even more violent, in Egypt. These gloomy prophecies have been falsified by events. Indians, even bitter opponents of the Government, have eagerly given assurance of their loyalty to the Empire in the present crisis, and Indian troops will doubtless testify to the unity of the Empire in a manner not pleasant to the common foe when they meet him on the Continent. In Egypt likewise the sympathies of Egyptians are not with Germany, as may be inferred from the attitude of the vernacular Press. *Al-Moayad* says:—

Egyptians are anxiously hoping for the termination of this unhappy war, so that business in the country may be restored. That, of course, is looking at the matter from the material point of view. Morally, however, the Egyptians are thoroughly well aware that the English have always behaved in a very satisfactory manner towards Moslems—better, in fact, than any other European nation. She has done her duty towards them by looking after their security and welfare and by guaranteeing the rights of the individual. Moreover, she has given them complete freedom to work for their national, social, and economic upraising so long as this liberty did not infringe on her own policy. Germany, on the other hand, has never done a thing for the Moslems, either in the past or the present. She has no thought for any interests but her own, which she loses no opportunity of pushing forward. Also, Egyptians now look much askance at Germany, for it is she who has brought about this terrible war. For France the Egyptians have always cherished a particular affection for the profuse way in which she has spread education.

Indian Moslems' Views.

The hon. secretary of the London All-India Moslem League has forwarded to us copies of two resolutions adopted at an emergency meeting of the committee of the League. The resolutions are as follows:—

1. That the Committee of the London All-India Moslem League desire to convey, through the favour of the Right Honourable the Secretary of State for India, to His Majesty's Indian troops their good wishes for success in the opportunity accorded to them to share with their British comrades-in-arms in the defence of the Empire on the battle-fields of Europe.

2. That the Committee further desire to place on record their conviction that the Moslem States will, in the titanic struggle in which the nations of Europe have become involved, do all in their power to avoid being drawn into the vortex; and that the Turkish Government will unswervingly maintain the neutrality which it has hitherto faithfully observed, and not allow the Ottoman people to be goaded by malign attempts into any deviation from strict fidelity to its pledges.

Cairo in Time of War.

The Egyptian Gazette, of August 25, gives an interesting description of Cairo and its people in time of war. We give an extract:—

The remarkable restraint and sober-mindedness shown by all classes of the population in Egypt during the present trying conditions is nowhere more conspicuously evident than in the capital itself, where, despite the thousand and one inconveniences of interrupted postal services and extinguished bank accounts, despite many sad partings from relatives and friends whose fate in the field of battle it may be impossible to know of for many weary and anxious months, and in defiance of all disconcerting rumours, people of all classes and all creeds appear to have resigned themselves to a cheerful endurance of whatever may come, confident that their destinies are in safe hands, and that every measure that is humanly possible to relieve their anxieties and ensure their bodily safety is being taken by the authorities.

The article concludes as follows:—

And so, like Mark Tapley, Cairo continues to be "jolly under creditable circumstances." Gay holiday crowds fill the roads to the Pyramids and the Zoo; the Mousky and the bazaars seem as full and as animated as ever; the cafés at night are crowded with all nationalities; the English clubs are filled to overflowing with those who have been recalled from too-short leave, while those who have their ordinary duties to fulfil go about the town marvelling at the peaceful aspect of Cairo in time of war, and blessing the faithful Belgians for maintaining unrestricted a full and punctual service of the trams.

Effect of Russian Victories.

A Reuter's message from Petrograd, under date of September 8, gives the following account of the state of feeling produced in South-Eastern Europe by the news of Austro-Hungarian defeats:—

According to a semi-official communiqué, fugitives from the Austro-Hungarian armies relate that the losses of the latter have been enormous and that numerous regiments have been completely destroyed. The Austrians fear a rising in Bukovina. Hungarian sympathies for Russia are said to be increasing. The *Retch*, in an article, dwells upon the ability of General Joffre, the French Commander-in-Chief, and the heroic stand made by the Belgians. Private correspondents confirm the disorganisation of the Austrian armies. According to news from Galatz (Roumania), the news of the Russian victories has created general enthusiasm there. The Russian National Anthem was sung at the theatre.

From Bucharest comes a report that a revolt has broken out in the Turkish army at Adrianople owing to famine. The people of Constantinople, having found out the falseness of news published by the German semi-official news agency, are said to be crowding in front of the Embassies of the Triple Entente Powers to learn the latest intelligence.

"The Declaration of the Allies."

The declaration of the Allies that none of the three Governments will conclude a separate peace is recognized by all qualified judges as an international act of the highest moment. It defines for all the world the fixed purpose of the signatories and the character of the war. When its significance has been grasped by the masses of the people throughout Europe it will exercise a powerful influence upon belligerents and neutrals alike. Our Rome message to-day shows that it is already beginning to tell upon opinion in Italy, where it has had "a profound and salutary effect." We feel assured that, as the news is spread and permeates the popular mind, it will have a like effect on all populations with intelligence and knowledge enough to realize what it means.—*The Times* (September 8.)

The Belgian Nation.

If among our mighty men, never standing forth so valiantly able as at the beginning of this war, the Foreign Secretary seems a head above the rest, likewise among the nations hurrying on with buckling swords, little Belgium leads the host. If in the past people here have been unjust to Sir Edward Grey, the world in general has been more than unjust to Belgium. Critics called her a political artificiality; said her people were a hybrid race. We have often been told, in fact, that there are no Belgians, and that the welding of many races into a homogeneous whole was yet far distant. This war has changed all that. No more will a slur be cast about racial inequalities; no more will men in debate dispose lightly of the State and its fortunes. Whatever the result of the war, out of it will arise a noble Belgian nation, brothers to a man, and in future to be reckoned with in the councils of Europe.—*The World's Work* (September).

Austria-Hungary, Servia and the War.

The Scots' Pictorial for September 5 contains an interesting article entitled "Austria and her Troubles," which provides a good exposition of the attitude of the Dual Monarchy at the opening of the present struggle. We quote below:—

In 1914, as in 1908, Austria is guilty of a fatal impatience, a desperate disregard of circumstances. She drew her sword to cut the Gordian knot without pausing to reflect on the fact that the same cord bound together the peace of Europe. But her attack on Servia is not to be associated with the German attack on Europe. Between the firm resolution with which Austria entered upon her own little war with Servia and the reluctance with which she joined Germany's big war with everybody there is an inconsistency which wants some explaining, if we are to believe that Austria was in any sense the accomplice of Germany in a plot to undermine the foundations of Europe. It is impossible to avoid the conclusion that Austria has two quite different wars to attend to, and that she has no heart in the great one. She, too, seemed to be wondering what had gone wrong with Germany. When Germany was already at war with Russia, France, and Britain, and Austria was at war with Servia, somebody—no doubt the German Emperor—noticed that Austria and Russia were not yet at war with one another. It was with pathetic gravity that Austria formally corrected this omission. It was with pathetic gravity that the derelict barque of the Cæsars consented to set out upon what is likely to prove her last voyage.

Roumania's Attitude.

There is much significance in the fact that Roumania has warned Turkey of the danger of doing anything to complicate the present situation, since it can only mean that in sympathy at least she has ranged herself definitely on the side of the Entente. Germany has been moving heaven and earth to persuade the Porte to take up arms, and by giving advice in the contrary sense Roumania appears as Germany's opponent. This is a very welcome development. . . . Her prudent and resolute conduct during the Balkan War showed that she had retained or recovered an independent point of view and this new move is a further proof of it. We can scarcely doubt that she has been compelled to it by the realisation that Germany will respect no treaties which she finds inconvenient. If international engagements are to be treated as of no value the position of Roumania would become extremely precarious, and all her interests lie in the maintenance of the public laws of Europe.—*Globe* (Sept. 4).

W. N. WILLIS'S GREAT BOOK,

ANTI-CHRIST IN EGYPT

It is a vehement appeal to Christian England to save the children of Egypt from the open vortex of degradation and shame permitted—indeed, encouraged—by the Capitulation Laws which govern that country.

The chapter descriptive of Lord Kitchener as a civil administrator will be a revelation to even the most enthusiastic of that great General's friends and admirers.

Every voice that denounces the rampant riot of vice in Egypt will assist **LORD KITCHENER** in his GREAT IMPERIAL EFFORTS.

The Book may be ordered of all Booksellers, or direct from the Publishers, 2/4 post free, any address in the world.

THE ANGLO-EASTERN PUBLISHING Co., 48-50, Waterloo Rd., London.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

Our suggestion that British firms interested in carrying into Near Eastern countries the campaign against German trade, should send us enquiries for specific information, has already met with the fullest success, the enquiries received covering a vast ground. In some cases the desired information will take some time to collect. However, we hope to be able, in our next issue, to answer some of our correspondents, and in the meantime invite further enquiries.

***

The situation in Persia is not conducive to optimism. On another page we reproduce a rather pessimistic message from the Teheran correspondent of *The Times* which, from a private source, I must reluctantly confirm. There is no trade at the present moment with Southern Persia through the Gulf, and, therefore, the Southern Customs receipts are bound to drop. Moreover, money remittances are practically non-existent throughout the world, and Persia forms no exception. Even the remittance of news is scarce, and remarkably little comes from Persia. It is believed, however, that in Northern Persia the situation is better than in Southern Persia.

***

There was a decided tendency in the City yesterday to regard the Turkish situation as improved. Information received in authoritative circles seemed to indicate greater stability reigning in Constantinople and greater confidence in London. I understand even that the Foreign Office regards the situation as more hopeful. To a certain extent this change for the better—both as regards Turkey and ourselves—is attributed to Sir Louis Mallet's return at an opportune moment. He, together with his French and Russian colleagues, is believed to have been able to dissuade the Ottoman Government from a career of adventure and folly that would have culminated, if not in the dismemberment of the Empire, at least in its utter bankruptcy. We are glad for all concerned that Enver Pasha's pro-German proclivities and his friendship for Liman von Sanders have not been allowed to play havoc with Turkish finance, already sufficiently burdened.

***

Money remittances are, as mentioned elsewhere, practically impossible. This does not apply only to the Near East, but to all countries, and, really, no one is to blame. It is the system that is at fault. In normal times, admittedly, it works well, but we are not living in normal times, and consequently there is a perceptible hitch which can only be overcome by some sort of a supplementary organisation. I will illustrate what I mean. In ordinary times it is not difficult for a bank to send an order for payment of £10,000 to its Roumanian branch, because it is more than likely that at the same time, practically the same amount is being remitted from the Roumanian branch home. Even supposing that this should not be the case, the difference between the credit and balance accounts can easily be settled periodically.

***

In war time there are no such facilities. Consequently banks, which must all strive to keep up normal relations with their branches and thus insure the regular ebb and flow of specie, cannot undertake to remit, say, an order for payment of £10,000 to a branch in Turkey or elsewhere, even if the remitter pays down the sum in cash here, unless there is a chance that simultaneously an approximate amount is being paid in at the other end. The difficulty, I think, can only be overcome in one way: People wishing to remit money to Greece or Turkey, for instance, ought to apply direct to banks dealing with those countries, asking to be put on a list for the sum in question. The bank, in its turn, ought to communicate with its associates or branches abroad with a view to being kept informed as to remittances being made, or proposed to be made, at their end. By this means the demands of the remitters would be met in rotation and with the least possible delay. Personally, I think that this scheme is feasible; therefore, if any banks dealing with Near Eastern countries and interested in the matter wish to consider it, THE NEAR EAST will be only too ready to give them any aid within its power.

***

There is one aspect of the "War on German Trade" which must not be lost sight of, namely, Colonial produce. Within recent years Trieste has become one of the most important sugar centres in the world. She can quite easily lose her place if we go about it in the right way. We can easily control the cane trade, and as for beet, there are many districts within the Empire where the plant could thrive as well as in Germany and Austria. From an extract published on page 638 on the "German Sugar Industry," it will be seen that the war is already causing uneasiness in the Fatherland, whose exports to Turkey and the Near East are likely to dwindle. It is a golden opportunity if we only organize the industry. Incidentally, I may mention that the Balkan States will be purchasers after the war of refining plant. Up to the present the necessary machinery has come exclusively from Germany. I leave it to a British firm to decide whether the matter is worthy of its consideration. Suffice it to state that during a recent trip to the Near East I had two or three enquiries from local commission agents for the names of British firms willing to quote against German firms.

***

Another tropical plant which is deserving of greater attention in certain parts of the Empire is sisal. The Germans have specialised in its cultivation in German East Africa and, I believe, in their South Sea possessions, and are practically in control of the market. The plant fetches a good price for its fibres and the waste makes an excellent and cheap substitute for horse-hair in the upholsterer's trade. According to one authority, this waste, which represents from 15 to 20 per cent. of the material concerned, is twisted into rope, then dyed, and finally untwisted; the fibre retains the twisted character and is springy. Furniture makers, please to note.

***

I understand from the Press that the majority of German engineering firms have stopped their regular work in order to manufacture war material and an air fleet. So much the better for British trade, because it will give us a start of which we must make the best possible use. As for the airships, they are bound to be ours (or destroyed) sooner or later.

***

I wish to draw the attention of engineering firms to the U.S. Consul's remarks on Greek tobacco-growing and the demand for machinery, reproduced on page 636. Both Bulgaria and Servia have likewise acquired, as a result of the war, important tobacco fields, and should be buyers of machinery. In the last-named country the banderole system obtains, though in the former the tobacco industry is a State monopoly, which implies that the State will be the purchaser. Regarding the Salonika suggestion, I can, if desired, obtain more information concerning the leading local exporters and manufacturers of tobacco for British firms interested.

***

Last February, when the German "Association for World-Commerce" was first mooted, I referred to it in these columns, and stated that it was deserving of the closest attention. The fact that the Foreign Office has now published a White Paper dealing with the whole matter proves that I was not wrong in my estimate of the intrinsic significance of a movement which, headed by the great shipping companies, had for object the organisation of the Fatherland's forces with a view to carry on a gigantic commercial campaign against all other nations. The Press was, of course, an important factor in the campaign, and to what an extent this was realised in Berlin is now proven by Sir E. Goschen's reports to Sir Edward Grey. The whole reveals the most ignominious attempt at bribery and corruption that has ever been chronicled in the history of the world, and it is fortunate that the cat has now come out of the bag. It behoves us to fight those organs of publicity which have submitted to ruling by the German Foreign Office. Happily, as I stated at the time, though in some countries it might be easy to influence the Press, in others (and I referred to Great Britain) it would be much more difficult.

COMMENTATOR.

WAR ON GERMAN TRADE.

British Firms interested in carrying into the Near Eastern market the war against German trade, and desirous of specific information concerning the prospects there, are invited to communicate with the Commercial Editor, "THE NEAR EAST," Devonshire Square, E.C.

War on German Trade.

BOARD OF TRADE BULLETINS

A.—CUTLERY.

German exports of coarse and fine knives and scissors amounted (1912) to £1,747,800, and Austria's exports (1913) to £78,200, as against £836,000 (1913) for the United Kingdom.

Germany's exports to the Near East are relatively small, our greatest rival in that market being Austria. The following figures are available for 1913:—

Coarse knives and shears:—

Roumania	£900
Turkey	£4,700
Egypt	1,300
	£6,900

Pocket and clasp knives:—

Roumania	£3,800
Turkey	3,500
Egypt	400
	£7,700

or a total of £14.600.

Great Britain's exports of cutlery in 1913 were £15,000 to Turkey and £6,000 to Egypt. No figures seem to be available for Roumania.

[We should, in the circumstances, easily be able to increase our exports to the Near East by about £10,000 per annum.]

Greece.

Referring to Greece, the memorandum reports that a good opening for razors is reported in Salonika, where stocks are stated to be exhausted. Razors of German make are sold at 3s. 6d. to 20s. a dozen; those of English make at 3s. a dozen up to 10s. each. Razors are packed in cardboard sheaths and cases. Safety razors are not, so far, in favour at Salonika. The annual sale is estimated at £8,000 in value.

Syria.

A certain amount of cutlery is imported at Beyrout, the principal supplying countries being, in order of their importance, Germany, France, England, and Russia. Cheap goods are especially in good demand. Packing is in strong cases containing twelve packets of 12 light carboard boxes. Cash payments are made, with 2½ per cent. discount, for goods coming from England; for those from France the terms are 3 per cent. or 90 days, and for German goods 5 per cent. or 180 days. Prices are fixed franco factory or f.o.b. port of shipment for France and England; German manufacturers always offer goods delivered at destination.

B.—ENAMMELLED HOLLOW-WARE, ETC.

The estimated annual exports of Germany, Austria, and Great Britain, are:—

Germany	£1,776,000
Austria	124,000
United Kingdom	531.000

Germany's exports are directed mostly oversea, but the following show Austria's exports (1913) to some Near East countries:—

Roumania	£8,200
Turkey	4,330
Egypt	3,040
	£15,570

as against the United Kingdom:—

Roumania	£300
Turkey	16,600
Egypt	8,200
	£25,100

[If more complete figures were available for Near East imports of enamel ware, it would be found that Germany and Austria's exports together were vastly superior to ours, so that in this class of goods a decided opening for British trade is to be had without much trouble.]

The bulletin gives the following particulars:—

Egypt.

According to a German report enamelware is continually pressing out the trade in earthenware owing to the heavy cost of transport and the liability to breakage. There is a demand for every class of article as the natives are using this enamelware in rapidly increasing quantities. The trade has mostly been in the hands of Austria, but German firms have recently been making strenuous attempts to secure a greater share.

An Austrian report recently pointed out that business from Austria to Egypt was only being done under terms of strenuous price cutting. Austrians appeared particularly to feel the competition of English manufacturers.

Syria.

In a recent report the Special Commissioner sent out by the Board of Trade to Syria stated:—

The use of enamelled hollow-ware has become very general in the country, not only in the towns and villages, but has extended to the Bedouin tribes around Damascus, Homs, and Aleppo, as well as to those of Palestine. The trade is a growing one, and it is estimated that the value of the ware which is annually imported through Beyrout is between £40,000 and £60,000. Austrian and German manufacturers have the greater part of the trade. A small quantity of British-made utensils is found on the market—principally saucepans—and these are stocked by large importers in order to complete their assortment. Importers, however, state that the British-made article is too dear for the Syrian market, and although heavier and more substantial, it cannot compete with foreign goods, which perhaps may not be so good yet are cheap and are attractive in design.

Although the general colour of the ware is blue and white—white enamel mostly inside—preference is shown for the mottled colours, or what is termed "tiger enamelling," that is, enamelling in coloured lines on white grounds.

The prices, whether for French, German, or Austrian ware, are all the same for the various classes, the difference, however, being in the rates of discount allowed by the various firms. The terms given by the French manufacturers for goods enamelled in two colours, or in two colours with patterns, are:—70 per cent. discount off prices, with an extra 3 per cent. for cash; or, 70 per cent. discount with four months' credit. Packing free; all c.i.f. Beyrout. Austrian and German prices are:—70 per cent. discount with 10 per cent. off, and an extra 3 per cent. for cash on arrival of goods; or, 70 per cent. discount and 10 per cent. off, with four months' credit; all c.i.f. Beyrout; packing free. These quotations are for any colours.

Quotations are preferred in francs, as there is a 2½ per cent. difference between the rate of the franc and sterling in Beyrout, or, if quotations are in sterling, 2½ per cent. must be added on the price.

GERMAN WAR MATERIAL.

Some twenty months ago (says *Eastern Engineering* in a spirited article from which we take the following extract), we dealt in these columns, in what we consider to have been a very unbiassed manner, with the quality of German war material. We pointed out that the ammunition supplied by the Germans to the Turks during their last war was of inferior quality, and we attributed in some measure the severe and unexpected losses of the Turks to that fact as well as to the tactics of those German officers who had been instructing them in military matters. From this we endeavoured to show how ill-advised the Chinese had been in purchasing their war material from Germany and employing German military instructors. That very simple and straightforward article created a storm of abuse in the German papers, and especially in the technical Press of that country, which is largely owned by Messrs. Krupp and other makers of German war material. Since that time our words have been confirmed. . . . For the German guns and ammunition in the hands of the Germans themselves have already proved to be far inferior to those of any of the forces opposing them . . . . . The object lessons of this war will no doubt reach the uttermost recesses of the earth, and it is not necessary for us to advise the Chinese or any other nation to refrain in the future from purchasing arms and ammunition that have been "made in Germany," for it is quite certain that Germany will not be in a position to furnish anything of the sort for years to come. Possibly there may be no such country as Germany by that time, and in the interests of humanity it is to be hoped that such will be the case.

TOBACCO MACHINERY FOR GREECE

Writing in *The Daily Consular and Trade Reports*, the U.S. Consul at Salonika says that, owing to the withdrawal of the Ottoman Tobacco Régie, the Greek Government is not only facilitating the installation of independent tobacco factories, but is also proceeding to establish a so-called public factory. The purport of this establishment is to assist the small merchant. Provision will be made for the leasing of space to manufacturers who may install their own machinery and operate under the direct supervision of Government weighers and inspectors. Such manufacturers will be exempt from depositing a cash bond, the annual franchise tax, and from the payment of salaries of Government inspectors. The law in old Greece as regards the affixing of tax stamps (or "banderoles") to packages of tobacco or cigarettes has now been extended to the occupied territories. The cigarette tobacco grown in these regions is as fine as is produced anywhere in the world. The Greek refugees who have been swarming into Macedonia from Asia Minor and Turkish Thrace will for the most part apply themselves to the cultivation of tobacco, and in view of the new law, which permits the manufacture of tobacco on open competition, it is probable that several factories will be established in Salonika. A general opinion prevails that the manufacture of cigarettes will eventually become an important industry of this district.

Exporters of tobacco-manufacturing machinery should not delay in availing themselves of the opportunity to introduce their machines. In regard to the manner of entering the local market the following points should be observed:—Price must be the lowest possible, commensurate with quality. Terms should be part cash with order, *i.e.*, sufficient to cover freight charges and expenses both ways, and balance upon arrival of goods. Correspondence and printed matter should be in the French language. Information in regard to the Government requirements for the establishment of tobacco factories in this district can be obtained from Iaanis Andonopoulos, director of tobaccos, Salonika, or the Minister of Finance, Athens.

COMMERCIAL INTELLIGENCE COMMITTEE.

A special meeting of the Board of Trade Advisory Committee on Commercial Intelligence was held on August 27.

A statement was laid before the Committee as to the action now being taken by the Board of Trade to assist British merchants and manufacturers in an endeavour to secure that share of trade in colonial and neutral markets which has hitherto been in the hands of their German and Austro-Hungarian competitors.

It was reported that arrangements have been made by the Board of Trade and Foreign Office for information to be furnished by the Trade Commissioners and Consular Officers in the various Dominions and other important over-sea markets as to the commercial and financial position there, and as to the likelihood of regular payments being forthcoming. A summary of the reports will be published from time to time.

Shipping Intelligence.

FREIGHTS AND SHIPPING.

The *Morning Post* publishes from "A Correspondent" the following:—

September 7.

Cable advices have been received from Russia by London grain operators stating that for the present Turkey is permitting the free passage of the Dardanelles to grain-laden steamers. The result has been that many British steamers have made preparations to leave at once those ports in the Black Sea where they have been held up. Owing to Russia's prohibition of the export of grain, there has been a large number of steamers at various Russian ports which have had their charters cancelled, and these have so far been unable to find further employment. Their only chance has been to secure a cargo of grain from the Rumanian ports on the Danube, but owing to the attitude of Turkey in detaining steamers of various nationalities at Constantinople shippers of grain, as well as shipowners, have declined to risk the passage to the Mediterranean. It is stated that Turkey's action was dictated not so much by a desire to raise international complications as by an actual shortage of grain, and she adopted this method as a means of inducing vessels to discharge their cargoes at Constantinople. The immediate result of the granting of the facilities mentioned has been the chartering of a British steamer to load at Sulina, a port at the mouth of the Danube, for this country, for which a freight of 9s. per ton will be paid.

The better feeling as regards rates of freight is maintained, and the partial clearing off of the unchartered steamers which were dragging on the market has rendered the position much clearer. One by one they have secured employment, until there is some possibility that next week the demand may exceed the supply. Everything points to the substantial rise in freights which was foretold some days ago.

September 10.

A hand-to-mouth business is being done in ore cargoes from the Mediterranean, and a Spanish steamer was chartered to carry 4,200 tons from Carthagena, South Spain, to Maryport at the miserable rate of 5s. 6d. per ton. A simple calculation will show what a disastrous voyage from a financial point of view this will be. The cargo will cost 10d. per ton to load, 1s. 2d. per ton to discharge, the port charges may be reckoned at 1s. per ton, commissions at 3d. per ton—in all 3s. 3d. per ton, leaving the owners a net freight of 2s. 3d. per ton, or, say, £450. A period of twenty days would probably be occupied by the prosecution of the voyage, and allowing a cost of £20 daily for the vessel, this would amount to £400. In other words, a balance of about £50 would be left with which to pay war risk insurance. This sum would, of course, be immediately swallowed up by such expense, leaving the owners to face a heavy loss at the conclusion of the voyage.

CUNARD EMPLOYEES AND THE WAR.

No fewer than 115 of the Cunard Company's clerical staff at Water Street office and at their dock offices, as well as several members of the pursers' staff, have responded to the call of their King and country, and are now serving in the Comrades' Battalion. Apart from this, there are some sixty members of the clerical staffs already serving their country in Territorial Divisions and other units. This makes a total of 175 members of the staff at present with the Colours, not including members of the London and other staffs who have also responded to the call.

The Cunard Company have arranged to pay a month's salary to each member of the clerical staff who has volunteered, and thereafter to continue half-pay until the termination of hostilities. In addition, the places of all men so serving are being kept open for them.

RUSSIA AND THE DARDANELLES.

A Lloyd's Dardanelles message, dated September 3, says that Russian vessels no longer pass Dardanelles.

MERCHANT SHIPS FOR THE NAVY.

The monthly Navy List published by Admiralty authority has just been issued for September. This list, which excises the "Amphion" from the list of vessels in commission, though it includes both the "Speedy" and the "Pathfinder," includes a list of merchant vessels commissioned as his Majesty's ships.

The list includes the following:—"Alsatian," "Anglia," "Aquitania," "Armadale Castle," "Cambria," "Carmania," "Caronia," "Empress of Asia," "Empress of Britain," "Empress of Japan," "Empress of Russia," "Engadine," "Himalaya," "Kinfauns Castle," "Macedonia," "Maori," "Mantua," "Marmora," "Oceanic," "Osiris," "Otranto," "Riviera," "Scotia," "Tara," "Venetia," and "Victorian."

The list also includes the names of upwards of 100 trawlers.

The Press Bureau issued the following *communiqué* on Wednesday night:

The Secretary of the Admiralty announces that the armed merchant cruiser "Oceanic," of the White Star Line, was wrecked yesterday near the North Coast of Scotland, and has become a total loss. All the officers and crew were saved.

The "Oceanic" was a twin-screw steamer of 17,274 tons, with triple expansion engines, an indicated horse-power of 28,000, and a speed of 21 knots. She was launched from Harland and Wolff's Yard, Belfast, in 1899. Her length was 685 feet and breadth 68 feet. She had accommodation for 563 first-class and 254 second-class passengers.

NOTICE AFFECTING NAVIGATION.

The following notice affecting navigation has been issued:—

BULGARIA.

August 27.—The port of Bourgas is now reopened during daytime. Vessels approaching the port must await the pilot off Sozopol.

ROUMANIAN S.S. COMPANY.

The Roumanian Steamship Company begs to inform the public that the regular service of fast steamers *de luxe* between Constantinople, Pireaus and Alexandria has been suspended until further communication. A regular service twice a week is now running between Constantinople and Constantza, on Tuesdays and Saturdays.

HOLIDAY RESORTS ON THE GREAT CENTRAL RAILWAY.

Many tourists are now going away, and the stream will not diminish until well into the autumn. The Great Central Railway has quite a long list of attractive resorts, one or the other of which is certain to suit the taste of the most fastidious. For instance, there are the well-known watering-places of the North-East Coast—Scarborough, Bridlington, Cleethorpes, Whitby, Filey, and Redcar. Then there are the Wharfedale hydros, the Cheshire riverside haunts; Southport with its acres of glass, stretches of sand and superb marine lakes; Blackpool with its palaces of merriment and excellent service of sea excursions; the bonny banks of the Avon, where Shakespeare roamed; the old university cities; the ancient battlefields and the rustic nurseries where many of the heroes of the nation were reared.

Tourist and week-end tickets are issued all the year round, and excursion facilities are in operation during the summer. Golfers will find the line most considerate on their behalf. The highways and byways of the many districts served by the G.C.R. and its connections are a revelation to those who appreciate charming rural scenes, many of which are as yet almost unknown with their picturesque villages and farmsteads, flowery meadows, and shady lanes, where parents and their families, as well as the student of nature, may find delight amid an environment giving both physical and mental rejuvenation. A useful illustrated booklet and programme giving particulars of the various facilities may be secured on request to Publicity Office, 216, Marylebone Road, London, N.W.

Near East Markets.

SPECIAL REPORTS.

(From Our Own Correspondents.)

Bucharest. August 20.

The export of oats and of all descriptions of forage has been prohibited. Contrary to rumour, wheat, barley, rye, maize, and flour can still be exported, as well as beans, peas, lentils, rape-seed, linseed, sunflower seed, and bran, but the export of any other vegetable or animal substances, usually used for human food, is prohibited. The prohibition practically applies to grain and seed of last year's crop, as this year's wheat is only as yet coming forward in small quantities. The present crop is so large that it is expected that no export prohibition will be introduced.

Sofia. August 21.

In spite of the recent heavy rains the general harvest in the Sofia district is a good one, up to the average. The crops have almost all been gathered.

Regarding the maize crop in Bulgaria, it is expected that this year's production will create a new record.

The following information is extracted from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East:—

Seres. August 14.

The following are extracts from the monthly report for July:—

The rains during the month have been beneficial to the growing crops. The cutting of the tobacco crop has begun.

The movement of affairs during the month has been devoid of interest.

Mosul. June 30.

The following are extracts from the monthly report for June:—

Forecasts of the yield of this year's crop of gall nuts are pessimistic. There is general agreement of opinion that this year's result will be inferior to last year's, which was considered as well below the average.

In consequence of the firmness of the leading markets, the wool market here showed a good deal of animation during the first fortnight of the month. This state of affairs was due to the number of buyers, but prices declined greatly towards the end of the month.

Money has been rather plentiful owing to the exportation of wool and mohair.

Salonika. June 30.

The following are extracts from the report for May-June:—

Abundant rains have fallen during the two months, but they have not compensated for the damage which the previous drought caused. At the same time, these rains have lightened the labour preparatory to sowing the winter crops.

Business has been very restricted, exports almost nil, and imports only of prime necessaries. The enormous crowds of refugees have rendered the scarcity of these articles more severely felt.

Beyrout. July 20.

The following are extracts from the monthly report for June:—

The crops, which were believed to be more abundant than last year's, are now reckoned to be from 10 to 15 per cent. inferior. This applies especially to the wheat crop, which suffered from the frosts in April, and is said to be from 30 to 35 per cent. inferior to last year's crop. Barley and other cereals are only slightly inferior. The quality, however, is good.

The commercial activity of the month has been satisfactory. The export trade has been especially so, the exports being chiefly of wool, butter, and cereals of the old crop, these last being held by speculators and now released at the approach of harvest. Low prices of articles imported have encouraged this trade too, and some wholesalers have bought large stocks for the winter in the belief that prices will not go lower.

PRODUCE REPORT.

London, September 10.

Sugar.

English refined, cubes and pieces, are in good steady demand; for crystals and granulated there is a continued good inquiry. All standard quotations remain unchanged, though some sugars are withdrawn. Tate's cubes No. 1, 33s. 6d.; Lyle's granulated, 30s. to 30s. 6d.; crystals No. 3, 30s.; yellow, 27s. 6d. The market for foreign granulated, cubes, etc., remains quiet, but with a generally steady undertone. St. Lucia and Trinidad crystalised changed hands at 28s.; white Java quoted 24s. shipped, and 23s. 9d. for September-October shipment c.i.f. London.

Coffee.

The demand on spot remains quiet, with only small business doing at about steady rates. Regarding the terminal market, the London Produce Clearing House has issued the following circular:—It has been decided, on the recommendation of the Coffee Committee, that liquidation of contracts by brokers shall be allowed to continue by private negotiation within the following range of prices:—Deferred, September 37s. to 38s., December 37s. 6d. to 38s. 6d., March 38s. 3d. to 39s. 3d., May 38s. 9d. to 39s. 9d. To further assist liquidation latitude is given to those who have contracts open to shift positions, provided the total quantity of engagements is not increased, and that the total Clearing House engagements are lessened thereby. Every transaction to be subject to the approval of the Committee.

Seeds.

Linseed has been in quiet demand, and is easier for arrived lots. London spot Calcutta 48s., sellers 46s.; buyers, September-October, offered at 50s.; Hull-Calcutta, on passage, 48s. asked. Rapeseed.—Ferozepore, London spot, 50s. 6d. asked; bold 52s., sellers. Cottonseed. remains quiet; Egyptian-London spot, £8 10s. to £8 12s. 6d.; on passage, £8 10s.; Hull spot, £8 10s.; Bombay spot £6 5s. Canary seed, Turkish, on spot 125s. per 468 lbs. ex store.

Oilcakes, etc.

Linseed cakes are dull and inactive, as may be expected at this season of the year, and with some quantity of foreign descriptions now coming into the market values have again given way to the extent of fully 2s. 6d. per ton. Best London made sell at £8 17s. 6d. to £9. Cotton Cakes.—Although stocks of Egyptians are light, quotations are barely as strong, occasioned by the dulness of trade and further offers from the other side, with sellers of best brands at £5 10s. ex ship, and £5 12s. 6d. ex quay while English makes are without change at £5 10s. to £5 12s. 6d., and Bombays at £4 15s.

Corn.

Wheat.—The cargo market is quiet and easier, with resellers showing more disposition to take profits, especially for parcels, which are fully 6d. lower to sell. There is also more offering in Indians by first and second hands. Choice white Karachi afloat offers at 48s., September at 47s. 9d., and October-November 47s. 6d. Barley is firm with few sellers. Black Sea, 25,000 quarters, per "Navarro," arrived at Glasgow, reported part sold on landed terms at 26s. 6d. For this quality arrived 26s. 9d. is wanted, and 26s. 6d. for parcels, while Karachi afloat is quoted 29s. 6d. Maize is quiet and favouring buyers. Galatz-Foxanian, 3,310 French tons, per "Dunarea," sailed August 27, sold at 32s. 6d. Oats are dull and neglected.

ALBERT SINGER
KHARTOUM SUDAN

EXPORT OF GUM ARABIC AND SUDAN PRODUCE.

Agency for firms desirous of introducing their brands of goods into the Sudan.

Established 1900.

CYPRUS CROPS AND THE WAR.

A Cyprus correspondent writes:—

Even before the war the position of agriculturists was causing some anxiety in parts of the island. The yield of cereals was only moderate, considerable damage having been caused by unusually late rains. The progress of the disease which is attacking caroub trees is serious. The district of Kyrenia, in the north of the island, has been hard hit, as a large number of the villagers depend in great measure on the locust bean crop for a living. The yield this year is but moderate. Unfortunately, the olive crop is insignificant. As regards grapes, on which so much depends, the produce is rather disappointing. The hill villages in some parts rely largely on their fruit trees. Fortunately, walnuts and almonds will give a good return; but apples, pears and quinces have failed. Silk-worms did well.

In existing circumstances some anxiety naturally prevails. Petitions have been put forward for relief works, for delay in the collection of all taxes, etc. There is, however, no cause for alarm, as the people can rely on Government taking any measures that may become necessary.

By order of the High Commissioner, all cereal tithes (wheat, barley, oats, and vetches), which are paid in kind, and which were, as usual, advertized for sale to highest bidders, are being retained in the stores. The quantities are approximately as follows:—Of wheat, 268,000 bushels; barley, 262,000 bushels; oats, 49,000; vetches, 23,000. The exportation of grain and various commodities was also prohibited.

GERMAN SUGAR INDUSTRY.

The German sugar industry has asked the Government to cancel the prohibition of the exportation of sugar. The Government replied that at present this would be impossible, but that they would keep the application in mind, and see what they could do with regard to neutral countries.

The *Kreuz Zeitung* points out that the abolition of the prohibition is a vital question to the German sugar industry, as the production is far greater than the demand, and 25,000,000 centner must be exported. Should this not be possible, commerce and industry will suffer immensely. In the event of the withdrawal of the prohibition, the journal proceeds, German industry could avail itself of the neutrality of Italy, which would be the only country through which exportation to the Levant, Turkey, and Greece would be possible. The Netherlands, too, would be an important country for this transit trade. Another possible channel by which to get rid of the superfluous output, the *Kreuz Zeitung* concludes, would be by way of Scandinavian countries, whence export to America could be inaugurated.—Reuter.

BRITISH COTTON-GROWING ASSOCIATION.

The one hundred and twenty-seventh meeting of the Council was held at the offices, 15, Cross Street, Manchester, on September 1. In the absence of the President, Mr. J. Arthur Hutton occupied the chair.

Reference was made to the loss sustained by the association through the death of Mr. A. H. Gill, M.P., who had been a most valuable member of the Council since the association was formed. It was decided that any member of the association's staff who joined the battalion which is being raised in Manchester should be guaranteed re-engagement on discharge from Army service, and be given all the other benefits agreed upon by the leading Manchester firms. It was reported that a meeting had been held at the Colonial Office on August 19, when members of the London, Liverpool, and Manchester Chambers of Commerce, Chambers of Mines, shipping, banking, and cotton-growing interests were all represented. The question of how West African trade could be carried on during the present crisis had been discussed, and Mr. Hutton had laid stress on the importance of the Government taking over war risk insurance at a nominal premium, that shipping companies should not charge excessive freights, and that there should be better facilities for financing.

The Egyptian Cotton Crop.

(From Our Own Correspondent.)

Cairo, August 22.

On Wednesday afternoon a meeting of bankers, dealers, and cultivators was held at the Ministry of the Interior under the presidency of Hussein Pasha Rushdi, the Prime Minister; all the Ministers and the senior Government officials were also in attendance. The object of this meeting was to consider the present situation and to devise some means of financing the cotton crop pending the resumption of business and the reopening of the markets.

Serious Situation.

The position would appear to be a somewhat serious one to all concerned and to justify some special departure. The cotton crop, which is Egypt's staple product on which everything in the country absolutely depends, is about to mature, and picking should start very shortly. The moving of the crop is practically all done on credit; that is to say, the large dealers and ginners are financed by guarantees from home, either through or directly by the local banks, who have to import large amounts of gold at this period of the year.

The outbreak of war has interfered very considerably with this system. Gold can no longer flow in as in times of peace, and notwithstanding the forcing of bank-notes as legal tender, what has come in, added to the local stock, would appear to be only just sufficient to satisfy present ordinary requirements. Moreover, the closing of the markets has undoubtedly prejudiced the position of the dealers and ginners, who are no longer able to find capital in return for their old guarantees if the latter still exist under the existing conditions in Europe.

The elements to suffer in these circumstances are the Government and the fellaheen. The latter to a very large extent look to their cotton for most of their profit, and the payment of the land tax is graduated so that the heaviest instalments fall in October and November, after the crop has been harvested; in addition, with the proceeds of their cotton the fellaheen meet the cost of preparing their estates for winter and other crops.

Government Taxes.

The position is, therefore, serious, in that the fellah, unless he is assisted, will find very great difficulty in executing the preliminaries for other crops, whilst the Government will not be able to collect the important land tax instalments about to fall due, and on which it depends for the balancing of its accounts.

A great many people—and some of them are supposed to be competent men—have been freely asserting that it is necessary to devise some means for financing not only the movement of the crop, but also the picking thereof. It is, however, not necessary to go so far as that. The smallest cultivators do not require any cash to carry out the picking of their cotton. They invariably assist one another, and it is quite usual to find a man working on his holding assisted by his neighbours, who in their turn will each be similarly helped. The medium cultivators have quite sufficient money to pay their pickers, and the tightness of gold will once more prove the truth of the old adage that 'tis an ill-wind that blows no one any good, for it will cause whatever gold hoards still exist to be released and put into circulation. The large estate owners may be somewhat handicapped, but not to any serious extent.

Advance to Fellaheen.

The proposal that is now under consideration is for an advance of £E1 to £E2 per cantar to be made to the cultivators against the deposit of their cotton either in bank shoonahs or in their villages under the guarantee of the local omda. The money, which will be at least some £E7,000,000, will be supplied by the Government authorising the National Bank of Egypt to increase its note issue temporarily against the security of the cotton. If some agreement is speedily come to on this basis, then the situation will be relieved considerably. It will also undoubtedly prevent the great danger which the local cotton merchants fear—the mixing of the various pickings. Competent men point out that the first picking is the one on which the trade relies for its best quality cotton, and from which the cultivators take their seed for the following year's crop. They say that unless the fellaheen are given money with which to pay for the pickers they will not start picking when they should, but will wait until all three pickings have matured, and the whole crop will be an inferior one owing to the resultant mixture. But the argument against that is that picking will with but few rare exceptions probably not be attempted unless and until the fellaheen are assured that if they cannot sell their cotton they can at any rate obtain an advance thereon. The Government and the financial authorities have, therefore, very wisely ignored the demand for assistance for the picking, and are concentrating their attention on finding some satisfactory means of financing the crop pending the reopening of the markets, for it is obvious that the latter will automatically assist the picking, since a fellah can after picking half a cantar or a cantar obtain thereon an advance sufficient to enable him to continue operations. Out here it is confidently believed that whatever arrangement is made will not need to be for any long duration, as it is considered that with the seas now open the cotton trade will soon return to its normal state, and that the spot markets will have to reopen in order to replenish the stocks that are now held in the West, and will speedily be exhausted owing to the great demand that, despite the continuance of war on land, is bound to set in. What is required in addition to same measure for financing the crop during this interval is one forbidding the sale of cotton below a certain figure, for the new crop will, it appears, be an exceedingly large one, and it is to be feared that unless some preventive measure is introduced the fellah may be tempted to sell at an unremuneratively low price as soon as the markets reopen.

August 25.

Negotiations are still in progress with regard to the financing of the cotton crop, and it is believed that a definite decision will not be come to for about three weeks. It is, of course, out of the question for either the Government or the National Bank of Egypt to carry the entire crop over an undefined period. Everything depends on how the spinners stand—*i.e.*, how long their present stocks will last them, and what their requirements will be. Although it may be somewhat restricted, the cotton goods trade will not be brought to a standstill by the war, and so, before coming to a decision, our financial authorities are making inquiries on the above points; in addition to which they hope to get some assistance from circles interested in the cotton trade at home, and thus divide the burden. That the best possible arrangement in the interests of Egypt will be made we may rest assured, for those who have the matter directly in hand have already proved their ability by the clever manner in which they negotiated the crisis of the early days of this month.

Cabling from Cairo on September 3, *The Times* correspondent stated that the Government had intervened in the question of the settlement of cotton contracts which the Alexandria Committee decided on August 6 should be paid for compulsorily at $15\frac{3}{8}$ (talaris). The decree cancels the committee's decision, and declares the Cotton Bourse simply closed.

An explanatory *communiqué* states that the Government considered the temporary dislocation of the cotton market owing to the war too great and the interests involved too widespread to be left to the committee of the Alexandria Bourse as hitherto constituted. It has become clear that the committee's decision is of a nature to hamper the progress of the negotiations with representatives of other cotton markets and the many other interests involved, wherewith it is doubtful the committee are legally competent to deal. The Government has, therefore, intervened and has appointed an advisory committee of bankers, brokers, and dealers to examine the situation afresh. The Government's action is regarded as the wisest course, the committee's decision being too arbitrary.

MANCHESTER MARKET.

Manchester, September 9.

No new feature of any importance has transpired in the market during the past week, but certain matters of interest keep arising, and on the whole the outlook is no worse. It is thought in some quarters that a big victory on the part of the allied troops would do more to establish confidence on the part of buyers than anything else, but, speaking generally, there seems to be little hope of a definite trade revival until there is some appearance of hostilities drawing to an end. Raw cotton matters at the moment require a good deal of attention. By degrees the position in Liverpool is getting more normal. There does not seem to be much prospect of an early opening of the futures market. A serious matter, however, is that buyers in the States are purchasing raw cotton on a much lower basis of values than Lancashire spinners. The Board of Trade returns have attracted considerable interest, and on the whole the takings of our foreign customers in yarn and cloth during August were rather larger than expected, in view of the disorganisation of the world's trade. Piece goods continue to be exported to Egypt, but money is coming in rather slowly from the other side. It is not so much a question of our customers abroad not being able to remit, but difficulty is experienced as to the manner in which money should be sent. The outlets of the Levant remain under a cloud, and sellers of cloth here who depend upon those markets are very depressed. Now and again a little inquiry has been met with for India, but scarcely any fresh business has been done. No news of any importance has come through from China. Buying of any moment for South America does not seem to be near at hand. Common printing cloths are about the worst thing in the market, and can be purchased cheaply. Fair orders are still on the books of producers of light fabrics such as dhooties. There is scarcely any change for the better in home trade circles. A dragging state of affairs has existed in the yarn market. Only trifling lots have been sold in American and Egyptian qualities for home use and export. Instructions as to deliveries have been received very irregularly.

COTTON COMMISSION FOR LONDON.

The Egyptian Gazette announced on August 26 that the Egyptian Government had decided to nominate three special delegates to proceed to London and discuss the financing of the cotton crop with the proper authorities. "The gentlemen selected are:—Mr. H. Higgs, Inspector-General of the Ministry of Finance; Mr. A. G. M. Dickson, Sub-Governor of the National Bank; and Mr. Critchley, manager of the Ottoman Bank at Alexandria. Mr. Critchley is now in London, and Mr. Dickson is leaving Alexandria this afternoon for Port Said to embark on the P. and O. liner. He will travel to London via Marseilles. Mr. Dickson was only recently recalled from leave and has been here about three weeks. During his absence his duties are being carried on at Alexandria by Mr. Hornsby."

[We understand that Mr. Dickson and Mr. Critchley have left London for Lancashire, and are not expected back in London until the beginning of next week. Up to the present no decision has been arrived at in connection with the question for the study of which the Committee was appointed.]

BRITISH CHAMBERS OF COMMERCE IN THE NEAR EAST.

We give below the addresses of Chambers of Commerce established in countries of the Near East in the interests of British trade:—

Turkey.—British Chamber of Commerce of Turkey and the Balkan States (Incor.), 34-35, Tunnel Han, Galata, Constantinople. Branches.—51, Boulevard Maria-Louisa, Sofia, Bulgaria; 7, St. Theodore Square, Athens, Greece; 1, Strada Academiei, Bucharest, Roumania; 47, Kniez Mihailova Ulitcha, Belgrade, Servia. (Correspondents at Salonika and Beyrout.) British Chamber of Commerce at Smyrna, Local Honischer, 21, Smyrna.

Egypt.—British Chamber of Commerce of Egypt, 6, Rue de l'Ancienne Bourse, Alexandria, and Savoy Chambers, Cairo. (Agents in Suez and London—Messrs. Back and Manson, Egypt House, 36, New Broad Street, E.C.)

Engineering Notes.

THE IMPORTANCE OF LUBRICATION.

An Oil-Testing Device.

Suitable lubrication is conducive to the efficiency and durability of all machinery in operation. Many excellent engines and other machines have been found faulty or inefficient in their work simply because those who were in charge of them did not know that the true source of the trouble was the use of unsuitable lubricants. There are still innumerable power-users, especially abroad, who think that any lubricant can be used indiscriminately for any class of machinery, ignoring the fact that of the various kinds of lubricating oils not perhaps two of them are equally suitable for any one special purpose. There are, for example, scores of cylinder oils divided into two classes, for steam or internal combustion engines; each class being, again, divided for use according to the speed of the engine, the temperature at which it works, the load, etc. Then there are the varieties of special oils for electrical machinery, oils for special machines and for turbine work, dynamo oils, transformer oils, etc. Now, all these lubricating oils, with an infinite variety of "special ordinary" lubricants—these latter, more or less, made or prepared in Germany—are very puzzling to the average power-user, who, unable to test them, and relying on the recommendations of some "interested" expert, often gets what is unsuitable for his purpose. The result is that he soon finds a considerable decrease in the output of his machinery and frequent troubles with his plant, but never suspects the unsuitable lubrication. A knowledge, therefore, of oils and oil testing should be cultivated by all power-users, especially those abroad, as they in most cases deal with commission agents, whose technical knowledge is meagre and their recommendations unreliable.

There are several oil-testing machines, but, so far as we know, the majority are not quite efficient in proving the actual lubricating value of the oils under test, especially in the important case of cylinder oils. A new oil-testing device, however, which has recently been brought out, appears to have been constructed to meet all the needs of the most widely varying plants, and to reproduce as nearly as possible the conditions obtained in actual practice.

The New Oil-Testing Machine.

This machine determines and automatically records the properties and consistencies of the lubricants on which their value depends when in actual use. With its help engineers can now accurately determine the practical value of all lubricants, and select with certainty the cheapest qualities which will give the highest degree of efficiency for any given purpose. The speed of the machine can be varied to produce the equivalent of from 50 to 3,000 revolutions per minute—*i.e.*, a speed of the friction at surfaces of about 5 in. to 25 ft. per second. The pressure can be varied from 1 lb. to 750 lbs. per square inch. The temperature can be raised from that of the frictional surfaces when at rest to about 500 deg. C. This is more than the equivalent of the heat of dry steam produced under the highest temperatures.

In the testing of lubricating oils for use in gas engines, Diesels, and other types of oil engines, petrol engines for motor cars, motor boats, etc., they are subjected to a temperature of 150 deg. C. to 250 deg. C. according to their normal working temperature, and the amount of friction is recorded at these temperatures. A definite quantity of oil is then submitted to a test to determine its lasting properties, and should any deposit result this is at once apparent.

A special feature of the apparatus is that, by means of a high-pressure steam boiler and superheater, cylinder oils can be tested under actual working conditions. By exposing the oil to the influence of superheated or saturated steam for any period, it determines to what extent, if any, disintegration of the oils and formation of sodium takes place.

How the Machine Works.

The machine consists essentially of steel frictional blocks placed one above the other and held together at a known pressure. A reciprocating or a rotary motion is given to these by means of a small electric motor, and they are placed in a receptacle which can be heated to, and maintained at, the required testing temperature. Before the test begins the surfaces receive a unit quantity of the lubricant, and they are then brought together and allowed to rub the one upon the other until the lubricating power of the oil is exhausted. That this point has been reached is shown by an automatic recorder, which, assuming the oil to be a good one which retains its lubricating power practically unimpaired until the end of the test, draws an abrupt line at right angles to the friction line as soon as the oil is used up. If, however, the oil is one that becomes "sticky" or unsuitable during use this fact is shown by the appearance of a gradual curve instead of a straight line, indicating that its lubricating properties are feeble.

PRIZE FOR A FIBRE MACHINE.

The Russian Ministry of Commerce and Industry has made an international offer of a prize of 5,000 roubles, or about £530, for an improved method of mechanically treating flax fibre without using the ratting and breaking process. Machines must be simply constructed, and the cost should not exceed the means of the average farmer. The original competition was to be kept open till March 1 of next year, but now that Russia is involved in war it is probable that the date will be extended. This is an excellent opportunity for inventors of fibre machines, for, apart from Russia, all the countries in the Near and Far East will be interested in such inventions, since the present method of treating flax fibre is so tedious and wearisome that Oriental farmers use the expression "*the troubles of flax*" when they want to describe a long and tiresome work.

EGYPTIAN RAILWAY NEWS.

Arrest of Constructional Work.

With the exception of the doubling of the Helwan Railway and the completion of the Zifta-Zagazig Railway, all construction work has been stopped on the Egyptian State Railways, says *The Egyptian Mail*. The works stopped include the construction of the projected line from Kafr-el-Zayat in the province of Gharbia to Tala in the Menufia, and the doubling of the rails from Mehallet-Rah to Mansura on the Tanta-Damietta line.

Zifta-Zagazig Railway.

The Zifta-Zagazig Railway, on which work is being continued, was due to be opened through on May 15 last, and although delays in delivery of material, and in the construction of the bridge which is to carry the rails across the canal at Zagazig into the station there, prevented this occurring, the work is almost completed now.

Effects of War.

As showing the great effect the present European situation is having upon Egypt, it may be mentioned that the total earnings of the whole of the State Railways for one day in August were, in round figures, £E5,000, in comparison with £E19,000 on the same date last year, in normal times. The fall is partly in passenger, but more largely in goods traffic.

The Helwan Railway.

The work of improving the Helwan Railway, one of the few State Railway works which have not been stopped, is progressing by degrees. The double line from Tura has now reached Helwan station, while, with one exception, all the bridges between those two stations have been altered accordingly. The exception is a bridge between Massara and Helwan on which work is now being carried out. A large new signal cabin is in course of construction at Tura, and an entirely new platform is being made at Massara. So far nothing appears to have been done between Tura and Bab-el-Luk, and there is no prospect of the entire work being finished before October 1, as was originally contemplated.

NEWS FROM ALL SOURCES.

The express trains of the Egyptian State Railways are only stopped at stations where the annual passenger revenue is £E1,000 or more, where there are important junctions, or where coaling or watering is necessary.

It is forbidden to export any goods from any Egyptian port to any German port, or to transhipin an Egyptian port articles or goods destined for a German port, without obtaining a special licence.

Our Bucharest correspondent informs us (under date of August 20) that the Service Maritime between Constantza and Constantinople, suspended at the outbreak of war, has been resumed. Two steamers pass to and fro each week.

The *Jeune Turc* is now being sold at 20 paras, and half of the receipts are to go to the work of the Ottoman Red Crescent.

Oats, barley, and goats are now excepted from the list of prohibited exports from Cyprus.

M. Moroff has been appointed Director of the new Fisheries Section of the Bulgarian Department of Agriculture.

According to a message from Rome, under date of September 9, a telegram from Constantinople states that bubonic plague is causing ravages among the Turkish troops at Smyrna and elsewhere. Plague is also reported at Salonika.

A recent Reuter message to the East, quoted by the Egyptian Press, stated that:—The striking feature of the last Turkish opium crop season has been the steadily increasing demand for opium for smoking purposes. Notwithstanding legislation in all civilised portions of the globe to put a stop to this traffic, it is remarked, the consumption appears to be on the increase.

A committee has been appointed in Cairo (under the chairmanship of the Regent) to make a report on the cotton question. The members are Messrs. Carver, Lindemann, Delta, and Abdy.

TURKISH MORATORIUM.

The following telegram was received from Constantinople on September 4 :—

The Turkish Moratorium has been extended to October 3. The following are the principal clauses :—

1. Payment of 5 per cent. must be made on or before September 13 for debts which fell due on September 2, and on the respective maturities for debts falling due between September 3 and October 3. Payments since August 3 to be deducted from the 5 per cent.

2. Regarding bank deposits, depositors who have received since August 3 5 per cent. or more of their deposit are still entitled to £10. Those who have received less than 5 per cent. are entitled to reclaim the complement with a maximum of £10.

3. Rates of interest fixed before August 3 will be maintained as long as the moratorium lasts. If the rate was not stipulated, it will be fixed at 4 per cent. for bank deposits and 7 per cent. for other debts.

4. Protests for the non-payment of 5 per cent. on bills and commerical papers must be made within a week of the date when the 5 per cent. was due.

5. These regulations do not apply to engagements contracted after September 3.

6. Contracts with the Government are not subject to these clauses.

The amount of gold imported into Egypt from January 1 to the end of July this year was £E1,099,910, as against £E624,785 during the corresponding period of last year. The exportation of gold during the seven months amounted to £E1,004,407, against £E8,123,045 during the corresponding period of last year.

GOLD FOR TURKEY.

(From Our Own Correspondent).

Bucharest, August 21.

Thirty millions of francs in gold for the Turkish Government from Berlin has arrived at Bucharest *en route* for Rustchuk and Constantinople in charge of some bank officials. A special wagon has been placed at the disposal of the banks sending this amount, and is being strictly guarded whilst in the station at Bucharest.

[The gold referred to above is most likely intended, not for the Turkish Government directly, but for the Deutsche Bank and its associate banks, such as the Deutsche Orient-bank, etc., at Constantinople. It is also possible that part of it is intended to relieve the pressure on the Wiener Bankverein, which had to close its doors in the last week of August. Evidently the Germans do not relish the fact that the Anglo-French banks in Constantinople can meet the demand for money whereas they cannot. On the other hand, we believe the remittance to have been only £120,000 and not £1,200,000.—Ed. "N.E."]

PERSIAN FINANCE.

Cabling on September 5, the Teheran correspondent of *The Times* states that the resignation of M. Mornard, the Treasurer-General, has been accepted. M. Henynssens, Director-General of Customs and Treasury, has been appointed acting director, though he is placed under orders of the Minister of Finance, which is an infraction of the financial law of 1911 giving the Treasurer-General "direct and effective control" over all matters of finance. This is likely to adversely affect the financial administration.

With regard to the British portion of the September 8, some difficulty is anticipated in quarterly loan, obligations falling due on the prompt payment (says the same despatch), owing to a serious contraction in Southern Customs receipts resulting from the present war.

BULGARIAN FINANCE.

Reuter reports as follows from Sofia (September 8) :—

The Administration of the Public Debt and of the debts guaranteed by the Bulgarian State begs to inform the public interested that, owing to he operation of the Sinking Fund for the last half of the current year of the 1902, 1904, and 1907 Bulgarian loans, the whole of the funds intended to cover the principal, interest, etc., of half-yearly liabilities due between August and November, 1914, was definitely paid in at the respective dates, viz., May 13 and June 22 and 30, 1914, at the Banque de Paris et des Pays Bas in Paris.

If it happened that certain establishments abroad charged with the services of payment failed to cash coupons which had become due and redeemed bonds of the above-mentioned loans, this is attributable to the fact that the Banque de Paris et des Pays Bas, owing to the European War, was unable to transmit the necessary funds in due time to other establishments concerned abroad.

As similar incidents might occur, and in order that the service of Bulgarian loans should continue to operate in a regular manner and without hitch, the Administration of the Public Debt has taken steps at the said bank in order to obtain refund of the sums necessary for the payments falling due outside France. These sums will be transmitted, through the Administration, as they are required, to the establishments charged with the service.

NATIONAL BANK OF BULGARIA.

State Bank of Emission. *Established 1879.*

Head Office - - SOPHIA.

Branches at Sophia, Roustschouk, Varna, Philippopolis, Tirnovo, Burgas, Widin, Plevna, Sistov, Sliven, T.-Pazardjic, Shumla, Stara-Zagora, Gabrovo, Dede-Agatch, Xanthie, Gumuldjina, and 70 agencies.

CAIRO NOTES.

(From Our Own Correspondent.)

Cairo, August 25.

State Finances.

At this juncture it is, perhaps, interesting to note the figures of the State Accounts for the first quarter of the new financial year—April to June—that have just been published. The revenue amounted to £E.4,056,608 and the expenditure to £E.5,115,320, as against £E.3,733,424 and £E.5,113,004 respectively during the same period of 1913, that is to say, while the receipts have risen by £E.323,184, the expenditure has increased by £E.2,316 only; in other words there is a net improvement of £E.320,868 on the quarter's working.

Under receipts Land Tax fell off by £E.20,157, divers receipts by £E.21,864 and rent of Government land by £E.17,709, but Customs increased by £E.59,592, tobacco dues by £E.61,887, railway receipts by £E.24,176, Post Office by £E.8,393, Ports and Lights by £E.11,528, sale of land by £E.32,687, and extraordinary receipts by £E.143,770, whilst the Domains figure for £E.46,128.

On the expenditure side, whilst various departments attached to the Ministry of Finance, the Public Health Department, the Ministry of Public Works, all show substantial increases, there are under the new system no special credits, hence the net increase of only £E.2,316 on balance.

With external trade at a standstill, we must expect a substantial drop in railway and customs receipts starting from the beginning of this month. The Government foreseeing this has given orders to stop all new works and to reduce all expenditure to a bare minimum. At the same time it has ordered the dismissal of all the temporary employees whose services are not absolutely necessary for the conduct of State business. This measure has given rise to a lot of adverse comment, but under the circumstances, however hard individually it may be, it is fully justified, for the Government, which has stopped all its new works expenditure, cannot be expected to keep on the large body of temporary officials engaged on those works, especially as it is exceedingly doubtful when it will be possible to resume them. It is true that the deficit on the quarter's budget—there is always a deficit, which is recovered in the autumn from the land-tax—has been reduced by £E.320,868; that improvement cannot be expected to be maintained during the next few months, so a policy of strict retrenchment is amply justified, until normal conditions set in once more.

Price of Food-Stuffs.

Although there is absolutely no just reason for their attitude, local merchants are still charging high prices for ordinary commodities and necessaries of life. The better-class foreign dealers have returned to their old tariffs, but it is the lower order of native and foreign tradesman that is trying to squeeze the inhabitants. It is purely a matter of trying to make hay while the sun shines with them, as the stocks held in this country are ample for the time being and further supplies are coming in as in times of peace. With regard to cereals, there is plenty and the outlook is excellent. An exceeding large millet crop is now ready for harvesting, a similarly large maize crop has just been planted, and supplies of flour, wheat and livestock have been contracted for by Government.

As, however, notwithstanding all this, prices remain high, a decree has been promulgated instituting in each Governorat or Mudiria special commissions empowered to fix every week the maximum prices at which the majority of necessaries can be sold.

THE POSITION IN THE CITY.

(By Our City Editor.)

The Committee now has a very fair idea of the position of its members. What the total liabilities of the Stock Exchange are no one knows and no one ever will know, because the Committee has not asked the members to state exactly how much each individual has borrowed from his fellow-broker or jobber. The general idea is that the Government should come in and help, but this is a most improbable event. No reasonable person outside the Stock Exchange expects the Government to contango the open account for an unlimited period. This would indeed be setting an official seal upon Stock Exchange gambling, and it would be deeply resented by the taxpayer, who in the end would have to pay the bill. It was bad enough to compel the taxpayer to come to the assistance of the bill brokers; it would be utterly unreasonable to ask him to support some of the wild gamblers who are now in such dire difficulties.

Another scheme for re-opening the House, and one which meets with a good deal of approval, is the formation of a trust to carry the open account. Many suggestions have been made as to who shall find the money for such a trust. It is quite clear that the Stock Exchange itself could not find the money, for it is quite unable for the present to meet its own liabilities. It is also certain that the few members of the House who have retained their wealth in a liquid form will certainly not utilise their resources in carrying an account of which at least 30 per cent. is definitely bad, and on which a huge loss must accrue.

These trusts are always a favourite method of getting people out of difficulties. But in almost every instance they are a failure. Everyone remembers how Central Mining was formed and what wonderful things were expected. Most of us remember that in the Baring crisis quotations were to have been supported by the help of the Bank of England and other financiers. Nevertheless, in spite of the strength at the back of the trust, prices steadily dwindled for years. As a matter of fact, these trusts have exactly the opposite effect to that which is intended; they keep vast loads of stock hanging over the market; no one will buy shares because they are perfectly confident that the price will fall; and as a result dealing in stocks and shares is made more difficult and business is atrophied.

Messrs. Goddard and Smith state that they propose holding auctions for the purpose of selling stocks and shares, and they claim that these auctions will be under the patronage of the Treasury. I do not see what the Treasury has to do with stocks and shares or why any auctioneer should require the permission of the Treasury to sell anything. All he needs is a licence. However, the experiment will be distinctly interesting, and will certainly do more to bring buyers and sellers together than muddling about in the street, as the brokers are doing at the moment.

I wonder why some enterprising person does not hire a hall in the City and start a Stock Exchange upon the lines that were so popular in Western Australia at the time of the Coolgardie gold boom. People who have shares to sell or shares to buy send in limits to the auctioneer, who gets up and announces that he has a thousand Consols to sell at 75. Naturally nobody takes any notice; then he gradually reduces the price until a buyer comes along. Supposing that he sells at 69: when he opens the auction the next morning he "calls the list"—that is to say, he tells his audience exactly what shares he sold the day before and the prices at which he did the business. If the market is rising he gets eager buyers at the list price, and they bid one against another, just as dealers do in the Stock Exchange. Naturally if it falls the exact opposite occurs. All the dealings are for cash on delivery, and it is a very simple matter either to buy or to sell shares.

But, as a matter of fact, the war seems to have completely knocked all enterprise on the head. No one is doing anything and no one wants to do anything. This is extremely foolish, for there are thousands of people who would be glad to exchange one class of security for another class.

The Steel Company of Scotland, one of the best managed concerns in Great Britain, was not able to maintain its profits, and the dividend has been cut from 10 to 5 per cent. Leyland and Birmingham Rubber Company has had a good year under the enterprising management of Mr. Byrne, and maintains its 7½ per cent. distribution.

COMPANY RESULTS, &c.

Suez Canal.—The traffic receipts of the Suez Canal on the 2nd inst. amounted to 11,000 frs., against 200,000 frs. last year.

Egyptian Delta Light Railways.—Receipts for the first ten days of August amounted to £4,860 (decrease £954); aggregate from April 1, £75,760 (decrease £753).

Ottoman Railway from Smyrna to Aidin.—The receipts for the week ended September 5 amounted to £8,149, against £9,887 during the corresponding period of last year.

Anglo-Roumanian. — Production week ended August 15, 250 tons.

Anglo-Egyptian Oilfields.—Gemsah production for week 1,067 tons (last week 1,017 tons), of which Hurgada 117 tons (last week 104 tons).

Egyptian Markets (week ended September 3).—Cattle markets closed, 54; dec., 22. Cattle markets, £307; inc., £215. General markets, £273; inc., £99. Total, £580; inc., £314. Total from commencement of year, £33,641; dec., £1,613.

Ionian Bank.—The directors have declared an interim dividend at the rate of 5 per cent. per annum, tax free, for the half-year ended July 13, payable on September 22.

COMPANY REPORTS.

Bulgarian Central Co-operative.

The position of the above Sofia bank on July 31 has just been published. The total amounted to 30,555,782.55 frs. and assets included a portefeuille of 48,502 frs. and current accounts amounting to 3,334,237.87 frs. Cash in hand was estimated at 54,559.28 frs. The capital of the bank is five million francs.

Ottoman Railway.

The accounts of the Ottoman Railway from Smyrna to Aidin for the half-year ended June 30, to be presented at the meeting to be held on September 29, show a balance applicable for dividend of £98,463, but, owing to the European war and the consequent unsettled position of affairs in the Ottoman Empire, the Council of Administration propose to carry forward the whole of this amount to the next account.

THE EASTERN BANK, LIMITED.

Head Office: 4, CROSBY SQUARE, LONDON, E.C.

Subscribed Capital, £1,000,000. Paid up, £400,000. Reserved Liability of Shareholders, £600,000.

NOTES OF THE WEEK.

The events of the past week have been almost fatal to the pretensions of the Teutonic Allies to dominate Europe by force of arms. It is only left to them to do so by means of telegrams. Indeed, the latter seem to be the more efficacious weapons in their hands, for, such is the effect of reiterated, even if unfounded, assertion, that many neutral countries are by now fully convinced that the Powers of the Triple Entente have been shattered beyond hope of recognition. That both the Austrians and the Germans have suffered defeat, that the Fleets of the Entente have undisputed command of the seas, and that every diplomatic effort of Berlin to secure new allies has failed is not generally known. We can, however, assure our readers in the Near East that in the end the victories of fact which have been won by Great Britain and her gallant Allies will be of greater influence upon the ultimate terms of peace than the defeats in fiction which the Wolff Bureau inflicts daily upon the Triple Entente in the cities of the Levant. In view of this it is unwise for statesmen anywhere to behave towards the Powers of the Triple Entente as though they were broken and defeated States.

The progress of events in Western Europe makes it clear that the tide of Teutonic invasion has definitely turned in France, and is now fast ebbing away. The Germans were first checked in their attempt to isolate Paris and to break the Allied line. They were then held at Vitry-le-François, and after hard fighting were driven back all along the line. The Allies, far from being exhausted or disheartened by three weeks' retreat and constant rear-guard fighting, were in high spirits, and immediately pressed the retreating Germans. In some instances the retirement was so hurried as to become disorderly, but it cannot as yet be claimed that the failure in France has led to a complete rout. The Germans, after losing a great number of men, guns, and material—to say nothing of prestige—have turned to bay behind the Aisne. We learn, however, that their supplies of food and ammunition are inadequate, and that their men are weary and dispirited. Even a short delay at the Aisne will enable these deficiencies to be made good, and from the latest reports at the moment of writing it appears that the Allies are doing everything in their power to prevent the enemy from reorganising his shattered forces.

In Belgium the army of Antwerp has resumed a vigorous offensive which has so disturbed the invaders, already hard put to find reinforcements for France and fresh troops for the Russian frontier, that they have had to withdraw from several positions of importance. It is reported, but not as yet confirmed, that they have even evacuated Brussels—apparently the only city in Belgium which the invaders have entered without subjecting it to pillage, massacre, and destruction. The Belgians by their gallant action have once again gravely interfered with the German plans. Reinforcements actually on their way to strengthen General von Kluck's army on the Aisne have had to be hurriedly recalled, and in this way 60,000 German troops have been out of the fighting line for the best part of a week at a moment when every man was needed. King Albert's army constantly gives fresh proofs not only of valour but of the knowledge of its commanders when and where to strike at the enemy with the maximum of effect.

The victory, or, rather, series of victories, of our Russian Allies in Galicia over the united Austro-German armies has already resulted in the loss of almost the whole of that kingdom to the Dual Monarchy. According to official calculations which have taken some days to prepare, it appears that no less than 250,000 of the soldiers of the two Emperors have been killed or wounded by the Russians. The Tsar's troops have, besides inflicting these tremendous losses, also captured 100,000 prisoners, 400 Austrian and thirty-six German guns, as well as many pieces of siege artillery and quantities of stores. It is upon substantial, and substantiated, victories such as these that a victorious campaign is built, even if they fail to be reported adequately in the Press of neutral countries.

The action of the Porte in announcing the "abolition" of the Capitulations has been variously received in this country. Some people, blessed with a certain ignorance as to the exact nature of the Capitulations, have hailed it as a manifestation of praiseworthy spirit on the part of Prince Said Halim Pasha's Cabinet. Others, even less informed on the subject, have entirely ignored an event which, had it happened six months ago, would have profoundly affected the money markets of two continents and aroused the angriest of buzzings in innumerable diplomatic hives.

Digitized by Google

Without doubt the move is one of internal politics, and the proclamation almost seems to be addressed more to the Ottoman "gallery" than to the various Foreign Offices. It may be assumed that there is more weight in the protest of the Ambassadors delivered at the Porte than in the incident which gave rise to it. The Ottoman Empire for some centuries past has been engaged in contracting international obligations of singularly far-reaching nature, and it is not creditable to the intelligence of the members of the present Cabinet to assume that they are seriously of the opinion that treaties are to be so lightly evaded. Indeed it is obvious to any person that a Great Power which goes to war with another Great Power because of the violation of a Treaty in one part of Europe is hardly likely nonchalantly to acquiesce in the wholesale abrogation of documents dating back to the reign of Queen Elizabeth and repeatedly confirmed since that date.

As an example of how Capitulations may be abolished, we may point out that Japan, Siam, and Zanzibar have been able to rid themselves by means of diplomatic negotiation, tedious no doubt, but in the end far more efficacious than the somewhat unusual methods apparently in favour for the moment in Constantinople. We are fully prepared to admit that in Turkey cases have arisen where the Capitulations have been onerous, where they have militated against the best interests of the country, and, in the case of the postal privileges so widely exercised by foreign States, actually harmful to the Ottoman Exchequer. But as it takes at least two to make a Treaty, so must it take two to break one satisfactorily.

The Consular representatives of the Teutonic Powers have withdrawn from Egypt at the invitation of the military authorities, and by their departure have put an end to an anomalous situation to which attention was drawn in THE NEAR EAST of last week. The curious activities of German diplomatists in foreign centres is now notorious, and to have continued to permit the presence of these intriguing gentry in Egypt any longer might well have been taken as a sign of weakness by the native population. In any case public opinion in Cairo has become more favourable to the cause of Great Britain and her Allies since the departure of the Germans. It may be that in Egypt also the proverb holds good, "The absent are always in the wrong."

Following upon the expulsion of German and Austro-Hungarian consular officials from Egypt comes news that in several quarters on the Continent Egyptians having failed to secure the assistance they required from Ottoman consuls successfully applied for help to British officials. It may be that such inaction on the part of the Ottoman representatives was due to lack of means or of initiative, but it is strangely consonant with the attitude both of certain Ministers at the Porte itself and of the Turkish Ambassador in Washington. While Turkey remains neutral her officials, even if of Austrian descent, should be instructed to behave as befits neutrals. They should not embark upon Press campaigns against a belligerent Power, nor should they refuse aid to those who by a legal fiction are still entitled to rely upon their assistance when in distress. It is foolish in a Turk to irritate Egyptian public opinion in order to show his dislike for Great Britain.

During the past week numerous reports have been current that a new Balkan combination has been formed consisting of Roumania, Bulgaria, and Greece. The suggestion is inspiring, but unless the Porte actually begins a war of aggression for the purpose of recovering Salonika and invades Bulgaria on the way it is highly improbable that the States will bind themselves on paper to take joint action. It is only the stress of necessity which could persuade the Bulgarians to enter into a definite alliance with their two dearest enemies, or could induce the Hellenes to stand side by side with the Bulgarians, who are chiefly associated in their Press with unedifying similes and distressing accusations. Still, the fear of the Turk overcame the hatreds of the Balkans long enough to ensure his ruin in 1912-13, and it is not impossible that the Porte may again succeed in uniting the most divergent interests against it. Cabinet changes are understood to be in progress in Bucharest, and it is highly probable that the formation of a Coalition Cabinet would enable Roumania to take a more definite line in foreign policy. At least, if she cannot secure an actual alliance with her southern neighbour, she can certainly leave her Danube and Dobruja frontiers undefended should she decide to strike for the liberation of the Roumans in Transylvania at the moment when Italy is ready to set free the Latins and the Littoral.

The retirement of Mr. Streit from the control of the Hellenic Foreign Office, although greatly to be regretted, was not unexpected. Mr. Streit, a Greek of Bavarian descent, has always preferred his duties as a diplomatist—for years he was Hellenic Minister in Vienna—to those attaching to Cabinet rank and membership of the Boule in Athens. He has been Foreign Minister during an extremely difficult period in the history of Hellas. The questions of Epirus, of the Islands, of the treatment of Greek rayahs in Turkey, of the part to be played by Greece in new Balkan combinations, of the line of policy to be followed amid the European conflagration, have all been crowded into his term of office. The friends of Greece will regret that so huge a burden will now be thrust upon Mr. Venizelos, who has taken charge of the Foreign Office, owing to Mr. Streit's retirement, but they will readily appreciate the late Minister's reasons for retiring.

As we anticipated last week, the Servians have decided to attack the heart of the Dual Monarchy instead of wasting their men on the fortifications of the Bosnian frontier. The capture of Semlin and the advance into Slavonia is a notable step towards dealing a heavy blow at the Kaiserlichs on their own soil, although that soil is inhabited by men of Serb race. It has been remarked with grim humour that the Servians have now started on a punitive expedition towards Budapest, although strategic necessities seem to prescribe a certain indirectness in the course of the expedition. We wish them well in their adventure, and recognize that they have at least put an end to the shameless and pitiless bombardment of Belgrade. The Montenegrins seem to be finding that their skill in mountain warfare and their remarkable mobility is of little avail against the fortresses of the Kaiserlichs. They have penetrated some distance into the Hertzegovina, the cradle of their Royal family, but will not be able to make good their footing until the frontier forts shall have been reduced—and for this great guns are required, pieces hard to move amid roadless mountains.

Time was when the conscience of the West was stirred by reports of abominable cruelties perpetrated in the name of religion or of nationality in the Balkans. Much outcry was raised and many sought to condone the atrocities in Macedonia on the ground that the offenders were but partially civilised and were still labouring under the blighting influence of centuries of slavery. If these arguments hold good it would appear that the upholders of the grim doctrine of *Blut und Eisen* do not enjoy even that measure of civilisation which has been achieved by the most recently liberated among the former rayahs of the Turk. Every day the indictment of the modern Huns grows more grave, and both hemispheres are aghast at the record of the Kaiser's army. The most terrible allegations collected in the Carnegie Report are equalled and even surpassed by the horrible things done by the invaders of Belgium and France. We trust that when in their turn the Allies become invaders they will not allow themselves to be misled by the dreadful doctrine of reprisals against the local population, but that every effort be made to deal faithfully with those in authority, no matter how exalted, who ordered or permitted the savagery which will for years to come render the German name synonymous in ignominy and public detestation with Hun or vandal.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, September 3.

Mobilization Troubles.

Even making all allowances for exaggeration on the part of the Agence Wolff the Germans would seem to have advanced sufficiently far into Northern France to make the writer somewhat doubtful whether this letter will reach The Near East within three weeks. This being so, it is my intention to confine the scope of this letter to the discussion, not of the fluctuating policy of the Porte and Enver Pasha, which may change two or three times before this reaches you, but to the situation created by a mobilization on a very large scale.

In the first place it is to noted that the mobilization has to all intents and purposes been general. Every one from 20 to 45 has been called out, and few indeed are the exceptions that have been made. A certain number of untrained men, elderly conscripts and Christians who have never handled a gun, have been sent home "on furlough" till they are required. The exemption tax, a minimum of £T43, has been levied freely, but its yield has thus far proved rather disappointing. The capital has produced £T300,000 only, and it is believed among the well-informed that the Government will be lucky if it makes £T1,500,000 out of the mobilization.

An Economic Error.

The calling up of every class and of all able-bodied men has been an economic error. The fact that a very large proportion of Government officials has been called out prevents the authorities from collecting revenues with anything like the success that they had in Anatolia at least during the Balkan War. The same applies to a considerable extent to the revenues of the Public Debt Administration. The shortage of supplies at the capital continues, and the railways are still largely encumbered by mobilization. This prevents corn coming down from up-country. The general refusal of credit by the banks, the increased tendency to hoard, and the calling out of a large number of able-bodied men from among the cultivators, who are mostly too poor to pay the exemption tax, have made it difficult to get the harvest in. The action of the banks has also affected the position of the tithe farmers, and it is doubtful whether the Government will be able to collect much tithe revenue before December. As for Customs revenues, the requisitions in which the military have indulged with such fervour at the expense of foreign and native traders have for the time being frightened away all foreign trade from Constantinople, and what with the general disturbance caused by the War, and the lack of confidence in the intentions of Enver Pasha and his group which every foreign merchant here must feel, there is no probability of an early return of trade.

Proposed Issue of Notes.

In these circumstances it is not surprising that the issue of paper is suggested by some authorities. The banks seem at present unwilling to adopt this measure, which is also regarded with disfavour by certain prominent Ottomans who remember the disrepute into which the "Kaimés" fell. Yet it is hard to see a way out of the present stagnation unless such a step is adopted.

Finally, one must remember that very large numbers of people, especially of non-Moslems whose value as soldiers is problematical—I refer to the Greek, Jewish and Armenian petty traders, gardeners, fishermen, sailors, etc.—have been taken away from productive work, and are likely to remain away for some time to come unless Djavid Bey succeeds in persuading Enver Pasha that they will be of more use to the country if they return to their homes. This has contributed to the general rise of prices. Finally, the crowding of often underfed men in large and indifferently drained camps is likely to cause outbreaks of epidemic disease and, indeed, seems to have done so in certain localities. Any serious epidemic at the present juncture would intensify the disastrous effects already brought about by the mobilization. There is a great deal of typhus in Thrace, while cholera or something very like it is reported from the Eski-Shehir district. Many of the reservists called out are still feeding themselves out of their own pockets, and bread and water is all the Government is in a position to give to some of the corps. Yesterday the military authorities commandeered all the animals at the slaughterhouses. A few days ago they requisitioned eight barrels of caviare—this doubtless for the German mission and the Ottoman General Staff. If the five or six hundred thousand men called out throughout the Empire remain much longer under arms, instead of shortage we shall have famine in every locality where the harvest has not been satisfactory, and the Constantinopolitan will have to tighten his belt.

The German Arrivals.

About 600 Germans, mostly technical troops disguised as workmen for the Baghdad Railway, have arrived here viâ Austria and Roumania. They were detrained at Makrikeui and San Stefano, and were afterwards sent to Chatalja and the Dardanelles. Some have remained, and "give the show away" by astonishing travellers in steamers and tram cars, who wonder to hear idiomatic German spoken by soldiers dressed in the fez and in Turkish khaki. The crews of the ex-"Goeben" and ex-"Breslau" remain on board. One begins to wonder whether they will ever leave the country.

VOLUNTEERS FROM CONSTANTINOPLE.

A Reuter's telegram from Constantinople states that a meeting held on Wednesday at the British Club in favour of a movement on the part of the colony for supplying volunteers to the British Army was characterized by much enthusiasm. Up to the present (the telegram continues) twenty-three young men have volunteered their services, and handsome donations have already been subscribed to the fund.

GERMAN RESERVISTS IN PALESTINE.

(From a Correspondent.)

Haifa, August 26.

An order has been received here calling two more classes of German reservists to the colours, in addition to all their countrymen who have already left for the seat of war; and they have been notified that they must join with as little delay as possible. As most of them will have to leave their homes, property, and families quite unprotected here they seem, not unnaturally, somewhat depressed. Moreover, the hardship of the overland journey to Constantinople (and thence onward) is no light one, for most of the men must do nearly a hundred miles of it on foot, since the railway in the Taurus region is incomplete, and there are practically no riding animals available, owing to the Turkish mobilization.

In speaking to one of the Germans before he set out I expressed a hope that before he and his companions reached the *Vaterland* the war would be over, and they would therefore have no fighting. "No," said he, "no. You must not think that the Germans will ever stop fighting until they have swept out Russia, crushed France, and smashed Britain. Then we shall be at peace, and the whole world will have rest also."

ALBANIAN LETTER.

(From Our Own Correspondent.)

Durazzo, September 3.

The Mpret's Departure.

This morning, at seven o'clock, the Mpret Wilhelm left Durazzo and bade farewell to Albania—for the time being, at any rate. The sight was a depressing one, and I would not wish any nation—even an enemy nation—to have to witness the departure of its sovereign even *en congé*. For it is a compulsory holiday that King William of Albania has granted himself. It would be impossible to describe the feelings of the King's adherents. His Majesty, in spite of his customary calm, was obviously affected, and the Mpreteresha, who has a very sympathetic disposition, was profoundly moved.

Why has the Mpret had to leave Albania, where he had been such a short time? In three months the insurrectionary movement has spread through the greater part of the country. A few days ago Valona had to yield to the rebels, and with Valona in their hands the insurgents are masters of every town of importance in Albania except Durazzo and Scutari. In a few days more they would have concentrated all their forces against the capital. Nevertheless, the capture of Durazzo would have been very difficult, if not impossible, thanks to its defences and the fidelity of its garrison. Its defenders, almost all men of Kossovo and of South Albania, had sworn to remain absolutely faithful in all circumstances. Durazzo would therefore have been able to defend itself for a long time yet; and it would have been legitimate to expect the revolutionaries to become weaker, and the storm to blow over. The King might, then, have felt safe in the capital at least.

Financial Difficulties.

For over a month Albania has been confronted by an insurmountable obstacle of quite a different nature—the lack of money. More than four months ago Austria and Italy jointly paid to Albania ten million francs, as a loan payable in instalments, and through the agency of the Bank of Milan and the Vienna Bankverein. The interest on this loan was nominally 5½ per cent., but in reality 12 per cent.

This sum, so necessary for the development of the country's resources, was already expended, thanks to the expeditions against the Greeks and the insurgents; large quantities of war material, such as cannon, rifles, ammunition, and uniforms, had also been purchased; and it must not be forgotten that the receipts from the tithes had been practically nil, the country being either in a state of revolt or overrun by the Greeks.

Such a large loan was a heavy burden on the country's resources, but that fact did not prevent Essad Pasha and his associates from spending it with the greatest freedom in drawing up the budget. As a result the International Commission of Control, which is especially charged with the control of the country's finances, found a month ago, when it was investigating the financial situation, that of the ten millions 6,700,000 were already spent, and 3,000,000 francs was due for the payment of certain accounts owing to Italian and Austrian companies. Thus the Albanian Treasury had only 300,000 francs available; and this sum was in the banks which had advanced the loan; and as the International Commission of Control could not leave Albania without funds, it had decided to arrange for a further advance of one million francs by the two banks already mentioned, at the same nominal rate of interest. But the general war was on the point of breaking out, and there were difficulties in the way of placing the Albanian Government in possession of the sum intended for its use. The Minister of Finance himself went to Rome to see what could be done, in company with the Albanian Minister in Rome. But all their efforts were useless. Italy opposed her veto and refused to hand over to her banks not only 500,000 francs, the half of the new loan, but also the half of the 300,000 francs! And thus Albania found herself left in the lurch, without money, without means of carrying on.

Italy's Hostility.

Italy has deliberately created all these difficulties. She has watched and waited for her right moment; and she has been rewarded. Austria-Hungary, desiring to humour an ally whose good faith seems rather doubtful, has not dared to cross her. Ever since Albania was made an autonomous State, Italy has shown but little sympathy towards her, and is quite unfavourable to national development, as witness her protection of Essad Pasha. This unfriendliness on the part of Italy was accentuated after the affair of Essad, which was regarded by the Italians as an attempt to undermine their prestige and to increase the influence of Austria-Hungary.

The Mpret's Manifesto.

On his departure from Durazzo the Mpret issued a proclamation announcing to the Albanians that in consequence of the difficulties created by certain short-sighted spirits, by passion, and by the general war, having complicated the situation, he found himself forced to leave for the West, but that his thoughts would always be with Albania, and that he would hand over the Government to the Commission of Control during his absence. What the Commission will do, and what the insurgents will do, too, we shall see in a few days.

Pessimists say that Prince William will never be able to return to Albania, and that he must regard the pleasant dream of his reign as finished and done with. His return, they say, is out of the question; for he enjoys the good wishes of only part of the population, and the remainder is hostile to him. The optimists, on their side, consider that his return is possible, since the revolt must soon die out, and a reaction in the Mpret's favour must take place. I shall not attempt to prophesy.

As to the past, however, the mystery of the Albanian revolt, it is possible now to speak with some certainty. There can be very little doubt that the insurrection was fomented by Greece and Servia, and supported by the Powers that protect those two countries. Greeks and Servians both made use of Young Turk emissaries to stir up the religious sentiments of the Moslems, and to play upon their reactionary tendencies; and, in this direction, the ground may be said to have been well prepared by Essad Pasha and his adherents, who never hesitated to appeal to the lower instincts of the mob in order to achieve their selfish objects.

When the Mpret arrived the country was in a quite abnormal condition. Essad and Ismail Kemal had let passions loose and stirred them up. Essad especially had been extraordinarily active in his endeavours to secure a Moslem Prince, and has roused fanaticism to a dangerous point. The treacherous policy of Greece and the crimes of the soi-disant Epirote Government further complicated the combined action of the Young Turks (real, or so-called, as the case may be), and of the reactionaries who represented the party of Essad. The Government found itself without any means of enforcing its authority—and without any real authority. On the other hand, Scutari, which had an international administration, was fertile soil for intrigues of all sorts.

At present the only districts openly loyal to the Mpret are the mountains of Hasi, Luma, Mat, and Dibra, all close to Servia. The danger across the border and the memory of recent foreign domination has taught them wisdom.

NOTICE.

The Sadr Anjuman-i-Ahmadiyya, Qadian, has the sole right to publish the English Translation of the Holy Quran with notes which have been prepared under its order by its employee, Moulvi Mohammed Ali, M.A., LL.B., Editor of the "Review of Religions," Qadian.

This Anjuman has already spent about Rs. 13 000 on this Translation, and now appeals to the generous lovers of Islam for subscriptions to publish it. It has been brought to our notice that attempts are being made elsewhere to raise money for the same purpose. It is therefore notified to the public that no other individual or association except the Sadr Anjuman-i-Ahmadiyya, Qadian, has the proprietary right to the said translation, and has therefore no right to raise money for publishing it. Gentlemen who are willing to render pecuniary assistance for this purpose are requested to make all remittances to the Financial Secretary, Sadr Anjuman-i-Ahmadiyya, Qadian, Punjab.

The Anjuman is a responsible body registered under Act No. XXI of 1860, so our friends may safely send in their money here, whereas those who will remit money elsewhere will place their quotas in unauthorised hands.

SHER ALI, B.A.,
Secretary.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, August 31.

Egypt's Peaceful Condition.

The month of Ramadan and the succeeding Feast of Bairam are now things of the past, and Egypt will henceforward assume her normal mode of life in so far as the war will permit her. The outbreak of the European war in the midst of the great Moslem fast gave the local authorities cause for anxious thought, and this the four-day feast, with which the month of penitential abstinence ends, did not tend to diminish. Dwellers in the East are aware that the month of Ramadan has at the best of times an irritating effect on the tempers of the Faithful, and when it falls during the height of the summer, when the period between dawn and sunset is at its longest and the privations are consequently hardest, that effect becomes still more acute. Whilst it would be absurd to say that any serious trouble was, or is, expected, yet the fact that the low-class Europeans are not unnaturally in a somewhat excitable state led the authorities to fear, and prepare for, collisions between the native and foreign elements. When such collisions have taken place in the past the low-class foreign elements have always been responsible, but the physical privations which the natives were undergoing might, not unnaturally, have been expected to contribute to the risk on this occasion. Nothing of the kind has come to pass, however; the thirty-four days of fast and feast have come and gone without any untoward incident. Indeed, I am informed that the crime statistics for the period show a marked diminution. The Egyptian population, Moslem and Christian, native and European, is to be congratulated on the excellent manner in which it has conducted itself since the outbreak of the European war, despite the very trying, and at times irritating and unpleasant, experiences it has gone through; and one is encouraged to hope that it will continue to show the same restraint, patience, and dignity during the no less trying months that lie ahead.

Local Interest in the War.

The progress of the war is watched with the keenest interest by all sections of the population, and the special editions of the newspapers are bought up as soon as they appear, both in the cities and in the provinces. Every effort is made to give us a true and early version of what is happening. The censors work hard to eliminate from the cabled messages received all obviously inaccurate news and details liable to excite public opinion, and the British and French Agencies issue daily through the Press Bureau official communiqués giving the latest information received from London and Paris. Perhaps the most enterprising of our local papers have been, and still are, *The Egyptian Mail* and *Al Mokattam*, both of which have a special service of telegrams, and repeatedly out-distance Reuter and the diplomatic Agencies. *Al Mokattam* distinguished itself during the Tripoli and the Balkan Wars by its wonderful cable service, which from start to finish proved most accurate, and to-day once more it is far ahead of any of its native contemporaries.

Return of Stranded Residents and Egyptians.

By every boat Egyptians and residents are flocking back to Egypt. Steamers from London have been landing whole shiploads of officers and officials, who, in order to get back, have had to sleep in the holds, living-rooms, etc., but who, it appears, have, with but few exceptions, paid no fares as yet. Various and amazing are the tales of experiences related by those who were unfortunate enough to be caught on the Continent when hostilities broke out. All are agreed, however, that they received most generous and considerate treatment at the hands of the French, Swiss, and Italians, especially the last-named, and that, if the circumstances under which they travelled and lived were at times painful and distressing, the peoples of those three countries did their utmost to alleviate the discomfort.

The Health of the Khedive.

H.H. the Khedive, who was supposed to leave Constantinople on August 25, is still in the Turkish capital, and it is unknown when he will be able to return to Egypt. Various rumours as to the true state of his health are floating about. It is impossible to prove or disprove their accuracy. The Egyptian Government still declares that he is improving in health, but the fact that three weeks ago he was stated officially to be practically cured gives a certain colour of truth to the above-mentioned rumours.

Position of German and Austrian Consulates.

The German and Austrian Consuls are straining every nerve to get the remaining reservists away, but they are finding it exceedingly difficult, as neutral ships decline to run the risk of being seized on the high seas and taken off to Malta. The plan was to ship them off to Patras, whence they were to find their way home as best they could, but it fell through, as the Greek vessels refused to take the men at the last moment. Some German reservists, it is understood, got away by an Italian steamer last week. One cannot help feeling sorry for these brave and patriotic fellows. They have been treated like dogs by the German Consular officials; those who tried to leave the country in obedience to instructions have had to pay all their expenses to and from the ports, and those who may succeed in reaching Brindisi or Patras will have to find their way home at their own expense. Yet, despite the lack of consideration, nay, the brutality shown them by their country's representatives, they are still ready to respond to the call to duty; though one hears them repeatedly compare in bitter terms their treatment with that meted out to the French and Russian reservists by their respective Consulates.

It is a pity that some steps cannot be taken to shut up the Austrian and German Consulates once and for all. As yet it is not clear, however, whether Germans and Austrians are to be treated as local subjects, or how they are to be dealt with. Egypt's peculiar political position makes the question a somewhat complex one. In the meantime, however, the Russian Consulate has issued a notice to the effect that all German and Austro-Hungarian subjects of Slav origin residing in Egypt will receive Russian protection during the war. Similarly Slavs of Servian and Montenegrin origin resident in Egypt may claim Russian protection during the war without prejudice to their rights as subjects of their respective countries at the end of the war.

The Question of Foodstuffs.

The Superior Foodstuff Commission which has been appointed consists of Said Pasha Zulficar, ex-Finance Minister (Chairman); Ali Pasha Zulficar, Governor of Cairo; Chafik Pasha, Under-Secretary for Wakfs; Lewa Blunt Pasha, and Messrs. Monteith-Smith, Craig, McKillop, and Hornblower. Its functions will be to deal with the general supply of foodstuffs and necessaries for the country. The tariffs set up by the various local commissions in conformity with the recent decree have in the main been accepted by the merchants and the general public. Certain trades, such as the butchers and bakers, have petitioned against the prices fixed for divers reasons, but, on the whole, the authorities are experiencing little difficulty in enforcing the tariffs.

Reduction in Expenditure.

Another Commission that is now sitting is the Budget or Expenditure Commission, whose task is to examine the State accounts and report on the best means for reducing

the expenditure. As already reported, the Government anticipates a considerable falling off in Customs and railway receipts, and quite possibly a diminution in the land tax collections, and consequently, as the Budget was very closely framed—in fact, a draft of £E574,000 on the reserve was provided for—the expenditure must be cut down fairly substantially. A large item has already been eliminated by the stoppage of all new works. Large numbers of temporary officials have been dismissed, and others are to be dispensed with. The dismissal of temporary officials employed on work that has been stopped is quite justifiable; but the cases of ordinary temporary officials merit a great deal of consideration, in the interests of the State alone, before any decisive step is taken, and, no doubt, the Government is giving this question its most careful attention.

Government Official's Salaries.

It is stated that the Government will probably, if the war lasts, have to reduce temporarily the pay of its staff, and various projects in this connection have been bruited about. I understand that this step is not likely to be taken for two or three months, but that it will have to be contemplated if the revenue falls off as much as is feared. The sums deducted from the salaries will be refunded by instalments after the war is concluded and normal conditions exist once more. Whatever decision is taken, it is obvious that a very extended sliding scale must be adopted, so as to proportion the deduction as fairly as possible and make the burden fall equally on the higher and lower paid officials, as well as making allowance for those who are married or have families dependent on them.

Telegraph Rates Raised.

In its endeavours to create sources of revenue the Government has decided, starting from to-morrow, to double the telegraph rates. This is an excellent step, and one that should result in an increase in receipts, though, of course, not an enormous one. (The receipts last year were about £E130,000.) It is not likely that the traffic will diminish much, for the Egyptians are what one might call "devotees of the wire," and make almost as much use of the telegraph as they do of the Post Office. One has only to notice the sheaves of telegrams that rain on an official who has been promoted, who has had a son born to him, or who has returned from a voyage abroad, to realise what a boon the telegraph has become; and in this respect the extra expense is not likely to daunt the senders.

The Local Position.

The local position has improved very much. Confidence has returned, as is evidenced in the falling off of withdrawals from the savings banks and the increase in deposits at the ordinary banks; and if only some means of financing part of the cotton crop can be found, we shall have little to complain of in comparison with some other countries. One fact appears certain, and that is that next year Egypt's cotton production must be restricted and the available area devoted to cereals.

GREAT BRITAIN IN EGYPT.

In a message dated September 12 Reuter's Naples correspondent reports that General Thurneyssen Pasha, before his departure for Alexandria, paid a very high tribute to Great Britain's rule in Egypt. In an interview, Thurneyssen Pasha, who is first Aide-de-Camp to the Khedive, declared that although he was himself an Austrian he could assert on his word of honour that no anti-English revolt could occur in Egypt, where English rule was solidly and unshakably rooted.

The Egyptian Gazette (of August 31) states that the Servian Government has instructed its representative in Egypt to engage a certain number of surgeons and physicians from that country, offering surgeons a salary of from 500 to 600 francs, and physicians from 400 to 500 francs per month. In addition to the salary the Servian Government offers the doctors three francs per day for food.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

A PLEA FOR SERVIA.

To the Editor of THE NEAR EAST.

Sir,—It is to the credit of the Near East that its voice has already been raised in recognition of the heroic part played by the little Servian nation in this great struggle. Servia has, it must be admitted, often been singularly unfortunate in her rulers, and her reputation has cruelly suffered for the dark pages which they have written in her annals. But, as a nation, she has the right, nevertheless, to be proud of the part she has constantly played in the emancipation of the Balkan Peninsula. More than 100 years ago she was the first to rise against Turkish oppression, and it was the plucky, if losing, fight she put up in 1876 against the Turks which prepared the way for the intervention of Russia and the liberation of Bulgaria. After that it was no longer Turkey who chiefly threatened her independence. There has been no more discreditable chapter in the history even of Austria than that of her relations with the small Servian neighbour, whom she alternately exploited and bullied. The ultimatum which she flung at Servia on July 23 has, Sir Edward Grey said on the following day, no parallel amongst the communications ever addressed by one independent State to another. Yet, on the advice of Russia, Servia was prepared to drain almost to the dregs the bitter cup forced upon her by Austria, and if the sacrifice she was willing to make in the cause of peace did not avail to avert war, it served, at any rate, to show that what Austria wanted was not surrender, but a pretext for war.

As for what she has done since Austria embarked upon her punitive expedition, may I quote the words of *The Times*:—

> The Servians numbered only four and a-half millions, and their resources are scanty, yet they have put nearly half a million men in the field and have driven superior Austrian armies headlong. Without doctors and nurses, without any help from the wealthy Powers for their sorely-tried women and children, they have boldly faced Goliath and put him to shame.

That is indeed a well-deserved tribute, but is it not time that the British people should give Servia some more substantial recognition of what she has done in the common cause? Many appeals have already been made to the generosity of the British public, but I believe that its generosity will keep pace with all legitimate appeals made to it. There is one direction in which Servia stands bitterly in need of help. On all previous occasions Servia has been able to rely very largely for the care of her sick and wounded on the sympathy of her fellow-Slavs in Russia and in the Dual Monarchy. Russian and Czech doctors and nurses invariably came forward in great numbers to relieve the strain placed upon the slender resources of the Servian Red Cross. In the present case Russia can spare nothing from her own resources, which are, it may be feared, scarcely adequate for the immense forces she is placing in the field, whilst obviously the Slavs of the Dual Monarchy, however warm their secret sympathies, can do nothing for Servia now. No figures have yet been published as to the losses incurred by Servia during the present war, but when one remembers that, in a battle of many days' duration, she has smashed up an Austrian Army of 300,000 men that has left behind it in its retreat thousands of wounded prisoners, one can readily imagine how heavy must have been the casualties on the Servian side, which was, moreover, constantly on the offensive. Some help, however small, from our Red Cross societies would bring to the people of Servia a message of sympathy and goodwill which the gallantry of her small Army assuredly deserves.

Yours obediently,

September 15. VALENTINE CHIROL.

FOREIGN INTERESTS IN TURKEY.

To the Editor of THE NEAR EAST.

Sir,—Affairs in Turkey are going from bad to worse. The Turks have gone quite crazy, and from the time war broke out have been treating British subjects most unmeritedly, violating domicile, and even threatening their lives. Now that they think that they have abrogated the Capitulations the condition of foreigners under the ban of the Young Turk military regime is indeed parlous. One of the worst features is that the local authorities pay no attention to the instructions received from the Ministry in Constantinople, and continue plundering under the guise of military requisition. Foreign interests and property are gravely menaced, and, notwithstanding the splendid efforts the Consuls are making, their intervention does not lead to any amelioration of the situation.

The abolition of the Capitulations is undoubtedly only the initiation of a plan, which the Young Turks have had at heart since they gained power, whereby the influence of foreigners in the country will be destroyed and their industries paralyzed.

What they will gain is not obvious to Western eyes, but they are pursuing that policy with a pertinacity which can only end in the economic ruin of the country and intervention of the Powers for the protection of their nationals.—I am, Sir, yours, etc.,

"ANATOLIAN."

September 15, 1914.

THE MOBILIZATION OF ADANA VILAYET.

We are indebted to a correspondent for permission to reproduce the following extracts from a letter received from Adana, and written on August 14. They give a convincing view of the state of uncertainty into which the population of Asia Minor was thrown by the orders regarding mobilization:—

The past two weeks have been teaching all peoples in this land the meaning of a general mobilization. Adana is now the military centre of this part of Turkey. Some few months ago the new barracks and quarters were made ready near the river adjoining the city. From a trustworthy source we learn that Cilicia is to provide 80,000 men. Of this number 35,000 are ready to start. Numbers more are to come to the ranks when called for. Everywhere the ages for the conscripts are from 22-45 for Moslems, and up to 32 for non-Moslems, as the latter have not been in training like the Moslems. Now a fresh order comes. All men are to present themselves up to 45, whatever their calling, station or ability. This includes students, teachers, pastors, who previously have been exempt. Of course, money is greatly needed by the Government, therefore those who can pay a ransom of from 40 to 60 liras will be exempt.

Can you realise what this means to the families dependent on the men? This is the most important time of the year, when the winter food stores are prepared, and next month the cotton picking season starts, when great numbers take up this work to gain money for their rents and for the winter, just as is done by our hop pickers. Now the men are taken from the fields and shops, and all business is at a standstill. Factories and shops are closed; so are the banks; and the flour and large food stores are shut by order of the Government, in order to keep their stocks for the army. Food prices have advanced about sixty per cent., and may soon be double. The women cannot do the work in the fields, etc., as the Bulgarian women did in the late wars, for they have never been used to such labour. They cannot go for the cotton picking in the villages without the men or without animals. If the Government does not do something to disband the army there must be famine.

Mrs. —— writes that the conditions in Tarsus are distressing in the extreme. She went one day to Mersina and found the shops shut, no vessels in the harbour as usual, no business, the women crying. She bought a few things at a well-known shop and stayed a long while, but nobody else came in. The owner of the shop had been forced to give a lot of strong calico to make shirts for soldiers. From another merchant 50 liaras' worth of oil was taken, needed for the railway, which is now in the hands of the Turkish Government, as the German officials and workers have been recalled to the Fatherland. Here, I may add, even the French Jesuit priests have been recalled to stand by their country.

Tarsus region was to supply 600 horses, but so many have not yet been found although Arab horses, draft horses, and all horses able to work (as far as found) have been taken. This again deprives I know not how many of a livelihood. Mrs. —— says one sees only lame horses and donkeys going about. A good many families, especially Moslems from Yeila, have had to return to the city, not knowing how to live alone. It is, however, a great blessing for all who are out of the heat in summering places, and much wiser for all who can do so to remain quietly, especially the foreigners, who by going down might unsettle the natives and cause panic.

Again, we do not know the real reason for the country's mobilization, although I wrote you reports we heard. The soldiers themselves do not know. And now, why this added call for men without any forward movement is a mystery, unless it be that the older men and untrained are to be left in charge of the towns, etc., when the army leaves the vilayet.

Yesterday, when I was in Namraum—I went down for two days—I heard of this added call for more men, and told M—— of it on my return. He did not fully believe (he has always been of the exempt class in the past), but this morning the report was confirmed, and, after hastily preparing, he has gone down to Namraum to understand the order, and may have to proceed to Tarsus to show up. Prison or death is the penalty for those who do not appear and present themselves at this time. I do not think there is any fear of his going to the front, but he may have to remain in Tarsus. Whether his medical note testifying to his inability to endure strain will be heeded or not remains to be proved. His brother has been taken, leaving his wife and mother. I could tell you of many others, but you do not know them.

Think not we are unmindful of the movements, fighting and suffering in other countries. All news from any source is quickly passed around, but as yet we have not had one foreign paper or even letter mentioning the war or conditions in any of the countries. Only "strained conditions between Austria and Servia." However, telegrams, if not altered before reaching, have told much in few words. A great battle; Liège taken by the Germans! Against whom? Belgians, French or English? A great sea-battle between English and Germans, and many vessels sunk. Russia moving towards Vienna, and Germany towards Russian soil!

August 15.

I told you M—— started prepared to proceed to Tarsus. He found friends in Namraum doing likewise. Just at that time fresh word came from Tarsus that the Government has postponed calling out the older men for a few days, giving date. Therefore, M—— was about to return when the Government doctor of Namraum came riding up with telegraphic news just received that the army was going to be disbanded or demobilized. We have scant parliamentary news, but enough to understand that there has not been union in maintaining this warlike defensive attitude. It was also added that the Dardanelles would be opened. This is the last word I have to give to-day.

LATER.

News of last evening not confirmed, though it may come to pass. Therefore, M—— goes down to Namraum to-morrow, to start for Tarsus early in the morning. I expect many others will also be going down, if the Government order is not clear enough for people to understand whether they are to appear or not.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

Egyptian Prize Courts. Sept. 10.

The Prize Courts (Egypt, Zanzibar, and Cyprus) Bill came up for second reading. This Bill, which is a Government measure, provides for the establishment of prize courts in these three places. The existing courts will have the same jurisdiction as a Vice-Admiralty Prize Court.

In Committee, Mr. Booth complained that other British settlements were omitted from the Bill.

In reply, Sir J. Simon (Attorney-General) said the three places mentioned in the Bill were places which, for administrative convenience, were found to require, or were likely to require, prize courts, although he did not know that they would need to use all three as such. The Government did not wish to multiply the number of prize courts unnecessarily.

The Bill passed through Committee, and was subsequently read a third time and passed.

Civil Servants in Egypt. Sept. 14.

Explaining a new Bill introduced by the Government for amending the Superannuation Acts, Mr. Montagu (Financial Secretary to the Treasury) quoted as an example of the need for such an Act the case of some Civil servants in Egypt. "I have in my mind," he said, "a case where an English Civil servant was lent to the Egyptian Government. He has reached the age of sixty-two, and he cannot get the pension earned in this country because he was lent to the Egyptian Government." This will be remedied under the new Bill, which will enable gratuities or pensions to be paid to English Civil servants lent to a foreign or colonial Government, even though the time for retirement arrive while he is still employed abroad.

The Bill was introduced and formally read a first time.

Dardanelles Mines. Sept. 15.

Mr. Hunt asked the Prime Minister whether his Majesty's Government had received information that automatic contact mines have been laid down by German agents in the Eastern Mediterranean in the track of neutral shipping; and, if so, whether he would propose to neutral Powers that they should, in the interest of common humanity, assist in ridding that sea from these engines of destruction laid in neutral waters.

Dr. Macnamara replied: A report to the effect stated was received shortly after the outbreak of the war, and immediate steps were then taken to counteract the supposed danger to shipping, but so far as I am aware no mines have actually been found. Drifting mines have been reported as being set adrift from the Dardanelles.

Armenian Reforms.

Mr. Aneurin Williams asked if the Foreign Secretary could state what was the present position of the proposals for the reforms in Armenia and of the two European Inspectors-General intended to be employed by the Porte in connection therewith.

Sir Edward Grey: I understand that the two European Inspectors have now proceeded to the scene of their duties. I have no further information.

Civil Servants in Egypt.

The Superannuation Bill (referred to above) was read a second and third time, and formally passed.

BULGARIAN LEGATION FOR U.S.A.

In a letter dated July 26, which only reached us on Monday, our Sofia Correspondent writes:—

Owing to the great number of Bulgarian emigrants to the United States, the Bulgarian Government has decided to establish a Legation in Washington. It will thus be in a position adequately to look after the interests of the Bulgarian subjects who are scattered all over the States.

VOLUNTEERS IN THE SUDAN.

It is gratifying to learn from *The Sudan Times* that Omar Effendi, the eldest son of the Khalifa Abdallah-el-Taayishi, who led the Dervish hordes against the British, has offered his services as a volunteer in the British Army, saying that his example will no doubt be followed by many others of his countrymen.

The Sudan Times understands also that many Syrian officials and others offered their services. They were thanked for their loyalty to the Government, and were informed that their applications had been sent to the proper quarters.

THE CAPITULATIONS IN HISTORY.

In July of last year the Cairo Correspondent of THE NEAR EAST, writing of the Capitulations in force in Egypt, made use of a phrase which adequately and briefly describes the value of those which during more than five centuries have existed in the Ottoman Empire. He says that Capitulations

> confer exemption from certain forms of taxation, protection from arbitrary arrest, liberty of religion, inviolability of domicile, immunity from the jurisdiction of the local courts in criminal matters, and subjection to special courts in all civil cases in which the other party is of different nationality, on all foreigners who, as a natural consequence of the condition of extra territoriality set up, can be dealt with by their particular Consuls in whatever manner the latter choose.

A curious belief has grown up that the extensive rights of extra-territoriality and the numerous privileges enjoyed by certain foreigners under the Capitulations in Turkey exist only because the Ottoman Empire is a Moslem State. It has even been asserted that the Capitulations are a stigma deliberately put upon Turkey by Christian Powers in order to emphasize their "contempt" for Islam, and many persons are inclined to look upon them as a species of religious injustice. The facts of History do not warrant such an opinion. The theory of Law, which has crystallized into the mass of Treaty-right and privilege which has gradually been formed under the Capitulatory régime, dates back many centuries. Time was when merchants and travellers were supposed to carry the law of their native land vested in their persons during their wanderings abroad. Law was held to be equally an affair of the individual as is religion, and arrangements were made accordingly. The Latin States in the Levant granted a formidable array of important privileges to the trading Republics of Italy, Venice, Genoa, Pisa, and Amalfi, and the powers of the Venetian Baile in Acre, even when it was capital of the kingdom of Jerusalem, were in many ways superior to those of the King himself. In many of the cities of the Levant a whole quarter was set aside under the Capitulations of those days for the use of Italian commercial communities and their consular rulers. Even in Constantinople itself the Byzantine Government accorded all Galata to the Genoese, while the trading privileges of the Republics of St. Mark and of St. George were so considerable as to impair seriously the actual sovereignty of the Greek successors of the Cæsars. Yet it must not hastily be assumed that the existence of Capitulations was an indication that more vigorous States were preying on a failing polity. Certainly the Byzantine Empire was in its decline when they were first established, but Capitulations were granted to the Italian Republics in the very hour of victory by more than one crusading Prince in Syria, and one of the earliest grants was confirmed to Genoa by Sultan Mohammed the Conqueror a few days after he had taken Constantinople by storm and assumed the proud title of Padishah as befitted the absolute Sovereign of the Imperial City. In most cases both parties to a Capitulation were glad to establish it, sometimes from a real fear that injustice might be done by subjecting a foreigner to the native Courts, and sometimes in order to avoid the opportunity for complaint which might arise therefrom. The Ottomans, true to their habit of ruling their rayahs through the religious heads of the various subject races, were glad to have some definite official made responsible for the control of his nationals. Other, and weaker, States were doubtless glad of any arrangement which ensured justice being done by his own consul upon an offending alien, the subject of a powerful and aggressive State. In times past the Capitulations were, as they still are, a most manifest convenience throughout the Levant. That they are not peculiar to Turkey or even to Moslem States is apparent to those who remember the Capitulatory régime in China, Japan, Siam, Zanzibar, and Morocco, from some of which it has not yet disappeared. That the Capitulations are not the fruit of Ottoman weakness is obvious from the fact that Mohammed el Fatih and Suleiman el Kanouni, the greatest of the successors of Osman, granted Capitulations in the plentitude of their power.

The Growth of the System.

The Porte has very readily in the past contracted Treaties establishing Capitulations in favour of the subjects of foreign countries, and has frequently and repeatedly entered into fresh Treaties binding itself either to renew, confirm, or extend the privileges already accorded. It appears that the very first Capitulation to be granted was in 1365 to the little Serb Republic of Ragusa, which survived the vicissitudes of more than four centuries of Balkan history to perish at the hand of Napoleon and become the Duchy of Marshal Marmont, and indirectly give a verb *raguser* to the French language. Next (June 8, 1387) came the great Republic of St. George, which already enjoyed immense privileges in the Byzantine dominions. The following is a chronological list of the Treaties, Protocols, and Conventions, and other diplomatic documents by which the various Ottoman Sultans have granted Capitulations or solemnly bound themselves to confirm and respect or enlarge those granted by their predecessors:—

State.	Treaty.	Date.
Ragusa	Grant	1365
Genoa	Grant	June 8, 1387
Wallachia	Grant	1393
Ragusa	Confirmation	1414
Genoa	Confirmation	1416
Knights of Rhodes	Grant	1425
Ragusa	Confirmation	1445
Genoa	Confirmation	1451
Ragusa	Confirmation	1451
Genoa	Confirmation	1453
Pisa	Grant	1460
Florence	Grant	1460
Venice	Grant	Jan. 25, 1478
Venice	Confirmation	1481
Ragusa	Confirmation	1481
Venice	Confirmation	Jan. 16, 1482
Ragusa	Confirmation	1512
Moldavia	Grant	1513
Ancona	Grant	1514
Venice	Confirmation	April, 1516

On the conquest of Egypt in 1517 by Sultan Yawuz Selim Khan the Porte undertook to recognize the Capitulations already existing in that country in favour of France and Arragon.

State.	Treaty.	Date.
Ancona	Confirmation	1520
Venice	Confirmation	Dec. 11, 1521
Ragusa	Confirmation	1521
France	Do. (for Egypt)	Sept. 20, 1528
Aragon	Do. (for Egypt)	Sept. 20, 1528
Tuscany	Grant	1528
Venice	Confirmation	1534
France	Grant	Feb., 1535

This grant is the earliest of those held by extant States, although in many ways Italy considers herself to be the heir of Ancona, Tuscany, Venice, and Genoa, just as Tuscany inherited the privileges accorded to Pisa and Florence. One of the most important clauses in this celebrated document runs:—

> Item, toutes fois que le Roi mandera à Constantinople ou à Pera ou autres lieux de cet empire un baïle, comme de présent il tient un consul à Alexandrie, que lesdits baïle et consul soient acceptés et entretenus en autorité convenante, de manière que chacun d'eux en son lieu, et selon leur foi et loi, sans qu'aucun juge, *cadi, soubachi* ou autre en empêche,—doive et puisse ouïr, juger et terminer, tant au civil qu'au criminel, toutes les causes, les procès différends qui naîtront entre marchands et autres sujets du Roi . . .

These Capitulations go on to stipulate that Ottoman officials are to give every assistance, using force if necessary to give effect to that assistance, to the French Baile and Consul, and expressly state:—

> non que les *cadi* ou autres officiers du Grand Seigneur puissent juger aucun different desdits marchands et sujets du Roi, encore que les dits marchands le requissent; et si d'aventure lesdits *cadi* jugeaient, que leur sentence soit de nul effet.

Nor in criminal cases are French subjects to be called upon to give evidence before Ottoman Courts, except under prescribed conditions. Nor in any circumstances is a Frenchman, his agent, or his servant to be molested or judged by any official other than the Grand Vizier himself on matters of religion.

State.	Treaty.	Date.
Poland	Grant	1553
Tuscany	Confirmation	1563
Venice	Confirmation	June 24 1567
France	Confirmation	Oct. 18 1569
Venice	Confirmation	Aug. 10 1575
Tuscany	Confirmation	1578
England	Grant	1580

Digitized by Google

A curious comment on Ottoman practice in the administration of justice is found in Article 11 of these English Capitulations:—

> If an Englishman, guilty of some crime, escapes, no other Englishman, who has not gone bail for him, shall be imprisoned or molested instead of him.

Otherwise the grant was largely based on the French Capitulations, which, as is shown by the wording of the Treaty of Confirmation of 1604, were supposed to protect all "Franks" from the West. In 1593, the date of the first Confirmation, the English Capitulations were made similar to those enjoyed by France.

State.	Treaty.	Date.
France	Confirmation	July 6, 1581
Venice	Confirmation	1589
England	Confirmation	1593
Venice	Confirmation	Nov. 3, 1595
France	Confirmation	Feb. 25, 1597
United Provinces	Grant	April, 1598
England	Confirmation	1603
France	Confirmation	May 20, 1604

This Capitulation allows that all nations, particularly the Venetians, English, Spaniards, Portuguese, Catalans, Ragusans, Genoese, Anconitans, and Florentines,

> puissent librement venir trafiquer par nos pays sous l'aveu et surêté de la bannière de France, laquelle ils porteront comme leur sauvegarde. . . . et qu'ils obéissent aux consuls français. . . .

In this Treaty the King of France, Henry IV., is specifically styled Emperor (Padishah) of France, a title which was only most grudgingly accorded to the Sovereigns of Russia after long negotiation late in the eighteenth century.

State.	Treaty.	Date.
Venice	Confirmation	Dec. 23, 1604
Venice	Confirmation	Mar. 9, 1605
England	Confirmation	1606
France	Confirmation	Apr. 20, 1607
France	Confirmation	1609

Hanseatic Towns	Confirmation	Sept. 27, 1862
Mexico	Grant	Sept. 4, 1864
Mexico	Confirmation	May 6, 1866
Portugal	Confirmation	Feb. 23, 1868
Mecklenburg Duchies	Grant	Nov. 5, 1868
Bavaria	Grant	Aug. 25, 1870

In support of the contention which has been advanced that the whole of the States enjoying the advantages of the Capitulations in Turkey are jointly interested in their maintenance it is interesting to find that Article 5 of this Convention runs as follows:—

> Dans le cas où la Sublime Porte viendrait à s'entendre avec le autres Puissances pour modifier, dans l'un ou l'autre sens, la juridiction qu'exercent en Turquie les Consuls étrangers en vertu des Traités et Capitulations, le Gouvernement de Bavière ne revendiquera rien au delà des privilèges et immunités qui seraient maintenus en faveur des Consuls des autres Puissances, auxquelles d'ailleurs les Consuls Bavarois continueront à être assimilés sous tous les rapports.

Germany	Confirmation	Aug. 26, 1890
Greece	Confirmation	April 1, 1900

The Greek privileges were not restored in their entirety as they had been before the war of 1897.

The Law of 7 Safar, 1284.

Apart from these grants and confirmations, there exists a whole series of Protocols and Conventions defining the rights of foreign subjects, so far as land tenure is concerned. On June 9, 1868 an important Protocol was signed with France guaranteeing rights of domicile to foreigners and defining them with some minuteness. This was a necessary preliminary to the acceptance of the Law of 7 Safar on property.

> La demeure de toute personne habitant le sol Ottoman étant inviolable . . . la demeure du sujet étranger est inviolable au même titre, conformément aux traités, et les agents de la force publique ne peuvent y pénétrer sans l'assistance du Consul ou du délégué du Consul dont relève cet étranger.

According to the terms of the Protocol the word "house" is to be understood in its widest sense. The Consul is to appear if required so that the delay in effecting an arrest should not be greater than twenty-four hours. If a house be more than nine hours' journey from a Consul the Ottoman police may in certain circumstances enter a foreigner's house—and only in case of murder, arson, highway robbery with violence, burglary, armed rebellion, or coining.

Law of 7 Safar, 1284 (June 9, 1867):—

> Art. 1.—Les étrangers sont admis, au même titre que les sujets Ottomans et sans autre condition à jouir du droit de propriété des immeubles urbains ou ruraux dans toute l'étendue de l'Empire, à l'exception de la province de l'Hedjaz.

. . . Subject to all laws and regulations affecting Ottoman proprietors.

> Mais sous la réserve des immunités attachées à leur personne et à leurs biens meubles aux termes des traités.

Various States concluded Protocols with the Porte, accepting the Protocol and the Law of 7 Safar, 1284, in the following order:—

Norway and Sweden	June 13, 1868
Belgium	July 14, 1868
Great Britain	July 28, 1868
Austria-Hungary	Nov. 5, 1868
Denmark	May 10, 1869
Prussia and States of the North German Confederation	June 7, 1869

* After the French Ambassador, Baron De la Mole, had been illtreated and insulted.

Digitized by Google

Spain	Oct. 5, 1870
Greece	Feb. 24, 1873
Russia	March 20, 1873
Italy	March 23, 1873
Netherlands	Aug. 6, 1873
United States	Aug. 11, 1874
Portugal	Jan. 29, 1883
Persia	June 30, 1883

In addition to these various diplomatic documents and international agreements defining the status of foreign subjects in the Ottoman dominions, there have, since 1881, been numerous financial agreements, the most important being the Decree of Muharrem, which is dealt with elsewhere. In conclusion, it is not inappropriate to quote one final document bearing upon the validity of the very considerable volume of Treaties referred to above. According to the first Protocol of the Conference of London, January 17, 1871, Earl Granville, President of the Conference, in addressing the assembled members, said:—

> Cette unanimité fournit une preuve éclatante que les Puissances reconnaissent que c'est un principe essentiel du droit des gens qu'aucune d'elles ne peut se délier des engagements d'un traité, ni en modifier les stipulations, qu'à la suite de l'assentiment des Parties Contractantes au moyen d'une entente amicale.
>
> Ce principe important me parait recevoir une adhésion generale et j'ai l'honneur de vous proposer, MM. les Plénipotentiaires de signer un Protocole *ad hoc*.

And the Protocol *ad hoc* was duly signed by the representatives of the North German Confederation (Germany), Austria-Hungary, Great Britain, Italy, Russia, and Turkey.

[NOTE.—The writer is greatly indebted for much of the information in the above article to the monumental work of H.E. Gabriel Nuradunghian Effendi, at one time Ottoman Foreign Minister, *Recueil d'Actes Internationaux de l'Empire Ottoman.*]

TANGIER TO TEHERAN.

The impossible has been achieved. The Porte, by a mere stroke of the pen, has revived, in Constantinople at least, no less an entity than the Concert of Europe, which was generally supposed to have died six weeks ago! As long ago the Turks contrived to unite the secular enemies of the Balkans against them, so now by a *coup de théâtre* they have drawn down upon themselves a series of Identic Notes. How great must be the magic of these blessed words. The mere mention of the mystic phrase aroused the slumbering Concert from the lethargy of war. Shoulder to shoulder did the ambassadors press upon the Porte at the word of command "Present Notes," momentarily forgetful of the fact that their respective Imperial, Royal, and Presidential superiors were mostly at one another's throats in Europe. Really the whole affair has a touch of comedy.

***

I must confess that the departure from Albania of its Mpret and Mpreteresha, as recorded by our Durazzo Correspondent, leaves me unmoved. Making every allowance for Prince Wilhelm, it still seems to me that he failed utterly to rise to the occasion. His position was, admittedly, an extremely difficult one, but I cannot help thinking that a man with real character, who knew when to lay caution aside for a while and risk a real throw of the dice, might have been much more successful than Prince Wilhelm of Wied. And I am sorry for the sake of Albania. For I fear that unless the Shkypetars very quickly lay aside their differences and show a united front to Europe and the world at large, we may—to put the matter quite plainly—soon have no Albania with us.

***

The Captain of the Port at Smyrna may be a very estimable person indeed, but I am tolerably certain that he is not deeply versed in Natural History. As I write there lies before me the translation of a circular issued by the worthy captain to the much-tried shipowners and agents of Smyrna, in which it is stated that in case any rats should be discovered in the baggage or on the person of any passengers on board any vessel, the said vessel will be subject to five days' quarantine. My acquaintance with passengers—deck passengers—on some of the Levant steamers inclines me to think that a close search of their persons might yield some surprising results, but—rats? I am inclined to think that even the deckiest of deck passengers would detect the presence of even a single rat on his person quite soon. Nevertheless, it must be quite an inspiring sight to see the myrmidons of the Captain of the Port examining the passengers and their baggage in the hopes of finding a stray rodent or two, and thus providing a few fees. Presumably the question on landing in Smyrna is: "Any rats to declare?"

It is reported from Colombo that Ceylon has offered to provide a contingent for war service, and that, Lord Kitchener having given his consent, it will be employed in Egypt. Ceylon, it is stated, will pay the cost of transport. Other visitors to Egypt shortly will be the 200 Maoris who have been accepted for service in that country. All who know the Maoris like them, and there is no doubt that if the 200 have their chance they will prove themselves worthy of their warlike sires. It is a far cry from the Antipodes to Cairo, but so much that is strange swims into the ken of THE NEAR EAST just now.

***

In spite of the present war, Western Europe is not likely to give up its habit of lecturing Turkey and the Balkans just yet—if ever. Nevertheless, I cannot help thinking that certain good people in this country who have in the past given much gratuitous advice to the Sultan and his subjects, to say nothing of the Bulgars and the Serbs, and now and then the Montenegrins and the Greeks, would do well to lie low for quite a long time. On the other hand, it is quite evident that Turkey and the Balkan States are now entitled to take their turn at offering advice, unasked. I am, therefore, not in the least surprised to find the *Hablul Matin* suggesting that the Sultan of Turkey's "attitude of strict neutrality in this great European struggle. . . . may possibly enable him to mediate between the belligerents and render a valuable service to civilization and humanity." And when I find the suggestion accompanied by the assurance that "Turkey does not seek an extension of territory in Europe," the phraseology strikes me as strangely reminiscent. We may yet live to see a "British Committee" in Turkey, a "French Committee" in Bulgaria, and so on; and philanthropic pashas may organize meetings in Stamboul to "protest" against all sorts of things in this country.

***

German veracity, like the "good German conscience," is peculiar. One of the most amazing fabrications of the "news for neutrals" factory—the story that the British Navy, in desperate straits for men, was offering £40 a week to German sailors for their services—bears upon it all the marks of the Teutonic genius. One assumes that these statements are intended to deceive, but they insult the intelligence of some of the people, at any rate, amongst whom they have been circulated. Yet this particular story seems to be a favourite. A correspondent, writing from Bucharest, informs me that Dr. Waldthausen, the German Minister there, has given it his official *imprimatur*. "Such statements," writes my correspondent, "can only be described as childish, and do not add to the dignity of the diplomat who unblushingly publishes them." From what my correspondent says, I gather that the "official" contradictions of reports that German arms have not been everywhere triumphant, and fantastic statements as to the weakness and wickedness of the Allies emanating from the German Legation are discredited. But the Teuton official is unable to understand a public which does not open its mouth and shut its eyes and accept gratefully whatever he deigns to stuff down its throat.

***

I have from the same source an interesting story of a Roumanian frontier guard's devotion to duty under trying circumstances. Whilst an engagement was proceeding between Servian and Austrian troops posted on their respective sides of the Danube near Orsova, the rifle bullets began to fall thickly on Roumanian territory, and onlookers scattered right and left in fear of their lives. On the top of a hill across which runs the frontier of Roumania and Hungary stood a Roumanian frontier guard. Bullets whistled round him, but he did not move. "Come away," people shouted from positions of safety. "I have no orders," was the reply, and the brave sentry remained at his post. After a quarter of an hour the fire slackened, but the earth around the frontier guard was ploughed up by bullets, though fortunately he didn't stop any of them. My correspondent states that the authorities intend to discover the identity of the man and decorate him as not unworthy to rank with the devoted Roman soldier of Pompeii.

THE PRESS ON THE NEAR EAST.

Bravo Servia!

The following is an extract from *The Times* of September 15, under the heading "Help for Servia":—

While our attention is concentrated upon the vast conflicts in the western and the eastern theatres of war, we are too apt to overlook the splendid heroism of the Servian people and the sacrifices they have incurred. Their whole able-bodied male population is under arms. Every peasant has left his home and his fields to join the fighting line, and many thousands of them have already given their lives in the common cause. Tens of thousands have been wounded. When we read with legitimate pride of the arrangements made for the comfort of our own brave troops we may fail to realize the hardships to which the Servian soldiers have been and are exposed. Their supply of surgeons, hospitals, and Red Cross appliances is utterly inadequate. Hardy and self-reliant though they be, they need help. It should be given without delay or stint. Among the Servians pecuniary and medical aid goes much farther than it would with more sophisticated races. And Servia has amply deserved support. By retaining powerful Austro-Hungarian armies in the south, and by shattering them in battle, she has appreciably lessened the military pressure that Austria could put upon Russia and the assistance Austria could lend to Germany against Belgium, France, and England. Nor ought we to forget that this war of European liberation was precipitated by Austro-German aggression upon Servia.

German Ambitions and the Balkan War.

We quote, as of special interest to our readers, the following passage from Mr. Frederic Harrison's prophetic article which originally appeared in *The English Review*, January, 1913, and part of which has been reprinted in the September issue of the *Review*, under the heading "Frederic Harrison's Warning":—

This collapse of Turkey, this aggrandisement of the Balkan kingdoms, is a rude disillusion and a fatal setback to Pan-German ideals, whether in Austria or in the Reich. Nothing outside Europe is now open to them. Asia, India, China, Australasia, Africa, America—North and South, all are closed—practically inaccessible and impregnable. And now the Bosphorus, the Ægean, and Asia Minor are equally closed. But, alas! Europe is open—and within touch—and, even if occupied, offers magnificent fields for enterprise of all kinds. It is therefore inevitable that the mighty German Empire, swollen perhaps by the German part of Austria, will seek "compensation" for its exclusion from places "in the sun"—within Europe itself. It has won "compensations" and accessions thrice before—in 1864, in 1866, in 1870; and four or five times since by demanding fresh "compensations," it has brought Europe to the brink of war. We are to see what are the compensations it demands in 1913.

From Constantinople.

A paragraph in *The Orient* of August 19 (received this week) is interesting as showing that the "Goeben" and "Breslau" suffered even more severely than was at first supposed:—

The long-expected ex-"Goeben" and the smaller "Breslau," now the "Yavouz Sultan Selim" and "Midilli," which were looked for in the Bosphorus last Wednesday, had to go into the Gulf of Nicomedia for a few necessary repairs for a few days, and on Saturday steamed up opposite Moda and Haidar Pasha for a few hours' stay, going back again to a point back of the Islands, and have not yet come into the harbour. After their long run in the Mediterranean, their boilers required considerable attention, and they were otherwise somewhat battered.

In the same number *The Orient* says regarding the conflicting reports about the war:—"The results seem to depend on which agency you choose to believe, for every victory claimed by one side is denied by the other." And after announcing that "Montenegro has declared war on Germany," our contemporary comments:—"We have not yet learned when the first engagement will be."

A Doubtful Bargain.

An interesting note under the heading of "Turkey's White Elephant" appears in *Page's Weekly* for September 11. After a reference to our Constantinople Correspondent's report that the Turkish Government had purchased the "Goeben" and "Breslau," the article continues:—

If the reported price of £4,000,000 has been paid the Kaiser has driven, as he usually does, an unconscionable bargain for ships which his gallant sailors showed much more inclination to bring into market rather than into the line of battle. Whatever price they may have paid for them, it is evident to all that the possession of so huge and complicated a vessel as the "Goeben" can never prove anything but an embarrassment to her new owners. The guns and torpedoes carried by the "Goeben" were, needless to say, "made in Germany," and the Turks will experience considerable difficulty, should the occasion ever arise to do so, in replenishing the magazines and torpedo rooms of the ship. Perhaps if it ever comes to the test of war, Turkey will emulate the German example and sell the ship to some friendly power rather than run the risk of having her sunk or seized. One or two capital ships such as these can be of no conceivable use to the Turkish navy without a suitable fleet to back them; indeed, it was only want of adequate support that compelled the "Goeben" and her satellite to seek refuge in Turkish waters after a pretty considerable mauling at the hands of one of our county-class cruisers.

The Greek Press on Germany.

The following extract from *Le Messager d'Athènes* of August 29 shows that the attempt made by Germany to influence Greek public opinion and to check its free expression in the Press has only succeeded in provoking a spirited opposition:—

Dès la première heure l'opinion grecque s'est manifestée; unanimement, fortement, fermement. Les liens d'affection et de reconnaissance, les affinités de race et de génie ne sont pas seulement de beaux mots sonores chez le peuple grec. Laissant à ses chefs le soin de régler l'attitude politique de la Grèce, le peuple grec a suivi les conseils de son cœur. Il l'a fait avec le tact et la mésure qui sont une des preuves les plus sûres de son illustre origine. Mais il l'a fait aussi avec l'esprit d'indépendance qui caractérise les nations jalouses de leur liberté parce qu'elles respectent d'abord la liberté des autres. Qu'ont-ils vu dans la noble et digne attitude du peuple grec ceux qui prétendent dicter leur loi au monde? Une volonté qu'il faut abattre? Une insolence qu'il faut châtier? Ou bien le souci d'éviter des formes blessantes à l'endroit de peuples avec lesquels la Grèce n'est pas en état de guerre a-t-il semblé un signe de faiblesse, d'une faiblesse propre à favoriser les arguments que Basile appelait irrésistibles? Tout cela peut-être, à juger par les moyens innombrables déployés depuis quatre semaines pour amener, de force, le peuple grec dans la voie où l'on souhaitait le voir. On se flattait évidemment de connaître les peuples d'Orient par avoir beaucoup fréquenté les Turcs. A Constantinople, c'est incontestable, la méthode a merveilleusement réussi. Qu'on ouvre un journal turc de n'importe quelle langue! A Athénes on répond simplement: Vive la France!

Articles to Note.

"L'Europa e la Questione d'Oriente," by Dr. Aldo Tiepolo, in *L'Esplorazione Commerciale*, Milan (August 29).

Letter on "Southern Slav Patriotism," by R. W. Seton-Watson, in *The Times* (September 16).

"Servia's Place in the Sun," by Lieutenant-Colonel Roustam Bek, in *The Daily Express* (September 17).

MAORI VOLUNTEERS FOR EGYPT.

In the White Paper issued on Monday night, containing correspondence regarding the naval and military assistance afforded to the Government by the oversea dominions, there is included a telegram sent by the Governor of New Zealand to the Secretary of State on September 3, which stated that the Maoris in New Zealand were eager to volunteer for war service. The Prime Minister of the Dominion expressed the hope that his Majesty's Government would agree to their doing so. If they would, he would place the matter before the Cabinet with a view of settling the numbers and the training necessary. In reply, Mr. Harcourt stated that the Army Council would gladly accept a contingent, not exceeding 200, for service in Egypt.

At the Central Criminal Court on Monday, before Judge Atherley Jones, the trial was resumed of Seham Yousry (25), who was charged with unlawfully and maliciously publishing a defamatory libel concerning Major W. E. Gunnell Connolly. Defendant, who claims to be an Egyptian princess, addressed letters to Major Connolly and his relatives, in which she claimed that she was the wife of Major Connolly, and that he was the father of her two children. It was alleged by her that she went through a form of marriage with Major Connolly at Cairo, where he was stationed with the British Army in Egypt. Major Connolly denied the allegations, while admitting that the defendant had been his mistress for some time during the period he was stationed at Cairo. The jury returned a verdict of guilty, and the judge sentenced her to six months' imprisonment in the second division, and said that he should recommend her for deportation.

PERSONAL & SOCIAL

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. New style.	Julian. Old style.	—	Moslem.	Jewish.
1914. Sept.	1914. Sept.		1332. Shawal.	5674. Ellul.
18	5	Friday	27	27
19	6	Saturday.....	28	28
20	7	Sunday	29	29
			Julkada.	Tisseri 5675.
21	8	Monday	1	1
22	9	Tuesday	2	2
23	10	Wednesday	3	3
24	11	Thursday	4	4

To-day is the birthday of H.I.R.H. the Archduchess Maria Theresa of Austria, wife of the Archduke Karl Stephan, daughter of the late Grand Duke Leopold II. of Tuscany and aunt to his Catholic Majesty the King of Spain.

To-day, 27 Shawal, is the birthday of H.H. Sidi Mohammed en Nasser, Bey of Tunis, who was born July 13, 1855.

Sunday is the birthday of H.I.H. the German Crown Princess, niece of her Majesty the Queen of the Hellenes.

Sunday is the birthday of H.H. Princess Josephine of Saxe-Coburg and Gotha, grand-niece of H.M. the Tsar of the Bulgarians.

Monday is the birthday of H.R.H. the Duke of Cumberland, son and heir of the late King of Hanover and father of the reigning Duke of Brunswick.

Thursday is the birthday of H.I.R.H. the Archduchess Hedwiga, grand-daughter of his Imperial and Royal Apostolic Majesty the Emperor of Austria.

Thursday is the first anniversary of H.H. the Imam of Muskat, Sultan of Oman.

Monday is the Jewish New Year's Day.

According to a Reuter's message from Amsterdam, dated September 15, unofficial reports have been received in Vienna from Nish that the King of Servia is again ill, and is keeping to his bed. His Majesty is said to be suffering from painful attacks of gout.

The death of H.R.H. Prince Adalbert of Prussia is reported from Brussels. He was a nephew of her Majesty the Queen of the Hellenes.

H.R.H. Prince Joachim of Prussia, another nephew of her Majesty the Queen of the Hellenes, has been wounded while invading France.

The Bulgarian Government deserves hearty congratulations on having secured the best man for the delicate task of inaugurating diplomatic relations between Bulgaria and the United States. Professor S. Panaretoff, who has just been appointed to the newly created post of Bulgarian Minister in Washington, belongs to a *milieu* in which the great Republic is fond of recruiting its diplomatists. All through his life he has been intimately associated with Robert College of Constantinople, an institution which for fifty years has represented American culture in South-Eastern Europe and rendered inestimable services to the intellectual uplifting of the Christian races in Turkey. Mr. Panaretoff is a sound scholar, equally versed in things European and American; an authority on Slav languages, history, and literature. He has paid frequent and prolonged visits to the States, and has numerous friends all over the country. Mme. Panaretoff is American by birth, and her social gifts are a further guarantee for the future success of the new Bulgarian Minister.

The King received H.H. the Agha Khan on Tuesday morning.

Nasr-ul-Mulk, the former Regent of Persia, arrived in Christiania on Saturday and left again the same day for Bergen on his way to England.

Crawford Pasha, acting on behalf of Sir Reginald Wingate, held the usual Bairam review at Khartoum on August 22. In the honours list appeared the names of Kaimakam W. D. Kenny Bey, who received the Fourth Class Osmanieh, and Kaimakam (temporary) Drew Bey, who received the Fourth Class Mejidieh.

The many friends, in Albania and elsewhere in the Near East, of the Hon. Aubrey Herbert, M.P., who was reported "missing," will be glad to learn that though wounded he is alive and going on well. He joined the Special Reserve Corps as an interpreter at the outset of the war and was afterwards attached as Second Lieutenant to the Irish Guards, serving in the 4th Guards Brigade. It is now known that he was discovered, alive but wounded, during the advance of the Allies. He arrived in London about noon on Tuesday from Southampton and is staying with his sister, Lady Victoria Herbert, at 5, Stratford Place. Though fatigued by his long journey he was going on well.

News was received in Rome last week from Munich that Captain Duncan Heaton-Armstrong, Secretary to Prince William of Wied, had been arrested and detained there as a military prisoner. Captain Armstrong had, it is added, accompanied Prince William's children to Vienna. Captain Heaton-Armstrong belongs to the 3rd Battalion Lancashire Fusiliers. He entered the service of the Albanian Government and became secretary and aide-de-camp to Prince William last January. At the time of the attack on Durazzo he took an active part in the defence, and after the death of Colonel Thomson he took control of the artillery.

Our readers will remember that as soon as war broke out the Bulgarian Minister in St. Petersburg, General Radko Dimitrieff, hastened to offer his military services to the Tsar. Since then he has been on active service with the Russian Army, and has acquitted himself brilliantly. A Reuter's message from Petrograd, under date of September 15, states that the Tsar has conferred the Fourth Class of the Order of St. George upon Lieutenant-General Radko Dimitrieff in recognition of his services in the field.

Mr. Gerald C. Dudgeon, Consulting Agriculturist to the Egyptian Ministry of Agriculture, has returned from leave and taken up his work. He reached Egypt on a Japanese liner.

Amongst the passengers to Egypt by the P. and O. s.s. "Caledonia," which left London last Saturday, are the following:—Judge Dilberoglue, Mr. H. Mun-Gavin, Judge H. W. Halton, LL.D., Miss Haselden, Mrs. A. S. Merton, Sir Reginald and Lady Oakes, the Ven. Archdeacon Ward and Mrs. Ward.

Sidky Pasha, the Egyptian Minister of Agriculture, has returned to Cairo from Europe.

Sixteen members of the Imperial Ottoman Bank's London staff are serving with his Majesty's forces.

MASPERO FRERES LTD
CAIRE EGYPTE
CIGARETTES EGYPTIENNES

Major-General Snow, commanding the 4th Division since 1911, served in the Sudan Expedition (1884-85), being severely wounded in the action at El Gubat; and the Sudan Campaign of 1898, when he was present at Atbara and Khartoum, and was twice mentioned in despatches.

Brigadier-General De Lisle, commanding the 2nd Cavalry Brigade, saw his first war service in Egypt, 1885-86, and was decorated with the D.S.O. for special service connected with the attack by Arabs on the fort at Ambigole Wells.

Lieutenant-Colonel C. B. Bulkeley-Johnson, commanding the Royal Scots Greys, was employed with the Egyptian Army from January, 1899, to January, 1903, and took part in the operations which led to the final defeat of the Khalifa, receiving the Egyptian medal with two clasps and the 4th Class of the Order of the Mejidieh. He was promoted to command the regiment in August, 1911.

Colonel Sir Horace Beauchamp, who recently met with a motor accident near Brentwood, has been employed as a district remount officer, West Norfolk Regiment. He saw service in Egypt and the Sudan, as well as South Africa, and has served in the Duke of Cornwall's Light Infantry and the 20th Hussars.

The Egyptian Gazette reports that Maître Carton de Wiart, his wife and family, are held up in Austria at Milstat, not far from Trieste, and that there appears to be no present possibility of their getting away. They have their children with them.

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.
Near the lake, with splendid park.

CECIL HOTEL.
In the town and 5 minutes from the station.

Two First-class Family Hotels. High-class Cuisine. French Chef.
J. SUMSER, Manager-Proprietor.

Sofia (Bulgaria).

GRAND HOTEL BULGARIE
(opposite the Royal Palace).
First-class Hotel. Entirely renovated and beautifully situated in the centre of the city, near Post Office, Theatre, Museums, Banks, etc. Electric Light. Central heating. Baths. Garage. Telephone. Garden. French Restaurant. Good wines. Café. Foreign newspapers. Most frequented by English and American Visitors. Interpreter meets all trains. Rooms from 4 frs.

Cyprus.

THE CYPRUS HOTEL CO.
Open all the Year round—
LIMASSOL (Olympus Hotel).
FAMAGUSTA (Savoy Hotel).
For Summer Seasons—
PLATRES (Platres Hotel). 4,000 ft. from the sea level. Opens from May till Oct.
TROODOS (Olympus Hotel). 6,000 ft. from the level of the sea. Opens from May till Oct.
Perfect Situation. French and English Cuisine. Moderate Terms. Also Excursion to Mount Troodos.
For Tickets and further particulars apply to—
NAJEM HOURY, Limassol, Cyprus
(*Proprietor of the Army and Navy Stores*).
Head Office: Najem Houry Stores, Limassol, Cyprus.
Branches: Polymedia, Troodos, Nicosia, Famagusta, Larnaca, and Platres.
All arrangements for Transport by Carriages, etc. are made by the above Firm.

Bucharest, Roumania.

GRAND HOTEL DU BOULEVARD.
The Rendezvous Hotel of the Diplomatic World and Distinguished Visitors to Roumania.
Entirely renovated, with all Modern Comfort. Unrivalled Cuisine.
FAMOUS ROUMANIAN BAND.
Admirably situated in the very centre of the Town.
LUCIAN BERTOLA, Proprietor.

Digitized by Google

A Reuter's message from Petrograd, under date September 16, states that H.I.M. the Tsar has made H.R.H. Crown Prince Alexander of Servia a Knight of the Military Order of Saint George.

The Hellenic Minister to Albania has left Durazzo in consequence of the departure of the Mpret.

According to a Reuter's message, Mr. Isbrati, of the University of Bucharest, and Mr. Diamanti, the brother of the Roumanian Minister in Rome, have arrived in Rome on a political mission. It is stated that the visit, which will last a week, is not official.

It is stated in the Egyptian Press that Monsignor W. L. Keatinge, who has been Roman Catholic Chaplain to the British troops in Egypt for some time past, has been recalled from leave (which he was spending in England) and is now with the British Expeditionary Force in France. Monsignor Keatinge, it may be mentioned, served throughout the South African War and for his services there received a double step in rank.

Mr. H. E. Poynter and Mrs. Poynter are returning to Constantinople via Port Said and Alexandria, and leave England to-morrow on board the P. and O. s.s. "Medina." Mr. F. Cowdray accompanies them.

Bimbashi F. Fergusson, the director of music to the Egyptian Army, has arrived in Cairo from England.

Mr. Rowland Snelling, editor of *The Egyptian Gazette*, left London yesterday on his return to Alexandria.

Mme. Grouitch, the wife of the former Servian Chargé d'Affaires in London, and her Ambulance Corps have arrived at Nish.

General Stepanovitch has been promoted to the rank of Voyvoda in the Servian Army.

M. Albert Eid, son of the Belgian Consul in Cairo, has joined the Belgian army as a volunteer. His father, M. George Eid, is still detained in Brussels.

The name of Lieutenant-Colonel G. Cuninghame Knight, Loyal North Lancashire Regiment, appears in the list of officers who died of their wounds which was forwarded by the General Headquarters of the Expeditionary Force, dated September 11 and 12. He was born in 1866 and got his first commission in the Loyal North Lancashires in 1887. He was employed in 1898 with the Colonial forces in New South Wales, and in the South African War raised and commanded the 1st New South Wales Mounted Infantry Regiment. He took part in the actions at Poplar Grove, Driefontein, Vet River, Zand River, and Wittebergen and Bothaville, and was slightly wounded in the operations in Cape Colony in 1900. He was mentioned in dispatches and gained his brevet as major and the Queen's medal with five clasps. He subsequently served on the Staff in Malta and Egypt, and was D.A.A.G. in South Africa in 1909.

In the list of fallen officers we regret to notice the name of Captain Douglas Clinton Leslie Stephen, who was employed with the Macedonian Gendarmerie from 1906 to March, 1909. He was thirty-seven years of age. During 1899-1902 he served in South Africa, including the action at Wittebergen, and won the Queen's medal with three clasps and the King's medal with two clasps. From December, 1909, until last January he was A.D.C. to the General Officer Commanding, London district.

We much regret to record the death of Mr. C. W. N. Garstin, 9th Queen's Royal Lancers, the only son of Sir William Garstin, G.C.M.G. Lieutenant Garstin was killed in action near Mons on August 24. He was only twenty years of age.

Mr. H. R. Pape, the racehorse trainer, has joined the Westminster Dragoons and left for Egypt.

The Mayor of Stoke Newington forwarded to the Servian Minister a letter conveying to the gallant Servian nation the greetings of the borough and congratulations upon its brilliant success. M. Boshkovitch has replied: "Many thanks to you and inhabitants of the borough for kind congratulations about Servian success. Servia is happy to fight jointly with great England the same foes, and delighted to congratulate the British people about the heroic conduct of the British Army and brilliant success."

APPOINTMENTS, PROMOTIONS, ETC.

It is reported from Athens that the resignation of Mr. Streit being now definite, the portfolio of the Foreign Minister will be provisionally held by Mr. Venezelos.

Mr. Stephan Panaretoff has been appointed to the newly-created post of Bulgarian Minister in Washington.

Mr. Typaldos Forestis, Consul-General of Greece at Constantinople, has been nominated Governor-General of Epirus.

Azim Bey, formerly Chief of Police in Constantinople, has been appointed Vali of Konia, and has left Constantinople to take up his appointment.

The Orient announces that Marshal Tatar Osman Pasha, President of the Ottoman War Council, has been made a Senator.

OBITUARY.

MUSTAPHA PASHA FEHMY.

A Cairo telegram to *The Times* announces the death, on the 13th instant, of Mustapha Pasha Fehmy, the veteran Egyptian statesman. Fehmy Pasha, who was of Turkish extraction, figured as Minister of Foreign Affairs in the Ministry formed by the Chamber of Notables in the spring of 1882 and after the formulation of the Joint Note of the British and French Governments, Mahmoud Pasha Sami being nominated President and Arabi Pasha Minister of War. A few months later, and on the rupture between the Khedive (Tewfik) and his Ministers, it was proposed by the British and French Consuls-General that Fehmy should form his own Cabinet, but this offer was declined by him. In May, 1891, he, however, succeeded Riaz Pasha as Prime Minister, retaining his office for two years, until the death of Tewfik and during the early months of the reign of Abbas Hilmy. In the autumn of 1895, and in consequence of the resignation from office of Nubar Pasha from ill-health, he again took on the duties of Prime Minister, and held office till the fall of the Ministry in 1908, when he was succeeded by the ill-fated Butros Pasha Ghali. Subsequently he retired into private life, until the Ministerial crisis of last March, when he was again asked to form a Ministry in succession to Mohammed Pasha Said. He at first expressed unwillingness to re-enter the arena of Egyptian politics, but subsequently gave way and agreed to entertain the request, provided certain conditions laid down by him were accepted, and provided his doctors assured him his health would stand the strain. A deadlock ensued, however, in the course of the negotiations as to the constitution of the Cabinet, and finally Fehmy Pasha withdrew his acceptance of office.

During his long tenure of office Mustapha Pasha Fehmy distinguished himself by his loyalty to British policy, from the execution of which he never shrank, although he was often brought into conflict with the Khedive. In his book, "Modern Egypt," Lord Cromer paid the following tribute to the deceased statesman:—"Loyal, thoroughly honest, truthful, and courteous, he possesses all the qualities which Englishmen usually associate with the word gentleman. He has been statesmanlike enough to see that the interests of his country would best be served by working loyally with the British officials instead of opposing them. During his tenure of office Egypt has made greater progress, both moral and material, than at any previous period."

DOMESTIC ANNOUNCEMENTS.

BIRTH.

BRAY.—On September 12, at the Vicarage, Fordingbridge, the wife of Lieut.-Colonel H. A. Bray, R.A.M.C., attached Egyptian Army, of a daughter.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

UPPER EGYPT.

Luxor.
The Winter Palace. The Luxor Hotel.
The Karnak Hotel.

Assouan.
The Cataract Hotel. The Savoy Hotel.
The Grand Hotel.
Are the Finest on the Nile.

Cairo.

HOTEL D'ANGLETERRE.
Comfortable and Quiet. Near Opera Square.

GRAND CONTINENTAL.
Central Situation. Opp. Esbekieh Gardens.

SAVOY HOTEL.
Most Fashionable Hotel in Egypt.

MENA HOUSE HOTEL.
At foot of the Great Pyramids.

GRAND HOTEL, HELOUAN.
Excellent Family Hotel, adjoining Golf Links.

HOTEL DES BAINS, HELOUAN.
Opposite Sulphur Baths Establishment.

HOTEL CASINO, SAN STEFANO.
Near Alexandria. Favourite Bathing Resort.

CAIRO.

HELIOPOLIS PALACE HOTEL.
The most luxurious and comfortable Hotel in the world.
Connected with the centre of Cairo by the Electric Metropolitan (10 minutes' journey).
Altitude, 40 metres above the Nile valley.
Splendid view over Cairo.
GOLF, POLO, CRICKET. HIPPODROME in vicinity of Hotel.
Under the same management—
HELIOPOLIS HOUSE,
A first-class Family Hotel, with moderate terms.

Alexandria.

WINDSOR HOTEL (*Facing the Sea on the New Quay*).
Most delightful and healthy situation of any Hotel in Alexandria. Electric Light throughout. Daily Concerts on Verandah. Meals served *al fresco*. French Cuisine and English Management.
Inclusive Terms from P.T. 80 (10s.) per day.
Special Terms to Government Officials, Commercial Travellers, and for long stays.
Proprietor and Manager—AUG. van MILLINGEN.

Alexandria.

CARLTON HOTEL, Bulkeley.
Just outside Alexandria. Half-way to San Stefano.
Ramleh's Fashionable Hotel.
Patronised by the Elite.
Open all the year round. Visitors from Cairo alight at Sidi Gaber Station and thence drive to Bulkeley in five minutes. Full Pension P.T. 80 per day.
G. AQUILINA, *Proprietor.*
(Late of Messrs. Thos. Cook & Son.)

Alexandria.

MAJESTIC HOTEL.
Every modern comfort and luxury. Private apartments with bath-rooms attached & combined suites.
150 ROOMS AND SALOONS.
Hot and cold water in each bedroom. Large and luxurious dining rooms. American bar and restaurant stocked with best wines and liquors. Garden terrace. Verandah.
Lift. Motor Car, Guides and Interpreters meet all trains and ships on arrival.

"SCRAPS OF PAPER."

The powers that be in Constantinople are agitated. Amid the clash of arms which is now shaking Europe to its foundations it is too much to expect of the warrior Turk that he should accept readily the rôle of a passive spectator. But apart from a natural propensity for fighting he is convinced at the present moment that he has an excellent object for which to fight. Two unsuccessful campaigns have left him with certain clearly defined grievances; they have also given the military authorities valuable experience, and these have satisfied themselves that, if not hopelessly outnumbered by a confederation of enemies, the Turkish Army is now in a position to render a good account of itself. Thus it comes to pass that there is a very bellicose spirit in the Ottoman capital, a spirit reminiscent of the Potsdam atmosphere which a number of the higher commands in the Turkish Army have so freely breathed. With Germany light-heartedly engaging in a conflict in which she seems to have taken special pains to swell the ranks of her enemies, an excellent opportunity appeared to be offered Turkey for settling her own scores. As a mere camp-follower of invincible German and Austro-Hungarian armies she could count upon picking up quite a number of acceptable trifles; but if she were to strike on her own behalf under the German aegis, the prospect of far more valuable spoils loomed before her. Unfortunately for such a programme, before Turkey had drawn her sword at Germany's bidding, the latter was shown to have made serious miscalculations, while Austro-Hungarian armies had failed miserably against both Servia and Russia. At the same time the Porte's political strategy met with no success, for it found that any attempt to provoke hostilities would involve the Ottoman Empire in a struggle against a confederation even more powerful than the one which had worked Turkey's humiliation in the first Balkan War. As a result of this discovery military ardour in Constantinople has given place to military exasperation. A partial mobilisation had been effected, and it was felt that Turkey, having rattled the sword in the scabbard, must do something. If the Treaty of London could not be torn up, a substitute must be found for an exhibition of martial spirit. What could be better than the Capitulations? They concern mainly the Great Powers, and the Great Powers being at war among themselves would not be likely to make common cause against Turkey. Accordingly the Capitulations are declared to be abolished as from October 1, and the Ottoman Empire is invited to celebrate the proclamation of national independence.

For the Powers which have Turkey's interests at heart and were fearing lest she should embark on a war that could only have ended in the expulsion of the Turks from Europe it comes as a relief to find that the Porte's military activities have led, for the moment, to nothing worse than a flamboyant tilting at a windmill. The difficulties of the Turkish Government are realised. It is not altogether master in its own house; the military element is strong and has to be humoured. The proposed abrogation is less serious in its effects than the course to which the extremists were committed, and offers what a declaration of war would not have offered—a basis for negotiation. Young Turkey, however, has much to learn in the school of international diplomacy. Some idea of the crudeness of her present venture will have been gathered from the fact that the proposed abrogation of the Capitulations has met with a simple *non possumus* from the Powers concerned. Not only does Italy associate herself with the Powers of the Triple Entente in an Identic Note to the Porte on the subject, but even Germany and Austria-Hungary, who are making such bids for Turkish help in the war of the nations which they have so rashly provoked, show no readiness to give way to Turkish susceptibilities on this point. The Capitulations, as diplomatic phraseology expresses it, do not represent a unilateral convention, to be repudiated at the mere wish of the Porte, they are a binding contract which can only be determined by mutual agreement of the contracting parties. It is true that in a case of war between the parties the Capitulations ought to lapse automatically, and the anomaly, to which reference was made in these columns last week, of allowing the German and Austro-Hungarian Consuls to continue their functions in Egypt has been stopped at the instance of Great Britain. But in the case of Turkey the Capitulations must hold good until they are abolished by the consent of all concerned. Hitherto Ottoman respect for the pledged word has been one of the most valuable assets of the Empire. It would be an ill omen for the new régime if it sought to introduce into Turkey's foreign relations the Potsdam doctrine that treaties are merely scraps of paper, to be kept or torn up as self-interest dictates. Before such a step is taken it might be well to see what measure of success attends the German exemplar.

Elsewhere in this issue we deal with the origin and full significance of the Capitulations which Turkey wishes to annul. They cover a wide area in their operations, and it cannot be denied that they constitute a very definite limitation of Ottoman sovereignty. On the other hand, they are a distinct safeguard for the country. By far the most important aspect of the Capitulations is the judiciary privileges reserved for foreign States. If these were removed there can be little doubt that Turkey would quickly find herself in serious conflict with various countries. Ottoman conceptions of justice are still where they were in the Middle Ages, if we may judge from incidents as recent as the experiences of El Masri. If such treatment can be meted out in Constantinople to a highly placed Turkish officer it is not difficult to imagine what might be the fate of a hapless foreigner left to the tender mercies of the local authorities in distant parts of the Empire. Even the Capitulations have not been sufficient always to secure respect for international comity in Turkey. Until, therefore, the Porte can show that Ottoman conceptions of justice and the liberty of the subject have more closely approximated to Western standards there can be no question of the abolition of the Capitulations. On the other hand, as proof that the Powers insist upon the Porte's observance of its pledged word solely from a sense of necessity, and not from any desire to impose upon Turkey, it should be possible to modify the Capitulations as the general progress of the country admits. The efficiency of the Turkish Post Office has come to be recognised, and if a few safeguards could be provided, it might be allowed to supersede the foreign post offices, which in some instances must be hard put to it to justify their existence. Here at least is a basis for negotiation beween the Porte and the Powers as soon as the ill-advised announcement regarding the Capitulations has been withdrawn. Much of the progress that Turkey has made in details of administration is apt to be counteracted by the *faux pas* of its Government. So long as the sober judgment of the majority of the Cabinet has to be subordinated to the ambitions of a few extremists, it is difficult for foreign Governments to give the Porte credit for what has been achieved under the new regime; for the ordered course of events is liable to be disturbed at any time by a military *pronunciamiento*. To seek to abolish the Capitulations before the question of domestic reform has been seriously dealt with can only expose the Porte to loss of face at home and abroad. The foreigner is not likely to show much appreciation for a system of administration which fails to satisfy Armenian, Arab, or even Turk.

THE CAPTURE OF SEMLIN.

The capture by the Servians of the Hungarian fortress of Semlin (Zemlin, or Zimony) is an achievement in its way as far-reaching as that of Lemberg by the Russians. It is difficult to predict what immediate bearing this new Servian victory will have on the future of the campaign, but nevertheless it must be admitted that the Serbs have acquired a strategic key of the greatest value in their operations, and one that will have considerable influence on the future of Slavonia and Bosnia, even of Hungary proper.

Situated on a hill on the left bank of the Save at its junction with the Danube, Semlin, with its powerful modern batteries, commands both rivers, and has ever been a menace to Belgrade on the opposite bank of the river. In a way the garrison town was Austria's "open eye" on the doings of the Serbs, and also the headquarters for an army of spies and provocateurs who were free to ferry backwards and forwards across the Save and ply their questionable trade.

To Austria the loss of this fortress-town is a severe blow. The bombardment of Belgrade is no longer possible, the command of the Lower Danube has fallen into the hands of the twin fortresses Semlin-Belgrade, now united, and the same fate awaits the Save, an important waterway forming the natural boundary between Hungary and Bosnia on the one hand and Hungary and Servia on the other. Even the control of the Drina has fallen into the hands of the Serbs, and thus the whole position in Bosnia has become imperilled, whilst simultaneously King Peter's valiant army has acquired a powerful *point d'appui*, whence it can advance into the heart of Slavonia.

From the Servian point of view—and taking it for granted that in view of Russian pressure in Galicia, Austria will not be able to retake her lost stronghold—the capture of Semlin is more important than the destruction of a whole Austrian army corps. Belgrade and its Save harbour are freed from a continual menace, the northern frontier is saved from further attack, hostile operations in the west are rendered practically impossible for fear of an attack on the flank, and the Austrian river gunboats on the Save, having no outlet to the Danube, will either be destroyed, captured, or bottled up to the west of Racha, thus enabling the Serbs to push unhindered across the river. For the fall of Semlin implies of a necessity the withdrawal of the Austrian army from its base on the Save northwards in the direction of Peterwardein (or Petervarad).

Taking Semlin as their base of operations, the Servian General Staff will in all probability attempt to push an army as rapidly as possible northwards to Peterwardein, the formidable fortress on the Danube commanding an important railway bridge and the town of Ujvidek (Neusatz), the centre of Hungarian Serbdom and the intellectual centre of Slavonia. Another army is likely to push northwards from Mitrowitz, with the result that, unless the Austrians retreat to the Danube, a battle will in all probability take place shortly somewhere near Rima, a junction station on two strategic railway lines to the north-west of Semlin. Much will depend on the outcome of the encounter. If the Serbs are successful, not only will the advance on Peterwardein be assured, but, on the other hand, all danger will have been removed of an Austrian flank attack from the north on a Servian army operating in Bosnia to the south of the Save. Progress here, then, ought to be rapid, as neither Montenegrins nor Serbs will have to fear threatening flank attacks. The fall of Serajevo—and with it the whole of Bosnia—ought, therefore, to be only a matter of weeks, according to the measure of opposition put up by the enemy. As for a serious offensive Austrian movement across the Drina, there does not seem to be much likelihood of one being undertaken, except perhaps as a "blind" to divert Servia's attention from what must be her real objective. Should it take place, however, it is likely to prove disastrous to the Austrians, owing to the fact that they must expose themselves to an attack on their left flank. Penetration into Servia has been tried, and has failed, at four points—namely, on the north from Semlin and Mitrowitz, and in the west from Vishegrad and Losnitza. At all four points the Austrians have been thoroughly defeated. They can hardly expect to be more successful now that they have lost their base on the Save. The Serbs, on the other hand, can hold the above-mentioned "gateways" into their country with reduced forces, thus enabling the bulk of their armies to take the offensive and to push forward in a westerly and northerly direction towards Serajevo and Neusatz.

[From accounts, both official and private, to hand at the moment of going to press, it would appear that, instead of retiring to a new base, the Austrians have again taken the offensive on the lower Drina, with the results anticipated by the writer. The news that the Servian troops north of the Save have, instead of pursuing their objective, been "recalled for strong strategic reasons," need cause no surprise, as it is likely that in view of the Austrian offensive on the Drina the Servian General Staff will attempt a flank attack from the north on the Austrian left. The fall of Vishegrad, reported to-day, should greatly help this manœuvre, as it will serve to incommode the right of the Austrian Army painfully attempting to cross the Drina.—ED.]

GREAT BRITAIN AND BULGARIA.

Mr. Noel Buxton, M.P., and Mr. Charles R. Buxton are at present on a visit to Bulgaria. In a telegram, dated September 15, Reuter's Sofia correspondent reports that since their arrival they have had conversations with numerous politicians belonging to all political parties. The cordiality of the welcome which the visitors have everywhere received indicates (the correspondent adds) that it is not merely a mark of gratitude on the part of Bulgaria for the services of Messrs. Buxton and the Balkan Committee in the cause of Bulgaria during the last few years, but is also a sign that Bulgarian politicians greatly appreciate the benevolent attitude which Great Britain has always shown towards the pacific and cultural development of the small nations, and that they are disposed to follow the advice which friends of Bulgaria in England are now giving in order to harmonize Bulgarian policy with that of England and with this intention to enter into pourparlers with English politicians. It is hoped that a political entente with England will ensure the realisation of Bulgarian national aspirations.

MR. ASQUITH'S GUILDHALL SPEECH.

Bulgarian Appreciation.

In a message dated September 16, Reuter's Sofia correspondent reports:—In reply to a telegram despatched to Mr. Asquith by the Slav Society of Sofia congratulating the Prime Minister on his recent speech at the Guildhall, the British Minister (Sir H. G. O. Bax-Ironside) here has sent the following letter to the vice-president of the society:—

"Sir,—I am desired by the Prime Minister of Great Britain to express to you and to the members of the Slav Benevolent Society his thanks for the telegram of congratulation which your society has been good enough to send him and for your expression of the sympathy and esteem which you entertain towards Great Britain and British policy. Mr. Asquith is much touched by the flattering words which have been conveyed to him concerning his speech."

THE WAR.

PRESS AND PUBLIC OPINION.

Financial Straits of Germany.

The German Imperial Government is making desperate efforts to raise the wind. The Copenhagen correspondent of *The Times* reports that the Press urgently appeals to the public in the following terms:—

We stand alone against a world in arms. No financial assistance worth mentioning is to be expected from neutral countries, and we are thrown upon our own resources for procuring money. These resources exist and will manifest themselves both abroad in the presence of the enemy and at home within the limits of the German Fatherland when it is a question of providing it with the means which it needs for the fight for its existence and its position in the world.

The victories which our glorious army has already won in the west and east justify the hope that just as in 1870-71 the expenses and burdens of the war will again finally fall upon those who have disturbed the peace of the German Empire.

After earnestly calling on German capitalists, Germans who have saved money, German corporations, companies, banks, etc., to show their patriotism by contributing to the success of the loan, the appeal continues:—

It is no sacrifice that is asked of you, for you are offered at a cheap price investments of the foremost security with an excellent rate of interest! Let no one say that he has no liquid assets! Steps of the widest extent have been taken by the war loan banks to render liquid the necessary cash. Every patriotic German must to-day unhesitatingly endure a temporary slight loss of interest due to this liquidation. The German savings banks will abandon as far as possible in the most liberal spirit the obstacle of notice of withdrawal.

French Newspapers and the War.

The straits to which newspapers are reduced in France owing to the scarcity of news are described by the Bordeaux correspondent of *The Times* in its issue of September 15. He says:—

Civilian France is in a darkened room, and with great appropriateness the Ministry of Posts and Telegraphs has been temporarily lodged in the local Deaf and Dumb Institute.

The newspapers live by taking in each other's washing. Items of news which filter through to Bordeaux forms the only source of information—the English papers do duty among the many newspapers of Bordeaux for many days. In sheer despair before their empty columns editors reprint their rivals' leading articles. English newspapers are loaned to the various Embassies and Government Departments. A banker of Bordeaux, who asked me for *The Times*, told me that in 1870 Paris was almost entirely dependent upon England for her news of events outside. His sister, who was shut up in the besieged city, found in the agony columns of *The Times*, which reached Paris by balloon, news of her relatives in the provinces.

The Humbugging of Mr. Straus.

Many of our readers will be interested in the story about Mr. Straus, which comes from Washington, owing to his former connection with Near Eastern affairs. The following is the version sent by the Washington correspondent of *The Morning Post*, under date of September 13:—

Further details in regard to the recent abortive peace movement show, as I have already indicated, that it originated with the German Ambassador, who used Mr. Straus, the former American Ambassador to Turkey, as his catspaw, and by keeping in the background was able to deny that he was acting officially if the effort failed or to claim the credit for successful diplomacy if the Allies should show any desire to end the war. Mr. Straus acted in entire good faith, and believed the Ambassador to be sincere. Count Bernstorff persuaded Mr. Straus that Germany was willing to listen to peace proposals, and Mr. Straus, prompted by motives of humanity, at once went to Washington and informed Mr. Bryan, by whom he was instructed to sound the British and French Ambassadors. Both were somewhat surprised at the form and manner in which the suggestion was made, and returned the answer that might naturally have been expected. Their Governments, they said, endeavoured to preserve peace and had not provoked the war, and they would, of course, be glad to transmit any offer that was officially made. Mr. Straus had not been empowered to make an offer of any kind, and Mr. Bryan sent for Count Bernstorff, who was in New York, and asked him what terms Germany proposed. Count Bernstorff admitted that he had not been authorised by his Government to propose terms, and that he had merely expressed his personal views, which, of course, ended the matter.

Austria-Hungary "in Extremis."

An article in *The Globe* (September 14) gives a truly terrible picture of the internal condition of Austria-Hungary. The title of the article is "The Terror in Austria," and its anonymous author describes himself as "A Serbian Refugee." The following is an extract:—

The Southern Slavs of the Dual Monarchy believe that their last days have come. As no information reaches them from without, and as Austria controls the entire Press and abuses its power in the most scandalous manner, the people in Bosnia, Croatia, and Dalmatia, who are Serbs by race, do not know at this day that a great European war has broken out. They know only that there is war between Austria-Hungary and Servia, and thousands of gendarmes frighten the women and children with fantastic lies of Austrian victories over the Serbs and Montenegrins. The people, in their simplicity and ignorance, believe that the end of the Serbian race has come, and that the kingdom of Serbia has ceased to exist. Over the whole territory inhabited by the Southern Slavs of Austria lies the fear of death. The people believe that Antichrist has arrived, that Slavism and Orthodox Christianity are doomed to destruction. The misery prevailing in Herzegovina and Dalmatia is heartrending. Numerous mothers have killed themselves in order not to see their children murdered. Whole families have committed suicide. At Mostar, the capital of Herzegovina, hundreds have drowned themselves in the River Neretva.

The state of things is no better in the north. The article continues:—

A reign of terror prevails not only among the Southern Slavs of Austria-Hungary, but also among the Northern Slavs, the Czechs. During two days Prague was in revolution. Battles took place between German and Slavonic regiments. The reign of terror in Bohemia is probably as fearful as it is in Bosnia, Dalmatia, and Croatia. The leading Czech politicians, University professors, authors, artists, merchants, etc., have either been executed or been taken as hostages, and in Austria hostages are held responsible for the good behaviour of the civil population. A riot, or merely a panic among the soldiers, leads to the execution of hundreds of hostages. According to reports received, the eminent Professor Massaryk and the celebrated politician, Dr. Kramarz, have been shot, although both have always been known as loyal Austrians. Their eminence was their only crime.

Bargaining under Difficulties.

The fixing of prices of food and necessaries in Egypt has upset the time-honoured business customs of the native merchant. On this point the following extract from *The Egyptian Gazette* of August 26 is interesting:—

Most of the little squabbles yesterday were due to the merchants commencing by asking a price above the tariff. This they did not do because they had any intention of defying the law by insisting upon such a figure, but merely because they cannot help bargaining; and unless the joy of argument was to be entirely lost it was necessary to start with a price well above the legal maximum. Now and then, however, an impatient customer, instead of settling down to the old, familiar discussion, would reply by calling the nearest shawish and threatening to give the merchant in charge. This coarse interruption of the time-honoured ritual associated for centuries with every bargain struck in Egypt would produce a terrible hullabaloo. The native does not object to the tariff on economic grounds, but it cuts him to the heart to have lost the power of bargaining. Is it possible that he will now at last come to see that it pays him better to do a lot of trade at a reasonable profit rather than to waste half the morning trying to swindle one customer out of a few piastres? If he *does* come to understand this, we may yet see native trading establishments springing up in Rue Sherif Pasha and Shareh Kasr-el-Nil, and the Egyptian Chamber of Commerce will at last have something to do. But traditions die hard.

NEAR EAST BOOK NOTES.

Messrs. Harrap have published "Augustus," by Mr. René Francis, in the "Heroes of All Time" Series. The book is a study of the career and policy of Augustus.

Messrs. Macmillan and Co. have just published the second series of Lord Cromer's "Political and Literary Essays." Amongst the subjects of the essays are "The Old Prussian Army," "Imperial Germany," and "The Hun Policy of Germany."

We have received a copy of a handbook on "Buxton and Environs," published by Messrs. Darlington and Co., of Llangollen, which, besides being admirably printed and illustrated from photographs, gives the right kind of information succinctly and explicitly. Visitors to Buxton could have no more convenient guide.

W. N. WILLIS'S GREAT BOOK.

ANTI-CHRIST IN EGYPT

It is a vehement appeal to Christian England to save the children of Egypt from the open vortex of degradation and shame permitted—indeed, encouraged—by the Capitulation Laws which govern that country.

The chapter descriptive of Lord Kitchener as a civil administrator will be a revelation to even the most enthusiastic of that great General's friends and admirers.

Every voice that denounces the rampant riot of vice in Egypt will assist **LORD KITCHENER** in his GREAT IMPERIAL EFFORTS.

The Book may be ordered of all Booksellers, or direct from the Publishers, 2/4 post free, any address in the world.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The reported abolition of the Capitulations by the Ottoman Government, to which reference has been made elsewhere, has left the City rather cold. The impression is that no step will have been taken by the Government towards the abolition by October 1, and that, as a result, the threat will die its natural death. On the other hand, it is admitted in authoritative circles that the Capitulations are a thorn in Turkey's side, and that their abolition is bound to come—not hastily, as was intended by the Ottoman Government, but duly and in good form as soon as the European war is over. For the time being, therefore, the Young Turks will be well advised to let the matter drop. They have shot their bolt, and it will find its mark—after the war.

***

The Decree of the Muharrem and its Annex are not, it is argued, affected either one way or the other by Turkey's threat. Consequently, the status of the Ottoman Public Debt Administration is not, and cannot be, altered in any way until the Decree itself has been modified, and this cannot be done by Turkey without consulting the Powers, as otherwise her credit in Europe would be destroyed. Reuter's message from Constantinople to the effect that it was intended to modify the Decree is therefore taken with a grain of salt, and from inside information I gather that the various Foreign Offices are inclined to regard the report in the same light.

***

The Turkish Consul-General notifies the public that the Ottoman Finance Ministry has advised him that in consequence of the troubled state of Europe, Coupon No. 4 of the Six Per Cent. Ottoman Treasury Bonds, due on September 14, will only be paid at Constantinople. The bonds referred to were issued in 1912 and are repayable by six equal payments of interest and principal. Regarding the Turkish Unified Debt, the interest upon which also falls due on September 14, our Constantinople Financial Correspondent, writing on September 2, states that the Public Debt Administration has made arrangements in Paris and London for payment on the coupon falling due. The September coupon of the Turkish Lottery Bonds will likewise be duly met in Paris. Regarding payment on the Unified Debt coupon in London, I may state that some discrimination is likely to be shown this year in the case of alien holders. At least, I imagine that German and Austrian holders will not receive payment through any British or French bank.

***

The Financial Times, referring to the payment of the Treasury Bond coupons in Constantinople only, criticises this arrangement and says that: "As the issue is probably domiciled either at the Imperial Ottoman Bank or the National Bank of Turkey, it should not have been very difficult to have arranged for payment in London as usual to British holders." I think the writer, if he had read my Notes last week, would have understood why such a course is impossible. There is no shifting of gold under present circumstances, and consequently banks must endeavour to keep a normal balance both here and in their branches abroad. The Ottoman Government can, of course, pay the necessary sums into a local branch in Constantinople, but if the London bank has to pay out those sums without obtaining corresponding sums at this end in return, its stock in gold will dwindle. However, if a British bondholder went to the bank—whichever it may be—and expressed a wish to be paid here instead of at Stamboul, the bank might be able so to arrange matters that his demand could be set off against the payment into the bank by a third person of a remittance to Constantinople. In order that this scheme, to which I referred last week, be practically realised it is necessary that people desiring to remit money abroad and those desiring to receive money from abroad should either get in touch with a bank or communicate their wishes to some organ of publicity (THE NEAR EAST, for instance, for the ground it covers) which, privately and unostentatiously, is in a position to further their request.

***

An Exchange wire from Rome, published yesterday, reported that a message from Bucharest stated that "the Cabinet had decided to float a loan of £8,000,000 through the National Bank of Roumania." I have been unable to have the report confirmed, but in competent City circles the opinion obtains that there may be some truth in it. The Roumanian Government is doubtless in present need of money. The Army has been actually mobilised, if not nominally, and expenses are accruing; loans abroad are quite out of the question, and therefore it is not surprising that the Government should approach the National Bank. The loan will, of course, have to be an internal one. If the popular enthusiasm for the Entente Powers, about which we have had several accounts, be true, there is no reason why the Government should not raise 200,000,000 lei at home on reasonable terms. In ordinary circumstances it is doubtful whether more than 25,000,000 lei could be raised. If the operation is to be carried out it will, therefore, be interesting to watch results. It will not be less interesting to see to what uses the money obtained will be put. There are rumours that Roumania will shortly be on our side against the Teuton aggressor of Transylvania.

***

"One fact," writes our Cairo correspondent, who is in a position to be exceptionally well informed, "appears certain, and that is that next year Egypt's cotton production must be restricted, and the available area devoted to cereals." Before committing myself to a criticism of the measure, I should like to point out that it only bears out what has been known and predicted for years, namely, that, in case of a general European war, Egypt would have to cease being, for the time at any rate, a one-crop country, and would have to plant food-stuffs in order to be more or less self-supporting. What effect the resolution if adopted will have on the country and whether it will remain in force after the war is over, are questions too speculative to be answered offhand, but this much, I think, will be readily admitted, namely, that cereals will never bring to the country the same measure of economic prosperity as was brought to it by cotton; further, that in case of a permanent shortage in the supply, either the demand will decrease or means will be found to increase that supply, either artificially or from another source; and, finally, that the reduction in the Egyptian crop does not of a necessity imply better prices. These are facts which will have to be borne in mind.

***

It must frankly be admitted that the whole question is one of exceeding gravity, as will be gathered from the series of articles which we have been publishing from our Cairo correspondent. The Cotton Commission, composed of Messrs. Higgs, Dickson, and Critchley, to which we referred last week, is doing good work on this side, principally devoting itself to inquiries concerning Lancashire demands. Regarding the gold necessary to move this year's crop, none, I am afraid, need be expected from the Bank of England. The result will be that, as I predicted, the crop will have to be moved with paper money. Perhaps next year's crop will have to be moved by the same means, and it is just possible that having once got used to paper instead of gold, the fellaheen can be induced to keep on taking notes for his crops, thus relieving the City of its annual autumn bugbear. As for the scarcity of gold in Egypt, local means will have to be devised to get over it, but it is too premature to suggest, as was done by a writer in *The Egyptian Gazette*, that the Government should mint its own gold coins.

***

I think it is time that level-minded patriots should no longer be led into condemning trading firms of British capital and interests because of a foreign-sounding name. Many such firms, of long-standing in this country and administered by a board of British directors, are every whit as "national" as others whose name may be Saxon, but whose directors are anything but Anglo-Saxon. I do not wish to go into particulars here, but when the sensational campaign is carried so far as to throw aspersions on thoroughly British firms for the sake of "copy," I think it is time to cry halt. Nothing is more prejudicial to our own interests than "overdoing it."

***

The case of Shannon, Ltd., illustrates what I mean. Certain insinuations were made as to the origin of the company and the nationality of its principals, which has brought forth from the chairman and managing director a spirited reply, in the course of which he points out that the Shannon, Ltd., is a British company, the whole of the capital of which has been subscribed and is held by British subjects; there never have been and there are not now any but British-born on their staff, either clerical or in their three factories; as for the directors, they are all London-born. Though I regret that such a statement was deemed necessary, I hope that it will have the result of silencing envious trade rivals.

War on German Trade.

BOARD OF TRADE BULLETINS

C—PHOTOGRAPHIC GOODS.

Germany exported in 1912 photographic goods to the value of £1,843,600, of which £369,350 represents the value of chemicals for photographic purposes. Of the latter, Egypt imported to the value of £1,200, Turkey £1,500, Roumania £1,250, and Bulgaria £450. Germany's exports of photographic paper, plates, and films amounted in the same year to £376,600, of which £2,300 went to Egypt, £2,700 to Turkey, £4,100 to Roumania, and £1,100 to Bulgaria. The export of lenses and photographic apparatus of all kinds amounted to £375,150, of which £1,850 went to Egypt, £2,100 to Turkey, £5,800 to Roumania, and £2,000 to Bulgaria.

Austria's total exports only amount to £26,500.

Particulars of photographic chemicals, materials, and apparatus exported are not separately recorded in the trade returns of the United Kingdom, so that it is not possible to compare the exports of the three countries to Colonial and neutral markets.

The Bulletin estimates the total volume of the trade in photographic goods which might conceivably be diverted to British manufacturers at £1,582,360, and publishes the following particulars concerning New Eastern centres:—

Greece.

The Austrian Consul-General at Salonika, in his report for 1912, states that photographic goods were obtained from Germany and England. Plates and films came from France and England, and a very few from Germany. Papers were mostly from Germany, though France, England and Austria supplied some. The cheaper sorts of matt papers were sold, such as silver chloride and gaslight papers, and bromide in rolls for enlarging; the more expensive kinds, such as platinotype, were only used in a few of the better studios, which ordered direct. Imports consisted entirely of whole sheets, cut pieces were not required. Photographic chemicals in bottles, cartridges and tablets came from Germany and England.

An American Consular report for 1912 states that optical goods are chiefly imported from France and Germany. There is no establishment equipped with apparatus for the examination of the eyes or machinery for grinding lenses, and none which is devoted exclusively to the sale of optical goods. Prescriptions of the local oculists are sent to opticians in France and Germany to be filled. The eye-glasses mostly in demand are nickel-plated pince-nez, which sell for 2s. 6d. a pair, and gold-plated pince-nez, which sell for 4s. 2d. a pair. When special lenses are prescribed by an oculist which have to be ground abroad, the eye-glasses retail at 11s. 8d. to 12s. 6d. a pair.

Egypt.

The following were the values of photographic apparatus and accessories imported into Egypt from the undermentioned countries in 1912 and 1913:—

	1912. £E.		1913. £E.
United Kingdom	6,993	..	8,466
Germany	2,491	..	2,338
Austria-Hungary	312	..	229
All countries	13,771	..	15,530

DELICIOUS COFFEE.
RED WHITE & BLUE
For Breakfast & after Dinner.
Wholesale, of Hanson's, London, England.

A recent issue of the Monthly Journal of the French Chamber of Commerce in Alexandria states:—

"Egypt is now a very promising field for the sale of photographic apparatus and accessories. The most saleable apparatus is German, American and British, especially the former. The large sales of the latter are due to extensive advertising and long terms of credit usually allowed to buyers. In papers, plates, etc., France has held the trade since 1911, though Germany has made considerable strides, again due to long credits in conjunction with low prices. The climate of the country being exceedingly favourable for photography, the prospects of the trade are good; but it must be noted that cameras for Egypt should be light and handy, and that the largest demand will not be for the cheapest article, but for a camera of moderate price and good workmanship."

In an article on the photographic trade, *The Egyptian Mail* says there is already in Egypt a distinct shortage in certain lines, such as plates, printing papers, and chemicals. The German supply has ceased, as has the French to a very large extent, because most of the French factories have had to close down due to their male employees having been summoned to the war. England manufactures the finest photographic materials in the world, and the great firms are exceptionally favourably situated for securing the entire Egyptian business. Italy has little interest in the trade. The United States, which produces great quantities of excellent photographic materials, are further away from Egypt than Great Britain is. It seems practically certain therefore that importers will have to turn to the latter country, though at the same time British manufacturers will have to pay attention to the business to secure it and hold it.

THIS WEEK'S BULLETINS.

The following bulletins were published during the past week:—Anchors, grapnels, and chains; cycles and parts thereof; buttons, studs, etc.; engine and boiler packing; hollow glassware and glass bottles; iron and steel plates and sheets; painters' colours and materials (including varnish); road locomotives (including steam rollers); screws, nails, bolts and nuts of iron and steel; and tubes, pipes and fittings of iron and steel; motor cars and parts thereof; and motor cycles; saddlery and harness and miscellaneous leather wares; sewing and knitting machines; and lubricating oils and greases.

SEWING MACHINES.

One of the most remarkable developments in connection with German industrial progress during the last forty years, says *The Morning Post*, has been the virtual capture by German sewing-machine manfacturers of the British trade. "Out of ten sewing-machines which we sell," the head of a large firm of importers told a representative of the paper mentioned, "at least nine come from German factories. We sell a German machine for £2 15s. net cash, and it is quite as good as, or perhaps better than, a similar article of English manufacture, which we cannot afford to sell for less than £4 9s. I could mention about a dozen English firms of sewing-machine manufacturers, the names of which were once well known, but which have now ceased to exist. Whether some of them will be revived under existing circumstances it is impossible to say, but it is certain that large profits are to be made just now in the trade, as with the cessation of German supplies there is sure to be a rise in prices."

Roumania, Bulgaria, and Turkey are big importers of sewing-machines, the American and German articles easily heading the list.

The exports of cotton yarn to the countries of the Near East during August this year, as compared with the corresponding month of 1912 and 1913, were as follows:—

	1912. Lb.		1913. Lb.		1914. Lb.
Bulgaria	1,072,500	..	—	..	237,900
Roumania	769,300	..	256,100	..	318,60
Turkey	1,331,100	..	842,400	..	219,700
Egypt.....	246,000	..	147,900	..	83,000

GERMAN TRADE METHODS.

Some of the trade secured by the Germans has been got by dubious methods. They are probably unrivalled in the art of making nothing look like something. They have taken customers away from us in some countries by giving dangerously long credit, for which, under present circumstances, they will doubtless suffer.

But we can learn much that is good from them. First and foremost are their general intelligence of methods and their application of science to industry They have covered the world with enterprising travellers, who study the requirements and speak the languages of the countries they visit. In the organisation of industries requiring delicate apparatus and a high degree of scientific attainment they put us to shame. In the manufacture of colours and drugs from coal tar they lead and, indeed, in some respects monopolise, the world. While the war lasts we may do something to catch up to them, but we are at present a generation in arrear.—Theodore C. Taylor, in the September *Contemporary Review*.

CUTLERY IN SYRIA.

In connection with our remarks last week on the opportunities for doing business in cutlery in Syria, a Consular report on the trade in the Aleppo Vilayet says that cheap German cutlery continues to find a good market. The natives, and particularly the Moslems, appreciate appearance rather than quality, and cheapness rather than durability. Lamps, perfumery, sweetmeats, and miscellaneous wares are imported largely from Austria-Hungary. Continental firms facilitate trade operations with Syria at ordinary times by taking bills payable at from one to eight months after the date of the original invoice. British firms usually demand payment on shipment or delivery of goods.

OFFICIAL INFORMATION FOR TRADERS.

With reference to the "Official Information for Traders," together with a complete list of memoranda published up to date and mentioned in last week's issue of THE NEAR EAST, we understand that memoranda on a number of other trades, among which may be mentioned certain further classes of machinery, of iron and steel manufactures, and of railway material, painters' colours and varnishes, cycles and parts, buttons and studs, hollow glassware, jewellery, stationery, photographic goods, saddlery and harness, portmanteaux, pianos, medicines and drugs, and chemicals will be issued in rapid succession.

The issue of the memoranda is only the first step. The Commercial Intelligence Branch is prepared to receive and answer personal and written inquiries for further information with regard to particular trades and markets.

Any British manufacturer or merchant who desires to be furnished with more detailed information as to openings affecting his particular business should address the Director of the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C.

CONFIDENTIAL INFORMATION.

Firms in the United Kingdom desirous of receiving confidential information as to opportunities for the extension abroad of those branches of trade in which they are specially interested, and as to other connected matters, may, upon application, have their names placed on a special Register at the Commercial Intelligence Branch of the Board of Trade.

The confidential information communicated to firms so registered relates mainly to openings for British trade abroad, and is received from H.M. Consular Officers in Foreign Countries, from H.M. Trade Commissioners and the Imperial Trade Correspondents, and from the Board of Trade Correspondents in the Crown Colonies, supplemented by information from other sources available to the Commercial Intelligence Branch.

Firms inscribed on the register may indicate the particular lines of trade to which the information to be sent to them should relate, and a classified list of subjects is sent to all applicants for registration with this object.

EGYPTIAN TRADE OPPORTUNITIES.

"During 1913," says *The Egyptian Mail* in a spirited article "the total value of goods of all classes of German manufacture imported into Egypt was £E1,608,881, and of goods of Austrian manufacture £E1,940,512. In other words, one-eighth of the whole of the Egyptian import trade came from these two countries combined. The source of what is in normal times approximately £E2,600,000 of trade has been effectually closed for some time to come, and the volume is quite sufficiently big to attract the earnest attention of British manufacturers."

The article in question then points out certain kinds of goods where we can compete with the Austro-German. We quote:—

Matches.

A small box of matches is an insignificant-looking item, but the value of matches imported into Egypt last year (1913) was £E61,508, an increase of nearly £E10,000 over the previous year. To the former sum Austrian imports contributed £E23,727, an increase of nearly £E6,000 over the figures for the previous year; Britain contributed £E185 only, though there was a slight increase of £E50 in comparison with 1912. The moment appears more than ripe for British match manufacturers to recover the ground they have lost in Egypt, and to achieve a stronger position than ever before. Italy, as matters stand at the moment, is the only serious competitor. She imported matches into Egypt to the value of £E12,141 in 1913, as compared with £E10,052 in 1912.

Medicines.

The total value of these sent to Egypt during 1913 was £E120,549. France was the highest contributor with goods to the value of £E44,394, Great Britain next with £E26,972, then Germany with £E22,159, Italy with £E9,539, and Austria with £E8,155. There is then £E30,000 worth of chemical business, open to absorption elsewhere.

Perfumery.

The value of the perfumery and perfumed soap imported into Egypt during 1913 was £E67,425, one-fifth, or £E12,051, coming from England, which was £E600 less than in 1912. Germany sent articles to the value of £E10,235, and Austria £E7,795. Between them the two latter countries hold more than one-quarter of the whole trade.

Hats.

During 1913 hats to the value of £E248,906 came into Egypt. Germany had far and away the most of the business, as she sent £E76,435 worth, being an increase of over £E22,000 on the corresponding figures for 1912. Austria sent hats to the value of £E20,203, an increase of over £E8,000 as compared with 1912. The British imports were valued at £E23,733. Germany and Austria between them share nearly one-third of the whole import business.

A "British Resident in Cairo," writing in *The Times*, refers to the great and "unique opportunity presented by the present war to British trade for recovering its former position and prestige here and throughout the Near East," and then continues:—

"As an example, I will take the supply of books and stationery in Cairo. Of the books sold, one-third are English, one-third French, and the remainder in the Italian, Arabic, and other languages; yet the sale has been, up to now, almost entirely in German hands. Any British venture at the present juncture would meet with very general support and the hearty backing of the Press. All that would be required would be that the undertaking should be on a scale commensurate with the position of Great Britain in this country, and an able agent sent out by one of the great publishing or book-selling firms would receive every assistance from the authorities. Even if business on a large scale were impracticable for the present, it is surely possible to make preparations so as to be ready to prepare the ground for the conclusion of the war.

"I have mentioned the book trade, which even in times of peace should be in British hands, but I would add a list of the following commodities to which, in our present practical monopoly of sea traffic, the above remarks may apply:—Hosiery, lisle and cotton, men's ready-made clothing, girls' pinafores and dresses, cotton and lisle gloves, printed flannelette, lace (Nottingham), mosquito netting, fezes, delaine muslin, fancy mixtures of wool and silk, heavy wool material, hardware, including agricultural implements, screws, locks, nails, and bolts, Government Railway contracts.

FLOUR AND BREAD SUPPLY OF EGYPT.

The following statement as to the Egyptian flour and bread supply is extracted from *The Egyptian Mail* (August 29):—The stock of flour in the bonded stores at Alexandria up to the 26th instant was 7,239 sacks, to which must be added 5,800 sacks that arrived yesterday morning from the United States on a Greek boat, which gives a total of 13,039 sacks. The stock in trade is from 10,000 to 12,000 sacks, and to the lot can be added several hundred sacks of fine flour, for European bread, from Russia, Roumania and Bulgaria. Australian and Indian flour can only be used for native bread, so that, as already foreseen, the supply of European bread is liable shortly to give out. It is even possible that part of our stock may be required to meet demands up country which will leave no other than native, Australian and Indian flour, provided these countries continue to export. It is stated that a few sacks were sent in July from the United States and Canada, but nobody knows when these may arrive or whether they will do so at all, as ships on this route touch Hamburg or Trieste. The Greek Government commandeered all ships on its own account at the beginning of the war to get wheat and flour from America to be sold to tradesmen at reasonable prices. At the present moment, America and Roumania can alone supply good flour, all other countries having stopped exports.

ROUMANIAN AND EGYPTIAN TRADE.

(From Our Own Correspondent.)

Bucharest, August 27.

The export and import trade of Roumania with Egypt has grown in importance during recent years, and was being steadily maintained until the present standstill of all commerce. For the first half-year of 1914 the figures show a marked increase in imports from Egypt, though there has been a falling off of exports to that country.

The actual figures are:—

Imports from Egypt, January 1 to June 30.

1914	362,062,094	Lei (Frs.)
1913	333,464,014	,,
1912	303,541,574	,,

In spite of political events last year the increase, as compared with 1912, is considerable.

Exports to Egypt, January 1 to June 30.

1914	13,389,857 Lei
1913	15,301,172 ,,
1912	7,639,012 ,,

The articles principally exported are given below:—

	1914.	1913.
Flour	3,928,216	5,142,159
Petroleum	5,414,869	5,428,708
Timber	3,485,388	3,657,242
Residues of Petroleum	487,010	801,876
Cheese	321,070	195,669

There was a severe drop in the export figures for June, especially for timber exports. In June, 1913, timber to the value of 1,343,640 lei was exported, the figures for the corresponding month of 1914 being only 105,758 lei, a drop of considerably over a million lei.

ROUMANIAN SITUATION.

(From Our Own Correspondent.)

Bucharest, August 21.

The political situation is keenly felt in commercial circles, and many factories here, on account of the total lack of communication with abroad, are closing their doors. Among these the factory "Lemaitre," of Liége, have closed down, dismissing all hands, and other firms are following their example. The important firm Bukarester Elektrizitätsgesellschaft is also forced to suspend operations and numbers of employés are being dismissed.

Principal sufferers are agency and commission houses. All transactions with firms abroad have ceased, and consequently local importers are reducing their staffs. A meeting of over 3,000 agents and commissioners has been called for next Sunday to discuss their difficult situation.

Near East Markets.

SPECIAL REPORTS.

The following information is compiled from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East :—

Homs. June 30.

The following are extracts from the monthly report for June :—The harvest has begun, and the crops appear satisfactory. It is estimated that the yield of the barley crop will be 10 per cent. above last year's, and the yield of the wheat crop about equal to last year's. There has been no plague of rats and other rodents, but the reason why the crop is not greatly superior to last year's is because the area sown was reduced.

In view of the promising result of the harvest, business is satisfactory. Owing to the low prices a small part of the stock of cereals is still unsold, but it will doubtless be disposed of shortly. Considerable quantities of native tissues have been despatched to Egypt and Turkey. The movement of imports is rather slack, the prices of the principal articles of import (manufactured goods, Colonial produce) being high.

Aleppo. August 17.

The following are extracts from the monthly report for July :—Harvest operations are actively carried on in spite of the great heat. Threshing is not being delayed.

Business in our market has been restricted. Prices offered by buyers of wool and butter are lower than those which holders demand. Moreover, the news from Europe has affected injuriously business activity here. Wholesale buyers of articles for sale in the interior have hesitated to launch out. For these reasons the orders for tissues are limited, and the production here consequently restricted.

CROP PROSPECTS.

Palestine.

The U.S. Vice-Consul at Jerusalem refers to "the favourable prospects of a good harvest, the early advent of the rainy season, and the consequently anticipated good harvest." It is expected that a lively export business in barley with England will result. The early arrival of the rainy season is also highly favourable for the sesame and corn crops.

Sugar Industry.

In connection with the sugar industry, referred to in last week's issue of THE NEAR EAST, the following figures concerning the European sugar output, as drawn up by Messrs. Willett and Gray, are of interest. In France the production in 1913-14 was 800,000 tons sugar, and the sowings for the coming crop 205,000 hectares (one hectare is 2.47 acres). In Belgium the production in 1913-14 was 230,000 tons sugar. In Holland the production for last crop was 230,000 tons sugar. The sowings for next crop were 60,000 hectares. The production of Germany in 1913-14 was 2,738,000 tons sugar, the sowings for 1914-15 550,000 hectares. Russia produced in 1913-14 1,750,000 tons sugar. The sowings for 1914-15 were 840,000 hectares. The sowings in Poland constitute about a tenth of these, those in Podolia and Volhynie, on the Galician (Austrian) border, about a fourth, and Kief, adjoining these latter inland, another fourth. In Austria the production last crop was 1,710,000 tons sugar. The sowings for 1914-15 were 440,000 hectares. Little sugar is produced near the Russian border. Galicia contains two factories and Bukowina three. Hungary, further south, contains thirty-two factories. Bosnia and Slavonia each contain one factory. The production of Italy in 1913-14 was 327,800 tons sugar. Sowings for 1914-15, 38,600 hectares. Servia produced in 1913-14 6,500 tons sugar. The sowings for 1914-15 were 9,000 hectares. Servia has only two beet factories. The production of Roumania in 1913-14 was 32,000 tons sugar, and the sowings 1914-15 20,000 hectares. Roumania has five factories. In Bulgaria the production was 7,800 tons sugar in 1913-14. The sowings 1914-15, 10,000 hectares. Bulgaria has two beet factories

PRODUCE REPORT.

LONDON, September 17.

Sugar.

The market has shown a continuous activity during the week, although supplies are limited. English refined has more inquiry, Tate's quoting only pieces at 23s. to 27s.; other kinds not offered. Lyle's granulated, in limited quantities, is offered at 30s. and 30s. 6d.; No. 3, crystals, 30s.; and yellow, 27s. 6d. Foreign granulated remains quiet but steady, with little business passing. Cane sorts met a good demand at auction at firm rates, crystallised Demerara sold at 28s. 6d., and Demerara syrups at 22s. 6d. Trinidad crystallised changed hands at 28s. to 28s. 6d.

Coffee.

The spot market remains quiet, but nominally steady. No decision has as yet been come to as to the date of reopening public sales, but the fact that the Customs Board has under its consideration the reopening of exports to Denmark and Holland is responsible for the apparent steady tone of the market.

Currants.

The market is quiet. New fruit is expected to arrive on or about the 25th inst. It is reported from Greece that a trust has been formed by the shipping agents at Patras with a view to increase the freight for shipments to English ports. This has caused great annoyance amongst the currant growers and merchants, who have made a strong appeal to the Government against such a trust at a time when, owing to the war, only the English markets are open to them.

Sultanas.

Rather quiet. Rain-damaged fruit sold at 26s., and common to fine sound at 28s. to 40s.

Seeds.

Linseed has been quiet this week, but more or less steady. London spot Calcutta offered at 47s., and Sept.-Oct. 49s. Hull spot Bombay 48s. Rapeseed, Firozpur, London spot, 50s. 6d. is asked, and bold 52s. Cottonseed is easier, London spot Egyptian £7 15s. is accepted, loading, £8; Hull spot, £8 5s.; and spot Bombay, £6 3s. 6d. asked. Canary seed is scarce, Turkish f.a.q. 125s. per 464 lbs. ex store.

Oils.

Linseed oil is slow at 26s. spot pipes, and 26s. 6d. spot barrels. Rape oil is firm, refined spot in barrels, 36s. Cotton oil is dull, crude Egyptian spot pipes, 31s. 6d.; refined pale pipes, 30s.; and sweet, barrels, 36s. 6d. Olive oil is scarce on spot and held at £55 per ton for Spanish ex store, and £54 10s. for Levant.

Oilcakes, etc.

Linseed cakes have rather more inquiry for autumn and winter delivery. Values, however, are stationary both as regards English and Colonial descriptions. Best London made sell quietly at £8 15s. to £8 17s. 6d. ex mill. Cotton cakes, Egyptian, are offered sparingly in warehouse, and £5 10s. to £5 12s. 6d. is freely paid by needy buyers, while there are sellers of a steamer parcel, shortly due, at £5 5s. ex ship terms. Decorticated cotton cake and meal are not offered on spot, and quotations are more or less nominal.

Corn.

Wheat.—Owing to the sharp decline in America, and the favourable political situation, the cargo market is weaker, and values are fully 1s. lower to-day. Choice white Karrachi afloat is offered 46s. 6d.; and Oct.-Nov. 45s. 6d. Maize continues weak, consumers still fearing the condition of La Plata qualities. For Galatz-Foxanian, arrived at Falmouth, 31s. 6d. is wanted, and 32s. for afloat and loading. Barley is quiet at about late rates. A part cargo of Black Sea, on the way, is obtainable at 26s., and parcels Sept.-Oct. at 25s. 3d. Oats are very dull and weaker.

In the Nuba Mountains Province the crop prospects are excellent. The early sown dura (a variety known as "Nagad" which takes sixty days to mature) was expected to be harvested for the "Id."

SUDAN MARKET REPORT.

The following are extracts from the July report of the Central Economic Board, Sudan Government :—

GUM.—During July 923,179 kilos of gum, valued at £26,450, were exported viâ Port Sudan. During the period Jan.-June, 1914, 9,598 tons of gum were carried on the Kosti-El-Obeid Railway, against 8,008 tons during the corresponding six months of last year. A Kordofan Province report states that the amount of gum brought into El Obeid gum market in July was 1,782 kantars of 120 rottles (54 kilos). This compares with 7,504 kantars in July, 1913, and 2,953 kantars in July, 1912.

COTTON.—According to a Berber Province report for July, the American cotton on the Sakias in Berber and Damer districts is doing well. Cotton at Zeidab is also doing well. There are over 4,000 feddans, the bulk of which is Ashmuni. It was planted earlier than last year, and at present is looking very promising. The natives to whom the Zeidab Company supply water had planted about 200 feddans of cotton up to the end of July, and were busy planting more. This cotton is all American cotton of the Zeidab variety.

GRAIN.—According to a Kordofan Province report for July, grain has been very scarce in all centres, and practically unobtainable in the villages. Loans of grain for seed have been issued in El Obeid and Bara districts to the extent of 400 ardebs. There is an increasing demand both in El Obeid Town and from the villages and even from the nomad tribes for any quantity of Indian grain which Government can put on the market. Practically nothing now remains of the first consignment of 1,000 ardebs experimentally brought up by Government, and a further consignment of 700 ardebs is expected in August, and will be readily absorbed. There has been considerable shortage in the villages of the food desirable to keep the cultivators going through the comparatively exacting labour of the weeding of the new crops. Another month, however, should see them already commencing to eat from the new crops in many places.

MANCHESTER MARKET.

(FROM OUR OWN CORRESPONDENT.)

MANCHESTER, September 16.

Some traders in the market during the past week have been a little encouraged by the more favourable news from the front, but so far as actual business is concerned no improvement whatever can be recorded. The feeling is growing that things will not be better until hostilities in Europe are at an end. All kinds of difficulties are met with, and there is a general disposition to straighten off old contracts before fresh commitments are arranged. Artificial prices in the raw material continue to prevail in Liverpool, and there is no probability of fresh buying in yarn and cloth until values are on a more reasonable level and more in accordance with the facts of the situation. Fair shipments in cloth continue to take place in Egypt, but advices from the other side are worse than a week ago. It is said that some civil disturbances have taken place in Cairo. Dealers abroad are not meeting with such good clearances. Money is coming in badly. There are no indications of fresh orders being placed with manufacturers. The outlets of the Levant remain dull and unsatisfactory. Deliveries for India keep up fairly well, and exports this month will probably be fairly large. In the India bazaars, however, dealers are suffering owing to the depreciation in values. To-day there has been some alarm owing to reports of boats being lost in the Indian Ocean. Complaints are met with as to China, and deliveries are still being held back. Occasional instances have been mentioned of a few more looms being at work in certain districts, chiefly on special contracts. Burnley manufacturers are in a bad way, and do not know which way to turn to keep machinery running. No fresh feature of any moment has shown itself in yarns. Rather fuller deliveries are now being met with in American twists, but fresh business seems to be quite out of the question. There is practically nothing going on at the moment in shipping bundles. Bolton spinnings remain uncertain.

Egyptian Cotton Question.

(From Our Own Correspondent.)

Cairo, August 31.

Egypt is these days living in an atmosphere of commissions. The latest to be constituted are the Cotton Crop Commission and the Superior Food-Stuffs Commission. The former consists of Mr. W. Higgs, C.B., Inspector-General of Finance; Mr. A. G. M. Dickson, Sub-Governor in Alexandria of the National Bank of Egypt; and Mr. T. Critchley, the manager of the Imperial Ottoman Bank in Alexandria. Messrs. Higgs and Critchley are at present in England, and Mr. Dickson left on Tuesday last to join them, travelling viâ Marseilles or by long sea, if the overland route should prove impracticable.

The London Commission.

This commission has been formed and sent to London with the object, firstly, of obtaining definite information as to the position of the Lancashire and American spinners, and, secondly, of enlisting their assistance, as also that of the British Government, in regard to the financing of the cotton crop. In the first place the possible requirements of the spinners in the immediate future must necessarily have an influence on any scheme that is proposed; and then, again, it must not be forgotten that a certain portion of the crop has already been sold for forward delivery by the local ginners. How much has been thus disposed of it is not possible to say, for the simple reason that, at present, no one can tell what the Allies, other than England, will be able to take.

The appended list gives details of the manner in which the Egyptian cotton crop was disposed of in 1913, and may safely be taken as a guide:—

	Cantars.
Germany	665,000
Austria	432,000
Russia	600,000
France	656,000
British Empire	3,000,000
United States	674,000
Italy	266,000
Other Countries	684,000

From this it can be seen that two-thirds of our crop was taken by the British Empire and non-belligerent countries of the world, whilst the balance is almost equally divided between the Franco-Russian Allies and the combatant members of the Triplice. The Commission's work is, therefore, fairly clear. It must ascertain what stocks the British and American spinners possess—Italy and the other countries will possibly not fluctuate much, and so can be left out of the inquiry—and what their requirements in the immediate and near future will be. Once those factors are established it will be possible to ascertain the maximum quantity that will have to be carried over.

Forward Sales.

The question of forward sales appears to be one that will give rise to no little trouble. Transactions completed with countries other than France, Russia, Germany, and Austria will, there is no doubt, go through, and it is highly probable that no, or, at any rate, very little difficulty will be experienced with the two first-named of the excepted countries. At any rate, the sellers have no right to think to the contrary, and can doubtless obtain guarantees. But what of Germany and Austria? Are those ginners who have sold to those countries entitled to consider the transactions null and void? Most of them have sold for delivery in January, February, and March. If war is over by then, it is to be presumed their contracts will hold. It is a pure gamble for them. Of course, the importance of this point is dependent entirely on the amount sold forward, and that is a fact that the Commission will have to ascertain by some means or other.

The present situation has been caused by the disappearance of the blank credits which the ginners and dealers had at their disposal at the Egyptian banks for the purchase of cotton inland, and their drawings against which they covered by drafts on their foreign agents or buyers for the value of the shipments made to them. Some means must be found to replace these blank credits, since it appears impossible for the crop to be financed directly by the National Bank of Egypt to the cultivators, and in the circumstances there seems no reason why, since it is to the Government's interest that the crop should be liquidated, the National Bank of Egypt should not be guaranteed against any possible losses it may incur through the granting of advances, under conditions to be laid down to ginners and dealers of good repute and of certain stipulated standing. Of course, for this the "spot" market must be reopened, otherwise we shall be in the same position as before—i.e., we shall have to carry the crop—but with the help of the British and American spinners, who between them take nearly half the whole crop, and of the British financial authorities some satisfactory agreement should be arrived at by the very able trio of specialists to whom the task has been entrusted.

THE LIQUIDATION OF COTTON CONTRACTS.

(From Our Own Correspondent.)

Cairo, August 31.

The liquidation of cotton contracts has raised quite a hornets' nest about the head of the Alexandria Mercantile Bourse Committee. The latter decided that all contracts still open should be at once closed at 15⅜ talaris per cantar for November, 15 9-16 talaris for January, and 15 13-16 talaris for March. That is to say, a speculator who purchased at a fixed price for delivery in November would have to sell at once at 15⅜ talaris per cantar, and a seller under similar circumstances would have to buy at that price, instead of, as is usual, closing their transactions at their own leisure in or before November. Objections were raised to this decision, which some considered unjust, since no compensation transactions are possible in other markets. On his return from Europe Lord Edward Cecil, the Financial Adviser, took up the matter, and requested the Bourse Committee to make some other arrangement. Negotiations ensued between him and the President of the Bourse, but no definite decision has been arrived at yet, although it is understood that a scheme acceptable to all parties has been proposed.

GOVERNMENT'S DRASTIC STEP.

Since the above was written a Khedivial Decree has been issued (dated September 3), in virtue of which the Commission de la Bourse des Marchandises is suspended until further notice. In addition to this, the decision arrived at by the Commission on August 6 is declared to be null and void, and, in consequence, and until further notice, contracts will hold at their respective amounts at the date of the decision that has been annulled, although friendly arrangements are not forbidden. In future all measures which may be considered necessary in connection with the Bourse des Marchandises will be provisionally taken by the Minister of Finance, after the approval of the Council of Ministers has been obtained.

An Advisory Committee has been formed provisionally to give the Minister of Finance, on request, the benefit of its opinion on all subjects formerly dealt with by the Bourse des Marchandises. This Committee will consist of:—Mr. A. King Lewis, Director-General of Customs, President; Mr. P. Augustino, Mr. W. R. Carruthers, Mr. S. R. P. Carver, Mr. E. Delta, Mr. A. M. Gandur, Mr. B. Hornsby, Mr. H. Masson, Mr. Costi Pilavachi, Mr. Michel Sinadino, Mahmoud El Dib Bey, members.

An official communiqué gives the following explanation of the Government's action:—

"The Decree of September 3, 1914, dealing with the Alexandria Bourse des Marchandises, is based upon the conviction that the temporary dislocation of the cotton market resulting from the outbreak of war is too great, and that the interests involved are too widespread, to be left to the Committee of the Bourse as hitherto constituted.

"At the date of the Committee's decision, recited in the Decree, no general moratorium had been proclaimed. From the outset of the crisis it was obvious that when the bourses of the world were closing that of Alexandria would have to adopt the same course, and there was every reason to anticipate that the banks would be enabled to furnish the financial assistance necessary for the pending settlement. In these circumstances the Committee, in the light of such information as was then in its possession, came to the conclusion that a forced liquidation of all cotton contracts at the price of 15⅜ talaris offered the best chance of avoiding a catastrophe, with due regard to the interests of all parties.

"Since that date the proclamation of a general moratorium and the other measures taken by the Government have relieved the financial strain and have permitted a further study of the situation. It has become clear that the decision in question is of a nature to hamper the negotiations which are being carried on with representatives of other cotton markets, and also that many interests are involved other than those of the members of the Bourse des Marchandises. There are, at least, grave doubts whether the Committee was legally competent to deal with these wider interests.

"In these circumstances it has appeared to the Government that a satisfactory solution would most easily be found by calling in the aid of an advisory committee of bankers, brokers, and cotton merchants, who should be asked to examine the situation anew, without being bound by any decision already taken."

CONDITION OF THE CROP.

The Alexandria General Produce Association in its monthly crop report, dated September 4, says:—

Lower Egypt.—The temperature during August has been favourable to the crop. Plants have progressed normally and are in satisfactory condition. Boll worm appeared to small extent in all districts and caused some damage. Slight fogs are reported from all districts, but the amount of damage done is insignificant. Water has been sufficient and the fields have been given a normal amount. First picking should be general the first fortnight in September, that is to say as early as last year, except in certain districts where the crop is eight to fifteen days late. It is very probable that the present abnormal situation will retard picking. Prospects of the crop are slightly better than they were at the same time last year.

Upper Egypt and Fayoum.—The temperature has been favourable. Boll worm has been reported in certain provinces without causing any appreciable damage. During the first fortnight of the month humidity was rather excessive, but there were no fogs. Water has been sufficient. First picking should commence during the first days of September; the condition of the plants is satisfactory.

COTTON CROP FINANCE.

On August 29 *The Egyptian Gazette* published an interesting letter by M. Costi Pilavachi, making drastic suggestions in reference to the financing of this year's Egyptian cotton crop and the steps to be taken next season, in view of the possibility of the war continuing and also bearing in mind the industrial disturbance which in any case will go on for a time after it is over. All the banks of the country, he says, ought to agree to advance collectively to would-be borrowers a minimum of ten dollars a cantar not under fully good fair brown value. Assuming the crop to be 7½ millions, the maximum total sum involved would be £15,000,000. The loan should be liable to be called up in a year or renewed for a certain period, after that under certain conditions to be determined and at the discretion of the Government; the interest on the loan to be a maximum of 6 per cent. The Government should guarantee unconditionally the principal of these advances up to ten dollars a cantar. Legislation must also be passed for the drastic curtailment of the area to be planted in cotton next season, and, in the case of war continuing after the end of the year, the Government must be prepared for a total prohibition of cotton cultivation. Foodstuffs should replace it, which, with the present prospect of enhanced prices, would advantageously replace depreciated cotton.

COTTON BOURSE RE-OPENED.

Under date of September 10, the Cairo correspondent of *The Times* reports:—According to present arrangements the Minet el Bassel Bourse re-opens on the 14th inst. for spot cotton and cereals. This should assist the situation considerably.

Engineering Notes.

Suspension of Sudan Irrigation Scheme.

In consequence of the present condition of affairs and of the impossibility of obtaining the necessary sums to finance so large an undertaking, says *The Engineer*, the whole of the work in connection with the Gezira irrigation project in the Sudan—the estimated cost of which is some £2,000,000 sterling—has, we understand, been postponed—temporarily, it is believed. Moreover, we hear that the carrying out of the Delta scheme, which was recently sanctioned by the Egyptian Government, and which involved an expenditure of £800,000 sterling, has also been delayed. On Wednesday last a large contract for plant and machinery representing £150,000 and another for constructional iron-work of the value of £30,000, both in connection with the Senna Dam and White Nile Barrage undertakings, were dropped. At the same time several minor appointments of engineers and fitters were either cancelled or indefinitely suspended.

Wireless Telegraphy.

It is not generally realised how important is the part that wireless telegraphy plays in the present war. Orders are sent considerable distances, and the movements of troops are controlled and directed by this means with amazing rapidity and certainty. Yet when wireless telegraphy was first introduced only a few years ago to an astonished world the layman was at a loss to understand it. It seemed to him to be something mysterious, uncanny. Even now the principle of wireless telegraphy is not generally grasped; and moreover to many wireless suggests fixed installations of cumbersome electric plant in high buildings, on the top of which are erected lofty permanent masts, and they cannot understand how this modern invention can be adapted to the exigencies of the battlefield. A few notes, therefore, on the subject, and on the new portable installations that are now being used in the war, may be of interest.

The Principle.

Signor Marconi has been recognised as the man who perceived the practical application of already known electrical laws, laws discovered in 1888 by Hertz, a great research worker. And what Hertz discovered was this (to put it simply), that when a charge of electricity is suddenly discharged it does not immediately settle down, but like a released pendulum, it vibrates to and fro; but with this difference, that whereas the pendulum wags, perhaps, only once in a second, in the same time an electrical charge will have oscillated an inconceivable number of times. These vibrations initiate waves in what pervades all space—the æther; waves similar to those formed on a pond when a stone is thrown in. These waves, travelling great distances, make themselves manifest by setting up oscillations in a suitable receiver. Thus a message can be transmitted from one point to another with no apparent intermediary.

Portable Wireless Telegraph.

For the utilisation of wireless telegraphy in the present war motor cars are used, fitted with transmitting and receiving apparatus. Towed behind them are small trailers, carrying articulated sections of the antennæ masts. The current is provided by a dynamo driven by the engine, and this is transformed to the necessary voltage for the transmission of messages. A full transmitting and receiving plant of small size is fitted, and the operator sits in the back part of the car. The method adopted in erecting the masts from which the antennæ are supported is of interest. The various sections are joined together, a small derrick is first erected, and the main mast is fixed at right angles to this derrick, lying on the ground. By heaving on the end of the derrick the mast is raised. The whole operation is carried out in a remarkably small space of time.

The French Army use a different method: the various sections are telescopic, and the mast is erected by forcing up air by means of an ordinary type of air-compressor, somewhat similar to a tyre pump. The actual operation of putting the outfit into working order is very simple, and thus this field portable station may be hurried from point to point with ease and dispatch.

A New Triple-screw Installation.

There is an interesting novelty in the design of a triple-screw installation which is being constructed by a London engineering firm. It comprises three sets of petrol-paraffin engines, which will be installed in a boat of 75 ft. length and 15 ft. beam, for sea and river work. She will be propelled by triple screws, but the chief interest of the installation is in the arrangement of the machinery. The wing shafts are each driven by a 35-h.p. motor, and the central shaft is coupled up to a 16-h.p. set. All three motors have four cylinders each, and are designed to start on petrol and run on paraffin. The 16-h.p. central installation is arranged so that it can be coupled to either of the wing shafts to start up the larger engines, and the central propeller is of the two-bladed type, apparently with the object of severing the blades when not in use, for it is anticipated that not only will a certain amount of sailing be performed, but, under normal conditions, the starboard and port shafts will be used together to drive the boat, the central engine only being brought into play when a burst of speed is required, or, on the other hand, when the speed required is too low to warrant starting up the larger engines.

The Value of Water Power.

It must be admitted that Italy owes her present position as a great European Power to the remarkable development and progress of her agricultural and industrial resources. The rapidity with which this progress has been achieved may be attributed to a great extent to the judicious utilisation of the natural wealth of the country. Thus, water, with which Italy has been endowed by Nature in such ways as to be conveniently utilized for irrigation or power in falling, has greatly contributed to the economic prosperity of that country. Its use for agricultural and industrial purposes is continuously increasing, in the case of the former for the more intensive cultivation of the soil, and in the case of the latter to relieve the manufacturers of the expense entailed by importing foreign coal. It is now reported that the Italian Government recently presented to Parliament a Bill to provide for the construction of dams and artificial lakes in Calabria and Sardinia, in the former case chiefly for the development and distribution of motive power, and in the latter, chiefly for irrigation purposes. It is estimated that in Calabria 170,000 horse-power will be made available, whilst in Sardinia 20,000 hectares of land can be watered and power developed to the extent of 11,000 horse-power, which in part can be utilized for pumping the water into the irrigation channels. Let us hope that Italy's example will be followed by the countries in the Near East, all of which possess numerous rivers, lakes, and waterfalls that can, with a comparatively moderate expenditure, be utilized for irrigation purposes or development of power, and turn vast, but barren at present, and neglected, land into very fertile and prosperous districts.

TENDERS INVITED.

EGYPT.

Uniforms.—Tenders will be received at the offices of the Egyptian Customs Administration for the supply of uniforms necessary for the Service. November 7.

Safes.—Tenders will be received at the Central Stores of the Ministry of Finance for the supply of 150 safes. October 15.

Thymol.—Tenders will be received at the Central Administration, Department of Public Health, Cairo, for the supply of 100 kilogrammes of thymol, for delivery during the month of November, 1914. October 12.

Water Supply Installation.—The Egyptian *Journal Officiel* of August 19 notifies that tenders are invited by the Egyptian Ministry of the Interior for the installation of a drinking water system at Mattaria-Manzala. Copies of the plans, cahier des charges, etc., may be obtained, on payment of 250 piastres (£2 11s.), from the "Section des Municipalités et Commissions Locales, Ministère de l'Intérieur, Cairo, by whom also tenders will be received at a date which will be announced later. The original date for the receipt of tenders was October 10, but it has now been postponed.

The congress of the International Petroleum Commission, which was to have taken place in Bucharest this month, is postponed *sine die*. The same fate has befallen the congress of the International Association of Drilling Engineers and Technologists, which was also to have assembled at Bucharest.

The Engineering Editor of "The Near East" will always be pleased to answer inquiries from readers respecting any machinery or appliances described in these pages.

SHIPPING NOTES.

PRIZE COURTS ACT, 1914.

The following Act to provide for the exercise of prize jurisdiction by certain British Courts in Egypt, Zanzibar, and Cyprus, in respect of the present War, was brought on Monday before the Commons:—

Be it enacted by the King's most Excellent Majesty, by and wtih the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:—If His Majesty is pleased to confer jurisdiction in matters of prize on any of the following courts, that is to say:—(a) His Britannic Majesty's Supreme Court for the Dominions of the Sublime Ottoman Porte in Egypt; (b) His Britannic Majesty's Court for Zanzibar in Zanzibar; (c) The Supreme Court of Cyprus in Cyprus; the Court shall, in respect of the present war, have under the Naval Prize Courts Acts, 1864 to 1914, the jurisdiction thereby conferred on a Vice-Admiralty Prize Court, and those Acts and any Order in Council made thereunder shall apply accordingly, subject to such modifications (if any) as to His Majesty in Council may appear expedient or necessary. This Act may be cited as the Prize Courts (Egypt, Zanzibar, and Cyprus) Act, 1914.

MANCHESTER SHIPPING TRADE.

The shipping trade of Manchester is gradually resuming normal proportions again, and the prospects are improving daily. Already several lines have announced a reduction of the heavy surcharge on freights which has hindered the shipping industry. The surcharge of 50 per cent. on freights which has been in operation between this port and Malta, Egypt, and Syria has now been reduced to 25 per cent.

WAR RISKS.

Messrs. Joseph Crosfield and Sons, Ltd., Widnes, have issued the following notice under date September 14, viz.:—

Dear Sirs,—In the present unexampled difficulties, arising from the war, we wish to assist our customers as far as possible to continue their business. The fluctuations in freight charges and war risk premiums are doubtless proving an obstacle to business resuming a more or less normal course. With the object of assisting our friends, we have decided from this date to provide cover for war risk insurance, and, in addition, to credit you with the surcharge on shipments made to the following markets:—India, Middle East, West Coast of Africa, Mediterranean.

Buyers' interests will be protected as fully as possible.

You will, of course, understand that this is a voluntary action on our part, and consequently we shall retain the right to withdraw the offer at any time, otherwise our sale conditions will remain as heretofore.

MEDITERRANEAN FREIGHTS.

The shipping trade of Manchester is gradually resuming normal proportions again, says *The Engineer* (September 11), and the prospects are improving daily. Already several lines have announced a reduction of the heavy surcharge on freights which has hindered the shipping industry. The surcharge of 50 per cent. on freights which has been in operation between this port and Malta, Egypt, and Syria has now been reduced to 25 per cent.

SHIPPING NOTICE.

Permission for neutral vessels to take cargo from Russian ports to the United Kingdom must be obtained from the Russian Government by the diplomatic representative at Petrograd of the country whose flag the vessel flies. If previous notification is made to the Foreign Office, his Majesty's Ambassador at Petrograd will be instructed to support the application.

According to *The Egyptian Gazette* of August 31, a shipment of flour amounting to about 4,500 sacks was expected in a few days' time to reach Alexandria from the United States of America, the goods having been shipped to certain clients there before the outbreak of war.

COAL FOR EGYPT.

(From Our Own Correspondent.)

Cairo, August 26.

(Delayed in Transmission.)

The decision of the British Government to make an exception as regards Egypt and allow the export to this country of all coal, except Cardiff, has given much satisfaction, and is very wise. It will enable all local industrial enterprises and all irrigation works to continue operations, and especially will it facilitate the working of the sugar factories and ginneries. The latter were in a very bad way, for the cotton-ginning season was at hand, and in many instances the coal contractors were unable or refused to fulfil their contracts, either because the colliers were not arriving or because they wanted to profit by the rise in prices locally. Of course, it might have been possible to obtain fuel from America, India, and South Africa, but, apart from the question of price and quality, the shipments, if they could be obtained, would have taken a very considerable time to come. Now that the embargo has been removed the local price will have to drop, and the contractors will no longer have any excuse for non-fulfilment of their engagements.

On August 31 in Alexandria the Governorate issued the following announcement:—

As a result of representations made by the Egyptian Government with a view to ensure the importation of coal for the needs of Egyptian agriculture and the industries thereto attached, such as irrigation pumps, ginning factories, flour mills, transport, etc., the British Government has stated that, as a special concession it is disposed to remove, in favour of Egypt, the interdiction placed on the exportation of coal which may be needed for agriculture and industries thereto attached, with the exception of Cardiff coal, which is reserved for the Fleet.

American Coal.

As Egypt depends entirely on imported supplies of coal there was a possibility of a shortage owing to the war. In view of this the proposal to send coal to Egypt from America and ship Egyptian cotton for the return voyage is interesting. It will be remembered that during the last coal strike in England Egypt was able to obtain coal from the other side of the Atlantic, and now we read in a telegram from the U.S. Agent and Consul-General in Cairo that the Ministry of Finance offers as feasible the suggestion that coal be shipped to Egypt and cotton carried in return, and wishes to know the probable demand for Egyptian cotton. When the cotton demand is known arrangements will be made for coal orders. An American coal company is to deliver to the Egyptian Railway Administration before September 30, 1914, 30,000 tons of coal. An additional order is contemplated.

Cardiff Coal.

It appears, however, that the difficulties that were apprehended have not materialised. The Cardiff correspondent of *The Financial Times* reported in the issue of that journal of September 14, that we may expect a steadily increasing flow of business to all the neutral countries, though the volume will necessarily be restricted while the war lasts. This, he adds, is the period of the year when, as a rule, big buyers come forward for requirements over the ensuing six or twelve months. The first large inquiry is that of the Egyptian State Railways for 360,000 tons of second-class Welsh coal, and 40,000 tons of North-country coal. There is always much speculation as to the price at which this contract will go, as it serves to govern many others. The general feeling in regard to the future of the market is one of optimism.

State Railways Supplies.

Naturally when the war first broke out some anxiety was felt on this score, and all possible economies were effected. The Egyptian correspondent of *The Railway News* says: When the news that a general conflagration had actually broken out was received in Cairo, the various administrations first of all examined their stocks of coal. It is stated that the result was very satisfactory so far as the stocks at depôts were concerned, but the future was, and is, unknown. In view of this, all transport concerns very wisely began to reduce their services. The Egyptian State Railways led the way with a diminished time-table which came into effect on August 7. Four of the Cairo—Alexandria expresses—two each way—have been withdrawn, also the night service in each direction between those places, and six of the main line trains on the Upper Egypt section. Thirty trains a day on the Cairo (Port Limoun)—Mataria suburban line have been taken off, thereby reducing that service by one-third. In order further to save the coal bill, all lights at the Cairo main station are being put out at 8 p.m., while many stations are not being lit at all.

EGYPT'S COAL IMPORTS.

The following are, according to Messrs. R. J. Moss and Co., of Alexandria, Egypt's imports of coal from January 1 to August 27, 1914:—

	Tons.
Welsh	417,395
Newcastle	178,003
Scotch	114,446
Yorkshire	89,896
Other qualities	180,326
Total	980,066

as against 955,514 tons for the same period last year.

NEWS FROM ALL SOURCES.

A Reuter's telegram from Constantinople, under date of September 16, stated that the export of corn from Roumania is permitted for the time being.

The High Commissioner of Cyprus has sent to the Lord Mayor a gift of 20,000 cigarettes from Messrs. Dianellos and Vergopoulos, of Nicosia, for the wounded inmates of military and naval hospitals.

The Board of Trade are in receipt of telegraphic information from H.M. Minister at Bucharest to the effect that the exportation of beans, sulphuric acid, and all pharmaceutical products from Roumania is prohibited.

The Board of Trade are in receipt of information to the effect that the Imperial Ottoman Government has prohibited the importation into and sale in Turkey of cigarette papers bearing obscene pictures and harmful to public morality.

Mr. Charles Macara's able and useful article on "The War: Its Effects upon Industry," which was published in *The Financial Review of Reviews* for September, has been reprinted as a pamphlet. All business men and intelligent citizens will find that it repays careful study.

The Egyptian postal authorities have announced that the despatch of registered correspondence to Austria and Germany is suspended until further notice. Registered correspondence for other countries is only accepted at the risk of the sender and the Post Office declines any responsibility in case of loss arising from the present international situation.

M. Jacobson, director of the Astra Romana, who was detained in Rotterdam owing to the war, is returning to Roumania viâ Alexandria-Constantza.

The Moniteur du Pétrole Roumain states that it is inaccurate that the Roumanian Government has prohibited the exports of oil. The only prohibition issued applies to oil residues.

Germany imported from Roumania in the first six months of 1914 18,468 tons of kerosene (13,430 tons in 1913), 39,536 tons of benzine (24,107 tons), and 8,774 tons of lubricants (5,115 tons).

The Capitulations and Ottoman Finances.

The proposed abolition by the Ottoman Government of the time-worn Capitulations on (or after?) October 1 was the sensation of the week, and has made as deep an impression on financial circles as it has on those devoted more exclusively to diplomacy and politics.

"Scraps of Paper."

It must be admitted, before discussing the effects of the abolition on Turkish finances, that the measure so unexpectedly announced by the Ottoman Government has not been introduced as yet, and, moreover, that there is very little likelihood that the Powers will be a party to it being carried out. After all, the Capitulations are not a unilateral collection of treaties and stipulations to be broken at random. They are bilateral, that is to say, drawn up by two contracting parties, and it is only the very strong Power that can regard, or can assume to regard, such bilateral treaties as mere "scraps of paper." Turkey is not in such a position, and we therefore think that unless the Government is being malevolently pushed to its doom by an enemy to her and to us, the protest which we have lodged at Constantinople will have the desired result. Needless to say, that protest must be pushed with energy if the Capitulations are to remain in vigour. To abolish them now would be disastrous to Turkey: it would ruin her credit abroad—if nothing else—and she cannot afford to let it drop below its present level. Should the Government, however, unhappily continue in its present attitude, the finances of the Ottoman Empire will be crippled for years to come. Admittedly, the Capitulations, as such, do not directly affect the Decree of Moharrem and the annex decree, but if a country gets rid of its treaties with other countries in the Germanic way indicated above, it will doubtless get rid of its treaties with bondholders in the same way. This must be guarded against, and we trust that the Allied and Neutral Governments, whose citizens are bondholders or otherwise financially interested in the Ottoman Empire, will see that the latter's privileges are completely safeguarded.

Bondholders' Rights.

The Ottoman Public Debt, as the most powerful organisation in which foreign investors are concerned, must needs have priority of consideration, but apart from this organisation, there are thousands of bankers, investors, and industrial concerns whose rights will have to be protected, should occasion arise, and thousands of merchants and tradesmen whose interests in the Ottoman Empire will have to be studied and guaranteed in some form or another if the abolition of the Capitulations is carried out.

As regards the Ottoman Debt administration, attempts have already been made by the Young Turks if not to abolish, at least to modify its terms, and the nature of its operations. The following appreciation by "A Bondholder" shows the tendency of the desired reforms in the past, and can be taken as a fair indication of what the Ottoman Government might propose in connection with the financial aspect of the announced, though by no means executed, abolition of the Capitulations.

Public Debt Administration.

"A Bondholder" writes:—

The Capitulations must be abolished for the welfare of the "Ottoman Fatherland." This phrase has the stamp of "made in Germany" about it, but for the past few years—ever since the Revolution, in fact—there has been a growing feeling in Turkey that this thorn in the flesh should be removed.

Let us set aside such aspects of the question as the trial of foreigners in Turkish courts, the abolition of the foreign Post Offices, etc., and see how the disappearance of the Capitulations would affect Turkey economically and how it would influence the foreign creditors of that State.

Should the Ottoman Empire gain her financial freedom she would be able to impose any Customs tariff that would suit her, irrespective of the wishes of the Great Powers, and she could create monopolies and levy new taxes, all of which would be applicable to foreigners resident in the Ottoman Empire. Without entering into the merits of the case, it is evident that the proposed abolition of the Capitulations is a move which the Turkish Government would at any other time have hesitated to make, and is one which, were not Europe otherwise engaged, would create a much deeper impression than has so far been the case. From the point of view of European and American residents and business men in Turkey, however, and of the holders of Turkish stock, it is a move of the first importance.

Until the exact scope of the proposed modifications are known it is not very easy to say how the Ottoman Public Debt Administration will be affected. Whilst during the past years the Turkish Government have scrupulously respected the rights of the bondholders under the Decree of Muharrem and Decret-Annexe, even under the most trying circumstances, the tendency of late has been to get hold—legitimately, of course—of as much of the Debt's money as possible. There can be no doubt that should this new *coup diplomatique* succeed it will affect the Debt administration in many ways, but it is not at all probable that the bondholders themselves will suffer directly. Turkey has shown that she cares for the goodwill of her bondholders, and knows that all hope of foreign financial aid would be lost should she entirely disregard their interests; she feels, however, that this international administration, this *imperium in imperio*, is an anomaly, and that the large sums devoted to sinking fund purposes, and in the reserve could be more usefully employed were they under her immediate control.

In the case of a change in the financial *modus vivendi* the bondholders may find that, apart from changes in the administration of the Debt itself, such as the possible gradual reduction of the number of foreigners employed, a reduction may be made in the amount set aside annually for sinking fund purposes (thereby lengthening the life of the Debt and not materially affecting the holders of Turkish stock); also a reduction of the amount held in the reserve fund, the sum of two millions being considered by some Turkish financiers as too high.

But, as was stated at the beginning of this article, the Powers and the bondholders have yet to have their say; a bilateral engagement cannot be dissolved by one party by a stroke of the pen, and unless the present situation has completely paralysed all political and financial authority the other parties interested in the Capitulations and the financial agreements entered into by the Ottoman Government will still have a good deal to say in the matter.

THE IMPERIAL OTTOMAN BANK, London Agency, are requested to PUBLISH the following TELEGRAM, dated Constantinople, 9th Sept., 1914:—

MINISTERE DES FINANCES OTTOMAN.

Le Ministère Impérial des Finances informe porteurs Bons Trésor 6% garantis par impôt de guerre qu'en raison de guerre générale qui a interrompu relations postales et rendu impossible toute opération internationale le coupon numéro quatre à échéance 1/14 Septembre, 1914, sera remboursé à partir cette date chaque jour sauf vendredi et dimanche à la Caisse Centrale du Trésor. Des formules de bordereaux numériques seront tenues à disposition des porteurs au guichets de la même Caisse à partir 28/10 Septembre courant.

FOREIGN MORATORIA.

Egypt.

The Cairo correspondent of *The Times*, under date of September 14, telegraphs:—A decree will be issued to-night extending to October 1 the general moratorium on commercial affairs which was declared on August 9 and expires to-morrow, without prejudice to the decree of August 4, delaying the enforcement of payment of negotiable instruments until November 1 next. Depositors will be allowed to increase their withdrawals from 5 per cent. to 15 per cent. up to a maximum of £E9,000; deposits under £E200 will receive a maximum of £E30; and charitable institutions will be allowed to withdraw a maximum of 30 per cent. Fifteen per cent. of the amount of commercial debts and negotiable instruments which matured before August 4, the recovery whereof was delayed by the decree of August 9, will be payable to-morrow, "set-offs" between deposits and debts on bills held by the same bank will be permissible, whilst all drafts in favour of State municipal bodies for the settlement of taxes will be fully payable. This, combined with the opening of the spot market at the Minet Bassel to-day, indicates a vast improvement in the economic situation.

Cyprus.

We extract the following from *The Board of Trade Journal*:—

Cyprus.—*The Cyprus Gazette* (Extraordinary) of August 10 publishes a Proclamation by the High Commissioner notifying a general moratorium in Cyprus from August 10 until September 13 inclusive. During this period the execution of all judicial decisions is suspended, excepting with regard to wages, salaries, rates or taxes. Similarly all petitions in bankruptcy are stayed. Withdrawals may not be made from the Government Savings Bank or any demands for money made on any banks in the island until after September 13. No payments can be demanded during this period on any bills of exchange, cheques, banknotes, or other negotiable instruments, or on money orders or postal orders; neither can any protests of bills of exchange or any other instrument of commerce be noted until after September 13.

Greece.

The British Minister at Athens has forwarded a translation of a Greek Royal Decree of July 26-August 8 re-imposing certain provisions of the Moratorium Law of 1912. With certain exceptions the decree suspends until August 31 to September 13 the compulsory execution of civil decisions and any other executive deeds. All cases concerning declarations of bankruptcy are also suspended during the same period. Conventional terms of delay referring to the carrying out of personal obligations, the expiry of which falls within the above period, are suspended, their expiration being deferred until August 31 to September 13, provided only that penal clauses and forfeiture of rights depend upon the lapse of the time limit.

INSURANCE COMPANIES IN EGYPT.

Though the tenets of the Mohammedan faith prohibit insurance, says *The Egyptian Mail*, there is nevertheless a considerable amount of insurance business done in Egypt among all classes of the community. Much of this—fire, life, motor, etc.—has, in the past, been in the hands of foreign companies, particularly German and Austrian. The present situation affords an unprecedented opportunity for British concerns to snap up business which has hitherto, for one reason or another, gone past them to their foreign rivals. Local British representatives, however, are quite awake to the position. The war cloud had scarcely descended upon Egypt when one of them at least became busy, and a policy that has come his way as a result of his energy is one valued at £E8,000 on a big cigarette factory, the insurance of which was previously placed with an Austrian company. This is not the only instance of this nature.

A scarcity of banknotes is being experienced in Egypt. The National Bank are having fresh supplies printed as speedily as possible.

THE POSITION IN THE CITY.

(By Our City Editor.)

There is a much better tone throughout the City. This is due, of course, to the victories of the Allies. The brokers and dealers who congregate in the Street report that on some days they have done a reasonable business; one broker declared that he had made over £300 commission on the week. There are a few bargain-hunters about, and not many sellers at present levels. But it must be admitted that the bulk of the public keeps resolutely away from the City. Naturally the only business done is for cash.

That the amount of trade in stocks and shares is ridiculously small is shown by the advertisement column of *The Daily Mail* exchange. If there were any real demand buyers would willingly take advantage of this paper. Other attempts to supplant the Stock Exchange have failed *in toto*.

The Committee have issued a list of gilt-edged stocks with prices attached, and they have forbidden members to deal under the prices fixed in the list. The edict has met with some criticism. It has not helped business, and it seems most unlikely that such a restriction on dealing can be continued. The sole *raison d'être* of the Stock Exchange is a free market—or, at any rate, as free a market as can be secured. Under the present ruling no one can buy even the largest blocks of securities under scale rates, and however pressed for money a man may be he cannot arrange business through the Stock Exchange, but he can go to a banker or outside dealer. No doubt the new rule was well meant. But it has not proved effective, and has only protected the dealers in the gilt-edged market who had stock either on their books or as cover on a loan with their banks.

Re-opening of the "House."

The question of re-opening the House continues to be discussed, and the members are hopeful that the Government will give its aid. It is clear that the Treasury could not possibly guarantee the open account, as this would make the taxpayer of England a bull of the stocks—a preposterous position. The idea of a trust which shall take over the whole position has been elaborately set forth, many members consider the scheme feasible. But if any Trust took over the account it would have to carry the stocks for a long time, and buyers would be chary of dealing for the rise when they knew of the huge blocks that had to be liquidated. Bulls of securities will naturally be in favour of such a Trust, and as the taxpayer would not be called upon to shouder the burden the scheme has this at any rate in its favour. No money would have to be found as the rich people would put up the capital and the banks would presumably continue the loans. If they refused the Trust could not be carried through successfully.

The really sound method of opening the Stock Exchange would be for the banks to continue their loans upon all good sound stocks, and for the insolvent firms to be hammered. This would produce a disagreeable panic for a few weeks, but matters would soon settle down. It is always useless to prop up hopelessly insolvent firms, and only increases the ultimate loss.

Issue of Treasury Bills.

The Government has again been in the market borrowing upon Treasury Bills. Thus it has issued £45,000,000 since August 19. Presumably it finds short term borrowing more profitable than a loan, and with trade dull and the banks full of money it can get what it wants at a shade over £3 8s. per cent.

Holders of English railway stocks will be glad to read that the Government will guarantee that the traffics of the roads shall be equal to 1913, supposing that the first half of 1914 shows no reduction on 1913. If it does then the Government will reduce their payment in proportion. There is little doubt that the first half of the present year was slightly less favourable than 1913. But the dividends on the whole year will be very satisfactory, and with L.N.W.R. quoted 116, Great Western 106, and North-Eastern 114, buyers should come along.

There has been a steady demand for Spies, which are now quoted 16s. as against 15s. on July 30, before the war broke out. Buyers may be bears anxious to buy back. But the dealers think that the buying is from insiders who are pleased with the way the new plots are developing.

The Bolckow Vaughan report was reasonably good. The profits have fallen £270,000, but the dividend is only down from 10s. to 6s. The Staveley Company has had a good year, but as a good deal of money is owing from abroad the dividend is cut in half. The balance-sheet has greatly improved during the past few years, and the position is now strong. The Gramophone Company has made a larger gross profit, but here also the company cannot collect its foreign debts, and nearly £50,000 is placed to suspense. But a dividend of 10 per cent. is again paid to shareholders.

FOREIGN EXCHANGE FACILITIES.

Official Announcement.

The following are extracts from an official statement issued by the Treasury :—

The breakdown of the foreign exchanges has caused, and is still causing, very great inconvenience to traders throughout the country. The dislocation of exchange is exercising an extremely prejudicial influence upon trade generally and especially upon the foreign trade. To ascertain the causes and to find a remedy for the difficulties in obtaining international exchange, the Chancellor of the Exchequer consulted a large number of leading traders, members of accepting houses and bankers, and now wishes to announce that an arrangement has been arrived at which is designed to remove the difficulties. The main features of the arrangement may be summarised as follows :

1. The Bank of England will provide, where required, acceptors with the funds necessary to pay all approved pre-moratorium bills at maturity. This course will release the drawers and endorsers of such bills from their liabilities as parties to these bills, but their liability under any agreement with the acceptors for payment or cover will be retained.

2. The acceptors will be under obligation to collect from their clients all the funds due to them as soon as possible, and to apply those funds to repayment of the advances made by the Bank of England. Interest will be charged upon these advances at 2 per cent. above the ruling bank rate.

3. The Bank of England undertakes not to claim repayment of any amounts not recovered by the acceptors from their clients for a period of one year after the close of the war. Until the end of this period the Bank of England's claim will rank after claims in respect of post-moratorium transactions.

4. In order to facilitate fresh business and the movement of produce and merchandise from and to all parts of the world, the joint-stock banks have arranged, with the co-operation, if necessary, of the Bank of England and the Government, to advance to clients the amounts necessary to pay their acceptances at maturity where the funds have not been provided in due time by the clients of the acceptors. The acceptor would have to satisfy the joint-stock banks or the Bank of England both as to the nature of the transaction and as to the reason why the money is not forthcoming from the client.

COMPANY REPORT.

Prince Line.

The report for the year ended June 30 shows net profits amounting to £280,413 as compared with £425,827 for 1912-13. With the addition of the sum of £18,147 brought forward, there is a total of £298,900 at credit of profit and loss account, and with this it is proposed to deal as follows:—Depreciation, £165,000; insurance reserve fund, £50,000; reserve fund for the protection of the company's trades, £25,000; interim dividend of 2½ per cent., paid in February last, £15,037; further dividend of 2½ per cent., making 5 per cent. for the year, £15,037; carry forward, £28,826.

COMPANY RESULTS, &c.

Anglo-Egyptian Oilfields. — Telegram from Gemsah:—"Well No. 10 struck oil 1,369, produced 9 hours 95 tons, estimated about 250 tons daily, under complete control, producing pure oil, specific gravity .820.

Suez Canal.—The traffic receipts on Friday 11th inst., amounted to 290,000 frs.; Saturday, 12th inst., 200,000 frs.; against 550,000 frs. and 320,000 frs. last year.

NOTES OF THE WEEK.

The tide of invasion in France has ebbed during the past week. True, the distance is not great, but still the retrograde movement is apparent. We call the fighting of the last ten days the Battle of the Aisne, but, in truth, the public is permitted to know very little about it. The names of many of the chief commanders, the numbers engaged, the losses suffered, the actual progress of the fighting line—all are concealed. Information is, however, available to show that the fortune of war inclines against the invaders, and it is considered probable that a definite result will be known within a few days. Under such conditions twentieth century war tends to become amazingly long-drawn when a single battle rivals in length whole campaigns which have made history in the past.

While the advance of the Allies in the West has been delayed by the stubborn resistance of the Germans along the Aisne, the Austrians in the east have been unable to resist the onset of the Russians along the San. Their line has been broken at Jaroslav, and the Russians have forced the passage of the San. The great fortress of Przemysl appears to be in danger of being isolated as the Russians have also penetrated far to the south and are reported to have reached the confines of Hungary, and the advance of the Muscovite forces is from all accounts so steady and sustained that we must expect their arrival before the gates of Cracow within a few days.

For the moment the Russians seem to be making every effort to put an end to Austrian resistance, at any rate so far as the provinces north of the Carpathians are concerned, and for this purpose have massed their troops in Galicia. Warsaw, however, is occupied by a vast and ever growing force, and it is to be expected that the capture of Przemysl and Cracow will be the signal for a revival of interest in the East Prussian theatre of war. As far as it is possible to ascertain, the Germans have very largely reinforced their armies in that direction, but it must be extremely distasteful to them to find that the Russians are playing the game which they had planned for themselves. The accepted theory was that the Germans were to have profited by their supposed superior rapidity of mobilization to crush first the French and then the Russians. The apparent fact is that the Russians are destroying the Austrians piecemeal preparatory to turning upon the Prussians with undivided strength. It is annoying to have one's thunder stolen in this way.

On sea there have been a number of incidents. Great Britain has lost three cruisers in the Narrow Seas, and a fourth, and much smaller, unit off Zanzibar. She has also learned of the loss of certain merchantmen in the Indian Ocean and of a curiously futile bombardment of Madras. The circumstances in which the warships were destroyed are particularly distressing, as our men had to suffer disaster without the possibility of striking an effective blow at the enemy. Such losses must be considered as part of the "price of Admiralty," but the lot of the seamen of old was happier in that they might at least see their adversary and have at him with carronade and cutlass. Still, many men were saved, and we may find comfort in the capture of an armed merchantman by our own Navy and in the gallant achievements of our Russian allies in the Baltic. In fact, it is no exaggeration to say that with every passing day our command of the sea becomes more and more impressive, and the number of hostile units at large grows beautifully less.

Such being the case it is not surprising that the efforts of Berlin to raise up to itself new allies in place of those who have declined to serve its aggressive ends or have fallen by the way in so doing, have not as yet achieved success. In spite of a behaviour not entirely consonant with its official protestations of neutrality, and an obvious bias in favour of the Teutonic allies on the part of certain influential men in the Committee, the Porte is still at peace, and, according to some reports, has even begun a partial demobilization. In Italy public meetings in Rome advocate a warlike policy against the Austrian, the secular enemy of the Royal House and the traditional oppressor of the Italian people. In Roumania steps have been taken to acquaint the civil authorities with the new duties which will be thrust upon them in the event of a mobilization, and it is a *secret de Polichinelle* that, as in Italy, the order for mobilization will go further to regularize an existing situation than to bring a new one into being. The aspirations of the Roumanian Irridentists appear to be on the point of materialization so far as Transylvania is concerned. There is a persistent rumour that although King Carol may find it impossible to sink his family feelings, Prince Ferdinand may not prove averse to fighting in order to add another territorial quartering to his royal shield. The Prince can at least reflect that history affords ample precedent to a Hohenzollern anxious to draw the sword against the Hapsburg, and that if he fights he will be doing all in his power to retain at least one crown in the family.

Now that news may be expected almost any day of the participation of the Indian Expeditionary Force in actual fighting, it is interesting to note the further offers of men, money, and service which have been pouring in from India. The action of H.H. the Aga Khan in offering his own personal service in addition to what he has already done as the spiritual head of a multitudinous Moslem community must come as a serious blow to those who had assured themselves of the support of Islam against Great Britain. Other chiefs and princes have placed themselves and their resources unreservedly at the disposal of the Kaisar-i-Hind in a manner deserving of the highest commendation. In the possession of the Suez Canal Great Britain holds the key to the vast storehouse of Indian loyalty, and the foresight of the great statesman who acquired that key is abundantly justified.

From information received it appears that the confidence reposed by Pan-German students of Islam in the armed assistance of the Sheikh es Senussi has been misplaced. It is understood that the leader of that powerful religious organisation, which has its headquarters in North-Eastern Africa, is not disposed to consider that the German Emperor has any claims upon him or his people. The abstention of the Senussi would deprive the *jihad* in which Berlin hopes to array the fighting men of all the Dar-ul-Islam against the enemies of Germany of much of its effect.

Our German adversaries are certainly whole-hearted enemies who leave no stone unturned to cause Great Britain or her Allies annoyance and inconvenience. Even when in neutral countries the Teutonic resident endeavours to stir up local animosity against the foes of his country. In Persia, for example, the industrious German Consul at Tabriz must needs invent news offensive to our Russian allies; in this task he was assisted by his nationals, and to such a pitch of fury did this action rouse his victims that the worthy man saw fit to take *bast* in the American Hospital and advise his Germans to leave the town. Persian neutrality, particularly in Azerbaijan, may not be quite so favourable to Germans as is that practised in Turkey, and these gentry will be well advised not to emphasize their nationality or exercise their inventive genius for the purpose of irritating Russians in the dominions of Sultan Ahmed Shah.

A good deal of criticism is being levelled against the Turks because of their somewhat ambiguous attitude at the present moment, and we are convinced that they would be consulting their best interests were they to take their neutrality more seriously and interpret it more strictly. In fairness to them we must remember that many of the men who bear rule among them have pleasant memories of their military training in the German army and that they are exposed to the blandishments and persuasions of assiduous German agents. The patriotic efforts of the egregious Wolff Bureau to dazzle the Turks with a fictitious glory of ungained victories are to a certain extent neutralized by the steps which have very properly been taken in this country to secure a supply of more authentic information for the public in Constantinople. The remarkable forbearance of the British Press to respond to undoubted instances of provocation is less open to misconstruction now that it is apparent that it is not the result of pusillanimity. The true Turk is still an Oriental and is quite ready to recognise that loquacity is not necessarily an indication of power. The tradition which led the inhabitants of Lystra to consider St. Barnabas to be greater than St. Paul because he preserved silence on an historic occasion is not dead in Asia Minor even at the present day.

In such circumstances we may remark that one of the accusations brought against the Porte, that of commandeering British engines on the Smyrna-Aidin railway for service on the Anatolian lines, is beside the mark. It is true that the engines have been requisitioned, and doubtless considerable loss and inconvenience has been caused thereby to the company, but we must remember that the Ottoman Government reserved the right to take over engines and rolling-stock when required—*contre remboursement*—when granting the original charter, and has, in consequence, only exercised an acknowledged right. In this particular case of requisitioning, as in multitudinous others of less intrinsic importance, the duty of British diplomacy is limited to the exaction of suitable compensation at the proper time.

During the past few days it has been more than usually difficult to follow the fortunes of war in the Serbian campaign. The Serbs claim another victory over the Kaiserlichs, who in their turn assert that they have successfully invaded Serbia. It is reported that the Montenegrins have been engaged a few miles from Serajevo, but it is difficult to believe that this can be more than a daring raid. In any case, even if the force be as considerable as it appears to be from Roman reports, it is doubtful whether it can effect much against the fortifications of that city until they have been at least partially reduced by artillery fire. The policy of the Kaiserlichs in studiously suppressing all news with the exception of announcements of their own "victories," and in arresting all prominent men in areas likely to be disaffected, has hitherto prevented any important rising of the Bosnian Serbs on behalf of King Peter's troops, and it is to be feared that where the passage of Montenegrin scouting parties has led to demonstrations of sympathy for the Liberators, the Kaiserlichs have subsequently reminded the misguided population in no uncertain manner that they are still Austrian subjects and liable to be treated as such.

In the Balkans it is still difficult seemingly for the Press of any one country to practise the maxim, "Live and let live," and certain journals alternate between asserting that a new Balkan *bloc*, comprising Bulgaria, has been formed against Turkey, and stating that it is now a universally accepted fact that Sofia and Constantinople are closely linked by a secret agreement aimed at Greece. It is not very unlikely that some sort of understanding was reached between the Porte and its only Balkan neighbour in the days of Bulgaria's political isolation in the earlier part of this year, but it is even more certain that no such agreement will persuade Bulgaria to take arms against the Powers of the Triple Entente or their friends. It may indeed be accepted as a fact that the neutrality at present professed by Bulgaria is entirely in accordance with the wishes of those Powers, who fully realize that in the best interests of the country Bulgaria must not unnecessarily be put to the expense of another war. It is equally apparent, moreover, that if Roumania abandons her neutrality to take part in the conflict her duties as gendarme of Europe will devolve upon Bulgaria, who will then mount guard along the Thracian march both in her own interests and on behalf of the Triple Entente. In such circumstances it is idle to suppose that Bulgaria will make common cause at this hour with the Turk to come to the aid of collapsing Teutonism, and it is unfair to her to suggest it.

The Khalif Omar, when ordering the destruction of the library at Alexandria which contained much of the accumulated wisdom and wantonness of the ancient world, is recorded to have said: "If this knowledge be not in the Quran it is dangerous; if it be it is superfluous." The Germans appear to have burned the library at Louvain without even that justification. When the Moslems first took Damascus they paused even in the fury of a sack and respected that half of the city which had surrendered and that half of the cathedral which was in the respected area. They even permitted the Christians for centuries to share the great building—half church half mosque. The Germans did not see fit to spare the Cathedral of Rheims, although consecrated to the uses of a Faith which many of them profess. In days past the Turk was regarded as the Great Destroyer, and the generations who learned to fear the legions of Sultan Mohammed el Fatih, or Yawuz Sultan Selim, or Sultan Suleyman el Kanouni, built up a tradition of blind destructiveness and, somewhat unjustly, fathered it upon the Ottoman. It now appears that the Turk must yield this doubtful pride of place and recognize his successor in the Prussian.

THE SITUATION IN SMYRNA.

(From Our Own Correspondent.)

Smyrna, September 8.

Anti-Foreign Feeling.

At no time during the Italian or Balkan Wars has the anti-foreign feeling prevailing amongst the Turks been so pronounced as at present. This feeling has been caused primarily by the seizure of the Turkish Dreadnoughts "Reshadieh" and "Sultan Osman Evvel" by the British Government, and has been aggravated by the situation arising out of the German action concerning the warships "Goeben" and "Breslau." The German subsidised newspaper *Osmanischer Lloyd*, appearing daily at Constantinople, has been publishing regularly inflammatory articles against England, and the Turkish papers throughout the country have reproduced them. The clever wording of these articles has fully convinced the Turks that Germany is their best friend, and that England is waiting her opportunity to break up the Ottoman Empire.

Alarming Reports.

Nothing is definitely known of the ultimatum said to have been presented by the Triple Entente Powers to the Sublime Porte, but rumour had it that Turkey had been asked to give an immediate explanation of her intentions, and this served to further the bad feeling against the British living in this country. At one time the situation became very serious, and all the British merchant ships lying in the harbour received orders to leave immediately. This action had a very alarming effect on the colony; and the advice of the British Consulate, given as quietly as possible, so as to cause the minimum of alarm, that anyone wishing to leave Smyrna should do so as quickly as possible, as it was feared the port might be closed at any moment, was acted on by many families. For the most part those who left went only as far as Mytilene, and some have already returned; but whether any danger really existed or no, the panic that took place was certainly unnecessary, and the reputation formerly enjoyed by the British for coolness has suffered considerably. Several incidents, nevertheless, contributed towards the belief that the Turks were contemplating an attack on Europeans and Christians in general. The now notorious Governor of Smyrna, apparently determined not to allow his present charge to become such an easy victim to any foe attacking it as his last place of residence (Salonika), has given orders to commandeer large quantities of petroleum to be stored in the police stations and guard-houses in the various quarters of the city. It was given out that he had openly avowed his intention to burn the whole of Smyrna rather than let it fall into the hands of an enemy. Such a threat was too serious to be allowed to pass unnoticed, and several of the Consuls interviewed the Governor on the subject, and the threat is said to have been repeated by Rahmy Bey. It is probably beyond the powers of even our energetic Governor to burn the whole of Smyrna before the arrival of foreign warships, but his extraordinary frame of mind is clearly evidenced in his determination to wreak his vengeance on the Christians in some way or other. His German friend and military adviser, Colonel Trommler, has happily taken his departure for the seat of war, but he has apparently inculcated his Turkish military colleagues with German methods, and several severe measures in force against Rayahs may be traced directly to his influence.

Mobilization in Asia Minor.

Few countries have suffered so much as this during the last three years from the effects of mobilization of troops. The agricultural development of the country seems fated to be thrown back; for no sooner have the men returned from the colours than they are once more called up. The measures taken during the two recent wars were mild compared with those in force at the present time. Then recruiting was carried out in a haphazard manner, and the men called up were often able to escape service on payment of a bribe; but this time few men have escaped the call, and a time limit has been given to them to present themselves at the nearest station, failing which extreme measures will be taken. The results of the general mobilization have been ruin for many districts and for thousands of people. All able-bodied men from eighteen to forty-two have been taken just at the time when they were most needed for the crops, for the drying of the sultana grapes, and for the working of the figs. At this time of the year Smyrna harbour is usually full of steamers. To-day only one German steamer is in port, and it, of course, is unable to leave. A Norwegian cargo boat is lying alongside the Aidin railway jetty, and is expected to leave soon with a cargo for London. This is the only ship to leave Smyrna so far with Smyrna summer produce. A notice has been posted up at the British Consulate stating that British ships may once more resume calling at Smyrna. This is a good sign of the relaxation of the tension between England and Turkey, and grain exporters may soon be able to ship any grain left them.

THE MOBILIZATION IN PALESTINE.

A correspondent writes from Jerusalem, under date of September 1:—

September 1 will be a long-remembered day among the European community of Jerusalem, and especially among the British community; for after threatening for three weeks to seize all horses belonging to British subjects, the Turks have at last gone so far as to take the animals, against the protests of the British Consul, backed by the Embassy in Constantinople, who without doubt are backed by the Foreign Office in London. This action on the part of the Turkish Government drags British prestige in the dust.

It must be understood that not only British animals were seized, but all horses belonging to European subjects resident in Jerusalem, with the result that the officials have larger heads than ever, the natives a greater idea of the power of their Government, and an anti-British feeling is fostered throughout the land. If Turkey respects treaties and agreements no more than her friend Germany, the sooner it is understood the better for those called upon to live in her empire.

Over against this high-handed action we have repeated assurances through Reuter's telegraphic agency, and papers of high standing, that "The Ottoman Empire wishes Great Britain to understand that she will preserve entire neutrality during this war"; and yet British property is seized and our rights and privileges endangered for all future time. Some try to excuse Turkey for such an action by saying that in time of war such doings are justifiable; but Turkey is not at war, and therefore cannot take refuge under that excuse.

Those on the spot are not slow to realise that this action of the Turk is only the thin end of the wedge for further aggressions along the same line, and nothing will now be free from demand. It would be interesting to know from headquarters what protection the British residents in Turkey may expect from their own Government, so that they may be prepared to defend their own without the disappointment of finding out that the British representative is helpless under such circumstances as we find ourselves in to-day.

I have lived for twenty-four years in this empire, but have never known a time like the present for arrogance on the part of the Turk. And we are at a loss to know what this elaborate mobilization means; for it is going on at a most costly rate, and must surely be for some definite purpose. The anti-British feeling is strong, and Germany is in the ascendant—so much so that the Turkish conscripts are encouraged to cheer for the Germans whenever they meet any of that nation on the road.

NOTES FROM JAFFA.

(From Our Own Correspondent.)

Jaffa, September 7.

Since the outbreak of war between Germany and Russia, the Ottoman Government has been mobilizing its forces, and all available soldiers—reserves, redifs, and territorial reserves—between the ages of twenty and forty have been called up to the colours. It is said that nearly 30,000 men have been called up for service from Jaffa and district. Exemption fees up to fifty Turkish liras are demanded from all Ottoman Christians and Jews who do not wish to serve; and this has made matters even worse than they would otherwise have been for the country, the greater part of the gold having been drawn off from Jaffa by the Government, with the result that there are fears of a famine.

The reason given for this mobilization is that though Turkey desires to remain neutral she cannot be sure of the perfect peace which she desires unless she is prepared for war. She must therefore have plenty of efficient and well-armed troops distributed on her borders and at various points in the interior. At the first blush this seems plausible enough, but on second thoughts it does not appear quite so satisfying. If Turkey is really bent on peace there is surely no need for mobilization on such a large scale. It is reported that in a fortnight there will be four million men under arms. That, of course, is exaggerated; but it serves to show how things are going. Then again, whereas at other times all Ottomans alike have to serve, Christians and Jews are now offered exemption for fees, while Moslems are not, which shows clearly that the Government wants a "Moslem" army.

The Exchequer can ill stand the strain of such a mobilization—if, in fact, it can stand it at all—but Enver Pasha still calls for more soldiers, egged on by his German advisers. The German generals and officers also continue to instruct the army and to drill the soldiers on the German system.

Fortifications of one kind or another are reported to be under construction at quite a number of places here, such as Nablus, Acre, Jerusalem, es Salt, etc. Large supplies of ammunition and guns are being sent to these places. And it is commonly reported that 40,000 troops are to be sent in a couple of days to the Egyptian frontier, probably near Rafa.

The natives here who are friendly to the Triple Entente cannot understand why Great Britain and her Allies shut their eyes to what is going on. The talk here is that Turkey intends to send part of her troops to regain Egypt, Tripoli, and Morocco, and then to make war on Russia. An ambitious programme.
